Tears of the Desert

A Memoir of Survival in Darfur

One World “[Halima Bashir’s] mesmerizing tale of against-all-odds endurance is a piercing lament—and a clear-eyed call to action.”—Vogue “This memoir helps keep the Darfur tragedy open as a wound not yet healed.”—Elie Wiesel, author of *Night* Born into the Zaghawa tribe in the Sudanese desert, Halima Bashir received a good education away from her rural surroundings (thanks to her doting, politically astute father) and at twenty-four became her village’s first formal doctor. Yet not even Bashir’s degree could protect her from the encroaching conflict that would consume her homeland. Janjaweed Arab militias savagely assaulted the Zaghawa, often with the backing of the Sudanese military. Then, in early 2004, the Janjaweed attacked Bashir’s village and surrounding areas, raping forty-two schoolgirls and their teachers. Bashir, who treated the traumatized victims, some as young as eight years old, could no longer remain quiet. But breaking her silence ignited a horrifying turn of events. Raw and riveting, *Tears of the Desert* is the first memoir ever written by a woman caught up in the war in Darfur. It is a survivor’s tale of a conflicted country, a resilient people, and an uncompromising spirit. Praise for *Tears of the Desert* “This is a brave book. And a valuable one. Halima’s story of the atrocities and immeasurable losses she has endured must be told.”—Mia Farrow, actor and advocate “Vivid, poignant and brutally candid . . . *Tears of the Desert* is that rarest of literary endeavors, not just a book you read but a book you experience.”—The Washington Post Book World “An extraordinary memoir . . . Halima Bashir’s bravery contrasts with the world’s fecklessness and failures.”—Nicholas D. Kristof, The New York Times “Searing . . . *Tears of the Desert* gives voice to the unspeakable.”—USA Today “Powerful, harrowing and brave.”—The Economist “A luminous tale of growing up in rural Darfur . . . a wonderful and moving African memoir.”—The New York Review of Books

Bulletin of the Atomic Scientists

The *Bulletin of the Atomic Scientists* is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the *Bulletin's* iconic “Doomsday Clock” stimulates solutions for a safer world.

Backpacker

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Solar Power

Innovation, Sustainability, and Environmental Justice

University of California Press In this important new primer, Dustin Mulvaney makes a passionate case for the significance of solar power energy and offers a vision for a more sustainable and just solar industry for the future. The solar energy industry has grown immensely over the past several years and now provides up to a fifth of California's power. But despite its deservedly green reputation, solar development and deployment have potential social and environmental consequences, from poor factory labor standards to landscape impacts on wildlife. Using a wide variety of case studies and examples to trace the life cycle of photovoltaics, Mulvaney expertly outlines the state of the solar industry, exploring the ongoing conflicts between ecological concerns and climate mitigation strategies, as well as current trade disputes and the fate of toxins in solar waste products. This exceptional overview will outline the industry's current challenges and possible future for students in environmental studies, energy policy, environmental sociology, and other aligned fields.

Design with the Desert

Conservation and Sustainable Development

CRC Press Typical development in the American Southwest often resulted in scraping the desert lands of the ancient living landscape, to be replaced with one that is human-made and dependent on a large consumption of energy and natural resources. This transdisciplinary book explores the natural and built environment of this desert region and introduces development tools for shaping its future in a more sustainable way. It offers valuable insights to help promote ecological balance between nature and the built environment in the American Southwest-and in other ecologically fragile regions around the world.

Special Forces Survival Guide

Desert, Arctic, Mountain, Jungle, Urban

Firefly Books Limited Offers instructions for building shelter, finding food, emergency aid, and navigating various climates and terrains.

The Survival Manual

The adventurer's guide to staying alive in the wild

Teach Yourself Every year, more than 40,000 people climb Mount Kilimanjaro. Millions head for the great outdoors every weekend, and the concept of the Great Outdoors has never been more popular. If you are one of them, would you know what to do if you got stranded or hurt? "How to Survive Outdoors" gives essential, practical advice for situations that aren't in any way implausible. It starts with ten life-saving tips, then outlines the crucial components - water, food, shelter and so on. It covers scenarios any one of us could encounter, including plane crashes and sinkings.

