**KEY=PAPER - ANNABEL ANGELO**

---

## A scholarly contribution to educational praxis

AOSIS This publication contains original research targeting scientific specialists in the field of education, through research endeavours grounded on a philosophical basis, as well as being embedded in the empirical. The research methodology of each chapter emanates from applicable philosophical assumptions in the form of an applicable theoretical and conceptual framework. The latter forms a firm basis for the application of sound empiricism. The content of this book adds to the body of scholarly knowledge in education. In his evaluation of the book, Acting Executive Dean, Faculty of Education and Training, Professor Akpovire Oduaran, made the following remarks: 'To a large extent, the ideas put together in this book have come from data generated not just from literature found in books and journals but actual interactions with educators and the learning environment. So then, what the reader is offered in this volume is the articulation of ideas that have been interrogated, structured and presented in surprisingly simplistic and yet incisive and academically enriching content that can match the standards of scholarship that is available in the Western World. Yet, what makes this book so welcome, relevant and timely, is the fact that it is built around Afrocentric theories and practices such as one may find in imported literature.'

# Radiotelephony Manual

The UK Radiotelephony Manual (CAP 413) aims to provide pilots, Air Traffic Services personnel and aerodrome drivers with a compendium of clear, concise, standard phraseology and associated guidance for radiotelephony communication in United Kingdom airspace

# The African Mother Tongue and Mathematical Ideas

Vernon Press This book by renowned scholar Dr Abdul Karim Bangura combines linguistics and mathematics to show how and why African-centred mathematical ideas can be a driving force in Africa's development efforts. Bangura explores the concept that Africa has been the centre of the History of Mathematics for thousands of years, as the civilizations that emerged across the continent developed contributions which would enrich both ancient and modern understanding of nature through mathematics. However, scholars and other professionals working in the field of mathematics education in Africa have identified a plethora of issues in carrying out their tasks. This is highlighted by one of the most compelling arguments in the book, which is that a major reason for these problems is the fact that the African mother tongues has been greatly neglected in the teaching of mathematics in the continent. Bangura asserts that a change has to be made in order for Africa to benefit from the exceptional opportunities mathematics offer, showing that, even if there is a great body of work connecting linguistics and mathematics, few analyses have been performed on the link between African languages and mathematics—and the ones that have been made are not theoretically-grounded on linguistics. Thus, the book begins by identifying the objects of study of linguistics and mathematics, and delineates which ones they have in common. Next, since the object of study of linguistics is language, the nine design features of language are employed to examine each of the objects as it pertains to African languages. After that, mathematical ideas of sustainability and those of tipping points are suggested as means to help Africa's development efforts.

# Regional State of the Coast Report

## Western Indian Ocean

United Nations The Regional State of Coast Report for the western Indian Ocean (WIO) is the first comprehensive regional synthesis to provide insights into the enormous economic potential around the WIO, the consequential demand for marine ecosystem goods and services to match the increasing human population, the pace and scale of environmental changes taking place in the region and the opportunities to avoid serious degradation in one of the world's unique and highly biodiverse oceans.

## A scholarly inquiry into disciplinary practices in educational institutions

AOSIS This book is a collection of chapters based on original research dealing with issues of discipline and disciplinary practices in educational institutions. The aim of the book is to provide a scholarly and scientific perspective on the current state of discipline and disciplinary practices in schools and tertiary education settings. The issue of discipline is investigated from diverse paradigmatic and methodological perspectives, presenting empirical as well as also philosophical research. The empirical perspective includes quantitative (positivistic), qualitative (interpretive) and mixed methods (pragmatic), designs and worldviews. This book offers a ground-breaking contribution to the field of learner and student discipline, with insights into disciplinary practices and issues in educational institutions not hitherto researched, such as Technical Vocational Education and Training colleges and universities.

