Yeah, reviewing a book **Pdf 2010 2003 China Contemporary In Protest Social** could build up your near friends listings. This is just one of the solutions for you to be successful. As understood, talent does not recommend that you have fabulous points.

Comprehending as without difficulty as pact even more than further will present each success. next to, the statement as without difficulty as acuteness of this Pdf 2010 2003 China Contemporary In Protest Social can be taken as with ease as picked to act.

KEY=2003 - TIANA NICHOLSON

Social Protest in Contemporary China, 2003-2010 Transitional Pains and Regime Legitimacy Routledge *China's economic transformation has brought with it much social dislocation, which in turn has led to much social protest. This book presents a comprehensive analysis of the large-scale mass incidents which have taken place in the last decade. The book analyses these incidents systematically, discussing their nature, causes and outcomes. It shows the wide range of protests - tax riots, land and labour disputes, disputes within companies, including private and foreign companies, environmental protests and ethnic clashes - and shows how the nature of protests has changed over time. The book argues that the protests have been prompted by the socioeconomic transformations of the last decade, which have dislocated many individuals and groups, whilst also giving society increased autonomy and social freedom, enabling many people to become more vocal and active in their confrontations with the state. It suggests that many protests are related to corruption, that is failures by officials to adhere to the high standards which should be expected from benevolent government; it demonstrates how the Chinese state, far from being rigid, bureaucratic and authoritarian, is often sensitive and flexible in its response to protest, frequently addressing grievances and learning from its own mistakes; and it shows how the multilevel responsibility structure of the Chinese regime has enabled the central government to absorb the shock waves of social protest and continue to enjoy legitimacy.*

From Eco-Cities to Sustainable City-Regions China's Uncertain Quest for an Ecological Civilization Edward Elgar Publishing *A political scientist and an urban architect explore China's odyssey to become an ecological civilization and transform its massive, unsustainable, urbanization process into one that creates hundreds of eco-cities. The resulting From Eco-Cities to Sustainable City-Regions is the first book-length study combining analysis of politics and power, urban design and planning issues derived from the co-authors' interdisciplinary research, and on-site fieldwork from their political science and architectural area specialties.*

China and the International Human Rights System Social Movements in China and Hong Kong The Expansion of Protest Space Amsterdam University Press *Het uitgangspunt van dit boek is dat Chinese individuen van hun eigen inzet uit moeten kunnen gaan, ongeacht de beperkingen die hen door de staat worden opgelegd. Om hun belangen beter te kunnen verdedigen sluiten sommige individuen zich aan bij sociale bewegingen, die tot sociale protesten kunnen leiden.*

Handbook of the Politics of China Edward Elgar Publishing *The Handbook of the Politics of China is a comprehensive resource introducing readers to the very latest in research on Chinese politics. David Goodman provides an introduction to the key structures and issues, providing the foundations on which later learning can be built. Including a comprehensive bibliography, it is an ideal reference work for undergraduate and postgraduate students and academics. The Handbook contains four sections of new and original research, dealing with leadership and institutions, public policy, political economy and social change, and international relations. Each of the 26 chapters has been written by a leading internationally-established authority in the field and each reviews the literature on the topic, and presents the latest findings of research. Presenting the state of the art of the field, this reader-oriented Handbook is an essential primer for the study of China's politics.*

Rural Politics in Contemporary China Routledge *This collection provides an overview of China's rural politics, bringing scholarship on agrarian politics from various social science disciplines together in one place. The twelve contributions, spanning history, anthropology, sociology, environmental studies, political science, and geography, address enduring questions in peasant studies, including the relationship between states and peasants, taxation, social movements, rural-urban linkages, land rights and struggles, gender relations, and environmental politics. Taking rural politics as the power-inflected processes and struggles that shape access and control over resources in the countryside, as well as the values, ideologies and discourses that shape those processes, the volume brings research on China into conversation with the traditions and concerns of peasant studies scholarship. It provides both an introduction to those unfamiliar with Chinese politics, as well as in-depth, new research for experts in the field. This book was published as a special issue of the Journal of Peasant Studies.*

Workers and Change in China Resistance, Repression, Responsiveness Cambridge University Press *Rising labour unrest is changing Chinese governance from below; Elfstrom shows that this is occurring in unexpected and contradictory ways.*

