Department of Defense Dictionary of Military and Associated Terms **Plagued Australia's two years of hell — the inside story** *Pantera Press* This is the inside story of Australia's two years of hell, when the country was besieged by crisis after crisis, and a rolling series of challenges and setbacks. Much of what took place behind the scenes will astonish the public. **Plagued** reveals how the critical decisions were actually made, decisions that will forever change the nation's place in the world. In early 2020, Covid-19 breached Australian shores, triggering twin crises: health and economic. The nation had not endured trials of this scale and impact since the Spanish flu and the Great Depression. Simon Benson and Geoff Chambers - two of Australia's top political journalists - were granted exclusive access to the crucial machinations of government at the country's highest levels, not just within the corridors of power but also behind doors normally sealed. They delve into the depths of power and the cabinet room to reveal how decisions that would change the course of Australian history were actually made, but which did not prevent the federal government's crushing defeat in the 2022 election. **Plagued** chronicles a period of upheaval punctuated by the pandemic, natural disasters and political scandals within a world becoming more precarious with the rise of autocracy. It is a story of profound political intrigue, one in which Australia, its politicians, public servants and institutions were tested like in no other period in modern memory. **Raven Rock The Story of the U.S. Government's Secret Plan to Save Itself--While the Rest of Us Die** *Simon and Schuster* The author explores his belief in "the government's secret plans to survive a catastrophic attack on US soil--even if the rest of us die--a roadmap that spans from the dawn of the nuclear age to today"--Provided by publisher. **Studies in Law, Politics and Society** *Emerald Group Publishing* The articles in this volume of **Studies in Law, Politics, and Society** cover an exciting and diverse range of topics, from immigration and human rights policies to same-sex marriage and capital punishment debates. **The Justice Project** (émersion: Emergent Village resources for communities of faith) *Baker Books* Justice and the call for change are in the air. Whether it's extreme poverty, human rights, racism, or the Middle East, news outlets bombard us with stories about the need for justice in the world. But how are Christians to respond to these stories and the conditions to which they refer? Here's help. Editors Brian McLaren, Elisa Padilla, and Ashley Bunting Seeber have amassed a collection of over 30 brief chapters by some of the most penetrating thinkers in the justice conversation, including René Padilla, Peggy Campolo, Will and Lisa Samson, Sylvia Keesmaat, Bart Campolo, Lynne Hybels, Tony Jones, and Richard Twiss. Divided into sections, "God of Justice," "Book of Justice," "Justice in the USA," "Just World," and "Just Church," The Justice Project invites readers to deepen their understanding of the pressures our world faces and to take up the challenge of alleviating them. Never has the world been in greater need of Christians who "do justice, love mercy, and walk humbly with God." This resource will help them do just that. **Global Trends 2040 A More Contested World** *Cosimo Reports* "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) **Global Trends 2040-A More Contested World (2021)**, released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading. **The Eagle and the Dragon Globalization and European Dreams of Conquest in China and America in the Sixteenth Century** *John Wiley & Sons* In this important new book the renowned historian Serge Gruzinski returns to two episodes in the sixteenth century which mark a decisive stage in global history and show how China and Mexico experienced the expansion of Europe. In the early 1520s, Magellan set sail for Asia by the Western route, Cortes seized Mexico and some Portuguese based in Malacca dreamed of colonizing China. The Aztec Eagle was destroyed but the Chinese Dragon held strong and repelled the invaders - after first seizing their cannon. For the first time, people from three continents encountered one other, confronted one other and their lives became entangled. These events were of great interest to contemporaries and many people at the time grasped the magnitude of what was going on around them. The Iberians succeeded in America and failed in China. The New World became inseparable from the Europeans who were to conquer it, while the Celestial Empire became, for a long time to come, an unattainable goal. Gruzinski explores this encounter between civilizations that were different from one another but that already fascinated contemporaries, and he shows that our world today bears the mark of this distant age. For it was in the sixteenth century that human history began to be played out on a global stage. It was then that connections between different parts of the world began to accelerate, not only between Europe and the Americas but also between Europe and China. This is what is revealed by a global history of the sixteenth century, conceived as another way of reading the Renaissance, less Eurocentric and more in tune with our age. **Department of Defense Law of War Manual The Department of Defense Law of War Manual** belongs on the shelf of every researcher, journalist, lawyer, historian, and individual interested in foreign affairs, international law, human rights, or national security. The Manual provides a comprehensive, authoritative interpretation of the law of war for the U.S. Department