The History of the Peoples of the Eastern Desert

ISD LLC The last quarter century has seen extensive research on the ports of the Red Sea coast of Egypt, the road systems connecting them to the Nile, and the mines and quarries in the region. Missing has been a systematic study of the peoples of the Eastern Desert--the area between the Red Sea and the Nile Valley--in whose territories these ports, roads, mines, and quarries were located. The historical overview of the Eastern Desert in the shape of a roughly chronological narrative presented in this book fills that gap. The multidisciplinary perspective focuses on the long-term history of the region. The extensive range of topics addressed includes specific historical periods, natural resources, nomadic survival strategies, ancient textual data, and the interaction between Christian hermits and their neighbors. The breadth of perspective does not sacrifice depth, for all authors deal in some detail with the specifics of their subject matter. As a whole, this collection provides an outline of the history and sociology of the Eastern Desert

unparalleled in any language for its comprehensiveness. As such, it will be the essential starting point for future research on the Eastern Desert. Includes a CD of eleven audio files with music of the Ababda Nomads, and six short videos of Ababda culture.

Inhabitable Infrastructures

Science fiction or urban future?

Taylor & Francis Inhabitable Infrastructures: Science fiction or urban future?, the follow up to *Food City* and *Smartcities and Eco-Warriors*, from one of the world's leading urban design and architectural thinkers, explores the potential of climate change-related multi-use infrastructures that address the fundamental human requirements to protect, to provide and to participate. The stimulus for the infrastructures derives from postulated scenarios and processes gleaned from science fiction and futurology as well as the current body of scientific knowledge regarding changing environmental impacts on cities. Science fiction is interdisciplinary by nature, aggregates the past and present, and evaluates both lay opinions and professional strategies in an attempt to develop foresight and to map possible futures. The research culminates in the creation of innovative multi-use infrastructures and integrated self-sustaining support systems that meet the challenges posed through climate change and overpopulation, and the reciprocal benefits of simultaneously addressing the threat and the shaping of cities. J. G. Ballard has written that the psychological realm of science fiction is most valuable in its predictive function, and in projecting emotions into the future. The knowledge from the book is widely transferable, constituting both solutions and speculative visions of future urban environments. The book is indispensable reading for professionals and students in the fields of urban design, architecture, engineering and environmental socio-politics.

Woman, Man, and God in Modern Islam

Wm. B. Eerdmans Publishing Award-winning historian Theodore Friend recently set out alone across Asia and the Middle East on a quest to understand firsthand the life situations of women in Indonesia, Pakistan, Saudi Arabia, Iran, and Turkey. *Woman, Man, and God in Modern Islam* recounts Friend's remarkable journey and relates hundreds of encounters and conversations with people he met along the way. Combining a deep respect for Islam and his faith in the potential of women to change their worlds, Friend presents an open, exploratory outsider's perspective on women in five very different Islamic cultures timely fare for all who wish to broaden their world horizons.

The 3 Keys to Empowerment

Release the Power Within People for Astonishing Results

Berrett-Koehler Publishers An action guide and macro-level understanding of the process required to foster the workplace culture envisioned in *Empowerment Takes More Than a Minute*. As Ken Blanchard, John Carlos, and Alan Randolph clearly demonstrated in their previous bestseller, *Empowerment Takes More Than a Minute*, empowerment is not a goal that can be achieved in a minute. Empowerment is a process that requires ongoing effort, awareness, and commitment to transforming the hierarchy. This essential guide offers managers detailed, hands-on answers to their real-life questions about how, exactly, they can navigate the journey to empowerment. Written in an easily accessible Q&A format, the book closely examines and expands on the three keys to empowerment originally presented in *Empowerment Takes More Than a Minute*—sharing information, creating autonomy through boundaries, and replacing the hierarchy with teams. It clearly outlines the promises and challenges of each stage of the journey, providing managers with thought-provoking questions, clear advice, effective activities, and action tools that will help them create a culture of empowerment. Wherever they are in the journey, managers will find a clear roadmap in this user-friendly action guide. Praise for *Empowerment Takes More Than a Minute* "The most truthful, straight-talk book on managing people to come along in eons. This is an exceptional tool for business." —Harvey MacKay, #1 New York Times-bestselling author "One of the very best organized, thought out, planned, and written books on any business subject I have read." —Stanley Bass, Human Resources Consultant, Stan Bass Consulting

Survival! Desert

Teacher Created Materials Shares the necessary skills needed to survive in the desert, including digging into a dry streambed to find water, building a solar still, and using desert plants and animals as food sources.

