## Martindale

### the complete drug reference [book + CD-ROM]

*This is thirty-fifth edition of Martindale, which provides reliable, and evaluated information on drugs and medicines used throughout the world. It contains encyclopaedic facts about drugs and medicines, with: 5,500 drug monographs; 128,000 preparations; 40,700 reference citations; 10,900 manufacturers. There are synopses of disease treatments which enables identification of medicines, the local equivalent and the manufacturer. It also Includes herbals, diagnostic agents, radiopharmaceuticals, pharmaceutical excipients, toxins, and poisons as well as drugs and medicines. Based on published information and extensively referenced*

# Martindale

## The Complete Drug Reference

*Martindale: The Complete Drug Reference provides unbiased and evaluated information on drugs and medicines in use around the world. It is prepared by an experienced team of pharmacists and life scientists who use their professional expertise to select the most clinically relevant and appropriate information from reliable published sources.*

## Profiles of Drug Substances, Excipients and Related Methodology

**Academic Press** Volumes in this widely revered series present comprehensive reviews of drug substances and additional materials, with critical review chapters that summarize information related to the characterization of drug substances and excipients. This organizational structure meets the needs of the pharmaceutical community and allows for the development of a timely vehicle for publishing review materials on this topic. The scope of the Profiles series encompasses review articles and database compilations that fall within one of the following six broad categories: Physical profiles of drug substances and excipients; Analytical profiles of drug substances and excipients; Drug metabolism and pharmacokinetic profiles of drug substances and excipients; Methodology related to the characterization of drug substances and excipients; Methods of chemical synthesis; and Reviews of the uses and applications for individual drug substances, classes of drug substances, or excipients. Presents comprehensive reviews covering all aspects of drug development and formulation of drugs Profiles creatine monohydrate and fexofenadine hydrochloride, as well as five others Meets the information needs of the drug development community

## Dyes and Drugs

## New Uses and Implications

**CRC Press** *The science of chemistry is so broad that it is normally broken into fields or branches of specialization. The manufacture of drugs and dyes is one of the most practical industrial applications of chemistry. This collection presents the reader with a broad spectrum of chapters on drugs and dyes, thereby demonstrating key developments in this rapidly changing field. It examines dyes in chemical interaction and production of drugs for pharmaceutical use as well as in forensic work and in the production of materials.*

## Breastfeeding and Medication

**Routledge** *Sadly, women often feel they have no alternative but to give up breastfeeding, having been prescribed or purchased medication. In many cases, however, this is unnecessary. This book outlines the evidence-base for the use of medication during breastfeeding. Breastfeeding and Medication presents a comprehensive guide to the most frequently prescribed drugs and their safety for breastfeeding mothers. Evaluating the evidence for interventions and using a simple format for quickly identifying medications which are safe or unsafe to use, it also highlights those drugs where there is inconclusive evidence. Additional contextual information makes this the most complete text for those practitioners who support and treat breastfeeding women. It: provides an overview of the anatomy and physiology of the breast together with hormonal influences in order to better understand how complications, such as mastitis, arise and inform the approach to their treatment includes a section on conditions that affect women specifically when they are lactating where prescription of medication may be necessary discusses the importance of breastfeeding and its advantages, as well as its disadvantages explores how to support breastfeeding mothers, and presents a counselling model approach. Taking into account the recommendations of NICE Maternal and Child Nutrition guidelines, this is an invaluable reference for all health practitioners and volunteers who work with, support and treat breastfeeding women, including lactation consultants, breastfeeding support workers, health visitors, GPs, practice nurses, pharmacists and midwives.*

## Handbook of Drug Administration via Enteral Feeding

## Tubes, 3rd edition

**Pharmaceutical Press** *With over 400 drug monographs, this book covers the technical, practical and legal aspects that you should consider before prescribing or administering drugs via enteral feeding tubes.*

