Corporate Finance

McGraw-Hill Education **Corporate Finance**, by Ross, Westerfield, and Jaffe emphasizes the modern fundamentals of the theory of finance, while providing contemporary examples to make the theory come to life. The authors aim to present corporate finance as the working of a small number of integrated and powerful intuitions, rather than a collection of unrelated topics. They develop the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a balance of theory and application. The Tenth Edition includes many exciting new research findings as well as an enhanced Connect Finance, now with even more student learning resources. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

The Financial Crisis Inquiry Report

The Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States Including Dissenting Views

Cosimo, Inc. The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government." News Dissector DANNY SCHECHTER is a journalist, blogger and filmmaker. He has been reporting on economic crises since the 1980's when he was with ABC News. His film In Debt We Trust warned of the economic meltdown in 2006. He has since written three books on the subject including Plunder: Investigating Our Economic Calamity (Cosimo Books, 2008), and The Crime Of Our Time: Why Wall Street Is Not Too Big to Jail (Disinfo Books, 2011), a companion to his latest film Plunder The Crime Of Our Time. Risk Management and Corporate Governance

OCDE This sixth peer review of the OECD Principles of Corporate Governance analyses the corporate governance framework and practices relating to corporate risk management, in the private sector and in state-owned enterprises. The review covers 26 jurisdictions and is based on a general survey of all participating jurisdictions in December 2012, as well as an in-depth review of corporate risk management in Norway, Singapore and Switzerland. The report finds that while risk-taking is a fundamental driving force in business and entrepreneurship, the cost of risk management failures is often underestimated, both externally and internally, including the cost in terms of management time needed to rectify the situation. The reports thus concludes that corporate governance should ensure that risks are understood, managed, and, when appropriate, communicated.

What Went Wrong

How the 1% Hijacked the American Middle Class . . . and What Other Countries Got Right

BenBella Books, Inc. Something has gone seriously wrong with the American economy. The American economy has experienced considerable growth in the last 30 years. But virtually none of this growth has trickled down to the average American. Incomes have been flat since 1985. Inequality has grown, and social mobility has dropped dramatically. Equally troubling, these policies have been devastating to both American productivity and our long-term competitiveness. Many reasons for these failures have been proposed. Globalization. Union greed. Outsourcing. But none of these explanations can address the harsh truth that many countries around the world are dramatically outperforming the U.S. in delivering broad middle-class prosperity. And this is despite the fact that these countries are more exposed than America to outsourcing and globalization and have much higher levels of union membership. In *What Went Wrong*, George R. Tyler, a veteran of the World Bank and the Treasury Department, takes the reader through an objective and data-rich examination of the American experience over the last 30 years. He provides a fascinating comparison between the America and the experience of the "family capitalism" countries: Australia, Austria, Belgium, Denmark, France, Germany, the Netherlands, and Sweden. Over the last 30 years, they have outperformed the U.S. economy by the only metric that really matters—delivering better lives for their citizens. The policies adopted by the family capitalist countries aren't socialist or foreign. They are the same policies that made the U.S. economy of the 1950s and 1960s the strongest in the world. *What Went Wrong* describes exactly what went wrong with the American economy, how countries around the world have avoided these problems, and what we need to do to get back on the right track.
