### Microsoft 365 Excel: The Only App That Matters

## Calculations, Analytics, Modeling, Data Analysis and Dashboard Reporting for the New Era of Dynamic Data Driven Decision Making & Insight

*Tickling Keys, Inc. This is a book about Microsoft 365 Excel, or Excel 365. No other version in history has as much power, as many features or more possibilities than does Excel 365. With a new formula calculations engine and many new built-in functions, creating formula solutions and business models in Excel 365 is dramatically easier than at any time in the history of spreadsheets. In addition, with the new data tools like Power Query, Power Pivot and Power BI, performing data analysis to make data driven decisions can be easily done on data with different structures, with different sources and on small and big data alike. With this exciting new Excel 365 version, we will learn three types for formulas: Worksheet, M Code and DAX, and we will learn three types of Reporting/Dashboarding tools: Standard PivotTables, Data Model PivotTables and Power BI Visualizations. This means that the New Excel 365 is the only app that matters in our age of analytics and data driven decisions. Who is this book/class for? Everyone. The book starts at the beginning and moves you to an advanced level by telling a logical story about how to use Excel to solve calculation-based problems and answer crucial questions.*

## Governance in Nigeria post-1999: Revisiting the democratic 'new dawn' of the Fourth Republic

*Pretoria University Law Press At the start of Nigeria's Fourth Republic on 29 May 1999, there was great optimism as to the emergence of a new democratic future representing a significant break from the political undulations of the past. Two decades and four presidential epochs later, there is a prevalent question as to how well Nigeria has fared in governance and human rights post-1999. This book revisits the democratic 'new dawn' of the Fourth Republic discussing pertinent matters integral to Nigeria's democratic future post-2019.*

## Controlling Climate Change

*Cambridge University Press Presents a cutting edge overview of tackling and adapting to climate change, written by a lead member of the IPCC.*

## Enabling Enterprise Transformation

## Business and Grassroots Innovation for the Knowledge Economy

*Springer Science & Business Media Private enterprises in advanced economies have been learning to use information and communication technology (ICT) to innovate and transform their processes, products, services and business models, significantly improving productivity and competitiveness. Moreover, the ICT industry itself has become a major source of job creation and a contributor to economic growth and business transformation. A key question today is whether and how developing countries can learn to benefit from the ICT revolution, and what roles the government and private sector can play. Already, a number of developing countries have been inspired by the example of India and China, and are now seeking to jump on the outsourcing bandwagon. Nevertheless, with few exceptions in the developing world, little attention has been paid by policymakers and practitioners to invest systematically and proactively in ICT-enabled growth, poverty reduction and grassroots innovation. Most communities and small and medium-sized enterprises in developing countries, for example, face multiple constraints to adopting and leveraging this general purpose technology, and lack the capabilities for maximizing its potential. In "Enabling Enterprise Transformation", Nagy Hanna draws on his rich experience of over 35 years at the World Bank and other aid agencies as a development strategist and ICT policy expert, the most current research, and best practices from around the world to provide practical tools for promoting economic and social transformation through ICT. He assesses various initiatives to develop and diffuse ICT, such as innovation funds, incubators, parks, public-private partnerships, and comprehensive promotion programs. He argues for the strategic options now open for developing countries to participate in ICT production, to deploy ICT to transform industries and services, and to leverage ICT as a new national infrastructure for improving the business environment and enhancing the competitiveness of the whole economy. The challenge for leaders in developing countries is to create such social and institutional dynamics for learning about ICT use and adaptation at many levels. Lessons gained so far from programs to build these social learning and innovation capabilities at the institutional and grassroots levels should be shared among developing countries, and a dialogue among business leaders, policymakers, development agencies, educational institutions, and the general citizenry must be advanced.*

## Against Doom

## A Climate Insurgency Manual

*PM Press While the world's people suffer the apocalyptic torments of floods, fires, droughts, heatwaves, desertification, disease vectors, food shortages, forced migration, ecosystem collapse, extinction, and other effects of uncontrolled climate change, the world's governmental and political leaders continue to accelerate our wild ride to climate doom. Is there any way for the rest of us to put on the brakes? Climate insurgency is a strategy for using people power to realize our common interest in protecting the climate. It uses mass, global, nonviolent action to challenge the legitimacy of public and corporate officials who are perpetrating climate destruction. A global climate insurgency has already begun. It has the potential to halt and roll back the fossil fuel agenda and the global thrust toward climate destruction. Against Doom: A Climate Insurgency Manual tells how to put that strategy into action—and how it can succeed. It is a handbook for halting global warming and restoring our climate—a how-to for climate insurgents.*