## Palliative Care Formulary

**Radcliffe Publishing** *The Palliative Care Formulary is established as the comprehensive compendium of essential therapeutic information for palliative care specialists, pharmacists and oncologists. This expanded new edition incorporates numerous important updates and new data, bringing together a wealth of important information about drugs commonly used in palliative care and about drugs for use in special circumstances by, or in conjunction with, a specialist in palliative care. It highlights drugs given for unlicensed indications or by unlicensed routes and deals comprehensively with the administration of multipl.*

## Optometry

## Science, Techniques and Clinical Management

**Elsevier Health Sciences** *From the fundamental science of vision to clinical techniques and the management of common ocular conditions, this book encompasses the essence of contemporary optometric practice. Now in full colour and featuring over 400 new illustrations, it has been revised significantly.*

## Stockley's Drug Interactions

# A Source Book of Interactions, Their Mechanisms, Clinical Importance and Management

*Stockley's Drug Interactions, now fully revised and revalidated, remains the world's most comprehensive and authoritative reference book on drug interactions and provides the busy healthcare professional with quick and easy access to clinically relevant, evaluated and evidence-based information on drug interactions. Contains detailed yet concise monographs: covers interactions between therapeutic drugs, proprietary medicines, herbal medicines, foods, drinks, pesticides and drugs of abuse; based on published sources and fully referenced; provides comprehensive details of the clinical evidence for the interactions under discussion, an assessment of their clinical importance and gives clear guidance on how to manage the interaction in practice; contains over 3,400 monographs; New drugs launched in the last two years added - including drugs such as fesoterodine, several monoclonal antibodies, new antidiabetics (e.g. sitagliptin) new antineoplastics (e.g. dasatinib) and new immunosuppressants (e.g. temsirolimus); updated information on seasonal flu vaccines and antivirals, including all available information on possible interactions with concurrent medication; increased commentary on the involvement of newer mechanisms in drug interactions, such as drug transporter proteins, and other genetic factors that affect the ability of individuals to metabolise medicines.*

## British National Formulary

**Pharmaceutical Press** *This is the 39th edition of the British National formulary.*

## Martindale

## The Complete Drug Reference

*This is a source of information on medicines. This updated edition features: encyclopaedic facts about drugs and medicines; information on herbal medicine; synopses of disease treatments; and covers other substances including veterinary drugs, contrast media, diagnostic agents, radiopharmaceuticals, pharmaceutical excipients, poisons, and essential oils.*

# Pharmacy OSCEs

## A Revision Guide

**Pharmaceutical Press** *Pharmacy OSCEs is the only pharmacy-specific OSCE revision guide. This easy-to-use book covers the key competencies that will be tested during your Objective Structured Clinical Examinations whether you are still studying or in practice. Written in a concise and accessible way, all types of situations are covered from responding to a specific symptom to solving calculations. The scenarios read like tasks at an OSCE station and are accompanied by: (i) Learning objectives; (ii) Questions and answers; (iii) Feedback and revision points; (iv) Key references and further reading. The examples vary in complexity, ranging from early undergraduate years through to postgraduate. With over 70 practice scenarios, this book will support you throughout your training and ensure your best performance on the day of the exam.*

## Handbook of Pharmaceutical Excipients

*Describes the chemical and physical properties of pharmaceutical excipients. Each monograph contains nonproprietary names, synonyms, chemical name and CAS registry number, empirical formula and molecular weight, structural formula, functional category, applications in pharmaceutical formulation or technology, description, pharmacopeial specifications, typical properties, stability and storage conditions, incompatibilities, method of manufacture, safety, handling precautions, regulatory status, pharmacopeias, related substances, comments, specific references, general references, and authors.*

## Pregnancy and Obesity

**Walter de Gruyter GmbH & Co KG** *Obesity epidemic is a global problem of the 21st century for women in reproductive age and also the obstetricians and pediatricians. There are influences of mother's pre-pregnancy and antepartal obesity, at delivery, for fetal programming and for maternal and fetal lifelong metabolism. The epidemiological results are important, but for the health care providers the skills for prevention of mother's obesity with all consequences are essential. Evaluated programs in nutrition and physical activity will be discussed.*

