Interim National Security Strategic Guidance

Renewing America's Advantages

Cosimo Reports "We are in the midst of a fundamental debate about the future direction of our world...No nation is better positioned to navigate this future than America." -President Joseph R. Biden, Jr., Interim National Security Strategic Guidance (2021) Interim National Security Strategic Guidance-2021 was issued in March 2021 to convey President Joe Biden's vision for how America will engage with the world, and to provide guidance for US departments while the Biden Administration begins work on a National Security Strategy. This short essay is a good companion to two other reports released during the same period: The Annual Threat Assessment, an annual report of worldwide threats to the national security of the United States, compiled by the US Intelligence Community; and Global Trends 2040-A More Contested World by the National Intelligence Council, which specifically describes long-term global challenges (both available from Cosimo Reports). Students of national security, policymakers, journalists, and anyone interested in US security will find this report essential reading.

Global Trends 2040

A More Contested World

Cosimo Reports "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Stalin's Wars

From World War to Cold War, 1939-1953

Yale University Press This breakthrough book provides a detailed reconstruction of Stalin's leadership from the outbreak of the Second World War in 1939 to his death in 1953. Making use of a wealth of new material from Russian archives, Geoffrey Roberts challenges a long list of standard perceptions of Stalin: his qualities as a leader; his relationships with his own generals and with other great world leaders; his foreign policy; and his role in instigating the Cold War. While frankly exploring the full extent of Stalin's brutalities and their impact on the Soviet people, Roberts also uncovers evidence leading to the stunning conclusion that Stalin was both the greatest military leader of the twentieth century and a remarkable politician who sought to avoid the Cold War and establish a long-term detente with the capitalist world. By means of an integrated military, political, and diplomatic narrative, the author draws a sustained and compelling personal portrait of the Soviet leader. The resulting picture is fascinating and contradictory, and it will inevitably change the way we understand Stalin and his place in history. Roberts depicts a despot who helped save the world for democracy, a personal charmer who disciplined mercilessly, a utopian ideologue who could be a practical realist, and a warlord who undertook the role of architect of post-war peace.

What Does a Member of the Armed Forces Do?

Enslow Publishing, LLC Members of the Armed Forces come from all over the United States. These citizens choose to serve their country by fighting for it. Some are sailors on the high seas. Some fly airplanes. Others fight on the ground with tanks and guns, but there is much more to service than just fighting. This book looks at the civic responsibility of service where ordinary men and women sign up to defend their country. Using an inquiry based approach, students will learn the facts about military service and understand this important civic service in a format aligned with C3 standards.

Military Review

National Military Establishments and the Advancement of Science and Technology

Studies in 20th Century History

Springer Science & Business Media To some philosophers, seeking to understand the human condition, technology is a necessary guide. But to think through the complex human phenomenon of technology we must tackle philosophy of science, philosophy of culture, moral issues, comparative civilizational studies, and the economics of specific industrial and military technologies in their historical contexts. The philosopher wants to grasp the technological factor in this troubled world, even as we see it is only one factor, and that it does not speak openly for itself. Put directly, our human troubles to a considerable extent have been transformed, exaggerated, distorted, even degraded, perhaps transcended, by what engineers and scientists, entrepreneurs and politicians, have wrought. But our problems are ancient, problems of dominations, struggles, survival, values in conflict, greed and insane sadisms. To get some conceptual light on the social reality which seems immediately to be so complicated, a philosopher will need to learn from the historians of technology. A few years ago, the philosopher Elisabeth Straker concluded that "a historical philosophy of technology [is required] since history - and history alone - provides all those concepts that form part of the repertoire of the philosophical analysis of technology". And she added that this goes far beyond the triviality that like other cultural achievements technology has its historical development. Now historical comprehension is no substitute for a logical methodology in the analysis of technological problems.

American Defense Policy

JHU Press **American Defense Policy** has been a mainstay for instructors of courses in political science, international relations, military affairs, and American national security for over 25 years. The updated and thoroughly revised eighth edition considers questions of continuity and change in America's defense policy in the face of a global climate beset by geopolitical tensions, rapid technological change, and terrorist violence. On September 11, 2001, the seemingly impervious United States was handed a very sharp reality check. In this new atmosphere of fear and vulnerability, policy makers were forced to make national security their highest priority, implementing laws and military spending initiatives to combat the threat of international terrorism. In this volume, experts examine the many factors that shape today's security landscape -- America's values, the preparation of future defense leaders, the efforts to apply what we have learned from Afghanistan and Iraq to the transformation of America's military, reflection on America's nuclear weapons programs and missile defense, the threat of terrorism, and the challenges of homeland security -- which are applied to widely varied approaches to national defense strategy. This invaluable and prudent text remains a classic introduction to the vital security issues facing the United States throughout its history and breaks new ground as a thoughtful and comprehensive starting point in understanding American defense policy and its role in the world today.

Military and Security Developments Involving the People's Republic of China 2020 Annual Report to Congress

For 20 years, the Department of Defense (DoD) has provided Congress with an annual report on military and security developments involving the People's Republic of China (PRC). These reports have assessed the contours of China's national strategy, its approach to security and military affairs, and potential changes in the PRC's armed forces over the next 20 years, among other matters. 2020 marks an important year for the People's Liberation Army (PLA) as it works to achieve important modernization milestones ahead of the Chinese Communist Party's (CCP) broader goal to transform China into a "moderately prosperous society" by the CCP's centenary in 2021. As the United States continues to respond to the growing strategic challenges posed by the PRC, 2020 offers a unique opportunity to assess both the continuity and changes that have taken place in the PRC's strategy and armed forces over the past two decades.

The Draft, 1940-1973

"Individual liberty is ingrained in American culture. Yet, in contrast to this cherished ideal, American men were inducted into military service under a system that flourished for more than twenty years before its rationalization was seriously questioned by more than a small minority of citizens." "Analyzing this paradox, George Flynn provides the first comprehensive look at an institution that managed to sustain political and public favor through two wars before dying out under a barrage of protests during a third. Placing the American draft within a historical context, he shows how social and political considerations determined the character of conscription in the United States." "The draft developed as it did, he argues, not mainly because of military needs or strategy, but because of political decisions initiated by civilians with nonmilitary agendas. Explaining why the draft remained relatively immune to political criticism prior to the Vietnam conflict, Flynn chronicles the draft's military and strategic successes and failures in America's mid-century wars. He shows how major institutions and lobbies representing science, education, and various professions and religions influenced it and how, ultimately and ironically, the selective character of the draft eventually made the system inequitable and helped cause its downfall."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. The Mueller Report

The Final Report of the Special Counsel on Russian Interference in the 2016 Presidential Election

Courier Dover Publications This is the full Mueller Report, as released on April 18, 2019, by the U.S. Department of Justice. A reprint of the report exactly as it was issued by the government, it is without analysis or commentary from any other source and with nothing subtracted except for the material redacted by the Department of Justice. The mission of the Mueller investigation was to examine Russian interference in the 2016 Presidential election, consisting of possible links, or "collusion," between the Donald Trump campaign and the Russian government of Vladimir Putin as well as any allegations of obstruction of justice in this regard. It was also intended to detect and prosecute, where warranted, any other crimes that surfaced during the course of the investigation. The report consists of a detailed summary of the various investigations and inquiries that the Special Counsel and colleagues carried out in these areas. The investigation was initiated in the aftermath of the firing of FBI Director James Comey by Donald Trump on May 9, 2017. The FBI, under Director Comey, had already been investigating links between Russia and the Trump campaign. Mueller submitted his report to Attorney General William Barr on March 22, 2019, and the Department of Justice released the redacted report one month later.