Biology and Conservation of North American Tortoises

JHU Press **Tortoises**, those unmistakable turtles, evolved from a lineage that split off from the familiar pond turtles roughly 100 million years ago. Over time, these plant-eating land turtles spread around the world, growing to an enormous size (depending on the species) and living so long that they have become the stuff of legends. By most accounts, they are indeed the longest-lived of the turtles, with good records suggesting individuals may live as long as 180 years (anecdotal records suggest that some reach ages of 200 years or more). Providing the first comprehensive treatment of North America's tortoises, **Biology and Conservation of North American Tortoises** brings together leading experts to give an overview of tortoise morphology, taxonomy, systematics, paleontology, physiology, ecology, behavior, reproduction, diet, growth, health, and conservation. The contributors carefully combine their own expertise and observations with results from studies conducted by hundreds of other researchers. The result is a book that belongs in the library of every herpetologist. Contributors Gustavo Aguirre L. Linda J. Allison Matthew J. Aresco Roy C. Averill-Murray Joan E. Berish Kristin H. Berry Dennis M. Bramble K. Kristina Drake Taylor Edwards Todd C. Esque Richard Franz Craig Guyer J. Scott Harrison Sharon M. Hermann J. Howard Hutchison Elliott R. Jacobson Valerie M. Lord of the Flies

New Educational Edition

Faber & Faber A plane crashes on a desert island and the only survivors, a group of schoolboys, assemble on the beach and wait to be rescued. By day they inhabit a land of bright fantastic birds and dark blue seas, but at night their dreams are haunted by the image of a terrifying beast. As the boys' delicate sense of order fades, so their childish dreams are transformed into something more primitive, and their behaviour starts to take on a murderous, savage significance. First published in 1954, *Lord of the Flies* is one of the most celebrated and widely read of modern classics. Now fully revised and updated, this educational edition includes chapter summaries, comprehension questions, discussion points, classroom activities, a biographical profile of Golding, historical context relevant to the novel and an essay on *Lord of the Flies* by William Golding entitled 'Fable'. Aimed at Key Stage 3 and 4 students, it also includes a section on literary theory for advanced or A-level students. The educational edition encourages original and independent thinking while guiding the student through the text - ideal for use in the classroom and at home.

Hope in Troubled Times

A New Vision for Confronting Global Crises

Baker Academic Provides hope for real-world solutions to life-threatening problems such as global poverty, environmental destruction, and terrorism.

The SAS and Special Forces Guide to Escape and Evasion

Spellmount, Limited Publishers SAS and Special Forces guide to escape and evasion

Research Handbook on International Water Law

Edward Elgar Publishing The Research Handbook on International Water Law surveys the field of the law of shared freshwater resources. In some thirty chapters, it covers subjects ranging from the general principles operative in the field and international groundwater law to the human right to water and whether international water law is prepared to cope with climate disruption. The authors are internationally recognized experts in the field, most with years of experience. The Research Handbook is edited by three scholars and practitioners whose publications and work deal with the law of international watercourses.

Air Force Handbook 10-644 Survival Evasion Resistance Escape Operations, 27 March 2017

Createspace Independent Publishing Platform Air Force Handbook 10-644 Survival Evasion Resistance Escape (SERE) Operations 27 March 2017 This handbook describes the various environmental conditions affecting human survival, and describes isolated personnel (IP) activities necessary to survive during successful evasion or isolating events leading to successful recovery. It is the fundamental reference document providing guidance for any USAF service member who has the potential to become isolated; deviations require sound judgment and careful consideration. This publication provides considerations to be used in planning and execution for effective mission accomplishment of formal USAF Survival, Evasion, Resistance, and Escape (SERE) training, environmentally specific SERE training, and combat survival continuation training programs. The tactics, techniques, and procedures in this publication are recognized best practices presenting a solid foundation to assist USAF service members to maintain life and return with honor from isolating events.