# Novel Psychoactive Substances

## Classification, Pharmacology and Toxicology

**Academic Press** *Novel Psychoactive Substances: Classification, Pharmacology and Toxicology* provides readers with background on the classification, detection, supply and availability of novel psychoactive substances, otherwise known as "legal highs." This book also covers individual classes of novel psychoactive substances that have recently emerged onto the recreational drug scene and provides an overview of the pharmacology of the substance followed by a discussion of the acute and chronic harm or toxicity associated with the substance. Written by international experts in the field, this multi-authored book is a valuable reference for scientists, clinicians, academics, and regulatory and law enforcement professionals. Includes chapters written by international experts in the field. Provides a comprehensive look at the classification, detection, availability and supply of novel psychoactive substances, in addition to the pharmacology and toxicology associated with the substance. Offers a single source for all interested parties working in this area, including scientists, academics, clinicians, law enforcement and regulatory agencies. Provides a full treatment of novel psychoactive substances that have recently emerged onto the recreational drug scene including mephedrone and the synthetic cannabinoid receptors in 'spice' / 'K2'.

## Student Success in the Prescribing Safety Assessment (PSA)

**CRC Press** *Student Success in the Prescribing Safety Assessment (PSA)* The Prescribing Safety Assessment (PSA) is a two-hour open-book online examination which comprises eight sections incorporating eight main types of questions. The questions are structured around clinical case-based scenarios, requiring a holistic approach to analysing information and identi

# Was It Worth It Columbus in Jeans

**Troubador Publishing Ltd** *The arrival of the 1980s saw millions living behind the Iron Curtain flee their homeland in search of a better tomorrow. Step-by-step, they trudged persistently to reach their dream of happiness. These were the Columbuses of the 1980s – risk takers who had the courage to test themselves and explore the notoriety of the western world first-hand. Was It Worth It is a modern odyssey spanning three continents and following one family's path to a new, unfamiliar future. It tells of the characters' struggle to adapt to foreign places, languages and customs. With settings in Lima, Paris, Ottawa, and exploring venues in other countries, the book offers readers an insight into what it takes to start from scratch in an unknown land. Did they find what they were looking for?*

# Handbook of Pharmaceutical Excipients

**Amer Pharmacists Assn** *An internationally acclaimed reference work recognized as one of the most authoritative and comprehensive sources of information on excipients used in pharmaceutical formulation with this new edition providing 340 excipient monographs. Incorporates information on the uses, and chemical and physical properties of excipients systematically collated from a variety of international sources including: pharmacopeias, patents, primary and secondary literature, websites, and manufacturers' data; extensive data provided on the applications, licensing, and safety of excipients; comprehensively cross-referenced and indexed, with many additional excipients described as related substances and an international supplier's directory and detailed information on trade names and specific grades or types of excipients commercially available.*

# Critical Care Manual of Clinical Procedures and

# Competencies

**John Wiley & Sons** *This manual is aimed at all healthcare practitioners, from novice to expert, who care for the critically ill patient, recognising that different disciplines contribute to the provision of effective care and that essential knowledge and skills are shared by all practitioners. It provides evidence-based guidelines on core critical care procedures and includes a comprehensive competency framework and specific competencies to enable practitioners to assess their abilities and expertise. Each chapter provides a comprehensive overview, beginning with basic principles and progressing to more complex ideas, to support practitioners to develop their knowledge, skills and competencies in critical care.*

# Pharmaceutical Compounding and Dispensing

**Pharmaceutical Press** *Pharmacists have been responsible for compounding medicines for centuries. Although most modern medicines are not compounded in a local pharmacy environment, there are still occasions when it is imperative that pharmacists have this knowledge. Pharmaceutical Compounding and Dispensing provides a comprehensive guide to producing extemporaneous formulations safely and effectively. The book covers three core sections: the history of compounding; pharmaceutical forms and their preparation; product formulae. This is a modern, detailed and practical guide to the theory and practice of extemporaneous compounding and dispensing. Fully revised and updated, this new edition will be an indispensable reference for pharmacy students and practicing pharmacists. Supplementary videos demonstrating various dispensing procedures can be viewed online.*

