The new edition of this bestselling text emphasizes the theme of social change and the ways in which media-particularly social media-and other forms of technology inevitably bring about new ways of living, interacting with others, or doing certain activities or task. New sections on social change have been added throughout the book, and the theme also appears in the "Sociology Works!" and "Media" features. "Sociology and Social Policy" boxes return to this edition, examining issues such as gun control, prevention of military suicides, and whether employers should be allowed to "spy" on their employees. First-person accounts of individuals' lived experiences draw students into the chapter content by illuminating topics that reflect the text's primary themes of diversity, the application of sociology to everyday life, global comparisons, media, and social change. New timely topics include environmental activism, immigration, bullying and social media, and same-sex marriage. ECONOMY AND STATE

John Wiley & Sons Should governments be involved in economic affairs? Challenging prevailing wisdom about the benefits of self-regulating markets, Nina Bandelj and Elizabeth Sowers offer a uniquely sociological perspective to emphasize that states can never be divorced from economy. From defining property rights and regulating commodification of labor to setting corporate governance standards and international exchange rules, the state continuously manages the functioning of markets and influences economic outcomes for individuals, firms and nations. The authors bring together classical interventions and cutting-edge contemporary research in economic sociology to discuss six broad areas of economy/state connection: property, money, labor, firms, national economic growth, and global economic exchange. A wealth of empirical examples and illustrations reveals that even if the nature of state influence on economy varies across contexts, it is always dependent on social forces. This accessible and engaging book will be essential reading for upper-level students of economic sociology, and those interested in the major economic dilemmas of our times. .

LIQUID LOVE

ON THE FRAILITY OF HUMAN BONDS

John Wiley & Sons This book is about the central figure of our contemporary, 'liquid modern' times - the man or woman with no bonds, and particularly with none of the fixed or durable bonds that would allow the effort of self-definition and self-assertion to come to a rest. Having no permanent bonds, the denizen of our liquid modern society must tie whatever bonds they can to engage with others, using their own wits, skill and dedication. But none of these bonds are guaranteed to last. Moreover, they must be tied loosely so that they can be untied again, quickly and as effortlessly as possible, when circumstances change - as they surely will in our liquid modern society, over and over again. The uncanny frailty of human bonds, the feeling of insecurity that frailty inspires, and the conflicting desires to tighten the bonds yet keep them loose, are the principal themes of this important new book by Zygmunt Bauman, one of the most original and influential social thinkers of our time. It will be of great interest to students and scholars in sociology and in the social sciences and humanities generally, and it will appeal to anyone interested in the changing nature of human relationships.

SOCIAL CAPITAL

[John Wiley & Sons](#) Social capital is a principal concept across the social sciences and has readily entered into mainstream discourse. In short, it is popular. However, this popularity has taken its toll. Social capital suffers from a lack of consensus because of the varied ways it is measured, defined, and deployed by different researchers. It has been put to work in ways that stretch and confuse its conceptual value, blurring the lines between networks, trust, civic engagement, and any type of collaborative action. This clear and concise volume presents the diverse theoretical approaches of scholars from Marx, Coleman, and Bourdieu to Putnam, Fukuyama, and Lin, carefully analyzing their commonalities and differences. Joonmo Son categorizes this wealth of work according to whether its focus is on the necessary preconditions for social capital, its structural basis, or its production. He distinguishes between individual and collective social capital (from shared resources of a personal network to pooled assets of a whole society), and interrogates the practical impact social capital has had in various policy areas (from health to economic development). Social Capital will be of immense value to readers across the social sciences and practitioners in relevant fields seeking to understand this mercurial concept.

THE CONSEQUENCES OF MODERNITY

John Wiley & Sons In this major theoretical statement, the author offers a new and provocative interpretation of the institutional transformations associated with modernity. We do not as yet, he argues, live in a post-modern world. Rather the distinctive characteristics of our major social institutions in the closing period of the twentieth century express the emergence of a period of 'high modernity,' in which prior trends are radicalised rather than undermined. A post-modern social universe may eventually come into being, but this as yet lies 'on the other side' of the forms of social and cultural organization which currently dominate world history. In developing an account of the nature of modernity, Giddens concentrates upon analyzing the intersections between trust and risk, and security and danger, in the modern world. Both the trust mechanisms associated with modernity and the distinctive 'risk profile' it produces, he argues, are distinctively different from those characteristic of pre-modern social orders. This book build upon the author's previous theoretical writings, and will be of fundamental interest to anyone concerned with Giddens's overall project. However, the work covers issues which the author has not previously analyzed and extends the scope of his work into areas of pressing practical concern. This book will be essential reading for second year undergraduates and above in sociology, politics, philosophy, and cultural studies.

NARRATING SOCIAL ORDER

AGORAPHOBIA AND THE POLITICS OF CLASSIFICATION

[University of Toronto Press](#) Policies implemented in the mid to late 1990s in Ontario by Mike Harris's Conservative government have had undeniable repercussions for the population of that province. Kate Bezanson's Gender, the State, and Social Reproduction is the first study to consider the implications of those policies for gender relations - that is, how women and men, families, and households coped with these changes, and how division of labour and standards of living were affected. Bezanson also considers implications of neo-liberalism more generally, for the lives of people living under such regimes. Beginning with an outline of the restructuring experiment which took place under the Conservative government between 1995 and 2000, Bezanson shows how this process dramatically altered the scope of the welfare state, labour market protections and conditions, and the capacity for people to manage and plan their own lives. She combines this detailed investigation of the changes introduced by Harris with data collected in in-depth interviews of selected Ontario households, in order to examine how neo-liberalism affects daily lives, particularly of low income people, and especially of women. Ultimately, Bezanson finds that the neo-liberal restructuring of Ontario in the 1990s consolidated a gender regime that was highly unsustainable for poor households, many of which were lead by women. A controversial and illuminating study, Gender, the State, and Social Reproduction crosses the disciplines of politics, history, gender studies, and sociology.

GLOBAL HISTORICAL SOCIOLOGY

Cambridge University Press **Bringing together historical sociologists from Sociology and International Relations, this collection lays out the international, transnational, and global dimensions of social change. It reveals the shortcomings of existing scholarship and argues for a deepening of the 'third wave' of historical sociology through a concerted treatment of transnational and global dynamics as they unfold in and through time. The volume combines theoretical interventions with in-depth case studies. Each chapter moves beyond binaries of 'internalism' and 'externalism,' offering a relational approach to a particular thematic: the rise of the West, the colonial construction of sexuality, the imperial origins of state formation, the global origins of modern economic theory, the international features of revolutionary struggles, and more. MONADOLOGY AND SOCIOLOGY

re.press **Gabriel Tarde's Monadology and Sociology, originally published in 1893, is a remarkable and unclassifiable book. It sets out a theory of 'universal sociology', which aims to explicate the essentially social nature of all phenomena, including the behaviour of atoms, stars, chemical substances and living beings. He argues that all of nature consists of elements animated by belief and desire, which form social aggregates analogous to those of human societies and institutions. In this timely book, leading global expert on political extremism Cas Mudde provides a concise overview of the fourth wave of postwar far-right politics, exploring its history, ideology, organization, causes, and consequences, as well as the responses available to civil society, party, and state actors to challenge its ideas and influence. What defines this current far-right renaissance, Mudde argues, is its mainstreaming and normalization within the contemporary political landscape. Challenging orthodox thinking on the relationship between conventional and far-right politics, Mudde offers a complex and insightful picture of one of the key political challenges of our time.**
