Medical Isotope Production Without Highly Enriched Uranium *National Academies Press* This book is the product of a congressionally mandated study to examine the feasibility of eliminating the use of highly enriched uranium (HEU) in reactor fuel, reactor targets, and medical isotope production facilities. The book focuses primarily on the use of HEU for the production of the medical isotope molybdenum-99 (Mo-99), whose decay product, technetium-99m (Tc-99m), is used in the majority of medical diagnostic imaging procedures in the United States, and secondarily on the use of HEU for research and test reactor fuel. The supply of Mo-99 in the U.S. is likely to be unreliable until newer production sources come online. The reliability of the current supply system is an important medical isotope concern; this book concludes that achieving a cost difference of less than 10 percent in facilities that will need to convert from HEU- to LEU-based Mo-99 production is much less important than is reliability of supply. **The Changing Energy Mix A Systematic Comparison of Renewable and Nonrenewable Energy** *Oxford University Press, USA* "The energy mix is changing, and renewable energy is growing in importance. If you were born before 1989, you lived in a U.S. where there was no electricity generated from either wind or solar power and very little from geothermal and biomass. Now, in 2018, the combined generation from wind and solar has surpassed hydroelectricity. Fourteen states now generate more than 10% of their electricity from wind and three generate more than 30%. And bioethanol, produced from corn grain, now makes up 10% of the U.S. gasoline market. Changes have also occurred in the nonrenewable energy mix. Coal, which was responsible for 53% of the U.S. electricity generation in 1998 is now only 28%, as natural gas has taken the leadership role, surpassing coal in 2015 as the primary energy for producing electricity. Similarly, the world did not see any electricity generation from wind until 1985 and none from solar until 1989. Now solar plus wind generate 7% of the worldwide electricity. The worldwide demand for all energy types is also increasing rapidly, as energy usage has increased 84% over the last twenty years. This book makes a systematic comparison of twelve different energy types to help understand the driving forces for this changing energy mix. Twelve common criteria are used to provide tools to make these comparisons, such as proven reserves, the levelized cost for each energy type, energy balances, environmental issues, and the energy footprint. Proven reserves are also projected for each renewable energy type"-- **The Science of Getting Rich** *Sristhi Publishers & Distributors* Everyone wants to be rich, but do you know that there is a SCIENCE OF GETTING RICH. This book explains in simple steps how you can first ready yourself to earn more, without hassles or worries. From the simplest question of who all can actually get rich, to the small steps taken - like developing a will power, showing gratitude, getting into the right business - have been explained in detail, in everyday terms. Read on, and find out the secret behind changing your life and the way you earn. **Rich's Vascular Trauma E-Book** *Elsevier Health Sciences* For more than 40 years, Rich's Vascular Trauma has been surgeons' #1 reference for the diagnosis and treatment of vascular injury in both civilian and military settings across the globe. Published in association with the Society for Vascular Surgery (SVS), the fully updated 4th Edition reflects recent changes in vascular injury patterns, wounds, and trauma care, drawing from current research and a wide variety of peer-reviewed publications to keep you up to date with the latest evidence-based management strategies and techniques. Written and edited by vascular surgeons who are also trauma specialists—civilian and military experts who have proficiency in both open-surgical and endovascular techniques—this must-have reference offers a global perspective on every aspect of the broad spectrum of vascular trauma. Covers all vascular surgery procedures required to stop hemorrhage and restore perfusion in vessels in the limbs, junctional areas, torso and neck, including damage control techniques such as shunting, and endovascular techniques such as REBOA and stenting. Addresses pre-hospital, emergency department, surgical, and endovascular stages of treatment in developed, austere and deployed settings, including a rich section on vascular trauma in multiple international settings that provides important context for the global surgical community. Includes nine new chapters covering prehospital management, endovascular suites, stent-grafts, selective aortic arch perfusion, extracorporeal systems and gathering evidence in vascular trauma, and more. Presents surgical techniques in step-by-step, highly illustrated detail, as well as high level, strategic

decision-making such as the logistics of setting up an endovascular trauma service. Includes a new, rapidly digestible "Tips and Tricks" section summarizing how to execute essential vascular maneuvers and management steps to ensure that patients get the best outcomes. Emphasizes the current management of civilian vascular injuries while drawing upon the best available evidence, experience, and lessons learned from Afghanistan, Iraq, and the "urban battlefield." Contains an innovative chapter on the systems approach and quality improvement in vascular trauma, offering information and tactics for all providers wishing to understand how clinical systems underpin patient outcome and recovery.