## Human Rights in Africa

## Contemporary Debates and Struggles

Springer This edited collection explores key human rights themes and situates them in the context of developments on the African continent. It examines critical debates in human rights bringing together conceptually and empirically rich contributions from leading thinkers in human rights and African studies. Drawing on scholarly insights from the fields of constitutional law, human rights, development, feminist studies, public health, and media studies, the volume contributes to scholarly debates on constitutionalism, the

right to water, securitization of development, environmental and transitional justice, sexual rights, conflict and gender-based violence, the right to development, and China's deepening role in Africa. Consequently, it makes an important scholarly intervention on timely issues pertaining to the African continent and beyond.

## Bantu Authorities

## Apartheid's System of Race and Ethnicity

Rowman & Littlefield This book provides the first holistic study of Bantu Authorities (BA), the system South Africa created to implement rural apartheid. Based on interviews with Zulus and former commissioners and archival research, Bantu Authorities proves the primary objective of the system was to protect white capital, with white racial purity secondary.

## Munitions of the Mind

## A History of Propaganda, Third Edition

Manchester University Press A classic work, Munitions of the mind traces how propaganda has formed part of the fabric of conflict since the dawn of warfare, and how in its broadest definition it has also been part of a process of persuasion at the heart of human communication. Stone monuments, coins, broadsheets, paintings and pamphlets, posters, radio, film, television, computers and satellite communications - throughout history, propaganda has had access to ever more complex and versatile media. This third edition has been revised and expanded to include a new preface, new chapters on the 1991 Gulf War, information age conflict in the post-Cold War era, and the world after the terrorist attacks of September 11. It also offers a new epilogue and a comprehensive bibliographical essay. The extraordinary range of this book, as well as the original and cohesive analysis it offers, make it an ideal text for all international courses covering media and communications studies, cultural history, military history and politics. It will also prove fascinating and accessible to the general reader.

## Department of Defense Dictionary of Military and Associated Terms

## Transforming Encounters and Critical Reflection: African Thought, Critical Theory, and Liberation Theology in Dialogue

MDPI This book is a printed edition of the Special Issue "Transforming Encounters and Critical Reflection: African Thought, Critical Theory, and Liberation Theology in Dialogue" that was published in Religions

## Climate Change and Cities

## Second Assessment Report of the Urban Climate Change Research Network

Climate Change and Cities bridges science-to-action for climate change adaptation and mitigation efforts in cities around the world.

## Travel and the Pan African Imagination

Rowman & Littlefield "This book explores the African Atlantic world as a productive theater or space where modernity, racialized dominance, and racialized resistance took form. The book examines Black Power ideology, Pan Africanism, dilemmas facing the

racialized imagination of African world community figures, and the discipline of Africology"--

## Variation, Versatility and Change in Sociolinguistics and Creole Studies

Cambridge University Press Demonstrates how data, methods and theories from sociolinguistics and creole studies synergize and mutually benefit each subfield.

## Improving household consumption and expenditure surveys' food consumption metrics

## Developing a strategic approach to the unfinished agenda

Intl Food Policy Res Inst As the nature of global malnutrition changes, there is a growing need and increasing urgency for more and better information about food consumption and dietary patterns. The past two decades have seen a dramatic increase in the number, availability, and analysis of the food consumption data collected in a variety of multipurpose household surveys, referred to collectively as household consumption and expenditure surveys (HCESs). These surveys are heterogeneous, and their quality varies substantially by country. Still, they share some common shortcomings in their measurement of food consumption, nutrient intakes, and nutrition status that undermine their relevance and reliability for purposes of designing and implementing food policies and programs. This review crafts a strategic approach to the unfinished global agenda of improving HCESs' collection of food consumption data. Starting with the priority studies recommended by a 100-country HCES review (Smith, Dupriez, and Troubat 2014), it focuses on a strategic subset of those studies that deal most directly and exclusively with the measurement of food, and that are of fundamental importance to all HCES stakeholders in low- and middle-income countries. Drawing from the literature, this study provides a more

detailed, more circumspect justification as to why these particular studies are needed, while identifying key hypotheses, explaining why these studies are of growing urgency, and demonstrating why now is a propitious time for undertaking them. The review also identifies important study design considerations while pointing out potential challenges to successful implementation stemming from technical capacity, economic, administrative, and political considerations. Six key studies are rank ordered from a global perspective as follows, taking into account (1) the likely shared consensus that a topic is an important source of measurement error in estimating consumption; (2) the perceived urgency of the need for addressing a particular source of measurement error; (3) the perceived likelihood of success—that is, that the efforts will improve the accuracy of measurement; (4) whether or not the study entails modifying the questionnaire; (5) the ease with which a study may begin; and (6) the extent to which the study is independent of necessary negotiations with existing HCES stakeholders because of the types of changes it is likely to entail (in either the questionnaire or the way the data have traditionally been processed).