# Therapeutic, Probiotic, and Unconventional Foods

**Academic Press** *Therapeutic, Probiotic and Unconventional Foods compiles the most recent, interesting and innovative research on unconventional and therapeutic foods, highlighting their role in improving health and life quality, their implications on safety, and their industrial and economic impact. The book focuses on probiotic foods, addressing the benefits and challenges associated with probiotic and prebiotic use. It then explores the most recently investigated and well-recognized nutraceutical and medicinal foods and the food products and ingredients that have both an impact on human health and a potential therapeutic effect. The third and final section explores unconventional foods and discusses intriguing and debated foods and food sources. While research has been conducted on the beneficial biological effects of probiotics and therapeutic food, the use of these foods remains controversial. To overcome the*

*suspicion of the use of alternative, homeopathic and traditional products as therapy, this book reveals and discusses the most recent and scientifically sound and confirmed aspects of the research. Compiles the most recent, interesting and innovative research on unconventional and therapeutic foods Highlights the role of unconventional and therapeutic foods in improving health and life quality Discusses the implications of unconventional and therapeutic foods on safety Presents the industrial and economic impact of unconventional and therapeutic foods*

## Chest

# Official Publication of the American College of Chest Physicians

## Stockley's Herbal Medicines Interactions

# A Guide to the Interactions of Herbal Medicines, Dietary Supplements and Nutraceuticals with Conventional Medicines

*Provides an invaluable reference text for all healthcare professionals who require evidence-based information on the interactions of conventional medicines with herbal medicines, dietary supplements and nutraceuticals. Stockley's Herbal Medicines Interactions is a unique collaboration between a team of experts in the fields of drug interaction, clinical herbal medicines, phytopharmacovigilance and regulation of herbal medicinal products. Stockley's Herbal Medicines Interactions brings together available data on over 150 of the most commonly used herbal medicines dietary supplements and nutraceuticals in highly structured, rigorously researched and fully referenced monographs.*

# Arzneimitteltherapie in der Palliativmedizin

**Elsevier Health Sciences** Das Buch bietet Ihnen detaillierte Arzneimittelmonografien und praxisorientierte, konkrete Handlungsanweisungen mit exakten Dosierungsangaben und zahlreichen Tipps für die tägliche Praxis. Es liefert Ihnen präzise Informationen zu Sonderfällen wie z.B. Anwendungen außerhalb der Zulassung ("Off-Label Use"), alternative Applikationsformen sowie Dosierungsanpassung bei Organinsuffizienz und stellt alternative oder begleitende Medikation vor. Das ideale Buch zur kompetenten und sicheren Behandlung von Patienten in der Palliativmedizin. Die deutsche Fassung basiert auf dem renommierten englischen Werk "Palliative Care Formulary", wurde aber auf die Erfordernisse im deutschen Sprachraum angepasst. Die 4. Auflage ist nach dem neuesten Wissensstand aus dem PCF7 (Palliative Care Formulary 7) aktualisiert um zahlreiche Arzneimittel ergänzt Das Buch eignet sich für: Palliativmediziner\*innen Fachärzt\*innen und Weiterbildungsassistent\*innen Innere Medizin Apotheker\*innen

## The Content Analysis Guidebook

**SAGE** Content analysis is one of the most important but complex research methodologies in the social sciences. In this thoroughly updated Second Edition of The Content Analysis Guidebook, author Kimberly Neuendorf provides an accessible core text for upper-level undergraduates and graduate students across the social sciences. Comprising step-by-step instructions and practical advice, this text unravels the complicated aspects of content analysis.

## The Renal Drug Handbook

## The Ultimate Prescribing Guide for Renal Practitioners, 5th Edition

**CRC Press** This invaluable guide, endorsed by the UKMi and reflecting the extensive experience of the UK Renal Pharmacy Group, features drug monographs guiding physicians in how to prescribe, prepare, and administer drugs to patients with different levels of kidney function and when undergoing renal replacement therapy. It has been fully updated for this fifth edition to include up to 100

additional drugs, while maintaining the clear structure and format that is easy to use and simple to follow in the busy clinical setting. It continues to offer support and guidance to health care professionals enabling them to prescribe medications to their renal patients appropriately and safely.

