## The Boundaries of Europe From the Fall of the Ancient World to the Age of Decolonisation

*Walter de Gruyter GmbH & Co KG* Europe's boundaries have mainly been shaped by cultural, religious, and political conceptions rather than by geography. This volume of bilingual essays from renowned European scholars outlines the transformation of Europe's boundaries from the fall of the ancient world to the age of decolonization, or the end of the explicit endeavor to "Europeanize" the world. From the decline of the Roman Empire to the polycentrism of today's world, the essays span such aspects as the confrontation of Christian Europe with Islam and the changing role of the Mediterranean from "mare nostrum" to a frontier between nations. Scandinavia, eastern Europe and the Atlantic are also analyzed as boundaries in the context of exploration, migratory movements, cultural exchanges, and war. The Boundaries of Europe, edited by Pietro Rossi, is the first installment in the ALLEA book series Discourses on Intellectual Europe, which seeks to explore the question of an intrinsic or quintessential European identity in light of the rising skepticism towards Europe as an integrated cultural and intellectual region.

# Europe in the Sixteenth Century

*Routledge* This bestselling, seminal book - a general survey of Europe in the era of 'Renaissance and Reformation' - was originally published in Denys Hay's famous Series, 'A General History of Europe'. It looks at sixteenth-century Europe as a complex but interconnected whole, rather than as a mosaic of separate states. The authors explore its different aspects through the various political structures of the age - empires, monarchies, city-republics - and how they functioned and related to one another. A strength of the book remains the space it devotes to the growing importance of town-life in the sixteenth century, and to the economic background of political change.

# The Translation of Children's Literature

## A Reader

*Multilingual Matters* In the last few decades a number of European scholars have paid an increasing amount of attention to children's literature in translation. This book not only provides a synthetic account of what has been achieved in the field, but also makes us fully aware of all the textual, visual and cultural complexities that translating for children entails.... Students of this subject have had problems in finding a book that attempted an up-to-date and comprehensive review of the field. Gillian Lathey's Reader does just this. Dr Piotr Kuhiwczak, Director, Centre for Translation and Comparative Cultural Studies University of Warwick.

# The Wandering Throne of Solomon Objects and Tales of Kingship in the Medieval Mediterranean

## The Betrothed

# The Long Life of Magical Objects

## A Study in the Solomonic Tradition

*Penn State Press* This book explores a series of powerful artifacts associated with King Solomon via legendary or extracanonical textual sources. Tracing their cultural resonance throughout history, art historian Allegra lafrate delivers exciting insights into these objects and interrogates the ways in which magic manifests itself at a material level. Each chapter focuses on a different Solomonic object: a ring used to control demons; a mysterious set of bottles that constrain evil forces; an endless knot or seal with similar properties; the shamir, known for its supernatural ability to cut through stone; and a flying carpet that can bring the sitter anywhere he desires. Taken together, these chapters constitute a study on the reception of the figure of Solomon, but they are also cultural biographies of these magical objects and their inherent aesthetic, morphological, and technical qualities. Thought-provoking and engaging, lafrate's study shows how ancient magic artifacts live on in our imagination, in items such as Sauron's ring of power, Aladdin's lamp, and the magic carpet. It will appeal to historians of art, religion, folklore, and literature.

# Religious Narratives in Italian Literature after the Second Vatican Council

## A Semiotic Analysis

*Walter de Gruyter GmbH & Co KG* This book presents a semiotic study of the re-elaboration of Christian narratives and values in a corpus of Italian novels published after the Second Vatican Council (1960s). It tackles the complex set of ideas expressed by Italian writers about the biblical narration of human origins and traditional religious language and ritual, the perceived clash between the immanent and transcendent nature and role of the Church, and the problematic notion of sanctity emerging from contemporary narrative.

## History of the Italian Agricultural Landscape

*Princeton University Press* Emilio Sereni's classic work is now available in an English language edition. History of the Italian Agricultural Landscape is a synthesis of the agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this sweeping historical survey, he describes attempts by successive generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems. History of the Italian Agricultural Landscape first appeared in 1961. At the time of its publication it was a pathbreaking work, parallel in its importance for Italy to Marc Bloc's masterwork of 1931, The Original Characteristics of French Rural History. Sereni invented the concept of the historical "agricultural landscape": an interdisciplinary characterization of rural life involving economic and social history, linguistics, archeology, art history, and ecological studies. Originally published in 1997. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. ## Leonardo

# A Restless Genius

*John Wiley & Sons* A visionary scientist, a supreme painter, a man of eccentricity and ambition: Leonardo da Vinci had many lives. Born from a fleeting affair between a country girl and a young notary, Leonardo was never legitimized by his father and received no formal education. While this freedom from the routine of rigid and codified learning may have served to stimulate his natural creativity, it also caused many years of suffering and an insatiable need to prove his own worth. It was a

striving for glory and an obsessive thirst for knowledge that prompted Leonardo to seek the protection and favour of the most powerful figures of his day, from Lorenzo de' Medici to Ludovico Sforza, from the French governors of Milan to the pope in Rome, where he could vie for renown with Michelangelo and Raphael. In this revelatory account, Antonio Forcellino draws on his expertise - both as historian and as restorer of some of the world's greatest works of art - to give us a more detailed view of Leonardo than ever before. Through careful analyses of his paintings and compositional technique, down to the very materials used, Forcellino offers fresh insights into Leonardo's artistic and intellectual development. He spans the great breadth of Leonardo's genius, discussing his contributions to mechanics, optics, anatomy, geology and metallurgy, as well as providing acute psychological observations about the political dynamics and social contexts in which Leonardo worked. Forcellino sheds new light on a life all too often overshadowed and obscured by myth, providing us with a fresh perspective on the personality and motivations of one of the greatest geniuses of Western culture.

