The Great Power Competition

Contagion effect : strategic competition in the COVID-19 era

Springer Nature *Even before the outbreak of the COVID-19 pandemic, the Central Region faced numerous obstacles to building a stable and prosperous future. The region, which encompasses the Middle East, the Horn of Africa, Central Asia, and South Asia, has been plagued by economic and political uncertainty amidst dramatic shifts in the global power structure. With the pandemic now exacerbating the volatility in this already fragile region, the U.S.'s strategic objectives are rife for re-examination. A complicated stew of factors such as weakening of established governance systems, the emboldening of extremist individuals and groups through advances in digital technology, the humanitarian crises in Afghanistan and Syria, and the intensification of the great power competition with China and Russia are creating a fertile environment for the growth of violent extremist organizations (VEOs). Such organizations take advantage of vulnerable, aggrieved, and traumatized populations to fuel radicalization, recruitment, and unrest, which further undermine stability and the potential for peace and prosperity. While it is still early to fully understand how the ongoing response to the COVID-19 pandemic will impact U.S. policy, this book provides a timely analysis of relevant dynamics such as popular radicalization, digital information ecosystems, networks of influence, and new capabilities to recognize and prepare for other such black swan events in the region.*

China's Eurasian Dilemmas

Edward Elgar Publishing *Providing a timely analysis of China's engagement with Eurasia, R. James Ferguson focuses on the challenges obstructing China's path to becoming a sustainable global power. Engagement across Eurasia presents China, its leaders and policymakers with intensified contact with regional and national conflicts, posing environmental, developmental and strategic dilemmas.*

Global Trends 2030

Alternative Worlds

Createspace Independent Publishing Platform This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included in *Global Trends 2030*, including: a review of the four previous *Global Trends* reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible the impact on future international relations. Table of Contents: Introduction 1 Megatrends 6 Individual Empowerment 8 Poverty Reduction 8 An Expanding Global Middle Class 8 Education and the Gender Gap 10 Role of Communications Technologies 11 Improving Health 11 A MORE CONFLICTED IDEOLOGICAL LANDSCAPE 12 Diffusion of Power 15 THE RISE AND FALL OF COUNTRIES: NOT THE SAME OLD STORY 17 THE LIMITS OF HARD POWER IN THE WORLD OF 2030 18 Demographic Patterns 20 Widespread Aging 20 Shrinking Number of Youthful Countries 22 A New Age of Migration 23 The World as Urban 26 Growing Food, Water, and Energy Nexus 30 Food, Water, and Climate 30 A Brighter Energy Outlook 34 Game-Changers 38 The Crisis-Prone Global Economy 40 The Plight of the West 40 Crunch Time Too for the Emerging Powers 43 A Multipolar Global Economy: Inherently More Fragile? 46 The Governance Gap 48 Governance Starts at Home: Risks and Opportunities 48 INCREASED FOCUS ON EQUALITY AND OPENNESS 53 NEW GOVERNMENTAL FORMS 54 A New Regional Order? 55 Global Multilateral Cooperation 55 The Potential for Increased Conflict 59 INTRASTATE CONFLICT: CONTINUED DECLINE 59 Interstate Conflict: Chances Rising 61 Wider Scope of Regional Instability 70 The Middle East: At a Tipping Point 70 South Asia: Shocks on the Horizon 75 East Asia: Multiple Strategic Futures 76 Europe: Transforming Itself 78 Sub-Saharan Africa: Turning a Corner by 2030? 79 Latin America: More Prosperous but Inherently Fragile 81 The Impact of New Technologies 83 Information Technologies 83 AUTOMATION AND MANUFACTURING TECHNOLOGIES 87 Resource Technologies 90 Health Technologies 95 The Role of the United States 98 Steady US Role 98 Multiple Potential Scenarios for the United States' Global Role 101 Alternative Worlds 107 Stalled Engines 110 FUSION 116 Gini-out-of-the-Bottle 122 Nonstate World 128 Acknowledgements 134 GT2030 Blog References 137 Audience: Appropriate for anyone, from businesses to banks, government agencies to start-ups, the technology sector to the teaching sector, and more. Report to Congress of the U.S.-China Economic and Security Review Commission