Public Space In Urban Asia *World Scientific* Over the past few decades, rapid urbanisation has threatened to erode public space, especially in emerging economies. Market forces that prioritise profit generation are allowed to construct venues of consumption in its place. Though their physical appearance may resemble traditional public space, in reality, they are greatly restrictive and diminished in affordability, accessibility and social meaning. It is in this context that William SW Lim, chairman of Asian Urban Lab, has brought together architects, designers, historians, sociologists and urbanists from the region to discuss public space in selected Asian cities. Part One contains essays from participants from Chongqing, Hong Kong, Jakarta, Kuala Lumpur, Singapore and Taipei and observations from commentators. Several essays by William SW Lim on the subject round off the discussion in Part Two. The thoughtful essays in *Public Space in Urban Asia* emphasise how engaging with the present actuality of cities and public awareness of spatial justice in cities are crucial — for it is the achievement of spatial justice that will help create a greater level of happiness across societies in our increasingly urbanised world.

American Businesses in China Balancing Culture and Communication, 3d ed. *McFarland* Since the publication of earlier editions of this book, China's political and economic landscapes have changed dramatically, with the rise of new leadership, evolving alliances, tariff wars, educational policies and technological advancements. Focusing on Chinese-American ventures, this expanded and revised edition chronicles the investments that have marked China's astonishing growth in the 21st century. Adding another dimension to the exploration of Chinese-American commerce, this edition discusses China's roots in Confucian identity and its effect on modern business culture. Case studies of American businesses that have been successful in China are included. Reflecting upon the changing nature of Chinese consumerism and international corporate behavior, the authors close with specific suggestions for those interested in doing business in China.

Perioperative Medicine E-Book Managing for Outcome *Elsevier Health Sciences* Based on the most current evidence and best practices, *Perioperative Medicine: Managing for Outcome*, 2nd Edition, is an easy-to-follow, authoritative guide to achieving optimal outcomes in perioperative care. Written and edited by recognized authorities in anesthesiology and surgical critical care, this fully updated edition helps you think critically about complex, long-term issues surrounding the care of the surgical patient, providing decision trees that define strategies to enhance the medical outcome of care. Focuses on what anesthesiologists, surgeons, and intensivists need to know in order to improve outcomes through evidence- and outcome-based approaches. Provides practical guidance on potential risks to all major organ systems, the etiology of particular organ dysfunctions, preoperative and intraoperative risk factors, and perioperative protection strategies to minimize potential complications. Features a consistent chapter format - with even more color-coded algorithms, summary tables, and boxes - that enables you to quickly explore and determine the best management approaches. Includes six all-new chapters: Perioperative Fluid Management; Delirium and POCD; Role of Palliative Care/ICU; Value-Based Care: The UK Model; CFO Perspective on Value; Hospital to Home (Perioperative Transitions of Care) Discusses timely topics such as quality improvement, pay-for-performance, preexisting disease and comorbid conditions in anesthesiology, and the team-based model of care. Wonder *Random House* 'Has the power to move hearts and change minds' *Guardian* 'Tremendously uplifting and a novel of all-too-rare power' *Sunday Express* 'An amazing book . . . I absolutely loved it. I cried my eyes out' Tom Fletcher Read the award-winning, multi-million copy bestselling phenomenon that is WONDER. 'My name is August. I won't describe what I look like. Whatever you're thinking, it's probably worse.' Auggie wants to be an ordinary ten-year-old. He does ordinary things - eating ice cream, playing on his Xbox. He feels ordinary - inside. But ordinary kids don't make other ordinary kids run away screaming in playgrounds. Ordinary kids aren't stared at wherever they go. Born with a terrible facial abnormality, Auggie has been home-schooled by his parents his whole life. Now, for the first time, he's being sent to a real school - and he's dreading it. All he wants is to be accepted - but can he convince his new classmates that he's just like them, underneath it all? A funny, frank, astonishingly moving debut - and a true global phenomenon - to read in one sitting, pass on to others, and remember long after the final page.

