The Palestine Strategic Report 2018-2019 al-Taqrir al-'Istratiji al-Filastini 2018-2019 (التقرير الاستراتيجي الفلسطيني 2018-2019) مركز الزيتونة للدراسات والاستشارات
This annual referential report, has become an essential classic in the academic realm of Palestinian Studies. It includes the latest and most recent statistical and analytic data on the various developments related to the Palestinian issue. ** Al-Zaytouna Centre is pleased to present to its readers the Palestine Strategic Report (PSR) 2018-2019, the 11th PSR to be published. With an academic methodology and comprehensive, and objective approach, the report comprehensively details developments concerning the Palestine issue and provides the latest information and data available at the end of 2019, along with analyses and forecasts running into 2020-2021. This report is the result of collaborative work between 14 experts and researchers. In eight chapters, it addresses the internal Palestinian scene; Palestinian demographic and economic indicators; the situation in Jerusalem and the holy sites; the specifics of Israeli aggression, Palestinian resistance and the peace process; the complexities of Israeli-Palestinian dynamics, including the internal situation in Israel; and Palestine's Arab, Islamic and international relations. The PSR now occupies a prominent position as an indispensable reference document, integral to Palestine studies and research. Al-Zaytouna Centre hopes the PSR will continue to make valuable contributions in this field. **Kelly Vana's Nursing Leadership and Management John Wiley & Sons** Nursing Leadership & Management, Fourth Edition provides a comprehensive look at

The China Alternative Changing Regional Order in the Pacific Islands ANU Press In this collection, 17 leading scholars based in Solomon Islands, Fiji, Papua New Guinea, Timor-Leste, Australia, New Zealand, the United States and China analyse key dimensions of the changing relationship between China and the Pacific Islands and explore the strategic, economic and diplomatic implications for regional actors. The China Alternative includes chapters on growing great power competition in the region, as well as the response to China's rise by the US and its Western allies and the island countries themselves. Other chapters examine key dimensions of China's Pacific engagement, including Beijing's programs of aid and diplomacy, as well as the massive investments of the Belt and Road Initiative. The impact of China's rivalry for recognition with Taiwan is examined, and several chapters analyse Chinese communities in the Pacific, and their relationships with local societies. The China Alternative provides ample material for informed judgements about the ability of island leaders to maintain their agency in the changing regional order, as well as other issues of significance to the peoples of the region. 'China's "discovery" of the diverse Pacific islands, intriguingly resonant of the era of European explorers, is impacting on this too-long-overlooked region through multiple currents that this important book guides us through.' □ —Rowan Callick, Griffith University 'The China Alternative is a must-read for all students and practitioners interested in understanding the new geopolitics of the Pacific. It assembles a stellar cast of Pacific scholars to deeply explore the impact of the changing role of China on the Pacific islands region. Significantly, it also puts the Pacific island states at the centre of this analysis by questioning the collective agency they might have in this rapidly evolving strategic context.' —Greg Fry, The Australian National University

Addressing Adversity Prioritising adversity and trauma-informed care for children and young people in England. YoungMinds / Health Education England / Human-Experience / An edited collection of papers published by YoungMinds and funded by Health Education England. With 1 in 3 adult mental health conditions related directly to adverse childhood experiences, it is vital that we understand the impact that adversity and trauma can have on the mental health and wellbeing of young people, and how we can strengthen resilience and support recovery. Addressing Adversity presents evidence, insight, direction and case studies for commissioners, providers and practitioners in order to stimulate further growth in adversity and trauma-informed care, and spark innovation and good practice across England. Section 1: Understanding adversity, trauma and resilience includes evidence and analysis of the impact that adverse childhood experiences and trauma have on children and young people's mental health and wider outcomes across the lifecourse. Section 2: Addressing childhood adversity and trauma includes insights from the NHS in England, organisations and clinicians working with children and young people who have experienced forms of adversity and trauma. Section 3: Emerging good practice includes insight, case studies and working examples of adversity and trauma-informed service models being developed across England. The collection ends with an agenda for change, calling on all Directors of Public Health, commissioners and providers to make adversity and trauma-informed care a priority in their locality.

