KEY=ITALIANO - FAULKNER LOVE

The Maciste Films of Italian Silent Cinema

Indiana University Press **Italian film star Bartolomeo Pagano's "Maciste" played a key role in his nation's narratives of identity during World War I and after. Jacqueline Reich traces the racial, class, and national transformations undergone by this Italian strongman from African slave in Cabiria (1914), his first film, to bourgeois gentleman, to Alpine soldier of the Great War, to colonial officer in Italy's African adventures. Reich reveals Maciste as a figure who both reflected classical ideals of masculine beauty and virility (later taken up by Mussolini and used for political purposes) and embodied the model Italian citizen. The 12 films at the center of the book, recently restored and newly accessible to a wider public, together with relevant extra-cinematic materials, provide a rich resource for understanding the spread of discourses on masculinity, and national and racial identities during a turbulent period in Italian history. The volume includes an illustrated appendix documenting the restoration and preservation of these cinematic treasures.**

Fascist Modernities

Italy, 1922-1945

Univ of California Press **This cultural history of Mussolini's dictatorship discusses the meanings of modernity in interwar Italy. The work argues that fascism appealed to many Italian intellectuals as a new model of modernity that would resolve the European and national crises.**

Early Film Theories in Italy, 1896-1922

Film Theory in Media History **This collection for the first time brings together scholars to explore the ways that various people and groups in Italian society reacted to the advent of cinema. Looking at the responses of writers, scholars, clergymen, psychologists, philosophers, members of parliament, and more, the pieces collected here from that period show how Italians developed a common language to describe and discuss this invention that quickly exceeded all expectations and transcended existing categories of thought and artistic forms. The result is a close-up picture of a culture in transition, dealing with a "scandalous" new technology that appeared poised to thoroughly change everyday life.**

Vital Subjects

Race and Biopolitics in Italy, 1860-1920

[Oxford University Press](#) **Vital Subjects: Race and Biopolitics in Italy** is an interdisciplinary study of how racial and colonial discourses shaped the “making” of Italians as modern political subjects in the years between its administrative unification (1861-1870) and the end of the First World War (1919). This title was made Open Access by libraries from around the world through Knowledge Unlatched.

Images of Colonialism and Decolonisation in the Italian Media

[Cambridge Scholars Publishing](#) The twentieth century saw a proliferation of media discourses on colonialism and, later, decolonisation. Newspapers, periodicals, films, radio and TV broadcasts contributed to the construction of the image of the African “Other” across the colonial world. In recent years, a growing body of literature has explored the role of these media in many colonial societies. As regards the Italian context, however, although several works have been published about the links between colonial culture and national identity, none have addressed the specific role of the media and their impact on collective memory (or lack thereof). This book fills that gap, providing a review of images and themes that have surfaced and resurfaced over time. The volume is divided into two sections, each organised around an underlying theme: while the first deals with visual memory and images from the cinema, radio, television and new media, the second addresses the role of the printed press, graphic novels and comics, photography and trading cards.

Post-war Architecture between Italy and the UK

Exchanges and transcultural influences

[UCL Press](#) Italy and the UK experienced a radical re-organisation of urban space following the devastation of many towns and cities in the Second World War. The need to rebuild led to an intellectual and cultural exchange between a wave of talented architects, urbanists and architectural historians in the two countries. **Post-war Architecture Between Italy and the UK** studies this exchange, exploring how the connections and mutual influences contributed to the formation of a distinctive stance towards Internationalism, notwithstanding the countries’ contrasting geographic and climatic conditions, levels of economic and industrial development, and social structures. Topics discussed in the volume include the influence of Italian historic town centres on British modernist and Brutalist architectural approaches to the design of housing and university campuses as public spaces; post-war planning concepts such as the precinct; the tensions between British critics and Italian architects that paved the way for British postmodernism; and the role of architectural education as a melting pot of mutual influence. It draws on a wealth of archival and original materials to present insights into the personal relationships, publications, exhibitions and events that provided the crucible for the dissemination of ideas and typologies across cultural borders. Offering new insights into the transcultural aspects of European architectural history in the post-war years, and its legacy, this volume is vital reading for architectural and urban historians, planners and students, as well as social historians of the European post-war period.