Mobile Gaming in Asia

Politics, Culture and Emerging Technologies

Springer This book analyzes mobile gaming in the Asian context and looks into a hitherto neglected focus of inquiry – a localized mobile landscape, with particular reference to young Asians' engagement with mobile gaming. This edition focuses not only on the remarkable success of local mobile games, but also on the significance of social milieu in the development of Asian mobile technologies and gaming culture. It analyzes the growth of the current mobile technologies and mobile gaming not as separate but as continuous developments in tandem with the digital economy. It is of interest to both academics and a broader readership from the business, government, and information technology sectors

War with China

Thinking Through the Unthinkable

Rand Corporation A Sino-U.S. war could take various, and unintended, paths. Because intense, reciprocal conventional counterforce attacks could inflict heavy losses and costs on both sides, leaders need options and channels to contain and terminate fighting.

China's Economic and Political Presence in the Middle East and South Asia

Taylor & Francis This book explores a range of key issues connected to China's relations with countries in the Middle East and South Asia. It discusses economic and political connections, and projects which have arisen as part of China's Belt and Road Initiative. It covers both important countries in the Middle East, and also Pakistan, Bangladesh and Afghanistan. It examines current contentious

issues including Iranian sanctions and the war in Syria, and assesses the roles of other powers such as Russia, Turkey and Israel insofar as they affect China's relationships. Overall, the book presents many new perspectives on the subject, with many of the perspectives representing the view from the countries of the Middle East and South Asia.

Independent India's All the Seven Wars

Notion Press India fought seven wars in its independent era. The book is a factual story of all these wars which include 'The Liberation of Goa' and the 'Siachen War'. The book is a condensed military history but at the same time an exhaustive one. For a student of military history it will be a precious possession. The book brings out many 'not so well known facts' such as 'Hyderabad Police Action', 'how J&K acceded into India', 'Radcliffe Award bifurcating the Indian sub-continent', 'Jinnah's Two-Nation theory' and 'division of British India Armed Forces between India and Pakistan'. The book narrates in detail how the Chinese war came about to disgrace the country and its majestic army. The book gives a short history of the then East Pakistan in its existence for about twenty years and how East and West Pakistan moved away from each other never to make a come-back. The book describes how the armies fight at God-forsaken heights of 20,000 feet in winters. If one reads this book he/she need not study the other voluminous versions of the Indian wars.

The Long Game

China's Grand Strategy to Displace American Order

Oxford University Press For more than a century, no US adversary or coalition of adversaries - not Nazi Germany, Imperial Japan, or the Soviet Union - has ever reached sixty percent of US GDP. China is the sole exception, and it is fast emerging into a global superpower that could rival, if not eclipse, the United States. What does China want, does it have a grand strategy to achieve it, and what should the United States do about it? In *The Long Game*, Rush Doshi draws from a rich base of Chinese primary sources, including decades worth of party documents, leaked materials, memoirs by party leaders, and a careful analysis of China's conduct to provide a history of China's grand strategy since the end of the Cold War. Taking readers behind the Party's closed doors, he uncovers Beijing's long, methodical game to displace America from its hegemonic position in both the East Asia regional and global orders through three sequential "strategies of displacement." Beginning in the 1980s, China focused for two decades on "hiding capabilities and biding time." After the 2008 Global Financial Crisis, it became more assertive regionally, following a policy of "actively accomplishing something." Finally, in the aftermath populist elections of 2016, China shifted to an even more aggressive strategy for undermining US hegemony, adopting the phrase "great changes unseen in century." After charting how China's long game has evolved, Doshi offers a comprehensive yet asymmetric plan for an effective US response. Ironically, his proposed approach takes a page from Beijing's own strategic playbook to undermine China's ambitions and strengthen American order without competing dollar-for-dollar, ship-for-ship, or loan-for-loan.