## The Extra Pharmacopoeia (Classic Reprint)

**Forgotten Books** Excerpt from *The Extra Pharmacopoeia* The adoption in British Pharmacy of the metric weights and measures is still a desideratum; both are required, as where despatch has to be considered in dispensing liquids, they can be more accurately measured than weighed. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

## Aulton's Pharmaceuticals

## The Design and Manufacture of Medicines

**Elsevier Health Sciences** *Pharmaceutics* is one of the most diverse subject areas in all of pharmaceutical science. In brief, it is concerned with the scientific and technological aspects of the design and manufacture of dosage forms or medicines. An understanding of pharmaceutics is therefore vital for all pharmacists and those pharmaceutical scientists who are involved with converting a drug or a potential drug into a medicine that can be delivered safely, effectively and conveniently to the patient. Now in its fourth edition, this best-selling textbook in pharmaceutics has been brought completely up to date to reflect the rapid advances in delivery methodologies by eye and injection, advances in drug formulations and delivery methods for special groups (such as children and the elderly), nanomedicine, and pharmacognosy. At the same time the editors have striven to maintain the accessibility of the text for students of pharmacy, preserving the balance between being a suitably pitched introductory text and a clear reflection of the state of the art. provides a logical, comprehensive account of drug design and manufacture includes the science of formulation and

drug delivery designed and written for newcomers to the design of dosage forms New to this edition New editor: Kevin Taylor, Professor of Clinical Pharmaceutics, School of Pharmacy, University of London. Twenty-two new contributors. Six new chapters covering parenteral and ocular delivery; design and administration of medicines for the children and elderly; the latest in plant medicines; nanotechnology and nanomedicines, and the delivery of biopharmaceuticals. Thoroughly revised and updated throughout.

# Disease Management

## Palliative Care Formulary

### Edition 7

*The seventh edition of the Palliative Care Formulary (PCF), a Pharmaceutical Press product from the Royal Pharmaceutical Society, is an essential resource for healthcare professionals who care for patients with progressive end-stage disease. Although written primarily with cancer patients in mind, PCF7 contains specific material relating to several other life-limiting diseases e.g. COPD, congestive heart failure, renal and hepatic failure, and Parkinson's disease. PCF7 also includes several Quick Clinical Guides covering key topics in palliative care and designed for everyday use. Grounded in clinical practice, this comprehensive title includes independent information about drugs used in palliative care, highlighting off-label indications or routes, and dealing with the administration of multiple drugs by continuous subcutaneous infusion. Features: - Two new monographs to reflect increasing use in practice, Denosumab and Parecoxib - Hepatic chapter fully revised by a multidisciplinary working group - Cannabinoids monograph fully updated and including the 2019 NICE guidance - Anticoagulants monograph fully updated to include a brand new table with prescribing guidance for Direct Oral Anticoagulants (DOACs) - Opioid antagonists outside the CNS fully reviewed to reflect the latest products and evidence for use - Urinary antimuscarinics, a new combined monograph to reflect the increasing use of other drugs in this category From the reviews of previous editions 'PCF [is] a core text for the speciality and has no serious rivals.' Palliative Medicine 'The information is up to date and prepared with extreme care. This handbook should be available to staff involved with inpatient consultation, inpatient units of care and home visits.' Journal of Pain and Symptom Management 'First class. Highly recommended.' International Association for Hospice and Palliative Care*

# Excipient Development for Pharmaceutical, Biotechnology, and Drug Delivery Systems

**CRC Press** *To facilitate the development of novel drug delivery systems and biotechnology-oriented drugs, the need for new excipients to be developed and approved continues to increase. Excipient Development for Pharmaceutical, Biotechnology, and Drug Delivery Systems serves as a comprehensive source to improve understanding of excipients and forge new avenue*