Portfolio Life The New Path to Work, Purpose, and Passion After 50 *John Wiley & Sons* Praise for *Portfolio Life* "Dave Corbett's book turns two simple ideas into a program for life-enrichment, that you can create a life expressly for yourself and that the so-called retirement years are the best time to do it. Drawing on a lifetime of work with people who were rethinking what they wanted and their direction, he shows how to do both those things. Be warned: If you read the book, you're going to be changed. But I think you'll like how you turn out." --Bill Bridges, author, *Transitions and Job Shift* "Dave's book reveals a powerful and profound formula for crafting a genuinely rich life. If you agree that retirement is passé, and you are a lifelong learner and have a desire to make your life count in a deeply fulfilling way, you will love this book." --Fred Harburg, former chief learning officer and president, Motorola University "Healthy, fit, financially secure, and happy for another 40 years? Is there really that kind of gold over 'them thar' hills? Yes, and *Portfolio Life* is the guide, leading boomers to a life path never before traveled by so many. Don't pass 50 without it." --Natalie Jacobson, news anchor, WCVB-TV Boston "This is the work of a wise, thoughtful author with decades of experience helping people be more successful in the next chapter of their lives. It will help you embrace change and explore the possibilities that come with an additional 20 to 30 productive years to be designed and lived on your own terms." --Anne Szostak, chairman, The Boys & Girls Clubs of America "This timely book should be read by anyone of any age who wants his or her life to have meaning and purpose beyond the accumulation of money and things." --Millard Fuller, founder, Habitat for Humanity and the Fuller Center for Housing

Comprehensive Everglades Restoration Plan, Aquifer Storage and Recovery Pilot Project Design Report, Lake Okeechobee ASR Pilot Project, Hillsboro ASR Pilot Project, Caloosahatchee (C-43) River ASR Pilot Project Environmental Impact Statement How Libraries and Librarians Help A Guide to Identifying User-Centered Outcomes *American Library Association* Under a National Leadership Grant from IMLS, expert authors Durrance and Fisher have tested and developed the How Libraries and Librarians Help (HLLH) Outcomes Model to help library professionals effectively communicate their story by assessing the outcomes of library services. This unique model provides a step-by-step, context-centered method for assessing user outcomes and covers preparation, data collection, data analysis, and presentation of results, making it easy for libraries to apply the measurement tools to their own outcomes assessment. The book's tools and exercises for assessing user outcomes help libraries to strategize for outcomes assessment, while field-tested examples of user outcomes gleaned from several libraries that participated in the HLLH model provide real-world examples of this approach to measuring libraries' impact on individuals and communities.

Life at the Speed of Light From the Double Helix to the Dawn of Digital Life *Hachette UK* In 2010, scientists led by J. Craig Venter became the first to successfully create 'synthetic life' -- putting humankind at the threshold of the most important and exciting phase of biological research, one that will enable us to actually write the genetic code for designing new species to help us adapt and evolve for long-term survival. The science of synthetic genomics will have a profound impact on human existence, including chemical and energy generation, health, clean water and food production, environmental control, and possibly even our evolution. In *Life at the Speed of Light*, Venter presents a fascinating and authoritative study of this emerging field from the inside -- detailing its origins, current challenges and controversies, and projected effects on our lives. This scientific frontier provides an opportunity to ponder anew the age-old question 'What is life?' and examine what we really mean by 'playing God'. *Life at the Speed of Light* is a landmark work, written by a visionary at the dawn of a new era of biological engineering.