Handbook of Protest and Resistance in China Edward Elgar Publishing *Featuring contributions from top scholars and emerging stars in the field, the Handbook of Protest and Resistance in China captures the complexity of protest and dissent in contemporary China, while simultaneously exploring a number of unifying themes. Examining how, when, and why individuals and groups have engaged in contentious acts, and how the targets of their complaints have responded, the volume sheds light on the stability of China's existing political system, and its likely future trajectory.*

Cross-Strait Relations and International Organizations Taiwan's Participation in IGOs in the Context of Its Relationship with China Springer Science & Business Media *Taiwan has been excluded from the United Nations and other organizations for which statehood is required and its presence in IGOs is mainly limited to functional and regional organizations that allow flexible models of participation, having a specific name, status and activity space in each organization. Taiwan's exclusion from major IGOs derives from its*

unique international status as well as the political controversy over the representation of China in the international arena. Björn Alexander Lindemann provides a substantial analysis of the relationship between Taiwan and China in and with regard to IGOs in the time period between 2002 and 2011. Based on a neoclassical realist approach, he takes a look at the case studies of the WTO, APEC, WHO and UN, and explains Taiwan's new IGO strategy under President Ma Ying-jeou after 2008 and its impact on Taiwan's international space. **Social Equity in the Asia-Pacific Region Conceptualizations and Realities Springer** This book examines the concept and public service value of social equity in public administration research and practice outside of the Western context, considering the influence that historical, cultural, and social trends of Asian and Pacific societies may have on how social equity is conceptualized and realized in the Asia-Pacific region. The book presents the results of an effort by a group of scholars from seven countries (Australia, China, Hong Kong, Japan, Korea, The Philippines, and Singapore), one American State (the Hawaiian Islands), and the Pacific Islands to discover what social equity means in their respective contexts. It concludes by synthesizing and analyzing the chapter authors' findings to advance a more global conceptualization of social equity. **Handbook of Political Citizenship and Social Movements Edward Elgar Publishing** This Handbook uniquely collates the results of several decades of academic research in these two important fields. The expert contributions successively address the different forms of political citizenship and current approaches and recent development **Rekindling the Strong State in Russia and China Domestic Dynamics and Foreign Policy Projections BRILL** Rekindling the Strong State in Russia and China offers a thorough analysis of the profound regeneration of the State and its external projection in Russia and China. The book is an essential guide to understand the deep changes of these countries and their global aspirations. **Critical Issues in Contemporary China Unity, Stability and Development Taylor & Francis** Critical Issues in Contemporary China: Unity, Stability and Development comprehensively examines key problems crucial to understanding modern-day China. Organized around three interrelated themes of unity, stability and development, each chapter explores distinct issues and debate their significance for China domestically and for Beijing's engagement with the wider world. While presenting contending explanatory approaches, contributors advance arguments to further critical discussion on selected topics. Main issues analysed include: political change military transformation legal reforms economic development energy security environmental degradation food security and safety demographic trends migration and urbanization labour unrest health and education social inequalities ethnic conflicts Hong Kong's integration cross-Strait relations. Given its thorough and up-to-date assessment of major political, social and economic challenges facing China, this fully revised and substantially expanded new edition is an essential read for any student of Chinese Studies. **Sustainability in the Global City Cambridge University Press** This volume is a vital contribution to conversations about urban sustainability, looking beyond the propaganda to explore its consequences for everyday life. **China's Political System