## Handbook of Extemporaneous Preparation

### A Guide to Pharmaceutical Compounding

*A comprehensive and easy-to-follow guide to good practice in extemporaneous compounding. It incorporates the key findings and outputs from the UK National Advisory Board study, including advice on purchasing unlicensed medicines. It will be adopted as the standard for extemporaneous dispensing for NHS patients. Although the standards set out in this book are primarily written for implementation in NHS hospitals, the principles should be equally applied across the profession internationally. Written in two parts, this book provides: standards for extemporaneous dispensing stability summaries for the 50 most commonly prepared extemporaneously prepared medicines in NHS hospitals. Compounding of pharmaceutical formulations remains a core skill of pharmacists and is taught at undergraduate level. Written by experts in the field with input from the UK NHS Pharmaceutical Quality Assurance Committee, this book will be an invaluable reference for any clinical or procurement pharmacist, pharmacy technician or student involved with extemporaneous preparation.*

## Systematic Reviews

# CRD's Guidance for Undertaking Reviews in Health Care

*For adults. There is a pressing need for methodologically sound RCTs to confirm whether such interventions are helpful and, if so, for whom.*

## Sampson's Textbook of Radiopharmacy

*This textbook brings together information on advances in radiopharmacy, providing a basic guide to the art and science of the field. This edition has been completely revised and updated to reflect developments in the science and practice of radiopharmacy that have taken place over the last ten years. It is divided into 6 sections: physics applied to radiopharmacy, medicinal radio-elements, radiopharmacology and radiopharmacokinetics, radiopharmaceutics, formulation, preparation and quality assurance, radiopharmacy practice, new techniques for design and testing of radiopharmaceuticals.*

## Leung's Encyclopedia of Common Natural Ingredients Used in Food, Drugs and Cosmetics

**John Wiley & Sons** *The third edition of the unparalleled reference on natural ingredients and their commercial use This new Third Edition of Leung's Encyclopedia of Common Natural Ingredients: Used in Food, Drugs, and Cosmetics arrives in the wake of the huge wave of interest in dietary supplements and herbal medicine resulting from both trends in health and the Dietary Supplement and Health Education Act of 1994 (DSHEA). This fully updated and revised text includes the most recent research findings on a wide variety of ingredients, giving readers a single source for understanding and working with natural ingredients. The Encyclopedia continues the successful format for entries listed in earlier editions (consisting of source, description, chemical composition, pharmacology, uses, commercial preparations, regulatory status, and references). The text also features an easily accessible alphabetical presentation of the entries according to common names, with the index cross-referencing entries according to scientific names. This Third Edition also features: More than 50 percent more information than the Second Edition, reflecting the greatly increased research activity in recent years A new section on traditional Indian medicine, with information on nine commonly used herbs More than 6,500 references Two new appendices explaining and illustrating the botanical terminology frequently encountered in the text A revised and expanded index*

*Leung's Encyclopedia of Common Natural Ingredients: Used in Food, Drugs, and Cosmetics, Third Edition will continue to provide a comprehensive compilation of the existing literature and prominent findings on natural ingredients to readers with an interest in medicine, nutrition, and cosmetics.*

## Prescribing Medicines for Children

*Prescribing for children is a particularly challenging discipline due to specific issues of drug absorption, metabolism, distribution and excretion. The aim of this book is to improve understanding in all aspects of paediatric prescribing, from the development of suitable drugs through to their practical administration. With its origins in the EU-funded Global Research in Paediatrics (GRiP) project this is the first truly international textbook to provide guidance on the principles behind optimal neonatal and paediatric prescribing. Harnessing the international expertise of paediatricians and pharmacists in the field, Prescribing Medicines for Children compliments the British National Formulary for Children (BNFC), facilitating translation of essential pharmacological principles into good prescribing practice. It incorporates specific information on how to promote safe and effective prescribing in paediatrics, including how to avoid medication errors and adverse drug reactions in children. Highlights include the differences in prescribing habits between countries and the shared principles that underpin rational prescribing in paediatrics and neonatology. The book is divided into two sections: Section A provides concise educational material relating to paediatric pharmacology and optimising how medicines are developed and prescribed for children. Section B considers key clinical prescribing areas and can be used as a quick reference guide. Each chapter is focused on the key issues in prescribing for a respective clinical specialty or context. Prescribing Medicines for Children is essential reading for all those who are involved in prescribing medicines to neonates and children. This includes undergraduate and postgraduate pharmacists, nurses, paediatricians and primary care physicians, academic scientists, and those working in the pharmaceutical industry and drug regulation.*