of Defense. **Customary International Humanitarian Law** *Cambridge University Press* **Customary International Humanitarian Law, Volume I: Rules** is a comprehensive analysis of the customary rules of international humanitarian law applicable in international and non-international armed conflicts. In the absence of ratifications of important treaties in this area, this is clearly a publication of major importance, carried out at the express request of the international community. In so doing, this study identifies the common core of international humanitarian law binding on all parties to all armed conflicts. **American Volunteer Police: Mobilizing for Security** *CRC Press* Today, it is estimated there are over 200,000 volunteers in police work throughout the United States. Although the need for such volunteers has never been greater, there is a lack of published materials regarding the nature of volunteer police work and how qualified citizens may augment police services. **American Volunteer Police: Mobilizing for Sec Defenseless Under the Night The Roosevelt Years and the Origins of Homeland Security** *Oxford University Press* "As the bombs fell on Guernica and the Blitz terrorized Britons--even before Pearl Harbor--Americans watched and worried about attacks on their homeland. In May 1941, FDR established an Office of Civilian Defense to protect Americans from foreign and domestic threats. In this book, Matthew Dallek narrates the history of the Office of Civilian Defense. He uses the development of the precursor of "homeland security" as a way of examining constitutional questions about civil liberties; the role of government in propogandizing to its own citizens; competing visions among liberals and conservatives for establishing a plan to defend America; and federal, state, and local responsibilities for citizen protection. Much of the dramatic tension lies in the preparation of communities against attack and their fears of Japanese invasion along the Pacific Coast and Nazi invasion. So too there was a clash of visions between LaGuardia and Eleanor Roosevelt. The mayor argued that the OCD's focus had to be on preparing the country against German and Japanese attack, including conducting blackout drills, preparing evacuation plans, coordinating emergency medical teams, and protecting industrial plants and transportation centers. The First Lady believed the OCD should also promote social justice for African Americans and women and raise civilian morale. Their clashes frustrated FDR, who pressured them both to resign in 1942, and led to the appointment of James Landis, commissioner of the SEC, who created a semi-military operation that involved grassroots citizen mobilization, including planting Victory Gardens and building the Civil Air Patrol. It was the largest volunteer program in World War II America."--Provided by publisher. **2004 Logistics Demensions vol1** *DIANE Publishing* **An Oral and Documentary History of the Darfur Genocide** *ABC-CLIO* **Maritime Gray Zone Operations Challenges and Countermeasures in the Indo-Pacific** *Taylor & Francis* This book addresses the issues raised by Chinese and North Korean maritime 'gray zone' activities in the Indo-Asia-Pacific region. For years, China has been harassing its neighbors in South China Sea and East China Sea, employing both coast guard and maritime militia forces, in the name of safeguarding Chinese sovereignty. This behavior is frequently characterized as constituting 'gray zone' activity. As the term suggests, this refers to a state of conflict that falls between peace and war. Interestingly, the Yellow Sea, which is geographically much closer to China than South China Sea or East China Sea, has been comparatively quiet. However, there is a danger that the PRC has the capability to replicate its gray zone activities in this area. Worse, North Korea has also been engaging in carefully-calibrated provocations there. This book addresses pressing questions about these activities and offers: (1) a conceptual framework to understand maritime gray zone operations and Beijing and Pyongyang's approach, with an unprecedented focus on the Yellow Sea; (2) a comprehensive, fully updated fleet force structure for the PRC's Coast Guard, together with projections regarding how the Coast Guard is likely to develop in the future; (3) an extensive organizational analysis of the PRC's Maritime Militia that surveys the many units relevant to Yellow Sea operations, some revealed publicly for the first time; and (4) a detailed assessment of North Korean maritime 'gray zone' activities. This book will be of great interest to students of naval strategy, maritime security, Asian politics, and international security. **Global Trends 2030 Alternative Worlds** *Createspace Independent Publishing Platform* This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included in Global Trends 2030, including: a review of the four previous Global Trends reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible the impact on future international relations. **Table of Contents: Introduction 1 Megatrends 6 Individual Empowerment 8 Poverty Reduction 8 An Expanding Global Middle Class 8 Education and the Gender Gap 10 Role of Communications Technologies 11 Improving Health 11 A MORE CONFLICTED IDEOLOGICAL LANDSCAPE 12 Diffusion of Power 15 THE RISE AND FALL OF COUNTRIES: NOT THE SAME OLD STORY 17 THE LIMITS OF HARD POWER IN THE WORLD OF 2030 18 Demographic Patterns 20 Widespread Aging 20 Shrinking Number of Youthful Countries 22 A New Age of Migration 23 The World as Urban 26 Growing Food, Water, and Energy Nexus 30 Food, Water, and Climate 30 A Brighter Energy Outlook 34 Game-Changers**