Rowman & Littlefield** To thoroughly understand how the PRC has become one of the most important actors in international affairs, this definitive book provides readers with a comprehensive assessment of the preconditions, prospects, and risks associated with China's political development. **Social Ties, Resources, and Migrant Labor Contention in Contemporary China From Peasants to Protesters Lexington Books** This book examines labor protest in authoritarian states through a study of the evolution of migrant labor protests in China over the past three decades. It explores the economic, political, and demographic changes that have influenced migrant labor protest activity, how migrant workers engage in protest today, and protest strategies they employ. **Civil Society and Governance in China Springer** Written by scholars from both inside and outside China, this wide-ranging collection of essays explores the complexity of the relationship between governance and civil society by combining theoretical exploration and empirical case studies based on the governance practice in China. **Chinese Assertiveness in the South China Sea Power Sources, Domestic Politics, and Reactive Foreign Policy Springer** This book offers an assessment of China's assertive foreign policy behavior with a special focus on Chinese policies in the South China Sea (SCS). By providing a detailed account of the events in the SCS and by analyzing power dynamics in the region, it identifies the driving forces behind China's assertive foreign policy. Considering China's power on a domestic as well as an international level, it examines a number of different sources of hard and soft power, including military, economics, geopolitics, and domestic legitimacy. The author demonstrates that Chinese assertiveness in the SCS can be explained not only by increases in China's power, but also by effective reactions to other actors' foreign policy changes. The book will appeal to scholars in international relations, especially those interested in a better understanding of South China Sea developments, China's political power and foreign policy, and East Asian international affairs. **Politics in China An Introduction Oxford University Press, USA** Previously published: Oxford; New York: Oxford University Press, [2014] **Governing Society in Contemporary China World Scientific** This book examines how the Chinese state responds to the increasingly diverse civil society and maintains regime stability in a changing society. In recent years, the Chinese leadership has demonstrated great capability of adapting and developing sophisticated mechanisms of social control. The chapters in this book cover a wide range of these mechanisms, including co-opting social forces, managing population and migration, as well as controlling the media, trade unions, the internet, non-governmental organisations, and the cultural industries. The authors also discuss challenges the government is about to face and possible adjustments. **China's Challenges University of Pennsylvania Press** When the "fifth generation" of Communist Party leaders in China assumed top political positions in 2012-2013, they took the helm of a country that has achieved remarkable economic growth, political stability, and international influence. Yet China today confronts challenges at least as daunting as any it has faced since the reform era began in the late 1970s. In November 2013, the Chinese Communist Party's Central Committee announced ambitious reforms to address vital issues, such as giving market forces a "decisive role" in the economy, strengthening the social safety net, assigning greater weight to factors other than economic growth and social order in evaluating local officials, promoting urbanization, and relaxing the "one child" policy. *China's Challenges* brings together fourteen experts on China's social, economic, political, legal, and foreign affairs to examine some of the nation's pivotal policy issues. Their wide-ranging analyses cover economic and social inequality, internal migration and population control, imperatives to "rebalance" China's economy toward domestic demand and consumption, problems of official corruption, tensions between legal reform and social order, and the strained relationships with neighboring countries and the United States that stem from China's rising power, military modernization, enduring territorial disputes, and rising nationalism in domestic politics. This timely volume offers a broad and comprehensive look at the issues facing China today and lays the groundwork for understanding the shifts to

