Ama il tuo smartphone come te stesso

Essere più felici al tempo dei social grazie alla digital

mindfulness

IL CASTELLO SRL Il nostro rapporto con smartphone, tablet e pc in questi anni è cambiato molto. Non si tratta più di meri strumenti al servizio delle nostre attività: sono vere e proprie estensioni dei nostri corpi e delle nostre menti, delle quali non possiamo più fare a meno. In quasi ogni situazione umana che si possa immaginare è presente un dispositivo digitale, il quale influisce anche sul modo di relazionarsi tra le persone, portando con sé effetti collaterali come stress, scarsa capacità di concentrazione, superficialità, ma anche straordinarie potenzialità di comunicare con gli altri, reperire informazioni, realizzare progetti, perfino pensare. Per questo non bisogna demonizzare i nuovi media ma occorre capire come ormai siano parte di noi stessi e farli diventare elementi di crescita. Attraverso il percorso della Digital Mindfulness viene affrontato il tema della consapevolezza del rapporto con i media digitali, proponendo piccole pratiche quotidiane, spazi di riflessione, momenti di riequilibrio per migliorare la nostra vita e quella degli altri. E per trasformare in opportunità gli aspetti problematici della digital life.

Pon tu talento en acción

Ordena y construye tu espacio de desarrollo profesional

ESIC Editorial He visto delante de mí a grandes profesionales que manifestaban la incertidumbre que les provocaba no saber cuál era su talento, agotados de caminar sin rumbo y con la sensación de que sus oportunidades profesionales más valiosas pasaban ante ellos porque «los demás» no lograban verlos. En esos primeros encuentros, los imaginaba sintiéndose invisibles, en un callejón frío y oscuro, acumulando (sin ser totalmente conscientes) experiencias vitales, conocimientos, miedos, habilidades y proezas, pero sin ningún tipo de orden, colocándolos en un lugar poco visible; lo llamé la trastienda. Acompañarlos en su camino de desarrollo con el uso de esta metáfora les permitió entender que para lograr llegar a la tienda (ese lugar en el que, al fin, alcanzar sus resultados y el sitio perfecto en el que comunicar y visibilizar lo que pueden hacer por los demás), no era sino cuestión de un contundente trabajo personal. Identificar y clasificar el talento en el almacén y, sobre todo, dar el gran salto de transformarlo en valor para los demás en el taller, se convertían en las piezas clave de sus estrategias para alcanzar el éxito. Y justo esto quiero para ti. Ya está bien de sentirte invisible. Deja de poner tus sueños en manos de los demás y centra tu energía en construir tu espacio de desarrollo profesional con método, estrategia y creatividad. ¿Empezamos a poner orden? Te estamos esperando. Brilla sin miedo.

Delos Digital srl RACCONTO LUNGO (26 pagine) - ROMANCE - Michele crede che la donna giusta per lui non sia ancora nata. Forse ha ragione. O forse, più semplicemente, non ha ancora incontrato Anastasia... Michele, giovane agricoltore toscano, cede alla richiesta dell'amico Anselmo e lo accompagna alla Fiera agricola del lago Maggiore alla condizione di uscire a divertirsi la sera dato che entrambi sono single. Adelmo afferma di aver superato l'età per accasarsi ma vede per Michele una buona opportunità d'incontrare la donna giusta; lui, divertito, afferma che quella giusta non è ancora nata: si sbaglia. Incontra Anastasia, giovane e brillante manager,

che lo conquista al primo sguardo. Nasce una forte passione tra i due e una frequentazione assidua che però s'interrompe per volontà della donna che non disdegna altre frequentazioni. Michele non smette di amarla e la sorprende presentandosi, inatteso, all'ospedale dove lei è ricoverata: il suo gesto cambierà il corso della loro vite? Nata a Venezia, Stefania Fiorin vive in un piccolo paese alle porte di Varese. Ama la bellezza della poesia in ogni sua forma e il fuoco dei sentimenti che, grazie ai corsi di scrittura frequentati, trasforma da anni in racconti e versi spaziando tra vari generi. Dinamica, ironica, vive la vita con leggerezza senza prenderla alla leggera. Sempre coinvolta in mille attività, letterarie e non, lotta ogni giorno per mettere ordine nei suoi impegni, nelle sue inesauribili idee. E nei suoi capelli. Di sé dice: "Scrivo per dare vita ai sogni e riempire di sogni la vita" . Ha personalità curiosa, sempre in movimento, le piace stare in mezzo alla gente ma spesso si rifugia nella meditazione Zazen per ritrovare se stessa. Da anni opera nel mondo del volontariato; è stata presidente di un'Associazione senza scopo di lucro attiva nel sociale. Ha organizzato, anche nelle scuole, incontri con relatori esperti d' informazione, prevenzione e sensibilizzazione sociale. Ha creato il gruppo letterario su Facebook "Tovagliolo racconta" di cui è amministratrice e organizzatrice di contest. Ha scritto racconti pubblicati in ebook nella collana Passioni romantiche e Senza sfumature di Delos Digital: "Sveva, L'appuntamento, Infinito amore, Felissia Felez, Io brucio, The charging bull:il toro" e "Tovagliolo racconta" nella collana I Coriandoli. Ha vinto numerosi premi.

