Globalization The Key Concepts *Taylor & Francis* For the first time in human history, the vast majority of the world's population is connected through trade, travel, production, media and politics. Ours is an era of ubiquitous mobile communication, economic outsourcing, mass migration and imported consumer goods. At the same time, people everywhere are concerned to keep their identities rooted and sense of place in the face of momentous change. This new edition of Thomas Hylland Eriksen's concise and engaging landmark textbook outlines the main debates and controversies around globalization, and develops a unique perspective to show how globalization is an inherently double process, taking place both from above and below. Each chapter is supported by boxed case studies and bullet points summarizing the core information, suggestions for further reading, and essay and discussion questions, making this the ideal guide for both the classroom and independent study. Focusing on key concepts of globalization and drawing on international examples, this book is essential for anyone wishing to understand the fundamental processes underlying the contemporary world and the consequences these have for all of us. **Globalization The Key Concepts** *A&C Black* Globalization: The Key Concepts presents an accessible and provocative guide to the way we live now. **Globalization: The Key Concepts** *Routledge* Viewed as a destructive force or an inevitability of modern society, globalization is the focus of a multitude of disciplines. A clear understanding of its processes and terminology is imperative for anyone engaging with this ubiquitous topic. Globalization: the Key Concepts offers a comprehensive guide to this cross-disciplinary subject and covers concepts such as: homogenization neo-Liberalism risk knowledge society time-space compression reflexivity. With extensive cross-referencing and suggestions for further reading, this book is an essential resource for students and interested readers alike as they navigate the literature on globalization studies. **The Sociology of Globalization** *Polity* This accessible and wide-ranging book demonstrates the distinctive insights that sociology has to bring to the study of globalization. Taking in the cultural, political and economic dimensions of globalization, the book provides a thorough

introduction to key debates and critically evaluates the causes and consequences of a globalizing world. In addition to topics such as America's changing position in the world under President Obama, the growth of China as a global power and anti-globalization movements, Martell brings to the discussion other aspects of world affairs that sociologists have sometimes not focused on so much. In doing so, he underlines the importance of economic motivations and structures, and shows how power, inequality and conflict are major factors in globalization. The book argues that globalization offers many opportunities for greater interaction and participation in societies throughout the world, for instance through the media and migration, but also has dark sides such as war and nuclear proliferation, global poverty, climate change and financial crisis. This book will be an ideal companion to students across the social sciences taking courses that cover globalization, and the sociology of globalization in particular.

Each chapter also provides some carefully selected recommendations for further reading for the thinkers discussed. Europe and the People Without History *Univ of California Press* 'The intention of this work is to show that European expansion not only transformed the historical trajectory of non-European societies but also reconstituted the historical accounts of these societies before European intervention. It asserts that anthropology must pay more attention to history.' (AMAZON)

Globalization and Culture *John Wiley & Sons* Globalization is now widely discussed but the debates often remain locked within particular disciplinary discourses. This book brings together for the first time a social theory and cultural studies approach to the understanding of globalization. The book starts with an analysis of the relationship between the globalization process and contemporary culture change and goes on to relate this to debates about social and cultural modernity. At the heart of the book is a far-reaching analysis of the complex, ambiguous "lived experience" of global modernity. Tomlinson argues that we can now see a general pattern of the dissolution between cultural experience and territorial location. The "uneven" nature of this experience is discussed in relation to first and third world societies, along with arguments about the hybridization of cultures, and special role of communications and media technologies in this process of "deterritorialization". *Globalization and Culture* concludes with a discussion of the cultural politics of cosmopolitanism. Accessibly written, this book will be of interest to second year undergraduates and above in sociology, media studies, cultural and communication studies, and anyone interested in globalization.

Globalization and Literary Studies *Cambridge University Press* This book provides a history of the way in which literature not only reflects, but actively shapes processes of globalization and our notions of global phenomena. It takes in a broad sweep of history, from antiquity, through to the era of imperialism and on to the present day. Whilst its primary focus is our own historical conjuncture, it looks at how earlier periods have shaped this by tracking key concepts that are imbricated with the concept of globalization, from translation, to empire, to pandemics and environmental collapse. Drawing on these older themes and concerns, it then traces the germ of the relation between global phenomena and literary studies into the 20th and 21st centuries, exploring key issues and frames of study such as contemporary slavery, the digital, world literature and the Anthropocene.