The New World of Utilities A Historical Transition Towards a

New Energy System Springer After decades of stability, power systems are currently undergoing a rapid transition - demand patterns are evolving, while supply sources are shifting to renewable energies at an accelerated pace. This book, written by an experienced energy professional, combines the various aspects of supply and demand developments to offer a unified perspective. It highlights the key changes that the world of electric utilities and power systems will face in the coming decade, as well as the major challenges that will emerge as a result. Supplemented by a wealth of global and local data, the book describes the major patterns that affect both supply and demand, and provides a quantified analysis of their impacts on power system grids and markets. Lastly, it explores the new technologies that can enable the success of these transformations. **Thanks for Everything (Now Get Out) Can We Restore Neighborhoods without Destroying Them? Yale University Press** When a distressed urban neighborhood gentrifies, all the ratios change: poor to rich; Black and Brown to white; unskilled to professional; vulnerable to secure. Vacant lots and toxic dumps become condos and parks. Upscale restaurants open and pawn shops close. But the low-income residents who held on when the neighborhood was at its worst, who worked so hard to make it better, are gradually driven out. For them, the neighborhood hasn't been restored so much as destroyed. Tracing the history of Olneyville, a neighborhood in Providence, Rhode Island, that has traveled the long arc from urban decay to the cusp of gentrification, Joseph Margulies asks the most important question facing cities today: Can we restore distressed neighborhoods without setting the stage for their destruction? Is failure the inevitable cost of success? Based on years of interviews and on-the-ground observation, Margulies argues that to save Olneyville and thousands of neighborhoods like it, we need to empower low-income residents by giving them ownership and control of neighborhood assets. His model for a new form of neighborhood organization—the “neighborhood trust”—is already gaining traction nationwide and promises to give the poor what they have never had in this country: the power to control their future. **Ensuring a Better Future Why Social Studies Matters Gibbs Smith** A timely book that explores the critical need for social studies to be equally taught in American public schools. Provides a call to action for all that understand the need to build an active and informed citizenry through more effective social studies education. We have missed part of the equation for effective education. STEM became STEAM, but we forgot social studies and the importance of the skills and content it teaches. *Ensuring a Better Future: Why Social Studies Matters* explores the sacrifice of both many students' inherent skills/interests and an effectively informed and effective citizenry through prioritized Social Studies education in public schools. This book seeks to accelerate the pendulum swing away from strict STEAM education that the author and Jared feel is starting. It names and explores the issues of equitable funding and curriculum focus delinquency, the historical story about the swing away from social studies education, and how to energize our country in support of Social Studies education. **Welfare for the Rich How Your Tax Dollars End Up in Millionaires' Pockets—And What You Can do About It Post Hill Press** *Welfare for the Rich* is the first book to describe and analyze the many ways that federal and state governments provide handouts—subsidies, grants, tax credits, loan guarantees, price supports, and many

other payouts—to millionaires, billionaires, and the companies they own and run. Many journalists, scholars, and activists have focused on one or more of these dysfunctional programs. A few of the most egregious examples have even become famous. But *Welfare for the Rich* is the first attempt to paint a comprehensive, easily accessible picture of a system largely designed by the richest Americans—through lobbyists, lawyers, political action committees, special interest groups, and other powerful influencers—with the specific goal of making sure the government keeps wealth and power flowing from the many to the few.

Women in Turkey Silent Consensus in the Age of Neoliberalism and Islamic Conservatism Routledge

This book provides a socio-economic examination of the status of women in contemporary Turkey, assessing how policies have combined elements of neoliberalism and Islamic conservatism. Using rich qualitative and quantitative analyses, *Women in Turkey* analyses the policies concerning women in the areas of employment, education and health and the fundamental transformation of the construction of gender since the early 2000s. Comparing this with the situation pre-2000, the authors argue that the reconstruction of gender is part of the reshaping of the state-society relations, the state-business relationship, and the cultural changes that have taken place across the country over the last two decades. Thus, the book situates the Turkish case within the broader context of international development of neoliberalism while paying close attention to its idiosyncrasies. Adopting a political economy perspective emphasizing the material sources of gender relations, this book will be useful to students and scholars of Middle Eastern politics, political Islam and Gender Studies.