## What drives input subsidy policy reform?

### The case of Zambia, 2002–2016

Intl Food Policy Res Inst When and why do suboptimal agricultural policies persist despite technical evidence highlighting alternatives? And what explains episodes of reform after prolonged periods of policy inertia? This paper addresses these questions by applying the Kaleidoscope Model for agricultural and food security policy change to the specific case of agricultural input policy in Zambia. Since 2002, the Farmer Input Support Program (formerly the Fertilizer Support Program) has been a cornerstone of Zambia's agricultural policy. Over the years, however, many researchers have highlighted weaknesses in the program and proposed other options. Based on semistructured interviews with key stakeholders and intensive process tracing using media, donor, parliamentary, and research reports, this paper examines how the program initially began in 2002 and during subsequent periods of reform in 2009 and 2015. Based on the findings here, periods of reform for input support programs are most likely when there is a confluence of multiple factors. These include the emergence of a window of opportunity in the form of either a focusing event (for example, a food crisis) or an institutional shift (for example, a new president or new ruling party) that coincides with broad stakeholder support for empirically grounded alternatives, available material resources, and sustained commitment from politically important policy makers.

# The Environment-Conflict Nexus

## Climate Change and the Emergent National Security Landscape

Springer The aim of this book is to demonstrate how environmental factors have caused an evolution in the landscape of national security since the end of the Cold War. Through relevant case studies, the scope of the problem on the national security landscape due to environmental stressors is illuminated, examined, and synthesized with climate-related data. Human variables such as governance, GDP, and vulnerability are taken into account, and are compared against environmental factors to more accurately determine the causative agents of regional conflicts which threaten national security. These case studies comprise the majority of the text, and they show how individual conflicts are uniquely influenced by environmental stress with variations from situation to situation. This book will be of interest to government and military professionals, and may serve as a resource for college courses in the areas of military geography, international affairs, and sustainability studies.

## Epistemologies of the South

### Justice Against Epistemicide

Routledge This book explores the concept of 'cognitive injustice': the failure to recognise the different ways of knowing by which people across the globe run their lives and provide meaning to their existence. Boaventura de Sousa Santos shows why global social justice is not possible without global cognitive justice. Santos argues that Western domination has profoundly marginalised knowledge and wisdom that had been in existence in the global South. She contends that today it is imperative to recover and valorize the epistemological diversity of the world. Epistemologies of the South outlines a new kind of bottom-up cosmopolitanism, in which conviviality, solidarity and life triumph against the logic of market-ridden greed and individualism.

# Safe Management of Wastes from Health-care Activities

World Health Organization

## Global Library and Information Science

Walter de Gruyter GmbH & Co KG This 2nd edition of the highly successful Global Library and Information Science presents an up-to-date review of international librarianship and library science through insightful and well written chapters contributed by experts and scholars from all regions of the world. The role of public, academic, special, school libraries, as well as library and information science education are presented from the early development to the present time. Its lively, readable approach will help the reader to understand librarianship in Africa, Asia, Australia and New Zealand, Europe, Latin America and the Caribbean, and North America. Edited by Ismail Abdullahi, Professor of Global Library and Information Science, this book is a must-read by library science students and teachers, librarians, and anyone interested in Global Librarianship.

## Breaking the Silence

## South African Representations of HIV/AIDS

Boydell & Brewer Ltd Examines the South African HIV/AIDS epidemic through creative texts and the impact of these representations in determining which issues receive attention and how public understanding of the virus is shaped.

## The Political Economy of Clean Energy Transitions

Oxford University Press A volume on the political economy of clean energy transition in developed and developing regions, with a focus on the issues that different countries face as they transition from fossil fuels to lower carbon technologies.