Understanding Cultural Globalization *Polity* Paul Hopper leads the reader through the varied issues associated with globalization and culture, including

deterritorialization, cosmopolitanism, cultural hybridization and homogenization as well as claims that aspects of globalization are provoking cultural resistance.

Philosophy of Globalization *Walter de Gruyter GmbH & Co*

KG Not so long ago, it seemed the intellectual positions on globalization were clear, with advocates and opponents making their respective cases in decidedly contrasting terms. Recently, however, the fronts have shifted dramatically. The aim of this publication is to contribute philosophical depth to the debates on globalization conducted within various academic fields – principally by working out its normative dimensions. The interdisciplinary nature of this book's contributors also serves to scientifically ground the ethical-philosophical discourse on global responsibility.

Though by no means exhaustive, the expansive scope of the works herein encompasses such other topics as the altering consciousness of space and time, and the phenomenon of globalization as a discourse, as an ideology and as a symbolic form.

Understanding Globalization The Social Consequences of Political,

The book begins by examining the roots of the recent global financial crisis, looking at the roles of inflation, the housing crisis, Wall Street, policy makers, and more. It also explores the varying impact of globalization—from democratization and equality in some countries to destabilization and inequality in others. The fifth edition of *Understanding Globalization* is a compelling and current introduction to the myriad influences of globalization in our lives.

Investing in Cultural Diversity and

Intercultural Dialogue *UNESCO*

This report analyses all aspects of cultural diversity, which has emerged as a key concern of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and non-governmental organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural

diversity. Emphasizing the importance of cultural diversity in different areas (languages, education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community. **Globalisation - opportunity or thread?** *GRIN Verlag Seminar paper* from the year 2006 in the subject Politics - International Politics - Region: Western Europe, grade: 1,8, Dublin Institute of Technology, course: Int. Political Economy, 12 entries in the bibliography, language: English, abstract: Stocks are traded worldwide, mails are sent from Australia to Europe and forwarded to the US, the head of the catholic church, Pope Benedict XVI visits Turkey and has a meeting with the head of the Turkish government. 1 Our world has become a so-called "global village" where everyone can interact with everyone else within seconds or even realtime. Links between countries, companies and even individuals are no longer limited to borders, religion or attitudes. The following essay, written by Michael Krause, Erasmus student at the Dublin Institute of Technology, describes how globalization is affecting nowadays life in different fields of society and shows the positive as well as negative influence this global transformation has on lesser developed nations. [...] **Globalization and Its Discontents** *Penguin UK* From Nobel laureate Joseph Stiglitz, *Globalization and its Discontents* is the bestselling exposé of the all-powerful organizations that control our lives. Joseph Stiglitz's landmark book lifted the lid on how globalization was hurting those it was meant to help. Many of its predictions came true, and it became a touchstone in the debate. This major new edition looks afresh at the continuing mismanagement of globalization, and how it has led to our current political and economic discontents. Globalization can still be a force for good, Stiglitz argues. But the balance of power has to change. Here he offers real, tough solutions for the future. 'A massively important political as well as economic document ... we should listen to him urgently' Will Hutton, *Guardian* 'Stiglitz is a rare breed, an heretical economist who has ruffled the self-satisfied global establishment that once fed him. *Globalization and its Discontents* declares war on the entire Washington financial and economic establishment' Ian Fraser, *Sunday Herald* 'Gripping ... this landmark book shows him to be a worthy successor to Keynes' Robin Blackburn, *Independent*

Capturing the Ineffable An Anthropology of Wisdom *University of Toronto Press* Wisdom transcends knowledge but is only meaningful and relevant in context. This book explores the tensions and paradoxes associated with the ineffability of wisdom in a range of social and cultural contexts. **Globalisation and Seed Sovereignty in Sub-Saharan Africa** *Springer* "It is my expectation that respect for the critical importance of seed sovereignty will in due course be recognised by member states of the United Nations to be as critical to global peace and security as the UN Charter demands in respect of State sovereign equality, justice, human rights and economic and social wellbeing for all peoples."—Denis J. Halliday, UN Assistant Secretary-General 1994-98 "A constructive contribution to our understanding of what is going wrong and what can go right in the complex area of seed sovereignty."—Dervla Murphy, renowned travel writer and adventurer "Keeping seed diversity alive is the secret ingredient, not just for the good, nutrient-dense food that

every cook, gardener and farmer/producer needs, but for strengthening our resilience in the face of multiple environmental threats. This compelling and timely book helps us to understand what we are up against and how we can overcome it."—Darina Allen, internationally renowned cook, founder of Ballymaloe Cookery school and President of the East Cork Convivium of Slow Food