come. How—and how well—China handles these challenges not only will define China's trajectory for years to come, but will have repercussions far beyond China's borders. Contributors: Yong Cai, Jacques deLisle, Jane Duckett, Andrew Erickson, M. Taylor Fravel, Avery Goldstein, Yasheng Huang, Zai Liang, Benjamin Liebman, Melanie Manion, Barry Naughton, Daniela Stockmann, Robert Sutter, Guohui Wang.

China's Transition from Communism - New Perspectives Routledge As China moved from a planned to a market economy many people expected that China's political system would similarly move from authoritarianism to democracy. It is now clear, however, that political liberalisation does not necessarily follow economic liberalisation. This book explores this apparent contradiction, presenting many new perspectives and new thinking on the subject. It considers the path of transition in China historically, makes comparisons with other countries and examines how political culture and the political outlook in China are developing at present. A key feature of the book is the fact that most of the contributors are China-born, Western-trained scholars, who bring deep knowledge and well informed views to the study.

Contemporary Urban Youth Culture in China A Multiperspectival Cultural Studies of Internet Subcultures IAP In *Contemporary Urban Youth Culture in China: A Multiperspectival Cultural Studies of Internet Subcultures*, Jing Sun explores contemporary Chinese urban youth culture through analyses of three Chinese Internet subcultural artifacts--A Bloody Case of a Steamed Bun, Cao Ni Ma, and Du Fu Is Busy. Using Douglas Kellner's (1995) multiperspectival cultural studies (i.e., critical theory and critical media literacy) as the theoretical framework, and diagnostic critique and semiotics as the analytical method, Sun examines three general themes--resistance, power relations, and consumerism. The power of multiperspectival cultural studies, an interdisciplinary inquiry, lies in its potentials to explore contemporary Chinese urban youth culture from multiple perspectives; explore historical backgrounds and complexity of cultural artifacts to understand contradictions and trajectories of contemporary Chinese urban youth culture; recognize alternative medias as a space for contemporary urban Chinese youth to express frustrations and dissatisfactions, to challenge social inequalities and injustices, and to create dreams and hopes for their future; recognize that the intertextuality among cultural artifacts and subcultures creates possibilities for Chinese urban youth to invent more alternative media cultures that empower them to challenge dominations, perform their identities, and release their imagination for the future; invite Chinese youth to be the change agents for the era but not to be imprisoned by the era; and overcome misunderstanding, misrepresentation, or underrepresentation of contemporary Chinese urban youth cultural texts to promote linguistic and cultural diversity in a multicultural, multilingual, and multiracial world. Sun argues that contemporary urban youth need to obtain critical media literacy to become the change agents in contemporary China. They need to be the medium of cultural exchanges in the multicultural, multilingual, and multiracial world. In order to best assist contemporary Chinese urban youth in expressing their voices, portraying their hopes, and performing their historical responsibilities as change agents, Sun sincerely hopes more research will be done on the contemporary Chinese urban youth culture, especially on its contradictions and trajectories, with the intent to shed light on more richly textured, nuanced, and inspiring insights into the interconnection between contemporary Chinese urban youth and media power in an increasingly multicultural, multilingual, and multiracial world.

Handbook on Class and Social Stratification in China Edward Elgar Publishing This comprehensive and interdisciplinary Handbook illustrates the patterns of class transformation in China since 1949, situating them in their historical context. Presenting detailed case studies of social stratification and class formation in a wide range of settings, the expert international contributors provide invaluable insights into multiple aspects of China's economy, polity and society. The Handbook on Class and Social Stratification in China explores critical contemporary topics which are rarely put in perspective or schematized, therefore placing it at the forefront of progressive scholarship. These include; • state power as a determinant of life chances • women's social mobility in relation to marriage • the high school entrance exam as a class sorter • class stratification in relation to health • China's rural migrant workers and labour politics. Eminently readable, this systematic exploration of class and stratification will appeal to scholars and researchers with an interest in class formation, status attainment, social inequality, mobility, development, social policy and politics in China and Asia.

Being Middle Class in China Identity, Attitudes and Behaviour Taylor & Francis Many studies of the Chinese middle class focus on defining it and viewing its significance for economic development and its potential for sociopolitical modernisation. This book goes beyond such objective approaches and considers middle class people's subjective understanding and diverse experiences of class. Based on extensive original research including social surveys and detailed interviews, the book explores who the middle class think they are, what they think about a wide range of socioeconomic and sociopolitical issues, and why they think as they do. It examines attitudes towards the welfare state, social inequality, nationalism, relations with foreign countries and opinions on many social controversies, thereby portraying middle class people as more than simply luxury consumers and potential agents of democracy. The book concludes that a clear class identity and political consciousness have yet to emerge, but that middle class attitudes are best characterised as searching for a balance between old and new, the traditional and the foreign, the principled and the pragmatic.

China's Unruly Journalists How Committed Professionals are Changing the People's Republic Routledge Despite operating in one of the most tightly controlled media environments in the world, Chinese journalists sometimes take extraordinary risks, braving the perils of job loss or imprisonment to report sensitive stories. As a result, a group of journalists stands at the forefront of some of China's most dramatic social and political changes. This book is the first to systematically explore why some Chinese journalists decide to challenge Communist Party power holders and the censorship system. Based on 18 months of fieldwork, interviews with over 70 Chinese journalists and academics and analysis of nearly 20,000 Chinese newspaper articles, it investigates the motivation behind news workers who often brave the perils of challenging an authoritarian system. Rather than being driven by commercial pressures or financial inducements, the book suggests that many aggressive journalists push the limits of acceptable coverage because of their sense of public spirit and their professional role orientation. It argues that ultimately, these advocate journalists matter because they challenge specific policies and are changing China, one article at a time. By investigating these path-breaking journalists, the book engages with literature across the social sciences on contentious politics and social movements, political communication, media theory and the sociology of professions. Therefore, it will be of great interest to students and scholars of Chinese Studies, Politics and Media Studies.