Afoot in the Desert

A Contribution to Basic Survival

Many of our long-held beliefs about living in desert climates have been made obsolete in recent years. Recent scientific studies on water and heat exchanged in the human body make the old desert theories about thirst and ancient ideas on desert travel as out of date today as a Model T Ford or a World War I Jenny aircraft. Afoot in the Desert is written to bring men in the Air Force up to date on desert living conditions. It is intended to provide basic information for escape and evasion in desert regions. It makes available the most recent, reliable information concerning survival needs of the human body in the deserts of the world. There are numerous survival hints for you and me in the way desert plants and desert animals have adapted themselves to dry climate living. Afoot in the Desert shows you some of the lessons taught by plants and animals which have adjusted to life in dry climates. It gives you some idea of what to expect if you are forced down in these areas and find it necessary to live there until you can make it back to home and sweetheart. Unfortunately the space available does not permit descriptions of the beauty, the fascination, and the charm of the world's great deserts. Neither does it allow for details about the interesting peoples who live in deserts. However, the information presented will make it easier for you to land, to live, and travel afoot in the desert. At the time of original publication Alonzo W. Pond was Chief of the Desert Branch of the Arctic, Desert, Tropic Information Center at the Air University.

When Disaster Strikes

A Comprehensive Guide for Emergency Prepping and Crisis Survival

Chelsea Green Publishing Disasters often strike without warning and leave a trail of destruction in their wake. Yet armed with the right tools and information, survivors can fend for themselves and get through even the toughest circumstances. Matthew Stein's When Disaster Strikes provides a thorough, practical guide for how to prepare for and react in many of life's most unpredictable scenarios. In this disaster-preparedness manual, he outlines the materials you'll need-from food and water, to shelter and energy, to first-aid and survival skills-to help you safely live through the worst. When Disaster Strikes covers how to find and store food, water, and clothing, as well as the basics of installing back-up power and lights. You'll learn how to gather and sterilize water, build a fire, treat injuries in an emergency, and use alternative medical sources when conventional ones are unavailable. Stein instructs you on the smartest responses to natural disasters-such as fires, earthquakes, hurricanes and floods-how to keep warm during winter storms, even how to protect yourself from attack or other dangerous situations. With this comprehensive guide

in hand, you can be sure to respond quickly, correctly, and confidently when a crisis threatens.

Environmental Effects of Conservation Practices on Grazing Lands

A Conservation Effects Assessment Project (CEAP) Bibliography

Life in Extreme Environments

Springer Science & Business Media This book provides an intriguing look at how life can adapt to many different extreme environments. It addresses the limits for life development and examines different strategies used by organisms to adapt to different extreme environments.

An Oral and Documentary History of the Darfur Genocide [2 Volumes]

ABC-CLIO An unquestionably important, oral-history collection presents the first-person stories of survivors of the genocide in Darfur, a region in western Sudan where the Sudanese government is accused of abetting the murder of an estimated 400,000 persons. • 24 illustrations

Darfur and the Crisis of Governance in Sudan

A Critical Reader

Cornell University Press A diverse group of academics, activists, officials and rebels contribute chapters about different aspects of conflict in the western Sudanese region of Darfur. These chapters discuss the origins and evolution of the conflict, the various ways in which the conflict has been understood and misperceived (both locally and internationally), the profoundly gendered nature of the conflict, the status of those involved with regard to the Sudanese and international law, and the ongoing struggle for peace in the region. A substantial appendix reproduces UN, ICC, and (many for the first time in English translation) Arabic-language documents to trace the history of the conflict. The book also includes a chronology of major events in Sudan.

Democracy and Education

Read Books Ltd This antiquarian volume contains a comprehensive treatise on democracy and education, being an introduction to the 'philosophy of education'. Written in clear, concise language and full of interesting expositions and thought-provoking assertions, this volume will appeal to those with an interest in the role of education in society, and it would make for a great addition to collections of allied literature. The chapters of this book include: 'Education as a Necessity of Life'; 'Education as a Social Function'; 'Education as Direction'; 'Education as Growth'; 'Preparation, Unfolding, and Formal Discipline'; 'Education as Conservative and Progressive'; 'The Democratic Conception in Education'; 'Aims in Education', etcetera. We are republishing this vintage book now complete with a new prefatory biography of the author.