The Army Lawyer Joint Force Quarterly JFQ. South Africa's Post-Apartheid Military Lost in Transition and Transformation *Springer Nature* This timely book examines how the South African National Defence Force has adapted to the country's new security, political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for 'defence in a democracy'? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues, such as: · the effect of integrating former revolutionary soldiers into a professional armed force · the effect of affirmative action on meritocracy, recruitment and retention · military veterans, looking at the difficulties they face in reintegrating back into society and finding gainful employment · gender equality and mainstreaming · the rise of military unions and why a confrontational, instead of a more corporatist approach to labour relations has emerged · HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become 'lost in transition and transformation', spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence, security and civil-military relations of countries around the world.

Food Power The Rise and Fall of the Postwar American Food System *Oxford University Press* There is a widespread assumption that the American food system after World War II was transformed-toward an increasingly industrialized production of crops, more processed foods, and diets higher in fat, sugar, and calories-as part of a unified system. In this book, Bryan McDonald brings together the history of food, agriculture, and foreign policy to explore how food was deployed in the first decades of the Cold War to promote American national security and national interests, a concept referred to as food power. In the postwar years, Americans struggled to understand how an unprecedented abundance of food could be used to best advance U.S. goals and values. Was food a weapon, a commodity to be valued and exchanged through markets, or a substance to be provided to those in need? McDonald traces different visions of food power and shows how food formed an essential part of America's postwar modernization strategy and its vision of what it meant to be a stable, secure, and technologically advanced nation. Policymakers and experts helped build a new food system based around American agricultural surpluses that stabilized prices and food availability. This system averted a global-scale food crisis for almost three decades. The end of this food system in the early 1970s ushered in a much more precarious period in global food relations. By the late twentieth century, food politics had become a battleground in which the interests of security and foreign policy experts, farmers, businesses, and politicians contended with a growing social movement whose adherents worried about the role of food in contributing to conflict and inequality. Food Power argues that the ways postwar American policymakers and experts politically linked people and places around the world through food illuminates both America's role in the world during the mid-twentieth century and sheds light on contemporary food problems.

Warfighting McDP 1 *Vigeo Press* The manual describes the general strategy for the U.S. Marines but it is beneficial for not only every Marine to read but concepts on leadership can be gathered to lead a business to a family. If you want to see what make Marines so effective this book is a good place to start.

Strategic Theory for the 21st Century: The Little Book on Big Strategy *Lulu.com*

Disease Control Priorities, Third Edition (Volume 9) Improving Health and Reducing Poverty *World Bank Publications* As the culminating volume in the DCP3 series, volume 9 will provide an overview of DCP3 findings and methods, a summary of messages and substantive lessons to be taken from DCP3, and a further discussion of cross-cutting and synthesizing topics across the first eight volumes. The introductory chapters (1-3) in this volume take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a "highest-priority" essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC.

National Strategy for the COVID-19 Response and Pandemic Preparedness January 2021 *Simon and Schuster* The ultimate guide for anyone wondering how President Joe Biden will respond to the COVID-19 pandemic—all his plans, goals, and executive orders in response to the coronavirus crisis. Shortly after being inaugurated as the 46th President of the United States, Joe Biden and his administration released this 200 page guide detailing his plans to respond to the coronavirus pandemic. The National Strategy for the COVID-19 Response and Pandemic Preparedness breaks down seven crucial goals of President Joe Biden's administration with regards to the coronavirus pandemic: 1. Restore trust with the American people. 2. Mount a safe, effective, and comprehensive vaccination campaign. 3. Mitigate spread through expanding masking, testing, data, treatments, health care workforce, and clear public health standards. 4. Immediately expand emergency relief and exercise the Defense Production Act. 5. Safely reopen schools, businesses, and travel while protecting workers. 6. Protect those most at risk and advance equity, including across racial, ethnic and rural/urban lines. 7. Restore U.S. leadership globally and build better preparedness for future threats. Each of these goals are explained and detailed in the book, with evidence about the current circumstances and how we got here, as well as plans and concrete steps to achieve each goal. Also included is the full text of the many Executive Orders that will be issued by President Biden to achieve each of these goals. The National Strategy for the COVID-19 Response and Pandemic Preparedness is required reading for anyone interested in or concerned about the COVID-19 pandemic and its effects on American society.