Sustainability in the Maritime Domain Towards Ocean Governance and Beyond Springer Nature

This volume explores options for a sustainable maritime domain, including maritime transportation, such as, Maritime Spatial Planning (MSP), maritime education and training, maritime traffic and advisory systems, maritime security. Other activities in the maritime domain covered in the book include small-scale fisheries and sustainable fisheries, and greening the blue economy. The book aims to provide the building blocks needed for a framework for good ocean governance; a framework that will serve through the next decade and, and hopefully, well beyond the 2030 milestone of the UN Agenda for Sustainable Development. In short, this book brings together the problems of the current world and sustainable solutions that are in the development process and will eventually materialize in the not so distant future. Additionally, the book presents a trans-disciplinary analysis of integral sustainable maritime transportation solutions and crucial issues relevant to good ocean governance that have recently been discussed at different national, regional and international fora, highlighting ongoing work to develop and support governance systems that facilitate industry requirements, and meet the needs of coastal states and indigenous peoples, of researchers, of spatial planners, and of other sectors dependent on the oceans. The book will be of interest to researchers across many disciplines, especially those that are engaged in cross-sectoral research and developments in the maritime transport sector and across the wider maritime domain. To this end, the book covers areas including natural and social sciences, geographical studies, spatial planning, maritime security and gender studies, as they relate to transport and the wider maritime sector. In addition, the book explores

frameworks for sustainable ocean governance being developed under the UN's Agenda for Sustainable Development to 2030. It will also look beyond the 2030 milestone under that Agenda, and will be of use to national and international policymakers and practitioners, government actors at the EU and other regional and national levels and to researchers of ocean governance, sustainability and management, and maritime transport.

Handbook of Communication and Development Edward Elgar Publishing This incisive Handbook critically examines the role and place of media and communication in development and social change, reflecting a vision for change anchored in values of social justice. Outlining the genealogy and history of the field, it then investigates the possible new directions and objectives in the area. Key conclusions include an enhanced role for development communication in participatory development, active agency of stakeholders of development programs, and the operationalization of social justice in development.

Informal Politics in the Middle East Oxford University Press The culture of politics within any system of governance is influenced by how state and society interact, and how these relationships are mediated by existing political institutions, whether formal or informal. The chapters in this volume highlight two broad types of informal political engagement in the Middle East: civil action that works in tandem with the state apparatus, and civil action that poses a challenge to the state. In both cases, these activities can and do achieve tangible results for particular groups of people, as well as for the state. For many, informal politics and civil mobilization are not a choice, but a necessity to secure--collectively--some kind of social security, through communal reciprocity and everyday activism. Ironically, Middle Eastern authorities often turn a blind eye to informal organizing, because 'self-help' schemes allow certain social groups to survive--reducing their instinct to make demands of, or seek support from, the state. People are discouraged from political action and dissent; yet they are simultaneously encouraged to seek their own betterment, often leading to politicized groups and associations. By analyzing these formations, the contributors shed light on informal politics in the region.

Contextualizing Health and Aging in the Americas Effects of Space, Time and Place Springer This book presents new insights into the consequences of the impending growth in and impact of the older segment of Latino aging adults across distinctive regions of the Americas. It uses a comparative research framework to further understanding of current issues in health and aging in the transnational context of the health and migratory experiences of the U.S.- Mexican population. It provides an important contribution to the interdisciplinary investigation of chronic diseases and functional impairments, social care and medical services, care-giving and intervention development, and neighborhood factors supporting optimal aging, using new conceptual and methodological approaches (inter-group comparisons). Specifically, the chapters employ different methodologies that investigate trends in aging health and services related to immigration processes, family and household structure, macroeconomic changes in the quality of community life, and focus on the new realities of aging in Latino families in local communities. The book focuses on measurement, data-quality issues, new conceptual modeling techniques, and longitudinal survey capabilities, and suggests needed areas of new research. As such it is of interest to researchers and policy makers in a wide range of disciplines from