This book studies the relationship between globalisation and seed sovereignty in Sub-Saharan Africa. It provides comparative case studies of the most recent Kenyan and Ethiopian seed laws, as well as a study of seed sovereignty 'on the ground' in a locality within Ethiopia. Based on extensive fieldwork, it identifies the interests and motivations of transnational seed corporations, global philanthropic organisations, state actors, and local farmers. It finds significant differences in the wording of seed laws and the exercise of seed sovereignty, applying theories of globalisation to help us better understand these varied outcomes. It shows that seed sovereignty has the potential to be shared between local, national, regional, and global authorities, but in different ways in different countries and localities. In the face of what might sometimes appear to be unstoppable global forces, these findings suggest that the exercise of seed sovereignty can be transformed even in a highly globalised world.

Handbook of Globalisation and Development *Edward Elgar Publishing* Characterised by conceptual diversity, the Handbook of Globalisation and Development presents contributions from prominent international researchers on all aspects of globalisation and carefully considers their role across a whole host of development processes. The Handbook is structured around seven key areas: international trade, international production, international finance, migration, foreign aid, a broader view, and challenges. Adopting a multi-disciplinary approach, the section on 'a broader view' delves into dimensions of globalisation and development that go beyond the mere economic, such as: culture, technology, health, and poverty. Carefully crafted, the chapters herein offer a rigorous and comprehensive assessment of the available research to date and provide an assessment of policy options across all areas considered.

The Globalization Paradox Why Global Markets, States, and Democracy Can't Coexist *Oxford University Press* For a century, economists have driven forward the cause of globalization in financial institutions, labour markets, and trade. Yet there have been consistent warning signs that a global economy and free trade might not always be advantageous. Where are the pressure points? What could be done about them? Dani Rodrik examines the back-story from its seventeenth-century origins through the milestones of the gold standard, the Bretton Woods Agreement, and the Washington Consensus, to the present day. Although economic globalization has enabled unprecedented levels of prosperity in advanced countries and has been a boon to hundreds of millions of poor workers in China and elsewhere in Asia, it is a concept that rests on shaky pillars, he contends. Its long-term sustainability is not a given. The heart of Rodrik's argument is a fundamental 'trilemma': that we cannot simultaneously pursue democracy, national self-determination, and economic globalization. Give too much power to governments, and you have protectionism. Give markets too much freedom, and you have an unstable world economy with little social and political support from those it is supposed to help. Rodrik argues for smart globalization, not maximum globalization.

For organizations serving business schools, it will be a catalyst for action that elevates and improves business schools' capabilities. Readers will be left with the conviction that great opportunities exist for business schools to move from keeping pace with the sweeping changes of globalization, to leading the way. **Transnational Media Concepts and Cases** *John Wiley & Sons* A broad and accessible introduction to national and transnational media *Transnational Media: Concepts and Cases* provides a clear and engaging overview of media communication from a global and a region-based perspective. Mittelman finds that globalization is hardly a unified phenomenon but rather a syndrome of processes and activities: a set of ideas and a policy framework. More specifically, globalization is propelled by a changing division of labor and power, manifested in a new regionalism, and challenged by fledgling resistance movements. The author argues that a more complete understanding of globalization requires an appreciation of its cultural dimensions. From this perspective, he considers the voices of those affected by this trend, including those who resist it and particularly those who are hurt by it. *The Globalization Syndrome* is among the first books to present a holistic and multilevel analysis of globalization, connecting the economic to the political and cultural, joining agents and multiple structures, and interrelating different local, regional, and global arenas. Mittelman's findings are drawn mainly from the non-Western worlds. He provides a cross-regional analysis of Eastern Asia, an epicenter of globalization, and Southern Africa, a key node in the most marginalized continent. The evidence shows that while offering many benefits to some, globalization has become an uneasy correlation of deep tensions, giving rise to a range of alternative scenarios. **Globalization Dimensions & Impacts Global Studies Vol. 2** *IJOPEC Publication* The concept of globalisation is essentially about the increasing economic, political, cultural and technological intergradation with increasing speed, depth and breadth. Globalisation has become a buzz word in many academic debates, especially, amongst those who use the concept to describe the spread of global capitalism, market, the declining role of the state, and globalisation of civil society. (Harvey, 2005; Harmon, 2009; Chomsky 1999; Saad-Filho and Johnston 2004). In short, Harvey defines neoliberalism as: . . . a theory of political, economic practices that proposes that human well-being can best be advanced by liberating individual entrepreneurial freedoms and skills within an institutional framework characterized by strong private property rights, free markets and free trade. The role of the state is to create and preserve an institutional framework appropriate to such practices. The state has to guarantee, for example, the quality and integrity of money. It must also set up those military, defence, police and legal structures and functions required to secure private property rights and to guarantee, by force if need be, the proper functioning of markets. Furthermore, if markets do not exist (in areas such as land, water, education, health care, social security, or environmental pollution) then they must be created, by state action if necessary (Harvey 2005:2). This has become an