Handbook of US-China Relations

Edward Elgar Publishing This Handbook addresses the key questions surrounding US-China relations: what are the historical and contemporary contexts that underpin this complex relationship? How has the strategic rivalry between the two evolved? What are the key flashpoints in their relationship? What are the key security issues between the two powers? The international contributors explore the historical, political, economic, military, and international and regional spheres of the US-China relationship. The topics they discuss include human rights, Chinese public perception of the United States, US-China strategic rivalry, China's defence build-up and cyber war.

The China Nightmare

The Grand Ambitions of a Decaying State

Once the darling of U.S. statesmen, corporate elites, and academics, the People's Republic of China has evolved into America's most challenging strategic competitor. Its future appears dystopian. This book tells the story of how China got to this place and analyzes where it will go next and what that will mean for the future of U.S. strategy.

Chinese Assertiveness in the South China Sea

Power Sources, Domestic Politics, and Reactive Foreign Policy

Springer This book offers an assessment of China's assertive foreign policy behavior with a special focus on Chinese policies in the South China Sea (SCS). By providing a detailed account of the events in the SCS and by analyzing power dynamics in the region, it identifies the driving forces behind China's assertive foreign policy. Considering China's power on a domestic as well as an international level, it examines a number of different sources of hard and soft power, including military, economics, geopolitics, and domestic legitimacy. The author demonstrates that Chinese assertiveness in the SCS can be explained not only by increases in

China's power, but also by effective reactions to other actors' foreign policy changes. The book will appeal to scholars in international relations, especially those interested in a better understanding of South China Sea developments, China's political power and foreign policy, and East Asian international affairs.

CHINA IN INDIAN OCEAN REGION

Allied Publishers *This edited book is the outcome of the International Conference on 'China in Indian Ocean Region', held on 13th–14th November 2014, organized by UGC Centre for Indian Ocean Studies, Osmania University, Hyderabad. Indian Ocean, third largest ocean in the world surpasses the Atlantic and Pacific Oceans as the world's largest and most strategically significant trade corridor. Indian Ocean Region (IOR) which is surrounded by Africa, Asia and Australia serves as a maritime highway, linking trans-continental human and economic relationships. Being the world's most populated region, one third of the world's bulk cargo and around two thirds of world's oil ship tankers pass through it. China's interest in the Indian Ocean Region (IOR) can be traced back to the early 1960s. Ever since Beijing has been increasingly deepening its presence in the IOR for a variety of reasons—oil, trade, security, etc., over 30 per cent of China's seaborne trade worth about US \$300 billion transits across IOR. Sharing a quarter of the world's population, China faces ever increasing demand for energy. China has little choice but to look beyond its borders for its energy needs. About 77 per cent of its oil imports are sourced from West Asia and Africa and these are transported through the Indian Ocean. Thus China's dependence on the Indian Ocean continues to grow for energy imports from the Gulf, to import resources from Africa and trade with Europe. With China steadily spreading its footprints in the Indian Ocean Region with increasing military presence and with the rapidly growing Navy being equipped with warships, destroyers and nuclear submarines, this book analyses in depth growing Chinese influence in Indian Ocean Region (IOR), Geopolitical interests of China, Security and Economic implication for India. This volume will be of considerable interest to the students and scholars of international relations in the contemporary situation.*