Delos Science Fiction 174

Delos Digital srl RIVISTA (57 pagine) - FANTASCIENZA - Fantastic 4 - Alejandro Jodorowsky - William Gibson - Alessandro Forlani - Ant-Man Con il numero 174 prende il via la stagione autunnale di "Delos Science Fiction", la nostra storica rivista edita ormai da oltre vent'anni e diretta da Carmine Treanni. La copertina è dedicata a "Fantastic 4", ma lo speciale prende solo come spunto il disastroso film di Josh Trank per fare un ragionamento sulla fantascienza e il suo ruolo nell'industria dell'intrattenimento. Si parla di "Ant-Man", di parla di William Gibson, mentre un'intervista con lo scrittore Alessandro Forlani è l'occasione per parlare di "Clara Hörbiger e l'invasione dei Seleniti", nuova serie steampunk che ha da poco esordito in ebook. Nelle rubriche si parla di un fumetto creato dal grande Alejandro Jodorowsky, delle nuove uscite sul mercato americano e delle cinque astronavi più strane della fantascienza. Il racconto è di Filippo Radogna.

Delos Digital srl RIVISTA (192 pagine) - Ted Chiang - James Patrick Kelly - Leonardo Patrignani - Mauro Antonio Miglieruolo - Piero Schiavo Campo - Davide Paparozzi - Interviste con Leonardo Patrignani e John Scalzi Si stima che quest'anno verranno scattate oltre mille miliardi di fotografie. Negli ultimi cinque o sei anni sono state scattate quasi la metà delle foto scattate nell'intera storia della fotografia. E quando gireremo filmati di ogni singolo istante della nostra vita, come cambierà la nostra percezione della realtà? Su questo intrigante argomento indaga Ted Chiang nel suo "La verità dei fatti, la verità dei sentimenti", come sempre capace di creare storie affascinanti e sorprendenti dall'analisi dell'essere umano. Altrettanto intriganti sono i problemi familiari ipotizzati da James Patrick Kelly col racconto finalista all'Hugo "Immersione profonda", dove una figlia-clone incontra per la prima volta sua madre. L'autore bestseller Leonardo Patrignani ci assale mettendo in dubbio tutto ciò che sappiamo, e il premio Urania Piero Schiavo Campo mette in dubbio tutto ciò che crediamo. Amore e vendetta sono al centro del durissimo romanzo breve di Mauro Antonio Miglieruolo, mentre il sorprendente esordio di Stefano Paparozzi, vincitore del Premio Robot, è un intricato gioco temporale. Primo numero dell'annata 2015, annata che sarà caratterizzata dalle copertine di Aldo Katayanagi, straordinario illustratore americano selezionato tra gli artisti "Spectrum" che ha lavorato anche nel mondo di "Star Wars".

