The Making of Low Carbon Economies

Routledge The Making of Low Carbon Economies looks at how more than two decades of sustained effort at climate change mitigation has resulted in a variety of new practices, rules and ways of doing things: a period of active construction of low carbon economies. From outer space observations of the carbon in tropical forests, to carbon financial reporting, and insulating solid masonry walls, these diverse things, activities and objects are integral to how climate change has been brought into being as a problem. The book takes a fresh look at society's response to climate change by examining a diverse array of empirical sites where climate change is being made real through its incorporation into everyday lives - a process of stitching climate concerns into the discourse and practices of already existing economies, as well as creating new economies. The Making of Low Carbon Economies adds fresh insights to economic sociology and science and technology studies scholarship on the multiple origins and heterogeneous operation of markets, demonstrating the constraints and opportunities of an economic framing of the problem of climate change. It covers the obvious (and now well-researched) topic of carbon markets, as well as new more unusual material on the low carbon reframing of already existing markets and economies.

Competition and Cooperation in Economics and Business

Proceedings of the Asia-Pacific Research in Social Sciences and Humanities, Depok, Indonesia, November 7-9, 2016: Topics in Economics and Business

CRC Press Asia and the Pacific have become the growth engine of the world economy with the contribution of two-third of the global growth. The book discusses current issues in economics, business, and accounting in which economic agents, as individuals, entrepreneurs and professionals, as well as countries in the Asia and Pacific regions compete and collaborate with each other and with the rest of the globe. Areas covered in the book include economic development and sustainability, labor market competition, Islamic economic and business, marketing, finance, accounting standard compliances, and taxation. It will help shed light on what business

and economic scholars in regions have done in terms of research and knowledge development, as well as the new frontiers of research that have been explored and opening up.

Water Accounting

International Approaches to Policy and Decision-making

Edward Elgar Publishing This groundbreaking book examines the role that water accounting can play in resolving economic, environmental and social issues. One of the most pressing global issues of the 21st century is the scarcity of water to ensure economic, environmental and social sustainability. In addressing the issue through policy and management, access to high quality information is critically important. But water scarcity has many implications, and it is possible that different reporting approaches, generally called water accounting systems, can be appropriate to addressing them. In this key book, international experts respond to the question: what role can water accounting play in resolving economic, social and environmental issues at individual, organizational, industry, national and international levels? They explore how various forms of water accounting are utilized and the issues that they address. Academics and postgraduate students interested in water scarcity and accounting will find this book invaluable. Policymakers in all areas relating to water as well as environmentalists, water industry managers and water lawyers will find plenty of important insights in this essential resource.

Handbook of Research on Value Creation for Small and Micro Social Enterprises

IGI Global In the corporate world, businesses are focused on increasing their revenues but ignore the cries of social and environmental concerns from nearby communities. At the other end of the spectrum, nonprofits seek to help their local communities but are constantly required to create fundraisers without having adequate time to put those collected donations to use. The world needs an industry to combine civic engagement and public service with wealth and value creation to provide self-sustaining opportunities for public services that are sometimes overlooked or ignored. The Handbook of Research on Value Creation for Small and Micro Social Enterprises defines the concept of social enterprise and provides vital insight into the importance of rebalancing, creating, and

promoting economic activities that achieve social fairness, cultural fulfillment, and the protection of the environment. While highlighting topics such as marketing strategies, cross-cultural frameworks, and public policy, this publication focuses on empowering rather than controlling sustainable solutions for various communities and consumers. This book is ideally designed for researchers, policymakers, academicians who teach and/or research small and micro social enterprises, and advanced-level students furthering their research exposure to pertinent topics in this field.

The Semantic Web in Earth and Space Science. Current Status and Future Directions

IOS Press The geosciences are one of the fields leading the way in advancing semantic technologies. This book continues the dialogue and feedback between the geoscience and semantic web communities. Increasing data volumes within the geosciences makes it no longer practical to copy data and perform local analysis. Hypotheses are now being tested through online tools that combine and mine pools of data. This evolution in the way research is conducted is commonly referred to as e-Science. As e-Science has flourished, the barriers to free and open access to data have been lowered and the need for semantics has been heightened. As the volume, complexity, and heterogeneity of data resources grow, geoscientists are creating new capabilities that rely on semantic approaches. Geoscience researchers are actively working toward a research environment of software tools and interfaces to data archives and services with the goals of full-scale semantic integration beginning to take shape. The members of this emerging semantic e-Science community are increasingly in need of semantic-based methodologies, tools and infrastructure. A feedback system between the geo- and computational sciences is forming. Advances in knowledge modeling, logic-based hypothesis checking, semantic data integration, and knowledge discovery are leading to advances in scientific domains, which in turn are validating semantic approaches and pointing to new research directions. We present mature semantic applications within the geosciences and stimulate discussion on emerging challenges and new research directions.

