Dilip Kumar

The Substance and the Shadow

Hay House, Inc An authentic, heartfelt and compelling narrative – straight from the horse’s mouth – that reveals for the first time numerous unknown aspects of the life and times of one of the greatest legends of all time who stands out as a symbol of secular India. Dilip Kumar (born as Yousuf Khan), who began as a diffident novice in Hindi cinema in the early 1940s, went on to attain the pinnacle of stardom within a short time. He came up with spellbinding performances in one hit film after another – in his almost six-decade-long career – on the basis of his innovative capability, determination, hard work and never-say-die attitude. In this unique volume, Dilip Kumar traces his journey right from his birth to the present. In the process, he candidly recounts his interactions and relationships with a wide variety of people not only from his family and the film fraternity but also from other walks of life, including politicians. While seeking to set the record straight, as he feels that a lot of what has been written about him so far is ‘full of distortions and misinformation’, he narrates, in graphic detail, how he got married to Saira Banu, which reads like a fairy tale! Dilip Kumar relates, matter-of-factly, the event that changed his life: his meeting with Devika Rani, the boss of Bombay Talkies, when she offered him an acting job. His first film was Jwar Bhata (1944). He details how he had to learn everything from scratch and how he had to develop his own distinct histrionics and style, which would set him apart from his contemporaries. After that, he soon soared to great heights with movies such as Jugnu, Shaheed, Mela, Andaz, Deedar, Daag and Devdas. In these movies he played the tragedian with such intensity that his psyche was adversely affected. He consulted a British psychiatrist, who advised him to switch over to comedy. The result was spectacular performances in laugh riots such as Azaad and Kohinoor, apart from a scintillating portrayal as a gritty tonga driver in Naya Daur. After a five-year break he started his ‘second innings’ with Kranti (1981), after which he appeared in a series of hits such as Vidhaata, Shakti, Mashaal, Karma, Saudagar and Qila.

'Honour' Killing and Violence

Theory, Policy and Practice

Palgrave Macmillan This interdisciplinary collection provides a compelling analysis of the practices and beliefs that lead to violence against women, men and children in the name of 'honour', with a range of international insights from criminology, psychology, law and history. The volume advances legal and theoretical debates through the analysis of established research and presents new evidence and insights, addressing key questions such as: What psychological processes are relevant in the motivation of honour violence? Under what historical circumstances, and through what strategies, have honourable masculinity and violence been dissociated? Can honour be reconceptualised in ways that challenge violent practices justified in its name? By locating 'honour' killing and 'honour' based violence within and beyond debates on violence against women and girls, this collection offers recommendations to inform both theory and practice, making this an essential resource for teachers and students, health professionals, police officers, lawyers, social workers, policy-makers, and activists working against gendered forms of violence.

Media and Mediation

SAGE This volume, the first in a three-book series titled Communication Processes, is devoted to understanding the politics in, and of, communication. It explores both the ground on which processes of communication unfold and the political configurations implied in communication processes. This two-pronged approach questions the preoccupation in Indian scholarship with the `deployment` of communication technology, and the `impact` of mass media, and suggests a repositioning of `communication` as an interdisciplinary domain of enquiry. Like in the ensuing volumes, the editors of this book juxtapose a pluralist universe of conceptual articulations, theoretical constructs and empirical validations. In addressing these questions, the contributors steer through, on the one hand, the modernization-inspired tradition of communication research in India—predominated by impact and reception studies—and, on the other, global trends that shaped the glut of fashionable

writings—coincidental with and spurred by transnational television and the internet—during the 1990s.

M.N. Roy, Radical Humanist

Selected Writings

"To rectify the West's unfortunate neglect of one of India's premier intellectuals, humanist Innaiah Narisetti has compiled this new collection of Roy's most significant works. Roy conceived of humanism as a scientific, integral, and radically new worldview. Among many interesting selections in this volume, Roy's "Principles of Radical Democracy: Twenty-Two Theses" especially represents his thinking. Here he emphasizes ethics and eschews supernatural interpretations as antithetical to his scientifically oriented conception of New Humanism. Roy also underscores the importance of universal education to make average people scientifically literate and to teach them critical thinking."--BOOK JACKET.

Handbook of Social Status Correlates

Academic Press The Handbook of Social Status Correlates summarizes findings from nearly 4000 studies on traits associated with variations in socioeconomic status. Much of the information is presented in roughly 300 tables, each one providing a visual snapshot of what research has indicated regarding how a specific human trait appears to be correlated with socioeconomic status. The social status measures utilized and the countries in which each study was conducted are also identified. QUESTIONS ADDRESSED INCLUDE THE FOLOWING: Are personality traits such as extraversion, competitiveness, and risk-taking associated with social status? How universal are sex differences in income and other forms of social status? What is the association between health and social status? How much does the answer vary according to specific diseases? How well established are the relationships between intelligence and social status? Is religiosity associated with social status, or does the answer depend on which religion is being considered? Are physiological factors correlated with social status, even factors involving the brain? Finally, are there as yet any "universal correlates of social status"?

Tissue Phenomics: Profiling Cancer Patients for Treatment Decisions

CRC Press In the age of digitization our society is transformed into a new state. In particular, machine intelligence dramatically elevates our capability to create and digest information. Naturally, healthcare is also impacted by this trend and will even be more transformed into a informatic driven discipline in the future. In the most important area of histo-pathology, the interpretation of tissue slices from cancer patients, informatics will have an early and huge impact on treatment decisions and probably will act as the leading discipline for this transformation in medicine. Tissue Phenomics provides a comprehensive methodology aiming at the discovery of the most accurate tissue-based decision support algorithm by close integration of assay development, image analysis and bioinformatics, and optimization feedback loops. In this book the methodology of Tissue Phenomics and its benefits and wealth's are described. The different components of Tissue Phenomics are explained in the different chapters. In the chapters 2 to 4 of this book different authors describe various approaches on how to convert the wealth of tissue slide pixel data into mineable information using knowledge-based and data-driven image analysis methods. Subsequently, the datafication of images and the bioinformatics part plays a crucial role in generating prognostic and predictive models for disease progression. The integration of other data sources such as genomics, radiomics and patient related information is also important and is described as well. As discussed in chapters 5 and 6, these models may classify

patients in distinct groups such as those responding to a given therapy. Since Tissue Phenomics provides a huge set of potentially prognostic features (phenes), one focus of both chapters is robust feature selection methods by advanced Monte-Carlo cross validation algorithms. In chapter 7 we discuss multiple application examples of Tissue Phenomics in academic and commercial settings and its tremendous impact to advances in biomedical sciences. Building on the successes in research, chapters 8 and 9 discuss applications in clinical environments and provide a flavor to the future envision in chapter 10, where tissue datafication and subsequent patient profiling is part of every routine examination, with the goal to best match patients with the most successful therapy, as predicted by tissue phenes.