The New Great Game

China and South and Central Asia in the Era of Reform

Stanford University Press *China's rise has elicited envy, admiration, and fear among its neighbors. Although much has been written about this, previous coverage portrays events as determined almost entirely by Beijing. Such accounts minimize or ignore the other side of the equation: namely, what individuals, corporate actors, and governments in other countries do to attract, shape, exploit, or deflect Chinese involvement. The New Great Game analyzes and explains how Chinese policies and priorities interact with the goals and actions of other countries in the region. To explore the reciprocal nature of relations between China and countries in South and Central Asia, The New Great Game employs numerous policy-relevant lenses: geography, culture, history, resource endowments, and levels of development. This volume seeks to discover what has happened during the three decades of China's rise and why it happened as it did, with the goal of deeper understanding of Chinese and other national priorities and policies and of discerning patterns among countries and issues.*

Perfect Imbalance: China And Russia

World Scientific *Perfect Imbalance seeks to answer one of the most important outstanding questions in twenty-first century politics: how close are Putin's Russia and Xi's China? Written by a scholar fluent in both Chinese and Russian, this book examines the current China-Russia partnership from several perspectives. First, what Vladimir Putin, Xi Jinping and their respective foreign policy establishments publicly say about the relationship between the countries. Second, how the two establishments frame their tangible cooperation on matters such as security, the Arctic, space, and international relations with other Eurasian countries. Finally, the book examines the impact of the COVID-19 pandemic upon Sino-Russian relations. Putin and Xi's stories, where possible, are cross-checked with what is really happening. Perfect Imbalance argues that although Russia has not pivoted towards China, and although there is no official Sino-Russian alliance in sight, the relationship will continue to grow and expand in search for a perfect imbalance.*

Handbook of the Politics of the Arctic

Edward Elgar Publishing *The Arctic has again become one of the leading issues on the international foreign policy agenda, in a manner unseen since the Cold War. Drawing on the perspectives of geo-politics and international law, this Handbook offers fresh insights and perspectives on the most pressing issues, grouped under the headings of political ascendancy, climate and environmental issues, resources and energy, and the response and policies of affected countries.*

China's Grand Strategy

Trends, Trajectories, and Long-Term Competition

Rand Corporation *To explore what extended competition between the United States and China might entail out to 2050, the authors of this report identified and characterized China's grand strategy, analyzed its component national strategies (diplomacy, economics, science and technology, and military affairs), and assessed how successful China might be at implementing these over the next three decades.*

Fateful Decisions

Choices That Will Shape China's Future

Stanford University Press China's future will be determined by how its leaders manage its myriad interconnected challenges. In *Fateful Decisions*, leading experts from a wide range of disciplines eschew broad predictions of success or failure in favor of close analyses of today's most critical demographic, economic, social, political, and foreign policy challenges. They expertly outline the options and opportunity costs entailed, providing a cutting-edge analytic framework for understanding the decisions that will determine China's trajectory. Xi Jinping has articulated ambitious goals, such as the Belt and Road Initiative and massive urbanization projects, but few priorities or policies to achieve them. These goals have thrown into relief the crises facing China as the economy slows and the population ages while the demand for and costs of education, healthcare, elder care, and other social benefits are increasing. Global ambitions and a more assertive military also compete for funding and policy priority. These challenges are compounded by the size of China's population, outdated institutions, and the reluctance of powerful elites to make reforms that might threaten their positions, prerogatives, and Communist Party legitimacy. In this volume, individual chapters provide in-depth analyses of key policies relating to these challenges. Contributors illuminate what is at stake, possible choices, and subsequent outcomes. This volume equips readers with everything they need to understand these complex developments in context.

China's Search for 'National Rejuvenation'

Domestic and Foreign Policies under Xi Jinping

Springer Nature This volume discusses a range of key domestic forces driving the current Chinese growth ranging from economic reforms to governance practices to analyze their impact and influence at home as well as on China's foreign and security policies in its near and extended neighbourhood. At the same time, the volume also looks at specific themes like technology, agricultural development, reform of state-owned enterprises and the use of Party bodies to engage in foreign propaganda work among other things to offer examples of the merging of Chinese domestic political and foreign policy interests. In the process, the book offers its readers a better idea of China's place in the world as the Chinese themselves see it and the implications over time for China, its neighbourhood and the wider world.