Education and Development in Colonial and Postcolonial Africa

Policies, Paradigms, and Entanglements, 1890s–1980s

[Springer Nature](#) **This open access edited volume offers an analysis of the entangled histories of education and development in twentieth-century Africa. It deals with the plurality of actors that competed and collaborated to formulate educational and developmental paradigms and projects: debating their utility and purpose, pondering their necessity and risk, and evaluating their intended and unintended consequences in colonial and postcolonial moments. Since the late nineteenth century, the “educability” of the native was the subject of several debates and experiments: numerous voices, arguments, and agendas emerged, involving multiple institutions and experts, governmental and non-governmental, religious and laic, operating from the corridors of international organizations to the towns and rural villages of Africa. This plurality of expressions of political, social, cultural, and economic imagination of education and development is at the core of this collective work.**

Europe and Empire

On the Political Forms of Globalization

[Fordham Univ Press](#) **The European Union and the single currency have given Europe more stability than it has known in the past thousand years, yet Europe seems to be in perpetual crisis about its global role. The many European empires are now reduced to a multiplicity of ethnicities, traditions, and civilizations. Europe will never be One, but to survive as a union it will have to become a federation of “islands” both distinct and connected. Though drawing on philosophers of Europe’s past, Cacciari calls not to resist Europe’s sunset but to embrace it. Europe will have to open up to the possibility that in few generations new exiles and an unpredictable cultural hybridism will again change all we know about the European legacy. Though scarcely alive in today’s politics, the political unity of Europe is still a necessity, however impossible it seems to achieve.**

Handbook of International Futurism

[Walter de Gruyter GmbH & Co KG](#) **The Handbook of International Futurism is the first reference work ever to presents in a comparative fashion all media and countries in which the movement, initiated by F.T. Marinetti in 1909, exercised a particularly noteworthy influence. The handbook offers a synthesis of the state of scholarship regarding the international radiation of Futurism and its influence in some fifteen artistic disciplines and thirty-eight countries. While acknowledging the great achievements of the movement in the visual and literary arts of Italy and Russia, it treats Futurism as an international, multidisciplinary phenomenon that left a lasting mark on the manifold artistic manifestations of the early twentieth-century avant-garde. Hundreds of artists, who in some phase in their career absorbed Futurist ideas and stylistic devices, are presented in the context of their national traditions, their international connections and the media in which they were predominantly active. The handbook acts as a kind of multi-disciplinary, geographical encyclopaedia of Futurism and gives scholars with varying levels of experience a detailed overview of all countries and disciplines in which the movement had a major impact.**

Refiguring American Film Genres

Theory and History

[Univ of California Press](#) **This collection of essays by leading American film scholars charts a whole new territory in genre film criticism. Rather than assuming that genres are self-evident categories, the contributors offer innovative ways to think about types of films, and patterns within films, in a historical context. Challenging familiar attitudes, the essays offer new conceptual frameworks and a fresh look at how popular culture functions in American society. The range of essays is exceptional, from David J. Russell's insights into the**

horror genre to Carol J. Clover's provocative take on "trial films" to Leo Braudy's argument for the subject of nature as a genre. Also included are essays on melodrama, race, film noir, and the industrial context of genre production. The contributors confront the poststructuralist critique of genre head-on; together they are certain to shape future debates concerning the viability and vitality of genre in studying American cinema.