OECD Food and Agricultural Reviews Innovation, Productivity and Sustainability in Food and Agriculture Main Findings from Country Reviews and Policy Lessons Main Findings from Country Reviews and Policy Lessons

OECD Publishing Markets that function well within a stable regulatory and policy environment are key to improving the productivity and sustainability of the food and agriculture sector. This report contains the main findings and policy lessons gained from a series of wide-ranging country reviews on how government policies can improve sectoral productivity and sustainability through their impact

on innovation, structural change, natural resource use, and climate change. Improving the policy environment would require rolling back those policies that distort markets the most and retain farmers in uncompetitive and low-income activities, harm the environment, stifle innovation, slow structural and generational change, and weaken resilience.

FINANCE AND CONTINENTAL DEVELOPMENT PLAN

SWEDENGS EDITIONS Public domestic resources remain a major instrument of development plan via the financial part as they are the largest numerically with a total external financial flows into Africa amounted to \$200 billion and domestic taxes \$530 billion (OECD, AFDB,2014). How to Manage Value-Added Tax Refunds

International Monetary Fund The value-added tax (VAT) has the potential to generate significant government revenue. Despite its intrinsic self-enforcement capacity, many tax administrations find it challenging to refund excess input credits, which is critical to a

well-functioning VAT system. Improperly functioning VAT refund practices can have profound implications for fiscal policy and management, including inaccurate deficit measurement, spending overruns, poor budget credibility, impaired treasury operations, and arrears accumulation. This note addresses the following issues: (1) What are VAT refunds and why should they be managed properly? (2) What practices should be put in place (in tax policy, tax administration, budget and treasury management, debt, and fiscal statistics) to help manage key aspects of VAT refunds? For a refund mechanism to be credible, the tax administration must ensure that it is equipped with the strategies, processes, and abilities needed to identify VAT refund fraud. It must also be prepared to act quickly to combat such fraud/schemes.

International Corporate Reporting

Global and Diverse

Routledge This textbook provides a comprehensive overview of international corporate reporting which enhances students' understanding of diversity and convergence in the field. The authors discuss the institutional and cultural context in which international corporate reporting has developed over the years as well as the global reach of IFRS Standards from the IASB throughout and beyond the European Union, into interest groups and emerging economies. Other key elements explored throughout the book include assurance through auditing and corporate governance, narrative reporting, strategic and corporate social responsibility, group accounting, current accounting issues and taxation in corporate reports. Indicative research examples show how the methods used in research papers may be understood and applied. Case studies outline short projects based on corporate cases, with related links to material on corporate websites. Helpful and reliable sources of information and data are identified through hyperlinks to accessible websites. End-of-chapter questions encourage discussion of the main issues. Throughout there is a focus on accountability and the information needs of stakeholders. This new edition of a classic text is fully revised and updated in order to remain essential reading for students of international accounting and corporate reporting globally. The book will be an invaluable resource for postgraduate taught programmes and final-year undergraduate courses in accounting, finance and business studies.

Poverty and Regional Development in Eastern Europe and Central Asia

World Bank Publications "Regional economic development is an interest of policymakers throughout the Europe and Central Asia (ECA) region. One of its principal aims is to reduce poverty in lagging regions by stimulating local economic growth. However, problems exist with this approach. First, it may miss the target. Although geographical concentrations of poverty exist, poor people also live in regions that are - on average - rich. Second, the sources of the problem may be misdiagnosed. Poverty is not only related to where people are, but to who people are. In ECA, poverty is associated with low levels of education and people who are too young or too old to participate in the labor force. Under these circumstances, efforts to bring higher wage employment opportunities to poor regions may have little immediate benefit for the people who live there. Third, relying on regional economic development to address poverty in lagging regions ignores the potential role of migration. The emigration of labor, rather than the immigration of capital, may be a more effective means of reducing the poverty of individuals in lagging regions, though this is unlikely to eliminate pockets of poverty quickly. Development opportunities may exist in poor regions that markets have overlooked. Interventions must be assessed carefully. Some of the traditional instruments used to stimulate regional economic growth have mixed track records. Comprehensive, custom-tailored approaches appear to be a promising alternative. However, governments should be modest in using regional development as a tool of poverty reduction. Policies aimed at stimulating growth in poor regions should be complemented by more direct anti-poverty measures, including targeted transfers and investments in education, and efforts to remove barriers to emigration."--World Bank website.

Essential Issues in Corporate Social Responsibility

New Insights and Recent Issues

Springer Nature This book presents the latest evidence on, and new approaches to, the development of Corporate Social Responsibility in emerging and established economies. To do so, it examines a broad range of industries, from fashion to banking, and various aspects, like accounting, information security, and human resource management. Special emphasis is placed on the role of

education. The case studies gathered here analyse both small and medium sized companies, as well as listed enterprises. The book is a valuable resource for researchers in the fields of sustainability and corporate responsibility, provides student teaching cases for courses on CSR and sustainable management, and offers blueprints for professionals seeking guidance and inspiration on their path towards responsible business operations.

World Public Sector Report 2019

Sustainable Development Goal 16: Focus on Public Institutions

United Nations This report looks at national-level developments in relation to several concepts highlighted in the targets of Goal 16, which are viewed as institutional principles: access to information, transparency, accountability, anti-corruption, inclusiveness of decision-making processes, and non-discrimination. The report surveys global trends in these areas, documenting both the availability of information on those trends and the status of knowledge about the effectiveness of related policies and institutional arrangements in different national contexts.