social and behavioral sciences to economics, gerontology, geriatrics, and public health. **OECD Development Pathways Production Transformation Policy Review of Egypt Embracing Change, Achieving Prosperity Embracing Change, Achieving Prosperity OECD Publishing** Egypt is one of Africa's industrial heavyweights. Transforming the country's economy to sustain job-rich and sustainable growth are pivotal steps in its march towards prosperity. Today's search for new development models, accelerated by the unfolding of the COVID-19 pandemic, calls for shifting up a gear in raising Egypt's industrial capabilities to compete in an industry 4.0 and agro 4.0 landscape. The Production Transformation Policy Review (PTPR) of Egypt uses a forward-looking framework to assess the country's readiness to embrace change. This includes an analysis of the game-changing potential of the African Continental Free Trade Area (AfCFTA) and perspectives on agro-food and electronics (i.e. what in Egypt is referred to as part of the engineering sector), as well as identifying priorities for future reforms. This review is the result of government-business dialogue, and benefited from peer learning from Italy and Malaysia. It also resulted from international and multi-stakeholder knowledge sharing through a dedicated Peer Learning Group (PLG) and the OECD Initiative for Policy Dialogue on Global Value Chains, Production Transformation and Development. **Handbook of BRICS and Emerging Economies Oxford University Press, USA** This handbook presents a comprehensive and multi-faceted analysis of the BRICS countries and other emerging economies, exploring their economic, social, environmental, and governance dimensions and challenges. **Cybersecurity for Elections A Commonwealth Guide on Best Practice Commonwealth Secretariat** The use of computers and other technology introduces a range of risks to electoral integrity. Cybersecurity for Elections explains how cybersecurity issues can compromise traditional aspects of elections, explores how cybersecurity interacts with the broader electoral environment, and offers principles for managing cybersecurity risks. **The Free-market Family How the Market Crushed the American Dream (and how it Can be Restored) Oxford University Press, USA** A steady drumbeat of bad news about the state of our nation has convinced Americans that our country has gone off the rails. But where, exactly, did we go wrong? Maxine Eichner argues that the problem is that market pressures are overwhelming American families today. Eichner links "free-market family policy," a system in which families must fend for themselves without help from the government, to unstable relationships, reduced lifespans, kids' declining academic achievement, and low levels of happiness, compared with other wealthy countries. What's called for, she argues, is market regulation and an economy structured around supporting families. **Changing of the Guards Private Influences, Privatization, and Criminal Justice in Canada UBC Press** Although service outsourcing has spread throughout Canada's prisons and jails, into its police, courts, and national security institutions, and along the border in recent decades, the expanding scope and pace of corporate involvement in criminal justice functions has not yet been closely investigated. Changing of the Guards provides a detailed assessment of privatization and private influence across the twenty-first-century Canadian criminal justice system. It illuminates the many consequences of public-private arrangements for law and

policy, transparency, accountability, the administration of justice, equity, and the public. This trenchant analysis raises issues that are relevant in Canada and abroad.

Section 27 and Freedman's Village in Arlington National Cemetery The African American History of America's Most Hallowed Ground McFarland

From its origination, Arlington National Cemetery's history has been compellingly intertwined with that of African Americans. This book explains how the grounds of Arlington House, formerly the home of Robert E. Lee and a plantation of the enslaved, became a military camp for Federal troops, a freedmen's village and farm, and America's most important burial ground. During the Civil War, the property served as a pauper's cemetery for men too poor to be returned to their families, and some of the very first war dead to be buried there include over 1,500 men who served in the United States Colored Troops. More than 3,800 former slaves are interred in section 27, the property's original cemetery. **Futureproof City Ten Immediate Paths to Urban Resilience Routledge**

The Futureproof City creates adaptability and resiliency in the face of the unknown challenges resulting from technological change, population explosion, global pandemic, and environmental crisis. A paradigm shift is urgently required in the means of conceiving, delivering, and managing city development to create better places to live. This book brings to the fore many new solutions currently being proposed and piloted globally, identifying ten key areas affecting the physical fabric of our cities where governments, planners, investors, and the individuals responsible for shaping lives can refocus their understanding, priorities, and funding in order to more effectively utilise the limited financial, natural, and time resources available. It will be key reading for every policy maker and professional working in sustainability, development, technology, health and welfare, investment, and risk issues in cities today. **Endless Holocausts Mass Death in the History of the United States Empire NYU Press**