The Strategy of Denial American Defense in an Age of Great Power Conflict *Yale University Press* Why and how America's defense strategy must change in light of China's power and ambition Elbridge A. Colby was the lead architect of the 2018 National Defense Strategy, the most significant revision of U.S. defense strategy in a generation. Here he lays out how America's defense must change to address China's growing power and ambition. Based firmly in the realist tradition but deeply engaged in current policy, this book offers a clear framework for what America's goals in confronting China must be, how its military strategy must change, and how it must prioritize these goals over its lesser interests. The most informed and in-depth reappraisal of America's defense strategy in decades, this book outlines a rigorous but practical approach, showing how the United States can prepare to win a war with China that we cannot afford to lose—precisely in order to deter that war from happening.

Military and Security Developments Involving the People's Republic of China 2020 Annual Report to Congress For 20 years, the Department of Defense (DoD) has provided Congress with an annual report on military and security developments involving the People's Republic of China (PRC). These reports have assessed the contours of China's national strategy, its approach to security and military affairs, and potential changes in the PRC's armed forces over the next 20 years, among other matters. 2020 marks an important year for the People's Liberation Army (PLA) as it works to achieve important modernization milestones ahead of the Chinese Communist Party's (CCP) broader goal to transform China into a "moderately prosperous society" by the CCP's centenary in 2021. As the United States continues to respond to the growing strategic challenges posed by the PRC, 2020 offers a unique opportunity to assess both the continuity and changes that have taken place in the PRC's strategy and armed forces over the past two decades. Congress and Civil-Military Relations *Georgetown University Press* While the president is the commander in chief, the US Congress plays a critical and underappreciated role in civil-military relations—the relationship between the armed forces and the civilian leadership that commands it. This unique book edited by Colton C. Campbell and David P. Auerswald will help readers better understand the role of Congress in military affairs and national and international security policy. Contributors include the most experienced scholars in the field as well as practitioners and innovative new voices, all delving into the ways Congress attempts to direct the military. This book explores four tools in particular that play a key role in congressional action: the selection of military officers, delegation of authority to the military, oversight of the military branches, and the establishment of incentives—both positive and negative—to encourage appropriate military behavior. The contributors explore the obstacles and pressures faced by legislators including the necessity of balancing national concerns and local interests, partisan and intraparty differences, budgetary constraints, the military's traditional resistance to change, and an ongoing lack of foreign policy consensus at the national level. Yet, despite the considerable barriers, Congress influences policy on everything from closing bases to drone warfare to acquisitions. A groundbreaking study, Congress and Civil-Military Relations points the way forward in analyzing an overlooked yet fundamental government relationship.

Mobility, Mobilization, and Counter/Insurgency The Routes of Terror in an African Context *University of Michigan Press*

Mobility as the driving force of armed conflict The PLA at Home and Abroad Assessing the Operational Capabilities of China's Military *Strategic Studies Institute* "The chapters presented in this volume have demonstrated first, Chinese and PLA leaders have a strong sense of mission and concern for China's security and well-being. Second, the PLA is committed to the transformation in military affairs with Chinese characteristics. Third, the PLA is eager to learn from the U.S. military to expand and improve its operational capabilities. Finally, the PLA has made progress in its transformation and operational capabilities. For a long time, American leaders have been surprised with the PLA's advances. This volume (and many of the previous volumes from past PLA conferences) show that these advances did not come out of the blue. Although much of the learning and many of the improvements are still far from what is desired (from Chinese expectations and American critiques), and some of the learning has even created contradictions for the PLA, these persistent and diligent learning practices will eventually bring the PLA to a higher level of proficiency in its capabilities. The emergence of a much more sophisticated PLA in the coming years should not be a surprise."--P. 37-38.