all-encompassing term for differing economic and political projects. What essentially new liberalism has in common is that the state should be minimal, as the competition of the market will bring economic efficiency and choice. The crisis of capitalism in the late 1970s and 1980s has opened the gap for neoliberal ideas to have resonance as a solution to global capitalism. Despite their political, historical, geographical and economic differences, nearly every country in the world, especially, in the global south, has implemented neoliberal policies in some form. The policies have become an increasingly real alternative to over-come the predicament of the world economy. With the demise of Soviet ideology, the advocates of the free market liberalism in the world, particularly, in the USA, saw this as an opportunity to reassert their power globally. Hence, the globalisation of the world economy is claimed to 'serve the great majority of the world's people', and it will liberate the poor countries because they will have 'free domestic and international trade and more open financial markets' (Wade: 2004:38). At the core of globalisation lies the belief that a country must promote the private sector as the primary engine of its economic growth by shrinking the size of its state bureaucracy; increasing exports; privatising state-owned industries and utilities and deregulating capital markets (Freidman, 1999). The process that led to claim that the state, 'that artefact of the eighteenth and nineteenth centuries - has begun to crumble' (Ohmea, 1995: 7). With the international system, the borders are no longer necessary, and the international commerce would become free from the cumbersome constraints of state interference. However, the reality after nearly three decades of globalisation have not been drastically different from much of the world, the international system has yet to witness universalization of democracy or wealth. In fact, 'one of the consequences of globalisation appears to have been the poor growth and polarisation of wealth' (Morady & Siriner, 2011). Whilst 'the free market ideology that has dominated the public discourse as it puts emphasis on the dominant criterion of maximising profit through the private sector', a more fundamental question is, 'whether the market will be able to provide all the social, economic and political needs of the world's people' (Morady & Siriner, 2011), when the "bare logic" of capitalism is pitted against the cultural values of human experience (Castells, 2000). Globalisation, even if it's intended to meet basic economic, political and social needs of ordinary people, it has failed to deliver in much of the world. Indeed, this is noticeable in the area of gender equality. Their opposition to the globalisation has also been considerable with different social movements such as 'anti Capitalism' and 'anti war movement' have challenged the neoliberal agenda around the world. They have demonstrated their resentment in the process of economic, political and social unevenness, inequality between poor and rich, men and women, and the power of international organisations. The organisation of the current book comprises different articles dealing with various domestic, regional, and global economics, political and social issues. This book is mainly focusing on Turkey, but different authors have used different frameworks with empirical studies. We hope to provide an assessment of globalisation and its impact within the international system. The first article by Evren Denктаş and Bengü Doğangün Yasa is an attempts to analyse Karl Marx and Max Weber's work of social classes and its role in the economy and society. The article will argue that the middle class continues to play vital economic and political role.