Building Communities of Engaged Readers Reading for pleasure *Routledge* Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. *Building Communities of Engaged Readers* highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.

includes advice for leading a more fulfilling life. **Marriages Designed In Heaven** *Lulu.com* The subject of marriage is a timely subject. The Bible simply defines marriage as "a man takes a woman." Happiness and well-being in marriage is based on a specific design. This design along with society's mores, civil government expectations, and ecclesiastical laws and fantasies are addressed. Jesus' message is compared and/or contrasted with Moses, the Prophets, the Pharisees, the Apostles, and Medieval church leaders. Over 40 translations of the Bible were consulted in addition to comparing the ancient Hebrew with its Greek equivalents through interlinears, word studies, lexicons, dictionaries, textual variants, and scholastic articles and comments. The appendix gives the history of Christendom's changing positions on marriage, divorce, and remarriage. **Hospice and Palliative Medicine, An Issue of Physician Assistant Clinics, E-Book** *Elsevier Health Sciences* This issue of *Physician Assistant Clinics*, guest edited by Donna Seton and Rich Lamkin, is devoted to Hospice and Palliative Care Medicine. It also prepares student to succeed in University Interscholastic League (UIL) Chess Puzzle. • Includes nearly 60 chess diagrams, illustrations of musical notation, publicity materials, and useful forms for visual art and theatrical evaluation • Instructs readers on writing scripts for famous chess games such as the Immortal Game, the Evergreen Game, and the Opera Game • Helps educators and librarians prepare students to succeed in University Interscholastic League (UIL) Chess Puzzle • Provides the national content standard, objectives, resources and materials, procedure, and assessment in all 12 music, dance, visual art, and theater activities • An annotated bibliography identifies additional source materials • A glossary defines 69 chess terms **The Working Class Majority America's Best Kept Secret** *Cornell University Press* In the second edition of his essential book—which incorporates vital new information and new material on immigration, race, gender, and the social crisis following 2008—Michael Zweig warns that by allowing the working class to disappear into categories of "middle class" or "consumers," we also allow those with the dominant power, capitalists, to vanish among the rich. Economic relations then appear as comparisons of income or lifestyle rather than as what they truly are—contests of power, at work and in the larger society. **Sinostan China's Inadvertent Empire** *Oxford University Press* China's geo-economic vision is transforming the Eurasian continent. Acclaimed foreign policy experts recount their travels across Central Asia, bearing witness through interviews and personal experience to the growing Chinese influence in the region, and what this means for those both within and beyond the boundaries of its 'inadvertent empire'. **On the Shortness of Life** *Penguin UK* Timeless advice on the art of living well, from the celebrated Penguin Great Ideas series The writings of the ancient Roman philosopher Seneca offer powerful insights into stoicism, morality and the importance of reason, and continue to provide profound guidance to many through their eloquence, lucidity and wisdom. Throughout history, some books have changed the world. They have transformed the way we see ourselves - and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives - and destroyed them. The