An argument against the myth of "American exceptionalism" **Endless Holocausts: Mass Death in the History of the United States Empire** helps us to come to terms with what we have long suspected: the rise of the U.S. Empire has relied upon an almost unimaginable loss of life, from its inception during the European colonial period, to the present. And yet, in the face of a series of endless holocausts at home and abroad, the doctrine of American exceptionalism has plagued the globe for over a century. However much the ruling class insists on U.S. superiority, we find ourselves in the midst of a sea change. Perpetual wars, deteriorating economic conditions, the resurgence of white supremacy, and the rise of the Far Right have led millions of people to abandon their illusions about this country. Never before have so many people rejected or questioned traditional platitudes about the United States. In **Endless Holocausts** author David Michael Smith demolishes the myth of exceptionalism by demonstrating that manifold forms of mass death, far from being unfortunate exceptions to an otherwise benign historical record, have been indispensable in the rise of the wealthiest and most powerful imperium in the history of the world. At the same time, Smith points to an extraordinary history of resistance by Indigenous peoples, people of African descent, people in other nations brutalized by U.S. imperialism, workers, and democratic-minded people around the world determined to fight for common dignity and the sake of the greater good. **Abuse of Power Inside The Three-Year Campaign to**

Impeach Donald Trump Bombardier Books “That the Left tried to undo the results of the 2016 by whatever means necessary is not in doubt. Fred Lucas reminds us of the dangers this approach poses to constitutional government as he dissects what President Trump has rightly called one of the greatest hoaxes in our history.” —Cal Thomas, syndicated columnist and bestselling author “A devastating and comprehensive takedown of Trump’s impeachment, and a thoughtful look at the historical context of past impeachments, with strong reporting and research to combat the Left’s inevitable rewrite of history.” —Sara Carter, Fox News Contributor, award-winning correspondent, host of The Sara Carter Show podcast “Fred Lucas goes beyond the tribalism to the truth. There doesn’t need to be any partisan spin here, because the facts of the coup the Democrats attempted speak for themselves.” —Steve Deace, host of the Steve Deace Show on TheBlaze TV Abuse of Power exposes: • How Elizabeth Warren tried to set an impeachment trap for Trump even before the inauguration. • Why the depths of the Biden family’s international conflict of interests are worthy of a federal investigation. • Why Nancy Pelosi caved to The Squad to remain leadership. • How Adam Schiff pushed Jerry Nadler out of the key spot to lead the impeachment. • How Democrats abandoned what would have been a crowning leftwing achievement in gun control legislation in order to pursue an impeachment that was destined to fail in the Senate. • How Mitt Romney’s vote to convict likely prevent three moderate Democrats from rebelling against party leaders.

Strengthening Policy Research Role of Think Tank Initiative in South Asia SAGE Publications India Strengthening Policy Research: Role of Think Tank Initiative in South Asia is a vivid presentation of the diverse journeys of think tanks under the aegis of the Think Tank Initiative (TTI) programme managed by the International Development Research Centre in South Asia. The book extensively discusses the three areas of TTI support to strengthen think tanks, viz., organizational performance, research quality and policy engagement. It emphatically demonstrates the crucial role of long-term core support in strengthening think tanks for more rigorous research quality as the basis for public policymaking. It presents a rich tapestry of complex pathways that each think tank adopts to engage in policy outreach in their respective domains. The book makes a strong, evidence-based case on how even limited yet assured funding to think tanks leads to enhanced organizational capacities for good quality research, effective policy outreach and improved sustainability. It firmly puts forth the view that governments need to work jointly with private funding organizations to strengthen think tanks, which is in the best interest of evidence-informed and effective public policy-making.

Renewable Energy and Jobs - Annual Review 2020 International Renewable Energy Agency (IRENA) The sixth edition of the series highlights employment trends in renewables worldwide, noting increasing diversification of the supply chain.

Monopolies Suck 7 Ways Big Corporations Rule Your Life and How to Take Back Control Simon and Schuster An urgent and witty manifesto, Monopolies Suck “lucidly explains how monopolies threaten democracy, worsen inequality, and imperil the American Dream—and why it’s more important than ever to take action” (David Cicilline). Something’s not right. No matter how hard you work, life seems to only get harder. When your expenses keep going up but your income stays flat, when you’re price-gouged buying medicine for your child’s life-threatening allergy,