The Politics of Procurement Military Acquisition in Canada and the Sea King Helicopter *UBC Press* In 1993, Canada's Liberal Party cancelled an order to replace the navy's Sea King helicopter. It claimed that the Tory plan was too expensive, but the cancellation itself actually cost taxpayers hundreds of millions of dollars. Aaron Plamondon connects this incident to the larger evolution of defence procurement in Canada, revealing that partisan politics, rather than a desire to increase the military's capabilities, have driven the military procurement process. This saga of the government playing havoc with weapons acquisition offers an explanation for, and clues for resolving, the under-equipped state of Canada's military.

Innovative State How New Technologies Can Transform Government *Open Road + Grove/Atlantic* "As the . . . first Chief Technology Officer, Aneesh Chopra did groundbreaking work to bring our government into the 21st century" (President Barack Obama). Over the last twenty years, our economy and our society, from how we shop and pay our bills to how we communicate, have been completely revolutionized by technology. As Aneesh Chopra shows in Innovative State, once it became clear how much this would change America, a movement arose around the idea that these same technologies could reshape and improve government. But the idea languished, and while the private sector innovated, our government stalled, trapped in a model designed for the America of the 1930s and 1960s. The election of Barack Obama offered a new opportunity. In 2009, Aneesh Chopra was named the first Chief Technology Officer of the United States federal government. Previously the Secretary of Technology for