Virtual Art

From Illusion to Immersion

MIT Press An overview of the art historical antecedents to virtual reality and the impact of virtual reality on contemporary conceptions of art. Although many people view virtual reality as a totally new phenomenon, it has its foundations in an unrecognized history of immersive images. Indeed, the search for illusionary visual space can be traced back to antiquity. In this book, Oliver Grau shows how virtual art fits into the art history of illusion and immersion. He describes the metamorphosis of the concepts of art and the image and relates those concepts to interactive art, interface design, agents, telepresence, and image evolution. Grau retells art history as media history, helping us to understand the phenomenon of virtual reality beyond the hype. Grau shows how each epoch used the technical means available to produce maximum illusion. He discusses frescoes such as those in the Villa dei Misteri in Pompeii and the gardens of the Villa Livia near Prima Porta, Renaissance and Baroque illusion spaces, and panoramas, which were the most developed form of illusion achieved through traditional methods of painting and the mass image medium before film. Through a detailed analysis of perhaps the most important German panorama, Anton von Werner's 1883 The Battle of Sedan, Grau shows how immersion produced emotional responses. He traces immersive cinema through Cinerama, Sensorama, Expanded Cinema, 3-D, Omnimax and IMAX, and the head mounted display with its military origins. He also examines those characteristics of virtual reality that distinguish it from earlier forms of illusionary art. His analysis draws on the work of contemporary artists and groups ART+COM, Maurice Benayoun, Charlotte Davies, Monika Fleischmann, Ken Goldberg, Agnes Hegedues, Eduardo Kac, Knowbotic Research, Laurent Mignonneau, Michael Naimark, Simon Penny, Daniela Plewe, Paul Sermon, Jeffrey Shaw, Karl Sims, Christa Sommerer, and Wolfgang Strauss. Grau offers not just a history of illusionary space but also a theoretical framework for analyzing its phenomenologies, functions, and strategies throughout history and into the future.

The Italian Literature of the Axis War

Memories of Self-Absolution and the Quest for Responsibility

Palgrave Macmillan This book investigates the representation of the Axis War - the wars of aggression that Fascist Italy fought in North Africa, Greece, the Soviet Union, and the Balkans, from 1940 to 1943 - in three decades of Italian literature. Building on an innovative and interdisciplinary methodology, which combines memory studies, historiography, thematic criticism, and narratology, this book explores the main topoi, themes, and masterplots of an extensive corpus of novels and memoirs to assess the contribution of

literature to the reshaping of Italian memory and identity after the end of Fascism. By exploring the influence that public memory exercises on literary depictions and, in return, the contribution of literary texts to the formation and dissemination of a discourse about the past, the book examines to what extent Italian literature helped readers form an ethical awareness of the crimes committed by members of their national community during World War II.

Narrative Comprehension and Film

Routledge Narrative is one of the ways we organise and understand the world. It is found everywhere: not only in films and books, but also in everyday conversations and in the nonfictional discourses of journalists, historians, educators, psychologists, attorneys and many others. Edward Branigan presents a telling exploration of the basic concepts of narrative theory and its relation to film - and literary - analysis, bringing together theories from linguistics and cognitive science, and applying them to the screen. Individual analyses of classical narratives form the basis of a complex study of every aspect of filmic fiction exploring, for example, subjectivity in *Lady in the Lake*, multiplicity in *Letter from an Unknown Woman*, post-modernism and documentary in *Sans Soleil*.

Moving Forward, Looking Back

The European Avant-garde and the Invention of Film Culture, 1919-1939

Amsterdam University Press This book, the first full critical overview of the film avant-garde, ushers in a new approach—and in the process creates its own subject. While many books have studied particular aspects of the European film avant-garde of the 1920s and 1930s, *Moving Forward, Looking Back* provides a much-needed summary of the theory and practice of the movement, while also emphasizing aspects of the period that have been overlooked. Arguing that a European perspective is the only way to understand the transnational movement, the book also pioneers a new approach to the alternative cinema network that sustained the avant-garde, paying particular attention to the emergence of film culture as visible in screening clubs, film festivals, and archives. It will be essential to anyone interested in the influential movement and the film culture it created.