when you live in a hyped-up state of fear and anxiety, monopoly power is playing a key role. In *Monopolies Suck*, antitrust expert and director at the Open Markets Institute, Sally Hubbard, shows us the seven ways big corporations rule our lives—and what must be done to stop them. Throughout history, monopolists who controlled entire industries like railroads and oil were aptly called “robber barons” because they extracted wealth from everyone else—and today’s monopolies are no different. By charging high prices, skirting taxes, and reducing our pay and economic opportunities, they are not only stealing our money, but also robbing us of innovation and choice, as market dominance prevents new companies from challenging them. They’re robbing us of the ability to take care of our sick, a healthy food supply, and a habitable planet by using business practices that deplete rather than generate. They’re a threat to our private lives, fair elections, a robust press, and ultimately, the American Dream that so many of us are striving for. In this “accessible guide” (Zephyr Teachout, author of *Break ‘Em Up*), Sally Hubbard gives us an easy-to-understand overview of the history of monopolies and antitrust law, and urges us to use our voices, votes, and wallets to protest monopoly power. Emboldened by the previous century when we successfully broke up monopoly power in the US, we have the tools to dismantle corporate power again today—before their lobbying threatens to undermine our economy and democracy for generations to come.

Imagining Seattle Social Values in Urban Governance

U of Nebraska Press *Imagining Seattle* dives into some of the most pressing and compelling aspects of contemporary urban governance in the United States. Serin D. Houston uses a case study of Seattle to shed light on how ideas about environmentalism, privilege, oppression, and economic growth have become entwined in contemporary discourse and practice in American cities. Seattle has, by all accounts, been hugely successful in cultivating amenities that attract a creative class. But policies aimed at burnishing Seattle's liberal reputation often unfold in ways that further disadvantage communities of color and the poor, complicating the city's claims to progressive politics. Through ethnographic methods and a geographic perspective, Houston explores a range of recent initiatives in Seattle, including the designation of a new cultural district near downtown, the push to charge for disposable shopping bags, and the advent of training about institutional racism for municipal workers. Looking not just at what these policies say but at how they work in practice, she finds that opportunities for social justice, sustainability, and creativity are all constrained by the prevalence of market-oriented thinking and the classism and racism that seep into the architecture of many programs and policies. Houston urges us to consider how values influence actions within urban governance and emphasizes the necessity of developing effective conditions for sustainability, creativity, and social justice in this era of increasing urbanization.

Journal of International Students, 2020 Vol. 10 No. 2 OJED/STAR Issue 10.2 continues the journal's yearlong celebration with special 10th Anniversary Essays from influential voices in the field like Karin Fisher and Rahul Choudaha who highlight the need for research in the face of the current pandemic, the affordability crisis for students, and the workplace experiences of international students. The 10.2 issue features essays, research articles, reflections, and book reviews from authors in Australia, Canada, China, Eritrea, the Netherlands, Singapore, Thailand, Turkey,

and the United Kingdom. **The City Creative The Rise of Urban Placemaking in Contemporary America University of Chicago Press** Introduction : a brief history of the recent past -- The (near) death and life of postwar American cities : the roots of contemporary placemaking -- The roaring '90s -- Into the twenty-first century -- Growing place : toward a counterhistory of contemporary placemaking -- Producing place -- Creating place -- Conclusion : Placemaking is for people. **Security and Defence in Europe Springer** This book argues that security and defense have never been true priorities in the European Union, and have constantly been marginalized by the elites since the Soviet Union collapsed and the Warsaw Pact disintegrated. Despite the official rhetoric, only a few tangible results can be presented concerning the operational readiness of European forces, and the EU's inability to act was proven during the crises in the Balkans, NATO has experienced similar problems, as the majority of its members are EU countries. Both organizations have declared their resolve concerning the security and defense of their nations and territories, but, unfortunately, little has been done to lend these statements credence. In this context, the book analyzes several aspects of EU security and defense, including: the EU - NATO relationship, common defense policy and strategy, common capability building, common understanding of strategic changes, common operational planning and centrally synchronized exercises based on operational planning, etc. The member states have helped to make EU/NATO effective organizations, but unfortunately their individual interests and priorities constitute real challenges. This aspect should be discussed and addressed by political and military elites, scholars, analysts, students and the general public alike. **Oracles, Heroes or Villains Economic Policymakers, National Politicians and the Power to Shape Markets Cambridge University Press** "Economic Policymakers, National Politicians and the Power to Shape Markets"-- **We are the Weather Saving the Planet Begins at Breakfast Penguin UK** 'Read this book. Saving Planet Earth starts right here, right now' Stella McCartney From the bestselling author of Eating Animals, a brilliantly fresh and accessible take on climate change - and what we can do about it 'Climate change is the greatest crisis humankind has ever faced. It is that straightforward, that fraught. Where were you when you made your decision?' It is all too easy to feel paralysed and hopeless in the face of climate crisis, but the truth is that every one of us has the power to change history's course. We have done it before: making collective sacrifices to protect our freedoms, our families, our way of life. And we can do it again. In this extraordinarily powerful and deeply personal book, Jonathan Safran Foer lays bare the battle to save the planet. The music industries are fuelled by statistics: sales targets, breakeven points, success ratios, royalty splits, website hits, ticket revenues, listener figures, piracy abuses and big data. Statistics are of consequence. They influence the music that consumers get to hear, they determine the revenues of music makers, and they shape the policies of governments and legislators. Yet many of these statistics are generated by the music industries themselves, and their accuracy can be questioned. This original new book sets out to explore this shadowy terrain. While there are books that offer guidelines about how the music industries work, as well as critiques from academics about the policies of music companies, this is the first book that takes a sustained look at these subjects from a statistical angle. This is particularly significant as statistics have not just been used to explain the music industries, they are also essential to the ways that the industries work: they drive signing policy, contractual policy, copyright policy, economic policy and understandings of consumer behaviour. This edited collection provides the first in-depth examination of the use and abuse of statistics in the music industries. The international group of contributors are noted