Delos Digital srl RIVISTA (192 pagine) - Mike Resnick - Sarah Pinsker - Domenico Gallo - Lorenzo Crescentini - Susanna Raule - Luigi Calisi - George R.R. Martin - Franco Brambilla - Isaac Asimov Africa: il continente dove è nata l'umanità, e secondo molti il continente del futuro. C'è l'Africa sfruttata, terreno di conquista per le nuove potenze economiche raccontata da Luigi Calisi in "Le piantagioni", racconto finalista al premio Robot; e c'è l'Africa trapiantata su un altro pianeta, quella di Mike Resnick nello straordinario ciclo di racconti "Kirinyaga" che include anche questo "Perché ho toccato il cielo", finalista all'Hugo e al Nebula. Siamo invece nel pieno midwest americano con la novelette premio Nebula 2015 quasi autobiografica di Sarah Pinsker, scrittrice e cantante, che racconta la musica dal vivo in un mondo che ormai vive su internet. Mentre Lorenzo Crescentini ci porta nella Russia del futuro prossimo e Susanna Raule nella Londra Vittoriana (a trovare un certo detective), Nico Gallo ci racconta una Genova del dopoguerra e dei conti da rendere dopo il crollo del nazifascismo. Lo scrittore fantasy più famoso in questi anni è probabilmente uno scrittore di fantascienza, George R.R. Martin, che in questa intervista racconta i suoi inizi. Ed è anche il momento di conoscere meglio l'artista di quest'anno, Franco Brambilla. Fondata da Vittorio Curtoni, dal 2011 Robot è curata da Silvio Sosio, giornalista, curatore di diverse collane Delos

Networked

The New Social Operating System

MIT Press How social networks, the personalized Internet, and always-on mobile connectivity are transforming—and expanding—social life. Daily life is connected life, its rhythms driven by endless email pings and responses, the chimes and beeps of continually arriving text messages, tweets and retweets, Facebook updates, pictures and videos to post and discuss. Our perpetual connectedness gives us endless opportunities to be part of the give-and-take of networking. Some worry that this new environment makes us isolated and lonely. But in Networked, Lee Rainie and Barry Wellman show how the large, loosely knit social circles of networked individuals expand opportunities for learning, problem solving, decision making, and personal interaction. The new social operating system of “networked individualism” liberates us from the restrictions of tightly knit groups; it also requires us to develop networking skills and strategies, work on maintaining ties, and balance multiple overlapping networks. Rainie and Wellman outline the “triple revolution” that has brought on this transformation: the rise of social networking, the capacity of the Internet to empower individuals, and the always-on connectivity of mobile devices. Drawing on extensive evidence, they examine how the move to networked individualism has expanded personal relationships beyond households and neighborhoods; transformed work into less hierarchical, more team-driven enterprises; encouraged individuals to create and share content; and changed the way people obtain information. Rainie and Wellman guide us through the challenges and opportunities of living in the evolving world of networked individuals.

Digital Papyrology I

Methods, Tools and Trends

Walter de Gruyter GmbH & Co KG Since the very beginnings of the digital humanities, Papyrology has been in the vanguard of the application of information technologies to its own scientific purposes, for both theoretical and practical reasons (the strong awareness towards the problems of human memory and the material ways of preserving it; the need to work with a multifarious and overwhelming amount of different data). After more than thirty years of development, we have now at our disposal the most advanced tools to make papyrological studies more and more effective, and even to create a new conception of "papyrology" and a new model of "edition" of the ancient documents. At this turning point, it is important to build an epistemological framework including all the different expressions of Digital Papyrology, to trace a historical sketch setting the background of the contemporary tools, and to provide a clear overview of the current theoretical and technological trends, so that all the possibilities currently available can be exploited following uniform pathways. The volume represents an innovative attempt to deal with such topics, usually relegated into very quick and general treatments within journal articles or papyrological handbooks.

Mastering the Hype Cycle

How to Choose the Right Innovation at the Right Time

Harvard Business Press It happens over and over again. Some innovation (a new product, a management trend) comes along that captures the public's imagination. Everybody joins the parade with great fanfare and high expectations. This "next big thing" promises to transform the companies that adopt it -- and inflict great peril on those that don't. Then, when the innovation fails to deliver as promised immediately, everyone starts bailing out. Investments are wasted; stock prices plunge; disillusionment sets in. It doesn't have to be this way. In *Mastering the Hype Cycle*, Jackie Fenn and Mark Raskino explain what drives this pattern and how your company can avoid its potential dangers. By understanding the hype cycle, you can ride it more skillfully -- timing your investment decisions so that the innovations you adopt stand the best chance of succeeding in the long-term. Drawing on company examples and Gartner's proven STREET (Scope, Track, Rank, Evaluate, Evangelize, Transfer) framework, the authors show how to orchestrate the

key steps in the innovation-adoption process -- from choosing which innovations to take on and when in their life cycle you should adopt, to paving the way for a successful introduction. The hype cycle isn't going away. But this book arms you with the strategies you need to ride the crest of a new idea to success -- and steer clear of the trough of disillusionment.

