DE GRUYTER HANDBOOK OF ENTREPRENEURIAL FINANCE

Walter de Gruyter GmbH & Co KG As of early 2022, seven of the ten largest firms in the world by market capitalization had been funded through various types of entrepreneurial finance. This handbook provides an up-to-date survey of what we know about this significant phenomenon in all its forms, and where our knowledge about it needs to head from here. The handbook embraces a wide range of established and emerging academic and practitioner voices across the globe to explore the theoretical and practical flux and tension in the field. Until recently, most studies have taken a supply side perspective, focusing on the perspective of those who provide funding to new ventures. This book takes a different, demand side perspective, beginning with the entrepreneur and gradually broadening our view to include close by and then more distant funding sources. Following this approach, it is organized into four parts detailing the individual level (founders' resources, bricolage and bootstrapping, effectuation and portfolio entrepreneurship); the inner circle (informal financing, business groups, incubators and accelerators); the wider world (formal debt, microfinance, venture capital, corporate venture capital, business angels, government funding and family offices); and emerging perspectives (non-Western perspectives, gender, indigenous perspectives, post-conflict and disaster zones and ethics). The introduction considers the general state of the field, while the conclusion takes on additional topics relevant to entrepreneurial finance, such as decentralized finance, big data, behavioral economics, financial innovation and COVID-19, as well as possible ways in which entrepreneurial finance can have a greater impact on other disciplines. This handbook will be a core reference work for researchers, practitioners, and policy makers seeking an up-to-date academic survey of entrepreneurial finance. It can also be used as a primary text in Ph.D. seminars in entrepreneurship, entrepreneurial finance, and finance. Instructors in Master's level courses in entrepreneurial finance and venture capital will also find the book of benefit.

WHO OWNS THE WORLD'S MEDIA?

MEDIA CONCENTRATION AND OWNERSHIP AROUND THE WORLD

Oxford University Press Media ownership and concentration has major implications for politics, business, culture, regulation, and innovation. It is also a highly contentious subject of public debate in many countries around the world. In Italy, Silvio Berlusconi's companies have dominated Italian politics. Televisa has been accused of taking cash for positive coverage of politicians in Mexico.

Even in tiny Iceland, the regulation of media concentration led to that country's first and only public referendum. Who Owns the World's Media? moves beyond the rhetoric of free media and free markets to provide a dispassionate and data-driven analysis of global media ownership trends and their drivers. Based on an extensive data collection effort from scholars around the world, the book covers thirteen media industries, including television, newspapers, book publishing, film, search engines, ISPs, wireless telecommunication and others, across a ten to twenty-five year period in thirty countries. In many countries--like Egypt, China, or Russia--little to no data exists and the publication of these chapters will become authoritative resources on the subject in those regions. After examining each country, Noam and his collaborators offer comparisons and analysis across industries, regions, and development levels. They also calculate overall national concentration trends beyond specific media industries, the market share of individual companies in the overall national media sector, and the size and trends of transnational companies in overall global media. This definitive global study of the extent and impact of media concentration will be an invaluable resource for communications, public policy, law, and business scholars in doing research and also for media, telecom, and IT companies and financial institutions in the private sector.

SPECIAL ECONOMIC ZONES IN AFRICA

COMPARING PERFORMANCE AND LEARNING FROM GLOBAL EXPERIENCES

World Bank Publications "This book, designed for policymakers, academics and researchers, and SEZ program practitioners, provides the first systematic and comprehensive analysis of SEZ programs in Sub-Saharan Africa. It is the result of detailed surveys and case studies conducted during 2009 in ten developing countries, including six in Sub-Saharan Africa. The book provides quantitative evidence of the performance of SEZs, and of the factors which contribute to that performance, highlighting the critical importance not just of the SEZ itself but of the wider national investment climate in which it functions. It also provides a comprehensive guide to the key policy questions that confront governments establishing SEZ programs, including: if and when to launch an SEZ program, what form of SEZ is most appropriate, and how to go about implementing it. Among the most important findings from the study that is stressed in the book is the shift from traditional enclave models of zones to SEZs that are integrated ? with national trade and industrial strategies, with core trade and social infrastructure, with domestic suppliers, and with local labor markets.Although the book focuses primarily on the experience of Sub-Saharan Africa, its lessons will be applicable to developing countries around the world."

VIRTUAL CURRENCIES AND BEYOND

INITIAL CONSIDERATIONS

International Monetary Fund New technologies are driving transformational changes in the global financial system. Virtual currencies (VCs) and the underlying distributed ledger systems are among these. VCs offer many potential benefits, but also considerable risks. VCs could raise efficiency and in the long run strengthen financial inclusion. At the same time, VCs could be potential vehicles for money laundering, terrorist financing, tax evasion and fraud. While risks to the conduct of monetary policy seem less likely to arise at this stage given the very small scale of VCs, risks to financial stability may eventually emerge as the new technologies become more widely used. National authorities have begun to address these challenges and will need to calibrate regulation in a manner that appropriately addresses the risks without stifling innovation. As experience is gained, international standards and best practices could be considered to provide guidance on the most appropriate regulatory responses in different fields, thereby promoting harmonization and cooperation across jurisdictions.

THINK AGAIN

THE POWER OF KNOWING WHAT YOU DON'T KNOW

Random House Instant #1 New York Times Bestseller Discover the critical art of rethinking: how questioning your opinions can position you for excellence at work and wisdom in life Intelligence is usually seen as the ability to think and learn, but in a rapidly changing world, the most crucial skill may be the ability to rethink and unlearn. Recent global and political changes have forced many of us to re-evaluate our opinions and decisions. Yet we often still favour the comfort of conviction over the discomfort of doubt, and prefer opinions that make us feel good, instead of ideas that make us think hard. Intelligence is no cure, and can even be a curse. The brighter we are, the blinder we can become to our own limitations. Adam Grant - Wharton's top-rated professor and #1 bestselling author - offers bold ideas and rigorous evidence to show how we can embrace the joy of being wrong, encourage others to rethink topics as wide-ranging as abortion and climate change, and build schools, workplaces, and communities of lifelong learners. You'll learn how an international debate champion wins arguments, a Black musician persuades white supremacists to abandon hate, and how a vaccine whisperer convinces anti-vaxxers to immunize their children. Think Again is an invitation to let go of stale opinions and prize mental flexibility, humility, and curiosity over foolish consistency. If knowledge is power, knowing what you don't know is wisdom.