music business scholars and practitioners in the field. The book addresses five key areas in which numbers are employed: sales and awards; royalties and distribution; music piracy; music policy; and audiences and their uses of music. The authors address these subjects from a range of perspectives. Some of them test the veracity of this data and explore its tactical use by music businesses. Others are helping to generate these numbers: they are developing surveys and online projects and offer candid self-observations in this volume. There are also authors who have been subject to statistics; they deliver first-hand accounts of music industry reporting. The digital age is inherently numerical. Within the music industries this has prompted new ways of tracking the usage and recompense of music. In addition, it has generated new means of monitoring and engaging audience behaviour. It has also led to increased documentation of the trade. There is more reporting of the overall revenues of music industry sectors. There is also more engagement between industry and academia when it comes to conducting analyses and offering numerical recommendations to politicians. The aim of this collection is to expose the culture and politics of data. Music industry statistics are all-pervasive, yet because of this ubiquity they have been under-explored. This book provides new ways by which to learn music by numbers. A timely examination of how data and statistics are key to the music industries. Widely held industry assumptions are challenged with data from a variety of sources and in an engaging, lucid manner. Highly recommended for anyone with an interest in how the music business uses and manipulates the data that digital technologies have made available. Primary readership will be among popular music academics, undergraduate and postgraduate students working in the fields of popular music studies, music business, media studies, cultural studies, sociology and creative industries. The book will also be of interest to people working within the music industries and to those whose work encounters industry statistics.

Streetcars and the Shifting Geographies of Toronto A Visual Analysis of Change University of Toronto Press When looking at old pictures of Toronto, it is clear that the city's urban, economic, and social geography has changed dramatically over the generations. Historic photos of Toronto's streetcar network offer a unique opportunity to examine how the city has been transformed from a provincial, industrial city into one of North America's largest and most diverse regions. Streetcars and the Shifting Geographies of Toronto studies the city's urban transformations through an analysis of photographs taken by streetcar enthusiasts, beginning in the 1960s. These photographers did not intend to record the urban form, function, or social geographies of Toronto; they were "accidental archivists" whose main goal was to photograph the streetcars themselves. But today, their images render visible the ordinary, day-to-day life in the city in a way that no others did. These historic photographs show a Toronto before gentrification, globalization, and deindustrialization. Each image has been re-photographed to provide fresh insights into a city that is in a constant state of flux. With gorgeous illustrations, this unique book offers an understanding of how Toronto has changed, and the reasons behind these urban shifts. The visual exploration of historic and contemporary images from different parts of the city helps to explain how the major forces shaping the city affect its form, functions, neighbourhoods, and public spaces. **Donald Trump's New World Order U.S. Credibility, Reputation, and Integrity** Donald