# Quarterly Review of Distance Education

## Volume 16 #2

IAP The Quarterly Review of Distance Education is a rigorously refereed journal publishing articles, research briefs, reviews, and editorials dealing with the theories, research, and practices of distance education. The Quarterly Review publishes articles that utilize various methodologies that permit generalizable results which help guide the practice of the field of distance education in the public and private sectors. The Quarterly Review publishes full-length manuscripts as well as research briefs, editorials, reviews of programs and scholarly works, and columns. The Quarterly Review defines distance education as institutionally-based formal education in which the learning group is separated and interactive technologies are used to unite the learning group.

# Proceedings of the 7th International Conference on Business and Finance

AOSIS Cape Town, South Africa, 9 Sept. 2015 - 10 Sept. 2015. Theme: 'Creating futures: Sustainable economies?', Purpose: To share continuous and collaborative research outputs that review existing strategies and to propose mechanisms for the likely achievement of a sustainable economy that is unique but inclusive to different entities in the world. Target audience: This year's 7th International Conference on Business and Finance (ICBF) continues its tradition of being the premier forum for presentation of research results and experience reports on contemporary issues of finance, accounting, entrepreneurship, business innovation, big data, e-Government, public management, development economics and information systems, including models, systems, applications, and theory. Editorial Policy: All papers were refereed by a double blind reviewing process in line with the South African, Department of Higher Education Training (DHET) refereeing standards. Papers were reviewed according to the following criteria: relevance to conference themes, relevance to audience, contribution to scholarship, standard of writing, originality and critical analysis.

# Flooding and Management of Large Fluvial Lowlands A Global Environmental Perspective

Cambridge University Press Examines interrelations between flood management, flooding, and environmental change, for advanced students, researchers, and practitioners.

# Self-Directed Learning for the 21st Century: Implications for Higher Education

AOSIS This book is devoted to scholarship in the field of self-directed learning in the 21st century, with specific reference to higher education. The target audience of the book includes scholars in the field of self-directed learning and higher education. The book contributes to the discourse on the quality of education in the 21st century and adds to the body of scholarship in terms of self-directed learning, and specifically its role in higher education. Although all the chapters in the book directly address self-directed learning, the different foci and viewpoints raised make the book a rich knowledge bank of work on self-directed learning.

# Technology, Sustainability, and Rural Development in Africa

IGI Global "This book provides research, analytical methods, techniques, and development policies in ICT adoption and diffusion in Africa and around the globe, highlighting the major trends in ICT applications and rural development"--Provided by publisher.

# Cry, the Beloved Country

Longman Publishing Group

## Land Reform Revisited

## Democracy, State Making and Agrarian Transformation in Post-Apartheid South Africa

BRILL The rich empirical material presented in Land Reform Revisited engages with timely debates about land use, land reform, neoliberal state planning, power relations and questions of identity and belonging in post-apartheid South Africa.

## World Malaria Report 2015

World Health Organization The World Malaria Report 2015 assesses global malaria disease trends and changes in the coverage and financing of malaria control programs between 2000 and 2015. It also summarizes progress towards international targets, and provides regional and country profiles that summarize trends in each WHO region and each country with malaria. The report is produced with the help of WHO regional and country offices, ministries of health in endemic countries, and a broad range of other partners. The data presented are assembled from the 96 countries and territories with ongoing malaria transmission, and a further five countries that have recently eliminated malaria. Most data are those reported for 2014 and 2015, although in some cases projections have been made into 2015, to assess progress towards targets for 2015.