Spatial and Temporal Dimensions for Legal History

Research Experiences and Itineraries

Max Planck Institute for European Legal History <http://dx.doi.org/10.12946/gplh6><http://www.epubli.de/shop/buch/53894>"The spatiotemporal conjunction is a fundamental aspect of the juridical reflection on the historicity of law. Despite the fact that it seems to represent an issue directly connected with the question of where legal history is heading today, it still has not been the object of a focused inquiry. Against this background, the book's proposal consists in rethinking key confluences related to this problem in order to provide coordinates for a collective understanding and dialogue. The aim of this volume, however, is not to offer abstract methodological considerations, but rather to rely both on concrete studies, out of which a reflection on this conjunction emerges, as well as on the reconstruction of certain research lines featuring a spatiotemporal component. This analytical approach makes a contribution by providing some suggestions for the employment of space and time as coordinates for legal history. Indeed, contrary to those historiographical attitudes reflecting a monistic conception of space and time (as well as a Eurocentric approach), the book emphasises the need for a delocalized global perspective. In general terms, the essays collected in this book intend to take into account the multiplicity of the spatiotemporal confines, the flexibility of those instruments that serve to create chronologies and scenarios, as well as certain processes of adaptation of law to different times and into different spaces. The spatiotemporal dynamism enables historians not only to detect new perspectives and dimensions in foregone themes, but also to achieve new and compelling interpretations of legal history. As far as the relationship between space and law is concerned, the book analyses experiences in which space operates as a determining factor of law, e.g. in terms of a field of action for law. Moreover, it outlines the attempted

scales of spatiality in order to develop legal historical research. With reference to the connection between time and law, the volume sketches the possibility of considering the factor of time, not just as a descriptive tool, but as an ascriptive moment (quasi an inner feature) of a legal problem, thus making it possible to appreciate the synchronic aspects of the 'juridical experience'. As a whole, the volume aims to present spatiotemporality as a challenge for legal history. Indeed, reassessing the value of the spatiotemporal coordinates for legal history implies thinking through both the thematic and methodological boundaries of the discipline."

Locating the Moving Image

New Approaches to Film and Place

Indiana University Press **Leading scholars in the interdisciplinary field of geo-spatial visual studies examine the social experience of cinema and the different ways in which film production developed as a commercial enterprise, as a leisure activity, and as modes of expression and communication. Their research charts new pathways in mapping the relationship between film production and local film practices, theatrical exhibition circuits and cinema going, creating new forms of spatial anthropology. Topics include cinematic practices in rural and urban communities, development of cinema by amateur filmmakers, and use of GIS in mapping the spatial development of film production and cinema going as social practices.**

Cinema and Fascism

Italian Film and Society, 1922–1943

Univ of California Press **"This study considers Italian filmmaking during the Fascist era and offers an original and revealing approach to the interwar years. Steven Ricci directly confronts a long-standing dilemma faced by cultural historians: while made during a period of totalitarian government, these films are neither propagandistic nor openly "Fascist." Instead, the Italian Fascist regime attempted to build ideological consensus by erasing markers of class and regional difference and by circulating terms for an imaginary national identity. Cinema and Fascism investigates the complex relationship between the totalitarian regime and Italian cinema. It looks at the films themselves, the industry, and the role of cinema in daily life, and offers new insights into this important but neglected period in cinema history." -- Book cover.**

