THE BOY AT THE BACK OF THE CLASS

Hachette UK A World Book Day 2020 Author WINNER OF THE BLUE PETER BOOK AWARD 2019 WINNER OF THE WATERSTONES CHILDREN'S BOOK PRIZE 2019 SHORTLISTED FOR THE JHALAK PRIZE 2019 Told with heart and humour, The Boy at the Back of the Class is a child's perspective on the refugee crisis, highlighting the importance of friendship and kindness in a world that doesn't always make sense. There used to be an empty chair at the back of my class, but now a new boy called Ahmet is sitting in it. He's nine years old (just like me), but he's very strange. He never talks and never smiles and doesn't like sweets - not even lemon sherbets, which are my favourite! But then I learned the truth: Ahmet really isn't very strange at all. He's a refugee who's run away from a War. A real one. With bombs and fires and bullies that hurt people. And the more I find out about him, the more I want to help. That's where my best friends Josie, Michael and Tom come in. Because you see, together we've come up with a plan. . . With beautiful illustrations by Pippa Curnick

EXHIBITING ATROCITY

MEMORIAL MUSEUMS AND THE POLITICS OF PAST VIOLENCE

Rutgers University Press Today, nearly any group or nation with violence in its past has constructed or is planning a memorial museum as a mechanism for confronting past trauma, often together with truth commissions, trials, and/or other symbolic or material reparations. Exhibiting Atrocity documents the emergence of the memorial museum as a new cultural form of commemoration, and analyzes its use in efforts to come to terms with past political violence and to promote democracy and human rights. Through a global comparative approach, Amy Sodaro uses in-depth case studies of five exemplary memorial museums that commemorate a range of violent pasts and allow for a chronological and global examination of the trend: the U.S. Holocaust Memorial Museum in Washington, DC; the House of Terror in Budapest, Hungary; the Kigali Genocide Memorial Centre in Rwanda; the Museum of Memory and Human Rights in Santiago, Chile; and the National September 11 Memorial Museum in New York. Together, these case studies illustrate the historical emergence and global spread of the memorial museum and show how this new cultural form of commemoration is intended to be used in contemporary societies around the world.

The money-talk taboo and many more ...Through a mixture of anthropological analysis and her own unorthodox experiments (using herself as a reluctant guinea-pig), Kate Fox discovers what these unwritten behaviour codes tell us about Englishness.

PHONETICS FOR SPEECH PATHOLOGY

THE LITTLE PRINCE

Samaira Book Publishers

THE GETTYSBURG ADDRESS

Penguin UK The Address was delivered at the dedication of the Soldiers' National Cemetery in Gettysburg, Pennsylvania, on the afternoon of Thursday, November 19, 1863, during the American Civil War, four and a half months after the Union armies defeated those of the Confederacy at the decisive Battle of Gettysburg. In just over two minutes, Lincoln invoked the principles of human equality espoused by the Declaration of Independence and redefined the Civil War as a struggle not merely for the Union, but as "a new birth of freedom" that would bring true equality to all of its citizens, and that would also create a unified nation in which states' rights were no longer dominant. Throughout history, some books have changed the world. They have transformed the way we see ourselves - and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives - and destroyed them. Now Penguin brings you the works of the great thinkers, pioneers, radicals and visionaries whose ideas shook civilization and helped make us who we are.

THE DEATH AND LIFE OF GREAT AMERICAN CITIES

Random House In this classic text, Jane Jacobs set out to produce an attack on current city planning and rebuilding and to introduce new principles by which these should be governed. The result is one of the most stimulating books on cities ever written. Throughout the post-war period, planners temperamentally unsympathetic to cities have been let loose on our urban environment. Inspired by the ideals of the Garden City or Le Corbusier's Radiant City, they have dreamt up ambitious projects based on self-contained neighbourhoods, super-blocks, rigid 'scientific' plans and endless acres of grass. Yet they seldom stop to look at what actually works on the ground. The real vitality of cities, argues Jacobs, lies in their diversity, architectural variety, teeming street life and human scale. It is only when we appreciate such fundamental realities that we can hope to create cities that are safe, interesting and economically viable, as well as places that people want to live in. 'Perhaps the most influential single work in the history of town planning... Jacobs has a powerful sense of narrative, a lively wit, a talent for surprise and the ability to touch the emotions as well as the mind' New York Times Book Review

THE QUEST FOR ARTIFICIAL INTELLIGENCE

Cambridge University Press Artificial intelligence (AI) is a field within computer science that is attempting to build enhanced intelligence into computer systems. This book traces the history of the subject, from the early dreams of eighteenth-century (and earlier) pioneers to the more successful work of today's AI engineers. AI is becoming more and more a part of everyone's life. The technology is already embedded in face-recognizing cameras, speech-recognition software, Internet search engines, and health-care robots, among other applications. The book's many diagrams and easy-to-understand descriptions of AI programs will help the casual reader gain an understanding of how these and other AI systems actually work. Its thorough (but unobtrusive) end-of-chapter notes containing citations to important source materials will be of great use to AI scholars and researchers. This book promises to be the definitive history of a field that has captivated the imaginations of scientists, philosophers, and writers for centuries.

His clear, fluid writing-accessible to any reader with some scientific knowledge-is supplemented by extensive footnotes and references that make it just as gratifying and instructive a read for the specialist. MEMORIALS OF THE GREAT WAR IN BRITAIN

THE SYMBOLISM AND POLITICS OF REMEMBRANCE

[A&C Black](#) Taking as its focus memorials of the First World War in Britain, this book brings a fresh approach to the study of public symbols by exploring how different motives for commemorating the dead were reconciled through the processes of local politics to create a widely valued form of collective expression. It examines how the memorials were produced, what was said about them, how support for them was mobilized and behaviour around them regulated. These memorials were the sites of contested, multiple and ambiguous meanings, yet out of them a united public observance was created. The author argues that this was possible because the interpretation of them as symbols was part of a creative process in which new meanings for traditional forms of memorial were established and circulated. The memorials not only symbolized emotional responses to the war, but also ambitions for the post-war era. Contemporaries adopted new ways of thinking about largely traditional forms of memorial to fit the uncertain social and political climate of the inter-war years. This book represents a significant contribution to the study of material culture and memory, as well as to the social and cultural history of modern warfare.