# Inequality in Financial Capitalism

Taylor & Francis Recently, the issue of inequality has regained attention in the economic and political debate. This is due to both an increase in income inequality, in particular among rich countries, and an increasing interest in this issue by researchers and politicians. In the last three decades, income inequality among rich countries increased. This period also witnessed the growth of "financial capitalism", characterised by the strong dependency of economies on the financial sector, by the globalisation and intensification of international trade and capital mobility, and by the "flexibilisation" of labour markets and the reduction of wage shares. From the 1980s to the present day, this book considers the theoretical aspects of inequality (its foundations, definitions, approaches and origins) and examines empirical evidence of income inequality in a wide range of advanced economies. The key arguments in this volume are that income inequality increased during this period because labour and welfare became seen as costs to be compressed in "financial capitalism" rather than as a fundamental part of aggregate demand to be expanded. However, the welfare state is not a drain on economic performance and competitiveness, nor is it a barrier to economic efficiency. Instead, it is demonstrated that in countries that adopt "welfare capitalism", welfare state expenditure not only contributes to a reduction in inequality but also fosters economic growth. *Inequality in Financial Capitalism* is of great importance to those who study economics, political economy, labour economics and globalisation.

# The Deployment of Prepaid Electricity Meters in Sub-Saharan Africa

## Riding the Fourth Industrial Wave

Springer Nature This book provides a novel and holistic perspective on the deployment of prepaid electricity meter technology among energy impoverished (vulnerable) households based in developing or under-developed communities of Sub-Saharan Africa. It explores and reviews the nexus between the technology and socio-economic development, technology acceptance and rejection in low-income households, and ultimately proposes a contextual model to avert or assuage energy poverty in the region using the technology. Science is applied as a convenient, valid, and reliable model to generate bespoke, contextual, and relevant knowledge for policy

makers on the development of prepaid meter market in the region. The knowledge shared contributes to extant discourse and debates around the effectiveness of the technology within indigent household settings. The book is intended for energy/electricity utilities, prepaid electricity businesses, policy developers, and other interested parties whose work is related to prepaid electricity meters.

## Structural change, fundamentals, and growth : a framework and case studies

Intl Food Policy Res Inst

## Zulu Zion and Some Swazi Zionists

Oxford University Press, USA

## Living between Science and Belief

## The Modern Dilemma

Wipf and Stock Publishers Most thoughtful people live in an interregnum between science and religion. Traditional religious answers concerning the beginning, purpose, and end of life are questioned by the natural sciences, with neuroscience conceivably constituting the last frontier where skeptics and believers explore common ground. The question concerns the nature of reflective and creative moments in life. Can these be reduced to the intersect between the nerve cells and molecules of the physical brain? Does this account for the human sense of mystery, or even spirituality? Is there a nexus between the physical and unknown dimensions of existence? The mutation in the history of theism suggests that progressive theology in the West may be set for further change.

# Caper

## The Genus Capparis

CRC Press Caper: The Genus Capparis presents a pharmacognostic and ethnopharmacological exploration of the genus Capparis, emphasizing its medicinal potential. There is a long history of safe usage of Capparis parts both in diet and as plant drugs throughout the world, and the details of this usage are summarized in 39 tables covering numerous Capparis species. This detailed survey of historical and traditional medical uses of capers provides a forum for the integration of ethnomedicine and modern pharmacology. This book tracks the use of the genus Capparis from the present position of caper fruit and its flowers as a niche culinary article of economic importance, to ancient times and its use in traditional medicine of the Mediterranean and the Middle East. Section I covers the various classes of compounds found in Capparis that hold potential for being physiologically and medically active, including alkaloids, flavonoids, vitamins, and proteins and amino acids. Section II examines therapeutic uses for Capparis species for medical conditions such as inflammation, rheumatism, diabetes mellitus, pain and fever, cancer, infections and infestations, hypertension, and more. The authors balance the role of this plant in mythological and religious thinking with advances in modern chemical and pharmacological research. Coverage of ethnomedical usage leads to practical discussions of how the unique evolution of the genus Capparis impacts present and future applications of the different species for medicine and therapeutic nutrition. Providing chemical and pharmacological reviews to an extent not previously undertaken, this book will serve as a firm basis for scientists interested in conducting research on this novel source of safe phytoceutical agents.