The China-Pakistan Axis

Asia's New Geopolitics

Oxford University Press "The Beijing-Islamabad axis plays a central role in Asia's geopolitics, from India's rise to the prospects for a post-American Afghanistan, from the threat of nuclear terrorism to the continent's new map of mines, ports and pipelines. China is Pakistan's great economic hope and its most trusted military partner; Pakistan is the battleground for China's encounters with Islamic militancy and the heart of its efforts to counter-balance the emerging US-India partnership. For decades, each country has been the other's only 'all-weather' friend. Yet the relationship is still little understood. The wildest claims about it are widely believed, while many of its most dramatic developments are hidden from the public eye. This book sets out the recent history of Sino-Pakistani ties and their ramifications for the West, for India, for Afghanistan, and for Asia as a whole. It tells the stories behind some of its most sensitive aspects, including Beijing's support for Pakistan's nuclear program, China's dealings with the Taliban, and the Chinese military's planning for crises in Pakistan. It describes a relationship increasingly shaped by Pakistan's internal strife, and the dilemmas China faces between the need for regional stability and the imperative for strategic competition with India and the USA."--

Rise and Decline and Rise of China

Searching for an Organising Philosophy

Real African Publishers Pty Ltd. Running like a red thread through this book are the manifestations of Sino-African relations dating back many centuries. In this way, *The Rise and Decline and Rise of China: Searching for an Organising Philosophy* takes forward the work MISTRA conducted on the Mapungubwe society, one of the advanced states that existed in southern Africa some 800 years ago. What makes this research report unique, though, is that the treatment of these issues has been undertaken primarily from an African perspective.

Cybersecurity in China

The Next Wave

Springer This book offers the first benchmarking study of China's response to the problems of security in cyber space. There are several useful descriptive books on cyber security policy in China published between 2010 and 2016. As a result, we know quite well

the system for managing cyber security in China, and the history of policy responses. What we don't know so well, and where this book is useful, is how capable China has become in this domain relative to the rest of the world. This book is a health check, a report card, on China's cyber security system in the face of escalating threats from criminal gangs and hostile states. The book also offers an assessment of the effectiveness of China's efforts. It lays out the major gaps and shortcomings in China's cyber security policy. It is the first book to base itself around an assessment of China's cyber industrial complex, concluding that China does not yet have one. As Xi Jinping said in July 2016, the country's core technologies are dominated by foreigners.

Toward Well-Oiled Relations?

China's Presence in the Middle East following the Arab Spring

Springer With China replacing the United States as the world's leading energy user and net oil importer, its relations with the Middle East is becoming a major issue with global implications. Horesh and his contributors set out to analyse the implications of China's growing presence in the Middle East.

Mauritania and Newly Emerging Economies in Africa Turkey and China

International Strategic Research Organization (USAK) We are delighted to introduce the latest USAK Center for Middle Eastern and African Studies report, "Mauritania and Newly Emerging Economies in Africa; Turkey and China", which evaluates Mauritanian relations with Turkey and China, two increasingly dominant actors in this country. After laying out the country's profile from various perspectives, the report chronicles the overall progress of economic and political relations between Turkey and Mauritania, as well as making a review of relations in the areas of military and national security. The question of how economic relations with Turkey can be further developed is also discussed separately. The report which lays out the various economic resources of the country that trigger the interests of emerging powers has also a separate section on China, which has continually extended its political, cultural and economic spheres of influence in all over Africa. In this sense, the report also provides a brief and valuable analysis of Mauritania's relations with China. This section is important in the sense of providing a yardstick to see in a comparative manner how much Turkey's relations with Mauritania have in fact developed.