Urban Mobilizations and New Media in Contemporary China Routledge Popular protests are on the rise in China. However, since protesters rely on existing channels of participation and on patronage by elite backers, the state has been able to stymie attempts to generalize resistance and no large scale political movements have significantly challenged party rule. Yet the Chinese state is not monolithic.

Decentralization has increased the power of local authorities, creating space for policy innovations and opening up the political opportunity structure. Popular protest in China - particularly in urban realm - not only benefits from the political fragmentation of the state, but also from the political communications revolution. The question of how and to what extent the internet can be used for mobilizing popular resistance in China is hotly debated. The government, virtual social organizations, and individual netizens both cooperate and compete with each other on the web. New media both increases the scope of the mobilizers and the mobilized (thereby creating new social capital), and provides the government with new means of social control (thereby limiting the political impact of the growing social capital). This volume is the first of its kind to assess the ways new media influence the mobilization of popular resistance and its possible effects in China today. **Spatial Mobility of Migrant Workers in Beijing, China Springer** The great migration of farmers leaving rural China to work and live in big cities as 'floaters' has been an on-going debate in China for the past three decades. This book probes into the spatial mobility of migrant workers in Beijing, and questions the city 'rights' issues beneath the city-making movement in contemporary China. In revealing and explaining the socio-spatial injustice, this volume re-theorizes the 'right to the city' in the Chinese context since Deng Xiaoping's reforms. The policy review, census analysis, and housing survey are conducted to examine the fate of migrant workers, who being the most marginalized group have to move persistently as the city expands and modernizes itself. The study also compares the migrant workers with local Pekinese dislocated by inner city renewals and city expansion activities. Rapid urban growth and land expropriation of peripheral farmlands have also created a by-product of urbanization, an informal property development by local farmers in response to rising low-cost rental housing demand. This is a highly comparable phenomenon with cities in other newly industrialized countries, such as São Paulo. Readers will be provided with a good basis in understanding the interplay as well as conflicts between migrant workers' housing rights and China's globalizing and branding pursuits of its capital city. Audience: This book will be of great interest to researchers and policy makers in housing planning, governance towards urban informalities, rights to the city, migrant control and management, and housing-related conflict resolutions in China today. **Confucian HRM in Greater China Theory and Practice Routledge** This volume sets out in search of what we call 'Confucian HRM' in Greater China and beyond. It covers theory and practice not only in the People's Republic of China but also in the Overseas Chinese (Nanyang) Diaspora, namely in Hong Kong and Taiwan, among others. It will seek to understand how far traditional Chinese culture and values continue to influence the degree to which the human resource management (HRM) as adopted in those cultural contexts has been implemented. Confucian HRM in Greater China includes a wide range of concepts such as Confucian HRM, employee participation, family firms, 'guanxi', learning and job satisfaction, local labour markets, performance-based pay, training policies, and women's roles in employment. A wide range of international contributors provide the reader with diverse theories, methodologies and perspectives, arguing that the continuity of traditional Chinese values is indeed still empirically observable in the contemporary practice of people-management in Greater China. The contributors are all experts in their fields who teach and research on HRM in many faculties throughout the world. This book was originally published as a special issue of *The International Journal of Human Resource Management*. **Civil Society Networks in China and Vietnam Informal Pathbreakers in Health and the Environment Springer** This book brings a fresh, original approach to understand social action in China and Vietnam through the conceptual lens of informal environmental and health networks. It shows how citizens in non-democratic states actively create informal pathways for advocacy and the development of functioning civil societies. **Women, Gender and Rural Development in China Edward Elgar Publishing** China's countryside is being transformed by rapid, far-reaching development. This wide-reaching and multidisciplinary book questions whether gender politics are changing in response to this development, and explores how gender politics inform and are reproduced or reconfigured in the languages, knowledge, processes and practices of development in rural China. The contributors - prominent scholars in the fields of political science, sociology, gender, development and Chinese studies - argue that although gender has been elided in recent development policies, women have been singled out as a 'vulnerable group' requiring protection, instruction and 'empowerment' from paternalistic state and NGOs. Nevertheless, development has facilitated the dissemination of gender equality as an ideal and institutional norm, increased the channels through which women can advance claims for equal rights, and expanded the possibilities for agency available to them. Drawing on extensive field research in sites across China, from remote communities in Inner Mongolia and Guizhou to the fringes of expanding cities, the contributors illustrate how different women are bringing their own aspirations for development to bear in the momentous changes occurring in rural China. This compelling and thought-provoking book will be of interest to scholars, students and researchers in the fields of public and social policy, sociology, political economy, anthropology, gender and development. **Firebrand Waves of Digital Activism 1994-2014 The Rise and Spread of Hacktivism and Cyberconflict Springer** This book introduces four waves of upsurge in digital activism and cyberconflict. The rise of digital activism started in 1994, was transformed by the events of 9/11, culminated in 2011 with the Arab Spring uprisings, and entered a transformative phase of control and mainstreaming since 2013 with the Snowden affair. **Competing Chinese Political Visions: Hong Kong vs. Beijing on Democracy Hong Kong vs. Beijing on Democracy ABC-CLIO** A fascinating analysis of the features of the Hong Kong-style democracy viewed as alien, hostile, potentially subversive, and substantially dangerous by the mainland Chinese Communist Party. **Protesting America Univ of California Press** When the U.S.-Korea military alliance began to deteriorate in the 2000s, many commentators blamed "anti-Americanism" and nationalism, especially among younger South Koreans. Challenging these assumptions, this book argues that Korean activism around U.S. relations owes more to transformations in domestic politics, including the decentralization of government, the diversification and politics of civil society organizations, and the transnationalization of social movements. **Tamed Village "Democracy" Elections, Governance and Clientelism in a Contemporary Chinese Village Springer** Wang's book offers an empirically rich and conceptually nuanced analysis of how local state agents maintain control over village self-governance in China. His careful analysis of primary documents enables him to explicate the formal mechanisms used by members of the local state to influence village affairs. Meanwhile, his rigorous and fascinating ethnographic data enable him to elucidate the manifold ways in which informal clientelist ties between local state officials and village elites permit the former to exert control. Overall, this excellent book powerfully demonstrates the need for scholars to go beyond attention to election processes when evaluating what village democracy means in a Chinese context. It is a must-read for all serious scholars of Chinese politics and society. —Rachel Murphy, University of Oxford Guohui