## Extremisms in Africa Volume 2

Jonathan Ball Publishers Over the past two decades, the rapid emergence and spread of both local and transnational extremist organisations has become a primary source of insecurity in Africa. Extremist organisations represent the fluid and variable nature of conflict systems today and are at the heart of some of Africa's most enduring conflicts. Moreover, the inability of African states to contain the threat of extremism, or of heavy-handed security responses, has led to the loss of thousands of lives, displaced millions, and deeply impacted the continent's democratisation and development goals. This is the second anthology published by Good Governance Africa (GGA) on the topic of extremism and political violence in Africa. Extremisms in Africa, one of the first anthologies of

its kind on this topic to be authored - and published - on the African continent, provided an account of how extremist groups arose in Africa and the various ways in which they have harnessed their global agendas to local conflict dynamics and structural challenges, enabling them to exploit the grievances of individuals and communities for their cause. This anthology, Extremisms in Africa Volume 2, looks forward, giving special attention to the ways in which emergent trends, global geopolitics and conflict dynamics merge to impact upon the African continent. To this end, we have sought to engage diverse topics ranging from ecological concerns surrounding climate change and migration, the implications of such human movement for modern-day trafficking and slavery, and the roles of women and youth. State responses to extremisms on the African continent are not uniform; the capacity of individual states to detect/identify, police, investigate and prosecute is highly variable. At the most fundamental level, extremisms are ripe to arise in contexts where governments are failing, especially when democracy is on the wane. This anthology identifies some of the most pressing challenges in addressing extremisms today and provides chapters that could offer actionable policy insights to governments and civil society. Given the nature of Africa's geopolitical landscape, state and security services alone cannot prevent extremism. It will take a 'whole-of-society' approach, where government, civil society, academia, communities, families, and individuals collaborate to better understand the local dynamics of recruitment and radicalisation and develop context-specific strategies in response. This anthology will hopefully provide practitioners with improved insight into some of the key challenges and potential solutions in preventing extremism, while also being of interest to the general reader.

## Clean Bombs and Dirty Wars

### Air Power in Kosovo and Libya

U of Nebraska Press After the United States, along with NATO allies, bombed the Serbian forces of Slobodan Milosevic for seventy-eight days in 1999, Milosevic withdrew his army from Kosovo. With no troops on the ground, political and military leaders congratulated themselves on the success of Operation Allied Force, considered to be the first military victory won through the use of strategic air power alone. This apparent triumph motivated military and political leaders to embrace a policy of using "clean bombs" (precision munitions and air strikes)--without a dirty ground war--as the preferred choice for answering military aggression. Ten years later it inspired a similar air campaign against Muammar Gaddafi's forces in Libya as a groundswell of protests erupted into revolution. Clean Bombs and Dirty Wars offers a fresh perspective on the role, relevance, and effectiveness of air power in contemporary warfare, including an exploration of the political motivations for its use as well as a candid examination of air-to-ground targeting processes.

Using recently declassified materials from the William J. Clinton Presidential Library along with primary evidence culled from social media posted during the Arab Spring, Robert H. Gregory Jr. shows that the argument that air power eliminates the necessity for boots on the ground is an artificial and illusory claim.

## Report of the House of Bishops Working Group on Human Sexuality (The Pilling Report)

Canterbury Press In July 2011, the House of Bishops commissioned a review group to draw together and reflect upon explorations on human sexuality conducted since the 1998 Lambeth Conference, and to offer proposals on how the continuing discussion within the Church of England about these matters might best be shaped. This is the group's report.

## Reading Contemporary African Literature Critical Perspectives

Rodopi Reading Contemporary African Literature brings together scholarship on, critical debates about, and examples of reading African literature in all genres – poetry, fiction, and drama including popular culture. The anthology offers studies of African literature from interdisciplinary perspectives that employ sociological, historical, and ethnographic besides literary analysis of the literatures. It has assembled critical and researched essays on a range of topics, theoretical and empirical, by renowned critics and theorists of African literature that evaluate and provide examples of reading African literature that should be of interest to academics, researchers, and students of African literature, culture, and history amongst other subjects. Some of the essays examine authors that have received little or no attention to date in books on recent African literature. These essays provide new insights and scholarship that should broaden and deepen our understanding and appreciation of African literature.

# Gendered Innovations in Science and Engineering

This volume, which includes essays by women scientists, researchers, journalists, and administrators, investigates how gender analysis can spark creativity in science and engineering.