Visualising Facebook

A Comparative Perspective

UCL Press Since the growth of social media, human communication has become much more visual. This book presents a scholarly analysis of the images people post on a regular basis to Facebook. By including hundreds of examples, readers can see for themselves the differences between postings from a village north of London, and those from a small town in Trinidad. Why do women respond so differently to becoming a mother in England from the way they do in Trinidad? How are values such as carnival and suburbia expressed visually? Based on an examination of over 20,000 images, the authors argue that phenomena such as selfies and memes must be analysed in their local context. The book aims to highlight the importance of visual images today in patrolling and controlling the moral values of populations, and explores the changing role of photography from that of recording and representation, to that of communication, where an image not only documents an experience but also enhances it, making the moment itself more exciting.

Digital Anthropology

Taylor & Francis Anthropology has two main tasks: to understand what it is to be human and to examine how humanity is manifested differently in the diversity of culture. These tasks have gained new impetus from the extraordinary rise of the digital. This book brings together several key anthropologists working with digital culture to demonstrate just how productive an anthropological approach to the digital has already become. Through a range of case studies from Facebook to Second Life to Google Earth, Digital Anthropology explores how human and digital can be defined in relation to one another, from avatars and disability; cultural differences in how we use social networking sites or practise religion; the practical consequences of the digital for politics, museums, design, space and development to new online world and gaming communities. The book also explores the moral universe of the digital, from new anxieties to open-source ideals. Digital Anthropology reveals how only the intense scrutiny of ethnography can overturn assumptions about the impact of digital culture and reveal its profound consequences for everyday life. Combining the clarity of a textbook with an engaging style which conveys a passion for these new frontiers of enquiry, this book is essential reading for students and scholars of anthropology, media studies, communication studies, cultural studies and sociology.

Q

Random House "Set in Reformation Europe, Q begins with Luther's nailing of his 95 theses on the door of the cathedral church in Wittenberg. Q traces the adventures and conflicts of two central characters: an Anabaptist, a member of the most radical of the Protestant sects and the anarchists of the Reformation, and a Catholic spy and informer, on their thrilling journey across Germany, Italy and the Netherlands."--

Edizioni a confronto Comparing Editions

Sapienza Università Editrice Sono sempre più numerosi i progetti di Edizioni Critiche Digitali che permettono di studiare, per mezzo di sistemi open source, il processo di genesi ed evoluzione delle opere attraverso la rappresentazione e interpretazione delle varianti d'autore. Il Seminario Internazionale ECD/DCE Edizioni a confronto/Comparing editions - organizzato nell'ambito del Progetto multidisciplinare THESMA (Sapienza Ricerca 2014) - ha riunito i maggiori esperti in Italia e in Europa di DH per presentare alla comunità scientifica internazionale i principali modelli di edizioni critiche digitali realizzati sulle opere di grandi autori italiani ed europei, da Leopardi a Gadda, da Jane Austen a Proust, da Nietzsche a Pessoa. There is an increasing number of Digital Critical Editions which clarify, by means of open source systems, the genetic process and the evolution of literary works. This has been achieved by representing and interpreting the author's variants. The International Conference ECD/DCE Edizioni a confronto/Comparing Editions - organised within multidisciplinary THESMA PROJECT (Sapienza Research 2014) - has shown to the scientific community the main models of digital critical editions, produced at national and international levels, on the works by important Italian and European writers, from Leopardi to Gadda, Jane Austen to Proust, Nietzsche to Pessoa.

Jugaad Innovation

Think Frugal, Be Flexible, Generate Breakthrough Growth

John Wiley & Sons "Jugaad Innovation is the most comprehensive book yet to appear on the subject [of frugal innovation]." —The Economist A frugal and flexible approach to innovation for the 21st century Innovation is a key directive at companies worldwide. But in these tough times, we can't rely on the old formula that has sustained innovation efforts for decades—expensive R&D projects and highly-structured innovation processes. Jugaad Innovation argues the West must look to places like India, Brazil, and China for a new

approach to frugal and flexible innovation. The authors show how in these emerging markets, *jugaad* (a Hindi word meaning an improvised solution born from ingenuity and cleverness) is leading to dramatic growth and how Western companies can adopt *jugaad* innovation to succeed in our hypercompetitive world. Outlines the six principles of *jugaad* innovation: Seek opportunity in adversity, do more with less, think and act flexibly, keep it simple, include the margin, and follow your heart Features twenty case studies on large corporations from around the world—Google, Facebook, 3M, Apple, Best Buy, GE, IBM, Nokia, Procter & Gamble, PepsiCo, Tata Group, and more—that are actively practicing *jugaad* innovation The authors blog regularly at Harvard Business Review; their work has been profiled in BusinessWeek, MIT Sloan Management Review, The Financial Times, The Economist, and more Filled with previously untold and engaging stories of resourceful *jugaad* innovators and entrepreneurs in emerging markets and the United States This groundbreaking book shows leaders everywhere why the time is right for *jugaad* to emerge as a powerful business tool in the West—and how to bring *jugaad* practices to their organizations.