Virginia and managing director for a health care think tank, Chopra was tasked with leading the administration's initiatives for a more open, tech-savvy government. In *Innovative State*, Chopra offers an absorbing look at how open government can establish a new paradigm for the Internet era and allow us to tackle our most challenging problems, from economic development to affordable health care. "With inspiring stories and clear insights, [Chopra] provides a playbook for open innovations that work both in the public and the private sector." —Walter Isaacson, #1 New York Times bestselling author of *Steve Jobs* *Global Activism and Humanitarian Disarmament* *Springer Nature* This book analyses the politics of the humanitarian disarmament community—a loose coalition of activist and advocacy groups, humanitarian agencies and diplomats—who have successfully achieved international treaties banning landmines, cluster munitions and nuclear weapons, as well as restricting the global arms trade. Two campaigns have won Nobel Peace Prizes. Disarmament has long been a dirty word in the international relations lexicon. But the success of the humanitarian disarmament agenda shows that people often choose to prohibit or limit certain violent technologies, for reasons of security, honour, ethics or humanitarianism. This edited volume showcases interdisciplinary research by scholars and practitioners seeking to understand the dynamics and impact of the new global activism on weapons. While some raise concerns that humanitarian disarmament may be piecemeal and depoliticizing, others see opportunities to breathe new life into moribund arms control policymaking. Foreword by 1997 Nobel Peace Prize Laureate Jody Williams. *Sociology in Our Times* *Cengage Learning* This best-selling comprehensive book conveys the relevance of sociology by presenting a timely collection of theories, research, and examples -- including its signature first-person accounts that open many chapters. These lived experiences are relevant to students and introduce themes that provide a framework for learning the chapter material. Kendall's vivid and inviting writing style, emphasis on applications, and eye for compelling current examples further highlight sociology's relevance to all students. Now in its eleventh edition, *SOCIOLOGY IN OUR TIMES* is acclaimed for being the first textbook to integrate race, class, and gender issues, and for its thorough presentation of sociological theory, including contemporary perspectives such as feminism and postmodernism. This edition focuses more on social/global change and on the contemporary world, presenting such current debates as bullying and social media abuse, digital-age methods to increase school attendance, food trucks and the spread of culture, modern slavery, and weight bias. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. *Global Trends 2030 Alternative Worlds : a Publication of the National Intelligence Council U.S. Government Printing Office* This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous *Global Trends* reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of *Global Trends 2030*. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report. *American National Security* *JHU Press* The sixth edition of *American National Security* has been extensively rewritten to take into account the significant changes in national security policy in the past decade. Thorough revisions reflect a new strategic context and the challenges and opportunities faced by the United States in the early twenty-first century. Highlights include: • An examination of the current international environment and new factors affecting U.S. national security policy making • A discussion of the Department of Homeland Security and changes in the intelligence community • A survey of intelligence and national security, with special focus on security needs post-9/11 • A review of economic security, diplomacy, terrorism, conventional warfare, counterinsurgency, military intervention, and nuclear deterrence in the changed international setting • An update of security issues in East Asia, South and Southeast Asia, the Middle East, Sub-Saharan Africa, Russia and Central Asia, and Latin America and the Caribbean • New material on globalization, transnational actors, and human security Previous editions have been widely used in undergraduate and graduate courses. -- James Schlesinger, former Secretary of Defense, from the foreword *The Psychic Life of Power Theories in Subjection* *Stanford University Press* Judith Butler's new book considers the way in which psychic life is generated by the social operation of power, and how that social operation of power is concealed and fortified by the psyche that it produces. It combines social theory, philosophy, and psychoanalysis in novel ways, and offers a more sustained analysis of the theory of subject formation implicit in her previous books. *The People's Liberation Army and Contingency Planning in China* *Independently Published* All militaries have a responsibility to plan for contingencies, and China's military, the People's Liberation Army (PLA), is no exception. PLA contingency planning takes place primarily within the General Staff Department's (GSD's) First Department, also known as the GSD Operations Department. China's seven military regions participate in drafting and reviewing the plans relevant to their areas of responsibility, albeit under heavy supervision from the GSD. U.S. joint doctrine defines a contingency as "a situation that likely would involve military forces in response to natural and manmade disasters, terrorists, subversives, military operations by foreign powers, or other situations." U.S. doctrine distinguishes between deliberate planning (advance preparation of campaign and contingency plans in non-crisis situations) and crisis action planning (rapid planning in response to a developing incident or situation). Deliberate planning is typically used to develop campaign and contingency plans for a broad range of activities based on requirements identified in strategic guidance for military commanders. Crisis action planning is conducted with less advance warning (hours, days, or up to 12 months) and focuses on developing alternative courses of action or refining existing campaign or contingency plans to adapt to current circumstances. Why publish a book you can download for free? We print this book so you don't have to. Some documents are only available in electronic format. The print versions may be 6 inch by 9 inch (or smaller) so they are difficult to read. We print books a full 8 1/2 inches by 11 inches with large text and wide margins so you can jot down notes. Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the latest version from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these large documents as a service so you don't have to. The books are compact, tightly-bound, full-size (8 1/2 by 11 inches), with large text and glossy covers. We publish short-run books (limited numbers) so they are not the least expensive available. However, we strive to issue a high-quality product with large text that is clear and crisp. Of course, color printing is expensive, so we pass that cost along to the customer. 4th Watch Publishing is a Service Disabled Veteran Owned Small Business (SDVOSB) located in a HUBZONE. Feel free to contact me if there is a government publication you want to see printed. Our web site is: usgovpub.com *The Russian Way of War Force Structure, Tactics, and Modernization of the Russian Ground Forces* PRINTED IN COLOR - *The Russian Way of War - Force Structure, Tactics, and Modernization of the Russian Ground Forces* Published by the U.S. Army Training and Doctrine Command G2's Foreign Military Studies Office in 2016, this book picks up where the FM 100-2 series left off and discusses Russian military structure, capabilities, and future development. Includes July 2019 BONUS materials on the following: *1K17 Szhatie (1K17 Сжатие) Russian "Stiletto" Laser Tank *Combat Laser System (Peresvet) Russian Laser Cannon *T-14 Armata Main Battle Tank *T-15 Heavy Infantry Combat Vehicle *Kurganets-25 Light Tracked Armored Vehicle *2S35 Koalitsiya-SV 152-mm Self-Propelled Howitzer *VPK-7829 Bumerang Modular Infantry Wheeled Fighting Vehicle Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a SDVOSB. <https://usgovpub.com> *Recruiting, Retention, and Future Levels of Military Personnel* *Global Innovation Index 2020 Who Will Finance Innovation?* *WIPO* The *Global Innovation Index 2020* provides detailed metrics about the innovation performance of 131 countries and economies around the world. Its 80 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. The 2020 edition sheds light on the state of innovation financing by investigating the evolution of financing mechanisms for entrepreneurs and other innovators, and by pointing to progress and remaining challenges - including in the context of the economic slowdown induced by the coronavirus disease (COVID-19) crisis. *Guide for All-Hazard Emergency Operations Planning* *DIANE Publishing* Meant to aid State & local emergency managers in their efforts to develop & maintain a viable all-hazard emergency operations plan. This guide clarifies the preparedness, response, & short-term recovery planning elements that warrant inclusion in emergency operations plans. It offers the best judgment & recommendations on how to deal with the entire planning process -- from forming a planning team to writing the plan. Specific topics of discussion include: preliminary considerations, the planning process, emergency operations plan format, basic plan content, functional annex content, hazard-unique planning, & linking Federal & State operations.
