Cochrane Handbook for Systematic Reviews of Interventions [Wiley](#) Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves. **Tribal Decision-maker's Guide to Solid Waste Management Handbook of Research on Web 2.0 and Second Language Learning** [IGI Global](#) "This book investigates how those involved in education can respond to the opportunities offered by the Web 2.0 technology"--Provided by publisher. **Criminal Evidence** [Cengage Learning](#) With an emphasis on real-world applications, CRIMINAL EVIDENCE, Eighth Edition, provides readers with comprehensive, up-to-date coverage of common evidentiary topics in a brief, affordable format. TLC was born from a strong commitment to improving undergraduate science education through supporting the front-line educators who play an essential role in this mission. The TLC's comprehensive approach encompasses consultation, seminars and workshops, acculturation activities for new faculty members, and teaching preparatory courses as well as a certificate program for graduate students. At the University of Maryland, TLC serves biology and chemistry faculty members, postdoctoral associates, and graduate students. The Center is deeply integrated into the departmental culture, and its emphasis on pedagogical content knowledge makes its activities highly relevant to the community that it serves. The book reflects ten years of intensive work on the design and implementation of the model. Beginning with a needs assessment and continuing with ongoing evaluation, the book presents a wealth of information about how to design and implement effective professional development. In addition, it discusses the theory underlying each of the program components and provides an implementation guide for adopting or adapting the TLC model and its constituent activities at other institutions. In this book, the authors describe how they created the highly successful discipline-based Teaching and Learning Center at the University of Maryland. This is a must read for anyone interested in improving higher education. Charles Henderson, Co-Director, Center for Research on Instructional Change in Postsecondary Education, Western Michigan University This book will provide a much-needed resource for helping campus leaders and faculty development professionals create robust programs that meet the needs of science faculty. Susan Elrod, Dean, College of Science and Mathematics, Fresno State The authors provide a road map and guidance for higher education professional development in the natural science for educators at all levels.
