THE ZONES OF REGULATION

A CURRICULUM DESIGNED TO FOSTER SELF-REGULATION AND EMOTIONAL CONTROL

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

BUILDING ACADEMIC VOCABULARY

TEACHER'S MANUAL

In **Building Academic Vocabulary: Teacher s Manual**, Robert J. Marzano and Debra J. Pickering give teachers a practical way to help students master academic vocabulary. Research has shown that when teachers, schools, and districts take a systematic approach to helping students identify and master essential vocabulary and concepts of a given subject area, student comprehension and achievement rises. In the manual, readers will find the following tools: * A method to help teachers, schools, and districts determine which academic vocabulary terms are most essential for their needs * A six-step process for direct instruction in subject area vocabulary * A how-to to help students use the Building Academic Vocabulary: Student Notebook. The six-step method encourages students to learn critical academic vocabulary by connecting these terms to prior knowledge using linguistic and non-linguistic means that further encourage the refinement and deepening of their understanding. * Suggestions for tailoring academic vocabulary procedures for English Language Learners. * Samples and blackline masters for a variety of review activities and games that reinforce and refine student understanding of the academic terms and concepts they learn. The book also includes a list of 7, 923 vocabulary terms culled from the national standards documents and other publications, organized into 11 subject areas and 4 grade-level categories. **Building Academic Vocabulary: Teacher s Manual** puts into practice the research and ideas outlined in Marzano s previous book **Building Background Knowledge for Academic Achievement**. Using the teacher s manual and vocabulary notebooks, educators can guide students in using tools and activities that will help them deepen their own understanding of critical academic vocabulary--the building blocks for achievement in each discipline.