## Big Data as a Key Driver of Change Management. The Importance of Culture Change in Transformation Processes

GRIN Verlag Master's Thesis from the year 2020 in the subject Business economics - Business Management, Corporate Governance, grade: 94/110, University of Rome "Tor Vergata", language: English, abstract: This thesis deals with Big Data as a key driver of Change Management and the importance of Culture Change in transformation processes. It aims to answer the following questions: What is the Fourth Industrial Revolution's enabling technology that companies need to concentrate on extraction value in the phase of volatility and uncertainty? How can companies use change management theories and practices to stay competitive and agile? How do companies deal with the resistance to change? What is the role of Culture Change? Throughout the research, the Industry 4.0 as the background and central statue behind der study is examined. Change Management and Big Data are explored broadly in primary academic sources. This research contributes to the literature by providing a comprehensive picture of the essential determinants of successful change management that connects the gap between the different aspects raised in the literature. The world is transforming every day: customer needs are changing; technology is advancing, and the economy is evolving. Businesses who fail to embrace change can easily wind up as dinosaurs. This study analyses decisive change drivers coming with Industry 4.0, particularly Big Data. The core to effectively proceeding Industry 4.0 is to move from a traditional waterfall concept to an agile manner. Effective change management is crucial. Big Data transformations require an innovative way of thinking about how change impacts people, culture, organisations, processes and more. While resistance is the normal human reaction in times of change, Culture Change is critically essential to transformation and can mitigate much of the resistance. Digital transformation is not mainly about technology, it is about agility - organisations' culture plays a decisive role in the digital transformation of every business.

## The Climate Solutions Consensus

### What We Know and What To Do About It

Island Press In 2007, the Intergovernmental Panel on Climate Change shared the 2007 Nobel Peace Prize (with former Vice President Al Gore) for its reporting on the human causes of climate change. In 2008, the National Council for Science and the Environment reported that the acceleration of climate change is already faster than the IPCC projected only a year earlier. How we deal with the rapid environmental changes, and the human forces that are driving these changes, will be among the defining issues of our generation. Climate Solutions Consensus presents an agenda for America. It is the first major consensus statement by the nation's leading scientists, and it provides specific recommendations for federal policies, for state and local governments, for businesses, and for colleges and universities that are preparing future generations who will be dealing with a radically changed climate. The book draws upon the recommendations developed by more than 1200 scientists, educators and decision makers who participated in the National Council for Science and the Environment's 8th National Conference on Science, Policy and the Environment. After presenting a lucid narrative of the science behind climate change and its solutions, Climate Solutions Consensus presents 35 practical, results-oriented approaches for minimizing climate change and its impacts. It clearly spells out options for technological, societal, and policy actions. And it deals head-on with controversial topics, including nuclear energy, ocean fertilization and atmospheric geo-engineering. One of the book's key conclusions is that climate solutions are about much more than energy sources. They involve re-examining everything people do with an eye toward minimizing climate impacts. This includes our eating habits, consumption patterns, transportation, building and housing, forestry, land use, education, and more. According to these scientists, the time to act is now. With clarity and urgency, they tell us exactly what needs to be done to start reversing the driving factors behind climate change, minimizing their consequences, and adapting to what is beyond our power to stop.

## Why Do I Need a Teacher When I've got Google?

### The essential guide to the big issues for every teacher

Routledge *Why do I need a teacher when I've got Google?* is just one of the challenging, controversial and thought-provoking questions Ian Gilbert poses in this urgent and invigorating book. Questioning the unquestionable, this fully updated new edition will make you re-consider everything you thought you knew about teaching and learning, such as: • Are you simply preparing the next generation of unemployed accountants? • What do you do for the 'sweetcorn kids' who come out of the education system in pretty much the same state as when they went in? • What's the real point of school? • Exams - So whose bright idea was that? • Why 'EQ' is fast becoming the new 'IQ'. • What will your school policy be on brain-enhancing technologies? • Which is the odd one out between a hamster and a caravan? With his customary combination of hard-hitting truths, practical classroom ideas and irreverent sense of humour, Ian Gilbert takes the reader on a breathless rollercoaster ride through burning issues of the twenty-first century, considering everything from the threats facing the world and the challenge of the BRIC economies to the link between eugenics and the 11+. As wide-ranging and exhaustively-researched as it is entertaining and accessible, this book is designed to challenge teachers and inform them - as well as encourage them - as they strive to design a twenty-first century learning experience that really does bring the best out of all young people. After all, the future of the world may just depend on it
