POROELASTICITY

Springer This book treats the mechanics of porous materials infiltrated with a fluid (poromechanics), focussing on its linear theory (poroelasticity). Porous materials from inanimate bodies such as sand, soil and rock, living bodies such as plant tissue, animal flesh, or man-made materials can look very different due to their different origins, but as readers will see, the underlying physical principles governing their mechanical behaviors can be the same, making this work relevant not only to engineers but also to scientists across other scientific disciplines. Readers will find discussions of physical phenomena including soil consolidation, land subsidence, slope stability, borehole failure, hydraulic fracturing, water wave and seabed interaction, earthquake aftershock, fluid injection induced seismicity and heat induced pore pressure spalling as well as discussions of seismoelectric and seismoelectromagnetic effects. The work also explores the biomechanics of cartilage, bone and blood vessels. Chapters present theory using an intuitive, phenomenological approach at the bulk continuum level, and a thermodynamics-based variational energy approach at the micromechanical level. The physical mechanisms covered extend from the quasi-static theory of poroelasticity to poroelastodynamics, poroviscoelasticity, porothermoelasticity, and porochemoelasticity. Closed form analytical solutions are derived in details. This book provides an excellent introduction to linear poroelasticity and is especially relevant to those involved in civil engineering, petroleum and reservoir engineering, rock mechanics, hydrology, geophysics, and biomechanics.

If that wasn't troubling enough, Alix must deal with the arrogant (and extremely good-looking) architect Jared Montgomery, who is living in the property's guesthouse and who harbours secrets of his own. As sparks fly, the ghosts of the past begin to reveal themselves. Finding their lives inextricably entwined with the turbulent fortunes of their ancestors, Alix and Jared discover that only by righting the wrongs of the past can they hope to be together.

SEDUCED BY TWILIGHT

THE ALLURE AND CONTRADICTION MESSAGES OF THE POPULAR SAGA

McFarland Stephenie Meyer's Twilight saga has maintained a tight grip on the contemporary cultural imagination. This timely and critical work examines how the Twilight series offers addictively appealing messages about love, romance, sex, beauty and body image, and how these charged themes interact with cultural issues regarding race, class, gender and sexuality. Through a careful analysis of the texts, the fandom and the current socio-historical climate, this work argues that the success of the Twilight series stems chiefly from Meyer's negotiation of cultural mores.

DUAL MARKETS

COMPARATIVE APPROACHES TO REGULATION

Springer This comprehensive volume analyzes dual markets for regulated substances and services, and aims to provide a framework for their effective regulation. A "dual market" refers to the existence of both a legal and an illegal market for a regulated product or service (for example, prescription drugs). These regulations exist in various countries for a mix of public health, historical, political and cultural reasons. Allowing the legal market to thrive, while trying to eliminate the illegal market, provides a unique challenge for governments and law enforcement. Broken down into nine main sections, the book studies comparative international policies for regulating these "dual markets" from a historical, legal, and cultural perspective. It includes an analysis of the markets for psychoactive substances that are illegal in most countries (such as marijuana, cocaine, opioids and amphetamines), psychoactive substances which are legal in most countries and where consumption is widespread (such as alcohol and tobacco), and services that are generally regulated or illegal (such as sports betting, the sex trade, and gambling). For each of these nine types of markets, contributions focus on the relationship between regulation, the emerging illegal market, and the resulting overall access to these services. This work aims to provide a comprehensive framework from a historical, cultural, and comparative international perspective. It will be of interest to researchers in criminology and criminal justice, particularly with an interest in organized crime, as well as related fields such as sociology, public policy, international relations, and public health.

ELECTRONIC COMMERCE 2018

A MANAGERIAL AND SOCIAL NETWORKS PERSPECTIVE

Springer This new Edition of Electronic Commerce is a complete update of the leading graduate level/advanced undergraduate level textbook on the subject. Electronic commerce (EC) describes the manner in which transactions take place over electronic networks, mostly the Internet. It is the process of electronically buying and selling goods, services, and information. Certain EC applications, such as buying and selling stocks and airline tickets online, are reaching maturity, some even exceeding non-Internet trades. However, EC is not just about buying and selling; it also is about electronically communicating, collaborating, and discovering information. It is about e-learning, e-government, social networks, and much more. EC is having an impact on a significant portion of the world, affecting businesses, professions, trade, and of course, people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook, LinkedIn and Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field. Finally, some emerging EC business models are changing industries (e.g., the shared economy models of Uber and Airbnb). The 2018 (9th) edition, brings forth the latest trends in e-commerce, including smart commerce, social commerce, social collaboration, shared economy, innovations, and mobility.