Penguin Great Ideas series brings you the works of the great thinkers, pioneers, radicals and visionaries whose ideas shook civilization, and helped make us who we are. **Liquid Love On the Frailty of Human Bonds** *John Wiley & Sons* This book is about the central figure of our contemporary, 'liquid modern' times - the man or woman with no bonds, and particularly with none of the fixed or durable bonds that would allow the effort of self-definition and self-assertion to come to a rest. Having no permanent bonds, the denizen of our liquid modern society must tie whatever bonds they can to engage with others, using their own wits, skill and dedication. But none of these bonds are guaranteed to last. Moreover, they must be tied loosely so that they can be untied again, quickly and as effortlessly as possible, when circumstances change - as they surely will in our liquid modern society, over and over again. The uncanny frailty of human bonds, the feeling of insecurity that frailty inspires, and the conflicting desires to tighten the bonds yet keep them loose, are the principal themes of this important new book by Zygmunt Bauman, one of the most original and influential social thinkers of our time. It will be of great interest to students and scholars in sociology and in the social sciences and humanities generally, and it will appeal to anyone interested in the changing nature of human relationships. **Everybody Ought to Be Rich The Life and Times of John J. Raskob, Capitalist** *Oxford University Press* The extraordinary life and times of a colorful capitalist who invented the idea of consumer credit. **Enriching Urban Spaces with Ambient Computing, the Internet of Things, and Smart City Design** *IGI Global* In recent years, the presence of ubiquitous computing has increasingly integrated into the lives of people in modern society. As these technologies become more pervasive, new opportunities open for making citizens' environments more comfortable, convenient, and efficient. *Enriching Urban Spaces with Ambient Computing, the Internet of Things, and Smart City Design* is a pivotal reference source for the latest scholarly material on the interaction between people and computing systems in contemporary society, showcasing how ubiquitous computing influences and shapes urban environments. Highlighting the impacts of these emerging technologies from an interdisciplinary perspective, this book is ideally designed for professionals, researchers, academicians, and practitioners interested in the influential state of pervasive computing within urban contexts. **Fair Society, Healthy Lives** *Olschki* **Handbook of LGBT Elders An Interdisciplinary Approach to Principles, Practices, and Policies** *Springer* This groundbreaking resource presents a wealth of findings and perspectives previously unseen in the LGBT literature. Its focus on psychological, sociopolitical and care delivery issues affecting LGBT elders reveals both the nuanced interplay between diverse sources of identity and multiple sources of stigma and discrimination. Specific chapters highlight challenges and resiliencies impacting subpopulations (e.g., racial groups, veterans, immigrants), examine employment and advocacy issues, discuss later-life concerns in context and offer guidelines for relevant, ethical practice. Contributors represent a wide range of fields from psychiatry and gerontology to public health and public policy, reflecting the scope and needs of this diverse and complex population. Among the topics in the Handbook: Family relationships of older LGBT adults. The intersection of identities: race, age, sexuality and care network. Bisexuality: an