## Brain Injury Medicine E-Book

### Board Review

**Elsevier Health Sciences** *The only review book currently available in this complex field, Brain Injury Medicine: Board Review focuses on the prevention, diagnosis, treatment, and management of individuals with varying severity levels of brain injury. Focused, high-*

*yield content prepares you for success on exams and in practice, with up-to-date coverage of traumatic brain injury (TBI), stroke, CNS neoplasms, anoxic brain injury, and other brain disorders. This unique review tool is ideal for residents, fellows, and practitioners studying or working in the field and preparing to take the brain injury medicine exam. Supports self-assessment and review with 200 board-style questions and explanations. Covers the information you need to know on traumatic brain injury by severity and pattern, neurologic disorders, systemic manifestations, rehabilitation problems and outcomes, and basic science. Includes questions on patient management including patient evaluation and diagnosis, prognosis/risk factors, and applied science. Discusses key topics such as neurodegeneration and dementia; proteomic, genetic, and epigenetic biomarkers in TBI; neuromodulation and neuroprosthetics; and assistive technology. Reviews must-know procedures including acute emergency management and critical care; post-concussion syndrome assessment, management and treatment; diagnostic procedures and electrophysiology; neuroimaging, and brain death criteria. Ensures efficient, effective review with content written by experts in physical medicine and rehabilitation, neurology, and psychiatry and a format that mirrors the board exam outline.*

## Meyler's Side Effects of Drugs 15E

# The International Encyclopedia of Adverse Drug Reactions and Interactions

**Newnes** Building on the success of the 14 previous editions, this remarkable reference has been extensively reorganized and expanded and now comprises almost 1,500 individual drug articles providing the most complete coverage of adverse reactions and interactions found anywhere. Each article contains detailed and authoritative information about the adverse effects of each drug, with comprehensive references to the primary literature making this a must have for any academic or medical library, pharmacologist, regulatory organization, hospital dispensary or pharmaceutical company. Now available online for all academic, corporate or government institution as well as individuals via Science Direct! The online version provides an unparalleled depth of coverage and functionality by offering convenient desktop access and enhanced features such as increased searchability, extensive internal cross-linking and fully downloadable and printable full-text, HTML or PDF articles. Enhanced encyclopedic format with drug monographs now organised alphabetically Completely expanded coverage of each drug - thalidomide warranted three sentences in Meyler's 14th edition, but is now a 13 page extensive monograph Clearer, systematic organization of information for easier reading including case

*histories to provide perspective on each listing Extensive bibliography with over 40,000 references - Meyler's 15th edition incorporates all relevant citations from Meyler's 14th, but also includes relevant citations from previous editions of Meyler's and Side Effects of Drugs Annuals to give a historical perspective on the use and safety of drugs*

## Pharmacy Case Studies

*Knowledge gained within the individual areas of law and ethics, pharmaceuticals, pharmacology and pathology are tested by each example, bringing together all areas taught on the degree course. Each chapter contains five case studies, starting with uncomplicated cases and increasing in complexity as they expand.*

## The Chemotherapy Source Book

**Lippincott Williams & Wilkins** *The Chemotherapy Source Book, Fourth Edition pulls together all the current information on the chemotherapeutic management of cancer patients, including choice of chemotherapeutic agents, use of combinations, and toxicity of individual drugs. Organized by disease site, the book brings together pharmacologic and patient management information in one source that clinicians can consult for any question encountered in the delivery of chemotherapy. This updated Fourth Edition includes new drugs as well as new indications for older drugs. Content has been streamlined to provide essential information more quickly for the busy practitioner. Plus, this edition is softcover for greater portability and convenience.*