Simplexity

Simplifying Principles for a Complex World

Odile Jacob "Simplexity, as I understand it, is the range of solutions living organisms have found, despite the complexity of natural processes, to enable the brain to prepare an action and plan for the consequences of it. These solutions are simplifying principles that enable the processing of information or situations, by taking into account past experience and anticipating the future. They are neither caricatures, shortcuts, or summaries. They are new ways of asking questions, sometimes at the cost of occasional detours, in order to achieve faster, more elegant, more effective actions." A. B. As Alain Berthoz demonstrates in this profoundly original book,

simplicity is never easy; it requires suppressing, selecting, connecting, thinking, in order to then act in the best way possible. And what if we, in turn, are inspired by the living world to process the complexity that surrounds us? Alain Berthoz is professor at the Collège de France where he is co-director of the Laboratoire de physiologie de la perception et de l'action. [Laboratory for the physiology of perception and action]. He is a member of the French Academy of Sciences, and is the author of *Le Sens du mouvement* [The Brain's Sense of Movement] and *La Décision* [Emotion and Reason].

People Are Media

Digital Business in the Selfie Era

Communication is among human beings' primary needs. In addition to eating, sleeping, and having children, man has always looked for a way to pass on to his peers his thoughts, feelings, and fears. Digital technology has been disruptive even in this field. Nowadays, everybody can communicate with whomever they want, wherever they wish, for free and instantly. Thanks to social networks we can reach potentially unlimited audiences. E-commerce, chats, selfies, Instagram, Facebook, Snapchat, Youtube: the contemporary world is made of digital communications and virtual, uninterrupted connections. People surf it from their PCs for 6 hours a day and from their smartphones for 2 hours a day. We are talking about a huge human capital which needs to be regulated, but also a potentially limitless market where to make business by interpreting big data and using the most refined and efficient storytelling techniques. That is because we live in a time when our needs and requirements are stored in the cache memory of our PCs, the only place where we can never lie.

Editing and Special/Visual Effects

Rutgers University Press Most moviegoers think of editing and special effects as distinct components of the filmmaking process. We might even conceive of them as polar opposites, since effective film editing is often subtle and almost invisible, whereas special effects frequently call attention to themselves. Yet, film editors and visual effects artists have worked hand-in-hand from the dawn of

cinema to the present day. Editing and Special/Visual Effects brings together a diverse range of film scholars who trace how the arts of editing and effects have evolved in tandem. Collectively, the contributors demonstrate how these two crafts have been integral to cinematic history, starting with the “trick films” of the early silent era, which astounded audiences by splicing in or editing out key frames, all the way up to cutting-edge effects technologies and concealed edits used to create the illusions. Throughout, readers learn about a variety of filmmaking techniques, from classic Hollywood’s rear projection and matte shots to the fast cuts and wall-to-wall CGI of the contemporary blockbuster. In addition to providing a rich historical overview, Editing and Special/Visual Effects supplies multiple perspectives on these twinned crafts, introducing readers to the analog and digital tools used in each craft, showing the impact of changes in the film industry, and giving the reader a new appreciation for the processes of artistic collaboration they involve.

The Late Mattia Pascal

New York Review of Books Mattia Pascal endures a life of drudgery in a provincial town. Then, providentially, he discovers that he has been declared dead. Realizing he has a chance to start over, to do it right this time, he moves to a new city, adopts a new name, and a new course of life—only to find that this new existence is as insufferable as the old one. But when he returns to the world he left behind, it's too late: his job is gone, his wife has remarried. Mattia Pascal's fate is to live on as the ghost of the man he was. An explorer of identity and its mysteries, a connoisseur of black humor, Nobel Prize winner Luigi Pirandello is among the most teasing and profound of modern masters. The Late Mattia Pascal, here rendered into English by the outstanding translator William Weaver, offers an irresistible introduction to this great writer's work