invisible community among LGBT elders. Implications of the Supreme Court ruling on same-sex marriage. No money, no work and you're old. Disabilities among LGBT elders: responses of medicine, public health, rehabilitation and social work. Handbook of LGBT Elders is an essential reference for mental health professionals, psychologists and social workers who work with the LGBT community and the elderly, as well as researchers interested in the LGBT community and aging. **Rich Dad, Poor Dad** Lulu Press, Inc Although we have been successful in our careers, they have not turned out quite as we expected. We both have changed positions several times-for all the right reasons-but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual contributions. Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996, one of my children came home disillusioned with school. He was bored and tired of studying. "Why should I put time into studying subjects I will never use in real life?" he protested. Without thinking, I responded, "Because if you don't get good grades, you won't get into college." "Regardless of whether I go to college," he replied, "I'm going to be rich." **Think and Grow Rich** Sristhi Publishers & Distributors Ever wondered how life would be if we could condition our minds to Think and Grow Rich? Author Napoleon Hill claims to have based this book on twenty years of rigorous research on the lives of those who had amassed great wealth and made a fortune. Observing their habits, their ways of working and the principles they followed, Hill put together laws and philosophies that can be practiced in everyday life to achieve all-round success. The narrative is rich with stories and anecdotes, which not only inspire, but also show a way forward to take action. After all, riches are not just material, but also pertaining to the mind, body and spirit. Having sold more than fifteen million copies across the world, this book remains the most read self-improvement book of all times! **Empires and Colonies** John Wiley & Sons Empires and Colonies provides a thoroughgoing and lively exploration of the expansion of the seaborne empires of western Europe from the fifteenth century and how that process of expansion affected the world, including its successor, the United States. Whilst providing special attention to Europe, the book is careful to highlight the ambivalence and contradiction of that expansion. The book also illuminates connections between empires and colonies as a theme in history, concentrating on culture while also discussing the rich social, economic and political dimensions of the story. Furthermore, Empires and Colonies recognizes that whilst a study of the expansion of Europe is an important part of world history, it is not a history of the world per se. The focus on culture is used to assert that areas and peoples that lack great economic power at any given time also deserve attention. These alternative voices of slaves, indigenous peoples and critics of empire and colonization are an important and compelling element of the book. Empires and Colonies will be essential reading not only for students of imperial history, but also for anyone interested in the makings of our modern world. **Nicomachean Ethics** Phoemixx Classics Ebooks Nicomachean Ethics Aristotle - The Nicomachean Ethics is one of Aristotle's most widely read and influential works. Ideas central to ethics—that happiness is the end of human endeavor, that moral virtue is formed through action and habituation, and that good action requires prudence—found their most powerful proponent in the person medieval scholars simply called "the Philosopher." Drawing on their intimate knowledge of Aristotle's thought, Robert C. Bartlett and Susan D. Collins have produced here an English-language translation of the Ethics that is as remarkably faithful to the original as it is graceful in its rendering. Aristotle is well known for the precision with which he chooses his words, and in this elegant translation his work has found its ideal match. Bartlett and Collins provide copious notes and a glossary providing context and further explanation for students, as well as an introduction and a substantial interpretive essay that sketch central arguments of the work and the seminal place of Aristotle's Ethics in his political philosophy as a whole. The Nicomachean Ethics has engaged the serious interest of readers across centuries and civilizations—of peoples ancient, medieval, and modern; pagan, Christian, Muslim, and Jewish—and this new edition will take its place as the standard English-language translation. **Stories about Maxima and Minima** American Mathematical Soc. This book presents fifteen 'stories' designed to acquaint readers with the central concepts of the theory of maxima and minima, as well as with its illustrious history. This book is accessible to high school students and would likely be of interest to a wide variety of readers. **Cooperation and Excellence A Premodern Case for Capitalism** Rowman & Littlefield This book sets forth a case for capitalism guided by the skeptical stream of ancient philosophy represented by Cicero. Arguing that philosophy should be probabilistic and practical, this book stresses the primacy of social cooperation and human excellence. **The One Year Book of Amazing Stories 365 Days of Seeing God's Hand in Unlikely Places** NavPress ECPA 2020 Christian Book Award Finalist! You wouldn't believe it, but . . . James Earl Jones, the voice of Darth Vader, grew up mute. Michael Jordan was cut from his high school basketball team. Albert Einstein was bullied mercilessly in school. Beethoven's mom almost aborted him. Life takes the strangest sharp turns—and sometimes, U-turns. Robert Petterson—popular speaker, storyteller, and author—has been a student for his entire life of what God is teaching us through those real-life U-turns. In this book, he compiles 365 amazing stories that teach lessons you won't easily forget. Each entry is written in the rest-of-the-story style popularized by Paul Harvey. With The One Year Book of Amazing Stories, you'll marvel at how God has used the lives of these ordinary people to change the course of human history. **Helping Couples Proven Strategies for Coaches, Counselors, and Clergy** Zondervan The ultimate guide to marriage mentoring so you can feel confident in offering wisdom, encouragement, and practical help to couples who want to live out a love that lasts! Man and Woman: A Defense** Encounter Books Until very recently, no society had seen marriage as anything other than a conjugal partnership: a male-female union. What Is Marriage? identifies and defends the reasons for this historic consensus and shows why redefining civil marriage as something other than the conjugal union of husband and wife is a mistake. Originally published in the Harvard Journal of Law and Public Policy, this book's core argument quickly became the year's most