Wang's highly original, in-depth case research vividly reveals the dynamics of contemporary Chinese village politics. By combining abundant empirical data with close observation as an "insider," his book illustrates the processes and consequences of transplanting 'democracy' into rural Chinese society. Particularly for those in the West who are keen on understanding the ongoing transformation of rural China, this book is a rich and revealing source. —Shukai Zhao, Development Research Center of the State Council, P.R. China

Cities and Stability Urbanization, Redistribution, and Regime Survival in China Oxford University Press Cities bring together masses of people, allow them to communicate and hide, and to transform private grievances into political causes, often erupting in urban protests that can destroy regimes. The Chinese Communist Party (CCP) has shaped urbanization via migration restrictions and redistributive policy since 1949 in ways that help account for the regime's endurance, China's surprising comparative lack of slums, and its curious moves away from urban bias over the past decade. *Cities and Stability* details the threats that cities pose for authoritarian regimes, regime responses to those threats, and how those responses can backfire by exacerbating the growth of slums and cities. Cross-national analyses of nondemocratic regime survival link larger cities to shorter regimes. To compensate for the threat urban threat, many regimes, including the CCP, favor cities in their policy-making. *Cities and Stability* shows this urban bias to be a Faustian Bargain, stabilizing large cities today but encouraging their growth and concentration over time. While attempting to industrialize, the Chinese regime created a household registration (hukou) system to restrict internal movement, separating urban and rural areas. China's hukou system served as a loophole, allowing urbanites to be favored but keeping farmers in the countryside. As these barriers eroded with economic reforms, the regime began to replace repression-based restrictions with economic incentives to avoid slums by improving economic opportunities in the interior and the countryside. Yet during the global Great Recession of 2008-09, the political value of the hukou system emerged as migrant workers, by the tens of millions, left coastal cities and dispersed across China's interior villages, counties, and cities. The government's stimulus policies, a combination of urban loans for immediate relief and long-term infrastructure aimed at the interior, reduced discontent to manageable levels and locales.