Mapping Digital Game Culture in China

From Internet Addicts to Esports Athletes

Springer Nature In this book, Marcella Szablewicz traces what she calls the topography of digital game culture in urban China, drawing our attention to discourse and affect as they shape the popular imaginary surrounding digital games. Szablewicz argues that games are not mere sites of escape from Real Life, but rather locations around which dominant notions about failure, success, and socioeconomic mobility are actively processed and challenged. Covering a range of issues including nostalgia for Internet cafés as sites of youth sociality, the media-driven Internet addiction moral panic, the professionalization of e-sports, and the rise of the self-proclaimed loser (diaosi), Mapping Digital Game Culture in China uses games as a lens onto youth culture and the politics of everyday life in contemporary China. Based on ethnographic fieldwork conducted between 2009 and 2015 and first-hand observations spanning over two decades, the book is also a social history of urban China's shifting technological landscape.

Global Trends 2030

Alternative Worlds : a Publication of the National Intelligence Council

U.S. Government Printing Office This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

The Coming Population Crash

And Our Planet's Surprising Future

Beacon Press Chronicles nearly two hundred years of demographic issues, beginning with efforts to contain the demographic explosion, from the early environmental movement's racism to coercive family-planning policies in China and India.

Video Game Policy

Production, Distribution, and Consumption

Routledge This book analyzes the effect of policy on the digital game complex: government, industry, corporations, distributors, players, and the like. Contributors argue that digital games are not created nor consumed outside of the complex power relationships that dictate the full production and distribution cycles, and that we need to consider those relationships in order to effectively "read" and analyze digital games. Through examining a selection of policies, e.g. the Australian government's refusal (until recently) to allow an R18 rating for digital games, Blizzard's policy in regards to intellectual property, Electronic Arts' corporate policy for downloadable content (DLC), they show how policy, that is to say the rules governing the production, distribution and consumption of digital games, has a tangible effect upon our understanding of the digital game medium.

The Invisible Wall of China

Vij Books India Pvt Ltd The disintegration of Soviet Union in 1991, led to five new countries gaining independence in Central Asia. The Muslims, a predominant majority in the region, had faced religious suppression under the rule of the communist. Thus, began an era where Islam was practiced with larger freedom. However, the governance of most of these states was with the autocratic leaders who had grown under the influence of communism. Therefore, it was but natural for them to soon impose religious restrictions. This close tussle in almost all these newly raised states, led to emergence of some radical groups. Over the years, the influence of such groups has spread to the extent of posing a threat to the stability of country like China. A foothold for radical groups in China is a possibility as its western province of Xinjiang has historical links with Central Asia and was part of Turkistan. Today Xinjiang due to its ethnic violence between the Uyghur Muslims and the Han Chinese is acknowledged to be quite volatile. The link of Uyghur's with Central Asia has further compounded China problem. Apart from the extremists, China is also concerned regarding the growing American presence within the region of Central Asia. To negate the American influence and restrain any turbulence on its western province supported by the extremist of Central Asia, there is a need for China to review its external and internal policies which will steer it towards a more politically and economically stable nation. Failing to addresses such simmering issues the nation will be trapped within the folds of 'THE INVISIBLE WALL OF CHINA'.

Interdisciplinary Advancements in Gaming, Simulations and Virtual Environments: Emerging Trends

Emerging Trends

IGI Global Gaming has long been a means for humans to share knowledge, learn new concepts, and escape the constraints of reality. *Interdisciplinary Advancements in Gaming, Simulations and Virtual Environments: Emerging Trends* investigates the role of games and computer-mediated simulations in a variety of environments, including education, government, and business. Exploring psychological, social, and cultural implications of games and simulations, as well as policies related to their design and development, this reference aims to support the work of researchers in this growing field, as well as bridge the gap between theory and practice in the application of electronic games to everyday situations.