From Digital Natives to Digital Wisdom

Hopeful Essays for 21st Century Learning

Corwin Press An expert perspective on 21st century education What can you learn on a cell phone? Almost anything! How does that concept fit with our traditional system of education? It doesn't. Best-selling author and futurist Marc Prensky's book of essays challenges educators to "reboot" and make the changes necessary to prepare students for 21st century careers and living. His "bottom-up" vision includes students' ideas about what they need from teachers, schools, and education. Also featured are easy-to-do, high-impact classroom strategies that help students acquire "digital wisdom." This thought-provoking text is organized into two

sections that address: Rethinking education (including what and how we teach and measuring learning) 21st century learning and technology in the classroom (including games, YouTube, and more)

Against Intellectual Monopoly

Cambridge University Press "Intellectual property" - patents and copyrights - have become controversial. We witness teenagers being sued for "pirating" music - and we observe AIDS patients in Africa dying due to lack of ability to pay for drugs that are high priced to satisfy patent holders. Are patents and copyrights essential to thriving creation and innovation - do we need them so that we all may enjoy fine music and good health? Across time and space the resounding answer is: No. So-called intellectual property is in fact an "intellectual monopoly" that hinders rather than helps the competitive free market regime that has delivered wealth and innovation to our doorsteps. This book has broad coverage of both copyrights and patents and is designed for a general audience, focusing on simple examples. The authors conclude that the only sensible policy to follow is to eliminate the patents and copyright systems as they currently exist.

Laudato Si'

On the care of the common home

Le vie della Cristianità Laudato Si 'is Pope Francis' second encyclical which focuses on the theme of the environment. In fact, the Holy Father in his encyclical urges all men and women of good will, the rulers and all the powerful on earth to reflect deeply on the theme of the environment and the care of our planet. This is our common home, we must take care of it and love it - the Holy Father tells us - because its end is also ours.

Museums and Digital Culture

New Perspectives and Research

Springer This book explores how digital culture is transforming museums in the 21st century. Offering a corpus of new evidence for readers to explore, the authors trace the digital evolution of the museum and that of their audiences, now fully immersed in digital life, from the Internet to home and work. In a world where life in code and digits has redefined human information behavior and dominates daily activity and communication, ubiquitous use of digital tools and technology is radically changing the social contexts and purposes of museum exhibitions and collections, the work of museum professionals and the expectations of visitors, real and virtual. Moving beyond their walls, with local and global communities, museums are evolving into highly dynamic, socially aware and relevant institutions as their connections to the global digital ecosystem are strengthened. As they adopt a visitor-centered model and design visitor experiences, their priorities shift to engage audiences, convey digital collections, and tell stories through exhibitions. This is all part of crafting a dynamic and innovative museum identity of the future, made whole by seamless integration with digital culture, digital thinking, aesthetics, seeing and hearing, where visitors are welcomed participants. The international and interdisciplinary chapter contributors include digital artists, academics, and museum professionals. In themed parts the chapters present varied evidence-based research and case studies on museum theory, philosophy, collections, exhibitions, libraries, digital art

and digital future, to bring new insights and perspectives, designed to inspire readers. Enjoy the journey!

Resilience and Digital Disruption

Regional Competition in the Age of Industry 4.0

Springer Nature This book focuses on how digital technologies and rapid developments in artificial intelligence are shaping a new generation of cyber-physical systems based on the convergence among robots, sensors, and 3D printing. The book tells a story based on data and indicators to compare the resilience to this transformation in some key manufacturing regions. As a specific case study, the book discusses in length the transformation of the manufacturing processes in the Italian automotive industry. The authors conclude the book by providing policy implications for regions and cities.

The Cambridge Companion to Monteverdi

Cambridge University Press Claudio Monteverdi is one of the most important figures of 'early' music, a composer whose music speaks powerfully and directly to modern audiences. This book, first published in 2007, provides an authoritative treatment of Monteverdi and his music, complementing Paolo Fabbri's standard biography of the composer. Written by leading specialists in the field, it is aimed at students, performers and music-lovers in general and adds significantly to our understanding of Monteverdi's music, his life, and the contexts in which he worked. Chapters offering overviews of his output of sacred, secular and dramatic music are complemented by 'intermedi', in which contributors examine individual works, or sections of works in detail. The book draws extensively on Monteverdi's letters and includes a select discography/videography and a complete list of Monteverdi's works together with an index of first lines and titles.