widely read essay on the most prominent scholarly network in the social sciences. Since then, it has been cited and debated by scholars and activists throughout the world as the most formidable defense of the tradition ever written. Now revamped, expanded, and vastly enhanced, *What Is Marriage?* stands poised to meet its moment as few books of this generation have. Sherif Girgis, Ryan T. Anderson, and Robert P. George offer a devastating critique of the idea that equality requires redefining marriage. They show why both sides must first answer the question of what marriage really is. They defend the principle that marriage, as a comprehensive union of mind and body ordered to family life, unites a man and a woman as husband and wife, and they document the social value of applying this principle in law. Most compellingly, they show that those who embrace same-sex civil marriage leave no firm ground—none—for not recognizing every relationship describable in polite English, including polyamorous sexual unions, and that enshrining their view would further erode the norms of marriage, and hence the common good. Finally, *What Is Marriage?* decisively answers common objections: that the historic view is rooted in bigotry, like laws forbidding interracial marriage; that it is callous to people's needs; that it can't show the harm of recognizing same-sex couplings or the point of recognizing infertile ones; and that it treats a mere "social construct" as if it were natural or an unreasoned religious view as if it were rational.

Child Development and Education in the Twenty-First Century
Springer Nature This book provides an in-depth understanding of how children's development at different stages of their lives interfaces with the kind of education and support they need at school and home. It examines closely how education, in turn, influences their development and prepares them for an uncertain future. The chapters focus on the rapid developments of the 21st century that are changing the nature of education, especially the shift needed to being able to sift through and meaningfully deal with overwhelming volumes of information now available. This book helps readers understand how children can benefit from the digital environment while avoiding its pitfalls. Keeping in mind that in today's world parents are getting to spend less time with their children, the authors provide research-backed ideas on how they can best enable children's development, including their thoughts, feelings and notions of self. Given the increasing disparities, there is a perceptive analysis of how education can build an awareness of equity in a context marked by diversity and disadvantage. This book addresses issues such as these in a reliable, scholarly yet accessible manner, for students, young researchers and lay readers. Consequently, it is a valuable source of fundamental insights and understanding for educators, policy-makers, educational administrators and students of human and child development, education, and teacher training courses.

Cultures of Curriculum
Routledge Using "cultures of curriculum" as a lens, this clear, compelling text reveals and critically examines the belief systems and classroom practices of curricular orientations in contemporary American society. It is designed to foster awareness, examination, and deliberation about the curricula planned for and carried out in classrooms and schools; to inspire conversations about theory and practice as well as political, social, and moral issues; and to expand critical consciousness about approaches to curriculum and practice. Readers are encouraged to give serious attention to the issues this book raises for them, and to join with their colleagues, students, and communities in considering how to create curricula with purpose and congruent practices and to reculture classrooms and schools. A framework of inquiry is presented to facilitate such reflection and to accomplish these goals.

Cultures of Curriculum, Second Edition: Introduces the field of curriculum studies by describing theories and questions pertinent to curriculum inquiry Describes the process of curriculum leadership drawing from historical and contemporary research on curriculum change and transformation Presents the concept of cultures of curriculum as a way of thinking of curriculum as cultural text encompassing histories, norms, beliefs, values, roles, and environments. Connects theory to practice by describing curricular orientations as depicted in practice, providing educators with approaches to instruction, planning, and assessment for creating intentional practices in classrooms and schools Uses a heuristic that helps educators to understand curricular orientations, examine curriculum in classrooms and schools, and reflect upon their own beliefs and practices Integrates moral and political discourse into discussions of curriculum orientations so that educators can recognize, question, and challenge aims and actions by examining dominant paradigms and both their direct and unforeseeable influences upon schooling Changes in the second edition: Four new chapters - "Narrowing the Curriculum" (current trends of standardization and high-stakes testing) "Educating Through Occupations (Deweyan progressive and career/technical education) "Sustaining Indigenous Traditions" (Native American/indigenous education) "Envisioning Peace" (peace, global, human rights, environmental education) Updates and pertinent scholarship in all chapters reflecting recent events and discourses Curricular cultures all are examples of progressive alternatives to traditional education New two-part structure: Curriculum Studies and Curricular Cultures