## Libraries and Public Perception

## A Comparative Analysis of the European Press

*Elsevier* What is the future of libraries? This question is frequently posed, with widespread research into the social and economic impact of libraries. Newspapers play an important role in forming public perceptions, but how do newspapers present libraries, their past, present and future? Nobody has yet taken the press to task on the quantity and quality of articles on libraries, however Libraries and Public Perception does just this, through comparative textual analysis of newspapers in Europe. After a comprehensive and useful introductory chapter, the book consists of the following five chapters: Wondering about the future of libraries; Measuring the value of libraries; Libraries in the newspapers; Contemporary challenges and public

perception; Which library model from the newspapers: a synthesis. Provides an alternative means to evaluate the impact of libraries Compares different countries and societies regarding their representation of libraries Pursues its subject through active research, rather than self reflection

# Agamben and the Signature of Astrology

## Spheres of Potentiality

*Lexington Books* The work of Giorgio Agamben, one of the world's most important living philosophers, has been the object of much scrutiny. Yet, there is one dimension of his thought that remains unexamined by scholars: the presence of the ancient science of astrology in his writings. This book, the first of its kind, identifies the astrological elements and explains the implications of their usage by Agamben. In so doing, this study challenges us to imagine Agamben's thought in a radically new light. A critical account of the presence of astrology and related themes in Agamben's writings, ranging from the earlier works to the more recent publications, illustrates that the astrological signature constitutes a mode of philosophical archaeology that allows for an enhanced understanding of concepts that are central to his works, such as potentiality, the signature, bare life and biopolitics.

## Women of the Renaissance

*University of Chicago Press* In this informative and lively volume, Margaret L. King synthesizes a large body of literature on the condition of western European women in the Renaissance centuries (1350-1650), crafting a much-needed and unified overview of women's experience in Renaissance society. Utilizing the perspectives of social, church, and intellectual history, King looks at women of all classes, in both usual and unusual settings. She first describes the familial roles filled by most women of the day—as mothers, daughters, wives, widows, and workers. She turns then to that significant fraction of women in, and acted upon, by the church: nuns, uncloistered holy women, saints, heretics, reformers, and witches, devoting special attention to the social and economic independence monastic life afforded them. The

lives of exceptional women, those warriors, queens, patronesses, scholars, and visionaries who found some other place in society for their energies and strivings, are explored, with consideration given to the works and writings of those first protesting female subordination: the French Christine de Pizan, the Italian Modesta da Pozzo, the English Mary Astell. Of interest to students of European history and women's studies, King's volume will also appeal to general readers seeking an informative, engaging entrance into the Renaissance period.

The authors also discuss trends and the future of inequality. Inequality is a pressing issue that not only affects living standards, but is also inextricably linked

to the way our democracies work.

## Handbook of International Futurism

*Walter de Gruyter GmbH & Co KG* The Handbook of International Futurism is the first reference work ever to presents in a comparative fashion all media and countries in which the movement, initiated by F.T. Marinetti in 1909, exercised a particularly noteworthy influence. The handbook offers a synthesis of the state of scholarship regarding the international radiation of Futurism and its influence in some fifteen artistic disciplines and thirty-eight countries. While acknowledging the great achievements of the movement in the visual and literary arts of Italy and Russia, it treats Futurism as an international, multidisciplinary phenomenon that left a lasting mark on the manifold artistic manifestations of the early twentieth-century avant-garde. Hundreds of artists, who in some phase in their career absorbed Futurist ideas and stylistic devices, are presented in the context of their national traditions, their international connections and the media in which they were predominantly active. The handbook acts as a kind of multi-disciplinary, geographical encyclopaedia of Futurism and gives scholars with varying levels of experience a detailed overview of all countries and disciplines in which the movement had a major impact.

## Labics - Structures

## A System of Relations

*Park Publishing (WI)* Labics is a rising Rome-based architectural firm that has gained great international acclaim in recent years for both its projects and its submissions to major competitions. Its guiding principle is the idea of "structure." Each of the

firm's projects--which range from housing and office buildings to museums, cultural centers, schools, subway stations, and public spaces--is intended to exemplify the importance of the respective type of structure. Labics--Structures is the first book on Labics's remarkable and rapidly growing body of work. The book is arranged in four chapters that explore the idea of structure in different contexts: "Geometric," "Bearing," "Circulation," and "Public Space Structures." Alongside topical essays, it features twenty projects selected by the firm's founding directors, Maria Claudia Clemente and Francesco Isidori, to represent the diversity of the firm's work, as well as its wide geographic reach--with buildings in Italy, Finland, Switzerland, England, Bosnia and Herzegovina, Saudi Arabia, and Iran. Each project is documented with atmospheric photographs and a wealth of plans and diagrams to illustrate concepts and details.