Videogame Sciences and Arts

11th International Conference, VJ 2019, Aveiro, Portugal, November 27–29, 2019, Proceedings

Springer Nature This book constitutes the refereed proceedings of the 11th International Conference on Videogame Sciences and Arts, VJ 2019, held in Aveiro, Portugal, in November 2019. The 20 full papers presented were carefully reviewed and selected from 50 submissions. They were organized in topical sections named: Games and Theories; Table Boards; eSports; Uses and Methodologies; Game Criticism.

The Long Game

China's Grand Strategy to Displace American Order

Oxford University Press In *The Long Game*, Rush Doshi demonstrates that China is in fact playing a long, methodical game to replace America as a global hegemon. Drawing from a rich base of Chinese primary sources, including decades worth of party documents and memoirs by party leaders, he traces the basic evolution of Chinese strategy, showing how it evolved in response to changes in US policy and the US's position in the world order.

China's Quest for Great Power

Ships, Oil, and Foreign Policy

Naval Institute Press This book addresses three important facets of China's modern development. First is the ongoing modernization of the People's Liberation Army Navy (PLAN). The Chinese navy has grown from a relatively small, backward force in the 1980s into a capable twenty-first century maritime power. The PLAN now deploys around the world and includes nuclear-powered submarines, the first of several aircraft carriers, modern guided missile destroyers and frigates, and the world's most formidable force of seagoing cruise and ballistic missiles. This modern, growing navy is intended in significant part to undergird China's global search for energy sources and security. Beijing's determination to maintain its historic economic growth depends on energy security. These two national priorities—a navy capable of defending China's national security and economic interests and secure energy resources—come together to define and support Chinese foreign policy. This book addresses these three in both global and Asian contextual terms, with special emphasis on relations between China and the United States.

Routledge Handbook on China–Middle East Relations

Routledge This handbook brings together a mix of established and emerging international scholars to provide valuable analytical insights into how China's growing Middle East presence affects intra-regional development, trade, security, and diplomacy. As the largest extra-regional economic actor in the Middle East, China is the biggest source of foreign direct investment into the region and the largest trading partner for most Middle Eastern states. This portends a larger role in political and security affairs, as the value of Chinese assets combined with a growing expatriate population in the region demands a more proactive role in contributing to regional order. Exploring the effect of these developments, the expert contributors also consider the reverberations in great power politics, as the United States, Russia, India, Japan, and the European Union also have considerable interests in the region. The book is divided into four sections: • Historical and policy context • State and regional case studies • Trade and development • International relations, security, and diplomacy. This volume is an essential reference for scholars and policy-makers in the fields of international relations, political sociology, international political economy, and foreign policy analysis. Area studies specialists in Middle Eastern Studies, China Studies, and East Asian Studies will also find it an invaluable resource.

Social Media in Industrial China

UCL Press 'Life outside the mobile phone is unbearable.' Lily, 19, factory worker. Described as the biggest migration in human history, an estimated 250 million Chinese people have left their villages in recent decades to live and work in urban areas. Xinyuan Wang spent 15 months living among a community of these migrants in a small factory town in southeast China to track their use of social media. It was here she witnessed a second migration taking place: a movement from offline to online. As Wang argues, this is not simply a convenient analogy but represents the convergence of two phenomena as profound and consequential as each other, where the online world now provides a home for the migrant workers who feel otherwise 'homeless'. Wang's fascinating study explores the full range of preconceptions commonly held about Chinese people – their relationship with education, with family, with politics, with 'home' – and argues why, for this vast population, it is time to reassess what we think we know about contemporary China and the evolving role of social media.

China-India Relations

Geo-political Competition, Economic Cooperation, Cultural Exchange and Business Ties

Springer Nature This book examines India-China relations throughout history as well as in the context of current business cooperation and competition. It also explores geo-political and societal factors, such as religion or class models, that influence and shape bilateral relations, and provides thorough analyses and comparisons of networks between the two countries. This book will appeal to researchers and graduate students interested in India-China relations as well as Chinese and Indian business ties.
