## Essays in Production, Project Planning and Scheduling

### A Festschrift in Honor of Salah Elmaghraby

**Springer Science & Business Media** From the Preface: This festschrift is devoted to recognize the career of a man who not only witnessed the growth of operations research from its inception, but also contributed significantly to this growth. Dr. Salah E. Elmaghraby received his doctorate degree from Cornell University in 1958, and since then, his scholarly contributions have enriched the fields of production planning and scheduling and project scheduling. This collection of papers is contributed in his honor by his students, colleagues, and acquaintances. It offers a tribute to the inspiration received from his work, and from his guidance and advice over the years, and recognizes the legacy of his many contributions. Dr. Elmaghraby is a pioneer in the area of project scheduling (in particular, project planning and control through network models, for which he coined the term 'activity networks'.) In his initial work in this area, he developed an algebra based on signal flow graphs and semi-Markov processes for analyzing generalized activity networks involving activities with probabilistic durations. This work led to the development of what was later known as the Graphical Evaluation and Review Technique (GERT), and GERT simulation models. He has made fundamental contributions in determining criticality indices for activities, in developing methodologies for project compression and time/cost

analysis, and in the use of stochastic and chance-constrained programming and Petri Nets for the analysis of activity networks. This volume brings together fourteen contributions, which can be viewed under the following three main themes: operations research and its application in production planning; project scheduling, and production scheduling, inspired by, and in many cases based on, Dr. Elmaghraby's work in these areas. The first five chapters are devoted to the first theme, followed by four chapters each devoted to the other two, respectively. An additional chapter is devoted to the vulnerability of multimodal freight systems.

## Global Justice Reform

### A Comparative Methodology

NYU Press **Global Justice Reform** critiques and rethinks two neglected subjects: the nature of comparison in the field of comparative law and the struggles of national judicial systems to meet global rule of law objectives. Hiram Chodosh offers a candid look at the surprisingly underdeveloped methodology of comparative legal studies, and provides a creative conceptual framework for defining and understanding the whys, whats, and hows of comparison. Additionally, Chodosh demonstrates how theories of comparative law translate into practice, using contemporary global justice reform initiatives as a case study, with a particular focus on Indonesia and India. Chodosh highlights the gap between the critical role of judicial institutions and their poor performance (for example, political interference, corruption, backlog, and delay), discussing why reform is so elusive, and demonstrating the unavoidable and essential role of comparison in reform proposals. Throughout the book, Chodosh identifies several sources of comparative misunderstanding that impede successful reforms and identifies the many predicaments reformers face, detailing a wide variety of designs, methods, and social dilemmas. In response to these seemingly insurmountable challenges, Chodosh advances some novel conceptual strategies, first by drawing on a body of non-legal scholarship on self-regulating, emergent systems, and then by identifying a series of anti-dilemma strategies that draw upon insights about the nature of comparison.

## The Economics of Money, Banking, and Financial Markets

Pearson Education **Economics of Money, Banking, and Financial Markets** heralded a dramatic shift in the teaching of the money and banking course in its first edition, and today it is still setting the standard. By applying an analytical framework to the patient, stepped-out development of models, Frederic Mishkin draws students into a deeper understanding of modern monetary theory, banking, and policy. His landmark combination of common sense applications with current, real-world events provides authoritative, comprehensive coverage in an informal tone students appreciate.

## The Financial Crisis Inquiry Report

### The Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States Including Dissenting Views

Cosimo, Inc. **The Financial Crisis Inquiry Report**, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. **THE FINANCIAL CRISIS INQUIRY COMMISSION** is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government." **News Dissector DANNY SCHECHTER** is a journalist, blogger and filmmaker. He has been reporting on economic crises since the 1980's when he was with ABC News. His film *In Debt We Trust* warned of the economic meltdown in 2006. He has since written three books on the subject including *Plunder: Investigating Our Economic Calamity* (Cosimo Books, 2008), and *The Crime Of Our Time: Why Wall Street Is Not Too Big to Jail* (Disinfo Books, 2011), a companion to his latest film *Plunder The Crime Of Our Time*. ## The Global Economic Crisis through an Indian Looking Glass

SAGE Publishing India **"The fact that the authors have had a first-hand understanding and a ring-side view of Indian policy settings (in different capacities), and at the same time, the living experience of the international efforts to deal with the crises is reflected in their competent and insightful treatment of a most topical theme that continues to draw both heat and light, and animated engagement in the public space. Their effort is distinctive in that it provides an Indian perspective to the subject and fills an important gap in the swelling literature on the global crisis." -Dr C. Rangarajan, Chairman, Economic Advisory Council to the Prime Minister of India "For anyone interested in learning how the recent global financial crisis came about, how it impacted the world and India, and how the latter responded to the challenge posed by it, this book offers a clear and comprehensive one-stop analysis." -Arvind Panagariya, Columbia University "A large body of literature is already pouring in on the genesis, manifestation, and outcome of the worldwide meltdown, but few have taken the broad international view and combined it with an in-depth study of a large emerging economy. The authors of the book have done it, and done it successfully." -V. S. Vyas, Member, Economic Advisory Council to the Prime Minister of India *The Global Economic Crisis through an Indian Looking Glass* is about the onset and unfolding of the global financial crisis and the great recession of 2008-2009, tracing its origin and causes, dimensions and impact, policy responses, lessons and the way forward from an Indian**

perspective. A significant feature of the book is the analysis of the four facets of the crisis: (i) genesis, (ii) impact on the world and India, (iii) the response, and (iv) the aftermath. The objective is to capture the specific aspects of the onset of the crisis and the policy responses, with particular emphasis on the sequencing thereof. The authors underscore the gaps in the international financial architecture that allow the recurrence of crises with global ramifications and emphasize the importance of cooperation, coordination and collective action to secure and sustain macroeconomic and financial stability across the globe. The book is a testament to the powerful values of global interconnectedness.