Routledge Handbook of Environment and Society in Asia Routledge Nowhere is the connection between society and the environment more evident and potentially more harmful for the future of the world than in Asia. In recent decades, rapid development of Asian countries with very large populations has led to an unprecedented increase in environmental problems such as air and water pollution, solid and hazardous wastes, deforestation, depletion of natural resources and extinction of native species. This handbook provides a comprehensive survey of the cultural, social and policy contexts of environmental change across East Asia. The team of international experts critically examine a wide range of environmental problems related to energy, climate change, air, land, water, fisheries, forests and wildlife. The editors conclude that, with nearly half of the human population of the planet, and several rapidly growing economies, most notably China, Asian societies will determine much of the future of human impacts on the regional and global environments. As climate change-related threats to society increase, the book strongly argues for increased environmental consciousness and action in Asian societies. This handbook is a very valuable companion for students, scholars, policy makers and researchers working on environmental issues in Asia.

Handbook of China's Governance and Domestic Politics Routledge This Handbook provides an in-depth overview of how China is governed, how its domestic political system functions and the critical issues that it currently faces. Governed by the world's largest political party in the world's longest-ruling Communist regime, China is undergoing a transitional period of rapid economic and social development. How this period is managed will have significant implications for the Chinese state and its population concerning China's governance structures and economy, as well as the country's justice, public health, education and internal/external security concerns. This transition to a modern state is not without its challenges – particularly in terms of how the Chinese state deals with diverse issues such as social inequality, corruption, separatism, increasing individualism and political reform. China's governance and domestic politics also have possible major global consequences, especially in the context of China's continued rise within the international system. This Handbook will improve understandings of the core national dynamics of this rise and, as levels of international interdependence with China increase, can offer vital insights concerning China's domestic attributes. Gaining a better knowledge of China's internal workings can also help better appreciate the multiple and varied problems that China's leaders will face in the coming decades. Critically, many of the core internal issues facing China also have potential external repercussions, principally in terms of rising social unrest, nationalism, environmental degradation, resource shortages and attitudes towards globalization. This book aims to cover these issues and will help readers to fully comprehend China's ongoing contemporary global significance.

China's Transformation The Success Story and the Success Trap SAGE Publishing India The book provides insights into the economic and social transformation that China has undergone from 1979 to the present. Based on the author's research in China for over three decades, *China's Transformation: The Success Story and the Success Trap* shows how its 'reform and open door' policy evolved and helped achieve tremendous economic success. However, it also generated serious social and environmental problems. The book presents that the consequences of this success story of growth are so strong that it has been difficult for China to change its main development path to achieve a desirable level of equity and sustainability. The author describes this as the 'success trap' that China is currently grappling with. The author argues that China's reform path is grounded in the premises of the European Industrial Revolution backed by strong sociopolitical forces at home, indicating that a major change in the development path is unlikely. However, all indications point to a strong and prosperous China as a rising world power in the coming decades, trying to cope with the sociopolitical problems in its own way.

Routledge Handbook of Corruption in Asia Taylor & Francis Corruption in Asia ranges from the venal rent-seeking of local officials to the million-dollar bribes received by corrupt politicians; from excessive position-related consumption to future job offers in the private sector for compliant public servants; from money-laundering to 'white elephant' projects that do little more than line the pockets of developers and their political partners. The *Routledge Handbook of Corruption in Asia* addresses the theories, issues and trends in corruption and anticorruption reform that have emerged from this diverse experience. The book is divided into four major parts: corruption and the state; corruption and economic development; corruption and society; and controlling corruption: strategies, successes and failures. Chapters compare and contrast corruption in different social and institutional contexts, examine both successful and unsuccessful attempts to control it, and consider what lessons can be drawn from these Asian experiences. This academically rigorous and insightful book will be of interest to a wide range of students and scholars, particularly those of Asian studies, politics and sociology.
