Political Theories of the Middle Age

[Jazzybee Verlag](#) This excellent book is a translation of a very small portion of Dr. Gierke's " Deutsches Genossenschaftsrecht, " being the section entitled " Die Publizistischen Lehren des Mittelalters. " Its ten chapters treat of the following questions : The evolution of political theory under the diverse influences of ancient philosophy and law, medieval theology, local custom; Macrocosm and microcosm, i.e., the relation of the whole of society to its parts and vice versa from the medieval viewpoint; unity in Church and State, wherein are discussed the warring positions of parties in both, evolved by the length of the contest between the papacy and the empire; the idea of organization, i.e., of society as an organism; the idea of monarchy, its derivation from God, its consequent relations with the plenitudo potestatis of the papacy; the idea of popular sovereignty, its conflicts and combinations with the ruler's sovereignty, first in the temporal sphere, second, analogous developments of the idea as applied to the government of the Church, somewhat painfully brought out by the conciliar movement; the idea of representation; the idea of personality, i.e., of justice or legal personality applied to the Church and State or to minor corporations; the relation of the state to the law, natural and positive; the beginnings of the modern state, i.e., those elements in medieval doctrine that led up to the modern idea of the state. One half of the book is devoted to notes that elucidate the text of the cited authorities, a long list of which, both ancient and modern, is given. The mere enumeration of the titles of the chapters and the fact that the translation has been undertaken by so eminent a legal historian as Mr. Maitland are a warrant that the work is important, even for those who are not disposed to accept Dr. Gierke's views on faith. English - speaking readers in general must find it interesting, accustomed as they are to look on medieval thought as mere idle speculation of the logicians; as if political theories did not then, as now, agitate men's minds and lay the foundations for much of those political blessings that we now enjoy, or think we do. To a close observer of the development of government in the Catholic Church some portions will be, not merely interesting, but absorbing. They may even be instructive, though at the sacrifice of some preconceptions.

Latin Via Ovid

A First Course

Wayne State University Press Using an introduction to mythology by the master storyteller Ovid himself, the authors have prepared a unique teaching tool designed to achieve proficiency at Latin in one year at the college level, two years at the high school or intermediate level. The volume provides students with imaginative, connected reading, beginning with introductory prose versions of Ovid's simple myth tales and progressing to the rich poetry of Ovidian Latin (with appropriate teaching aids) within forty lessons. The grammatical approach is traditional, but the central emphasis is on reading. In each chapter the reading appears first, followed by the vocabulary, the grammar, exercises, and etymology relating to the vocabulary. The exercises begin with a group of questions in Latin (based on the reading), to be answered in Latin. Each tale is preceded by a brief discussion in English of the story and its mythological significance. The myths retold by Ovid and the attractive format are conceived to impel the student into acquiring the skill to read the author in the original language. Architecture of the Sacred

Space, Ritual, and Experience from Classical Greece to Byzantium

Cambridge University Press *In this book, a distinguished team of authors explores the way space, place, architecture, and ritual interact to construct sacred experience in the historical cultures of the eastern Mediterranean. Essays address fundamental issues and features that enable buildings to perform as spiritually transformative spaces in ancient Greek, Roman, Jewish, early Christian, and Byzantine civilizations. Collectively they demonstrate the multiple ways in which works of architecture and their settings were active agents in the ritual process. Architecture did not merely host events; rather, it magnified and elevated them, interacting with rituals facilitating the construction of ceremony. This book examines comparatively the ways in which ideas and situations generated by the interaction of place, built environment, ritual action, and memory contributed to the cultural formulation of the sacred experience in different religious faiths.*