even though there has significant changes since globaliza- tion, especially in the developing countries. The current economic complexity has become centre of attention for economic sociologists. Consequently, Karl Polanyi's concept of "(Dis)embeddedness". Gülten Dursun's paper will argue that the capitalist mode of production and distribution is within the field of economic system. Hence, as Polanyi argues the economy is im- mersed in social relations, i.e., it is not outside of this or independent. Sema Yılmaz Genç will investigate Ibni Khaldun's economic contribution and his relevance in the contemporary globalized world. It will demonstrate that even though his work was articulated seven centuries ago, it continues to influence the modern academic literatures. Hilal Yıldız and Keremet Shaiymbetova investigate the relationship between in- come inequality and economic growth through empirical studies of BRIC (Brazil, Russia, India, China) countries. Employing The Kuznets Curve they show in the latter stages of development, transition from agriculture towards industrialisation will lead to a change in the direction of income - inequality relation. In the first stage, with an increase in income, inequality will increase, but in the latter stages of industrialisation, with increasing income, the inequality level will decrease. Figen Büyükakın, focuses on credibility of Central Bank of Republic of Turkey to identify the importance of reliability in the effectiveness of monetary policy. In the event that macroeconomic dynamics are out of balance in an economy, monetary policies cannot provide sufficient confidence or control inflation. Therefore, pos- sessing credibility for policy makers is vital in order to solve problems. She assesses CBRT's credible monetary policy strategy performance in Turkish Economy in the last decade. Zişan Kılıçarslan assesses the importance of inflation targeting strategy in the Turkish economy. Using the Chow and Quant-Andrews structural break tests, she determined that the inflation targeting strategy applied in Turkey since 2002 had caused a structural break on the determined basic macroeconomic variables such as the consumer price index, exchange rate basket, budget deficit/GDP ratio, cur- rent deficit/GDP ratio and GDP growth ratio. The inflation targeting strategy is used with the aim of creating sustainability and permanence in price stabilization while fighting against inflation in the 1990's. İsmail Şiriner and Keremet Shayimbetova demonstrate the impact of globalisation on the Great Financial Crisis of 2008 and the financial stability. By focusing on CBRT's monetary policy approaches since the 2007 crisis, they argue that the fi- nancial stability of the system requires an effective monetary policy for the stability of the economy as a whole. Murat Aydın, looks at the role of state in local development in the period after glo- balization in Turkey. With the 2008 economic crises, expansion of service indus- tries, structural unemployment, and decentralization have increased the responsi- bility of local development agencies. The state has continued to be the major actor, but working alongside of the local agencies; they have been responsible to regulate and implement policies to suit the market. Mustafa Doğan also looks at the local development issue, yet assessing the role of ecomuseums in Turkey. Whilst the principles of sustainable local development are now widely implemented across the world, at the same time are protecting cultural and natural assets. The article will provide an overview on ecomuseums: that they are focused on a specific place or 'territory', and on the relationship between the population and their environment, culture and local history. He will

argue that ecomuseums have been utilized as a major means of promoting sustainable development in many rural areas of the world by conserving natural, historical and sociocultural resources of a locality, whilst recognising a place's potential to provide low-level tourism and economic/social opportunities. The empirical work of the paper is based on ecomuseum and social-economic development in Boğatepe village, in the province of Kars in Turkey. One of the consequences of globalisation is migration and gender as it is becoming a major socioeconomic study. The feminisation of migration as defining the number of women at international labour migration, has been increasing in recent years. Nilay Etiler and Kuvvet Lordoğlu will assess the health problems of recent female migrants. They will argue that women migrants, are mostly employed in jobs that are appropriate to their gender roles such as housework or childcare. Whilst, the health of migrants as a whole deteriorate because of poor living and working conditions, the female workers suffer more, especially in the area of mental health. Ayhan Orhan focuses on the property rights of natural Resources in a globalised world. He examines the rapid change of natural resource distribution in since the 1990's, which has added a new dimension to the concept of property rights. Hence, he argues that natural resources and property rights could not be treated independently from Multi National Companies or the states. As a last contributor of this volume of globalization, Farhang Morady argues that Iran's strategy to balance between the US on the one hand, and China, Russia and India on the other, was a failure. According his determinations, the end of the Cold War and the emergence of new independent republics in Central Asia offered Iran the opportunity to become a vital actor in the geopolitics of the region. Iran was seen as a possible corridor between Central Asia, the Persian Gulf, and the Indian Ocean Region (IOR). Struggling against US policy of strategic isolation, Iran made concerted efforts to break out of it by cultivating closer ties with non-Western powers. It used diplomacy, energy, and trade for the purpose of balancing its foreign relations. His paper will assess the strategic ambitions of Iran as a regional power and the degree of its success in combating Western imposed sanctions and the US military threat over the disputed nuclear programme. This 'balancing against the West' was the dominant approach during the Conservative presidency of Mahmoud Ahmadinejad. In the paper he figures out that it reflects a changed approach to serving Iran's interest by working with, and not against, the West. Due to nuclear détente, growing strategic convergence with the US in Iraq and Afghanistan, and the American shift in emphasis to the Pacific, Iran has an invaluable opportunity to re-emerge as a crucial member in the Indian Ocean Region. We hope this addition of globalisation will provide some ideas to inspire academics and students not only to what the world is facing, but some solutions as well. **Handbook of International Social Work Human Rights, Development, and the Global Profession** Oxford University Press, USA Global knowledge is increasingly essential for all aspects of social work.