Re-viewing Fascism

Italian Cinema, 1922-1943

Indiana University Press **When Benito Mussolini proclaimed that "Cinema is the strongest weapon," he was telling only half the story. In reality, very few feature films during the Fascist period can be labeled as propaganda. Re-viewing Fascism considers the many films that failed as "weapons" in creating cultural consensus and instead came to reflect the complexities and contradictions of Fascist culture. The volume also examines the connection between cinema of the Fascist period and neorealism--ties that many scholars previously had denied in an attempt to view Fascism as an unfortunate deviation in Italian history. The postwar directors Luchino Visconti, Roberto Rossellini, and Vittorio de Sica all had important roots in the Fascist era, as did the Venice Film Festival. While government censorship loomed over Italian filmmaking, it did not prevent frank depictions of sexuality and representations of men and women that challenged official gender policies. Re-viewing Fascism brings together scholars from different cultural and disciplinary backgrounds as it offers an engaging and innovative look into Italian cinema, Fascist culture, and society.**

Homosexuality and Italian Cinema

From the Fall of Fascism to the Years of Lead

[Springer](#) This book is the first to establish the relevance of same-sex desires, pleasures and anxieties in the cinema of post-war Italy. It explores cinematic representations of homosexuality and their significance in a wider cultural struggle in Italy involving society, cinema, and sexuality between the 1940s and 1970s. Besides tracing the evolution of representations through both art and popular films, this book also analyses connections with consumer culture, film criticism and politics. Giori uncovers how complicated negotiations between challenges to and valorization of dominant forms of knowledge of homosexuality shaped representations and argues that they were not always the outcome of hatred but also sought to convey unmentionable pleasures and complicities. Through archival research and a survey of more than 600 films, the author enriches our understanding of thirty years of Italian film and cultural history.

Animality in Contemporary Italian Philosophy

[Springer Nature](#) This volume provides an overview of contemporary Italian philosophy from the perspective of animality. Its rationale rests on two main premises: the great topicality of both Italian contemporary philosophy (the so-called "Italian Theory") and of the animal question (the so-called "animal turn" in the humanities and the social sciences) in the contemporary philosophical panorama. The volume not only intersects these two axes, illuminating Italian Theory through the animal question, but also proposes an original thesis: that the animal question is a central and founding issue of contemporary Italian philosophy. It combines historical-descriptive chapters with analyses of the theme in several philosophical branches, such as biopolitics, Posthumanism, Marxism, Feminism, Antispeciesism and Theology, and with original contributions by renowned authors of contemporary Italian (animal) philosophy. The volume is both historical-descriptive and speculative and is intended for a broad academic audience, embracing both Italian studies and Animal studies at all levels.

Brave New World Revisited

A Novel

Harper Collins When Aldous Huxley wrote his famous novel *Brave New World*, he did so with the sincere belief that the dystopian world he created was a true possibility given the direction of the social, political and economic world order. Written almost thirty years later, *Brave New World Revisited* is a re-evaluation of his predictions based on the changes he had witnessed in the meantime. In this twelve-part essay, Huxley argues that society is moving toward his dystopian vision even faster than he had originally assumed, and provides his own suggestions on how to bring an end to this decadent decline. *Brave New World Revisited* condemns symptoms of modern life such as overpopulation, propaganda and extreme government control while providing a staunch defence of individualism. Despite being published over fifty years ago, the problems identified in *Brave New World Revisited* are still startlingly relevant, lending a chilling creditability to Aldous Huxley's unsettling predictions. HarperTorch brings great works of non-fiction and the dramatic arts to life in digital format, upholding the highest standards in ebook production and celebrating reading in all its forms. Arte Ambientale, Urban Space, and Participatory Art

Routledge Working in 1970s Italy, a group of artists—namely Ugo La Pietra, Maurizio Nannucci, Francesco Somaini, Mauro Staccioli, Franco Summa, and Franco Vaccari—sought new spaces to create and exhibit art. Looking beyond the gallery, they generated sculptural, conceptual, and participatory interventions, called *Arte Ambientale* (Environmental Art), situated in the city streets. Their experiments emerged at a time of cultural crisis, when fierce domestic terrorism aggravated an already fragile political situation. To confront the malaise, these artists embraced a position of artistic autonomy and social critique, democratically connecting the city's inhabitants through direct art practices.
