TRANSNATIONAL SOCIAL WORK AND SOCIAL WELFARE

CHALLENGES FOR THE SOCIAL WORK PROFESSION

Routledge *The underlying frame of social work is the nation state, and it is from within the state that welfare strategies and social policies are devised and*

implemented. However, post-colonialism, globalisation, migration and the associated implications for human rights, social justice and social welfare policies contest the idea of a clearly defined space for social work and present new challenges for researchers and practitioners. *Transnational Social Work and Social Welfare* argues for the increased importance of the transnational perspective in social work theory and practice. The book challenges the idea of the nation state as a given entity and argues that globalization and an increasing number of people crossing borders must have an impact on the theories and strategies of social work. The international contributors are critical of a restricted focus on a geographically defined space and the impact on work with clients. With cases covering China, France, India, UK, Germany, Malaysia, Israel, Turkey, the book highlights the challenges as well as the opportunities this new perspective can open up for theories and strategies in social work. It will be of interest to students, researchers and social workers interested in migration, social care, poverty and cultural competency in health and social care.

THE MENTAL HEALTH PROFESSIONAL AND THE NEW TECHNOLOGIES

A HANDBOOK FOR PRACTICE TODAY

Taylor & Francis *In the last two decades, new communication technologies have dramatically changed the world in which mental health professionals and their patients live. Developments such as e-mail, online chat groups, Web pages, search engines, and electronic databases are directly or indirectly affecting most people's routines and expectations. Other developments are poised to do so in the near future. Already, for example, patients are acquiring both good and bad advice and information on the Web; many expect to be able to reach their therapists by e-mail. And already there is pressure from third party payers for providers to submit claims electronically. These technological breakthroughs have the potential to make mental health care more widely available and accessible, affordable, acceptable to patients, and adaptable to special needs. But many mental health professionals, as well as those who train them, are skeptical about integrating the new capabilities into their services and question the ethical and legal appropriateness of doing so. Those unfamiliar with the technologies tend to be particularly doubtful. How much e-mail contact with patients should I encourage or permit, and for what purposes? Why should I set up a Web site and how do I do so and what should I put on it? Should I refer patients to chat groups or Web-based discussion forums? Could video-conferencing be a helpful tool in some cases and what is involved? How do I avoid trouble if I dare to experiment with innovations? And last but not least, will the results of my experimentation be cost-effective? The book includes: an extensive overview of legal and regulatory issues, such as those raised by the Health Insurance Portability and Accountability Act (HIPAA); concrete technical, ethical, and managerial suggestions summarized in a seven-step Online Consultation Risk Management model; and how to" resource lists and sample documents of use to beginners and experienced professionals alike. For better or worse, no mental health professional today can avoid confronting the issues presented by the new technologies. The Mental Health Professional and the New Technologies: A Handbook for Practice Today will enormously simplify the job of thinking through the issues and making clinically, ethically, and legally prudent decisions.*

FAMILY AND CHILD WELL-BEING AFTER WELFARE REFORM

Transaction Publishers *Since their historic high in 1994, welfare caseloads in the United States have dropped an astounding 59 percent--more than 5 million fewer families receive welfare. Family and Child Well-Being after Welfare Reform, now in paperback, explores how low-income children and their families are faring in the wake of welfare reform. Contributors to the volume include leading social researchers. Can existing surveys and other data be used to measure trends in the area? What key indicators should be tracked? What are the initial trends after welfare reform? What other information or approaches would be helpful? The book covers a broad range of topics: an update on welfare reform (Douglas J. Besharov and Peter Germanis); ongoing major research (Peter H. Rossi); material well-being, such as earnings, benefits, and consumption (Richard Bavier); family versus household (Wendy D. Manning); fatherhood, cohabitation, and marriage (Wade F. Horn); teenage sex, pregnancy, and nonmarital births (Isabel V. Sawhill); child maltreatment and foster care (Richard J. Gelles); homelessness and housing (John C. Weicher); child health and well-being (Lorraine V. Klerman); nutrition, food security, and obesity (Harold S. Beebout); crime, juvenile delinquency, and dysfunctional behavior (Lawrence W. Sherman); drug use (Peter Reuter); mothers' work and child care (Julia B. Isaacs); and the activities of the U.S. Department of Health and Human Services (Don Winstead and Ann McCormick). When welfare reform was first debated, many people feared that it would hurt the poor, especially children. The contributors find little evidence to suggest this has occurred. As time limits and other programmatic requirements take hold, more information will be needed to assess the condition of low-income families after welfare reform. This informative volume establishes a baseline for that assessment.*

GROUND WATER AT YUCCA MOUNTAIN

HOW HIGH CAN IT RISE?

National Academies Press *The site of a proposed repository for high-level radioactive waste from the nation's nuclear power plants is not at risk of ground water infiltration, concludes this important book. Yucca Mountain, located about 100 miles northwest of Las Vegas, has been proposed as the site for permanent underground disposal of high-level radioactive waste from the nation's civilian nuclear power plants. To resolve concerns raised by a Department of Energy (DOE) staff scientist concerning the potential for ground water to rise 1,000 feet to the level proposed for the repository, DOE requested this study to evaluate independently the past history and future potential of large upward excursions of the ground water beneath Yucca Mountain.*

WHO HAS THE CURE?

HAMILTON PROJECT IDEAS ON HEALTH CARE

Brookings Institution Press *The Hamilton Project at the Brookings Institution was established to foster policy innovation from leading economic thinkers—ideas based on evidence and experience, not ideology and doctrine. The overall goal is to promote America's long-term economic growth, and economic security for American families. This important book brings The Hamilton Project's approach to one of the most critical issues facing Americans today—health care. In Who Has the Cure? a team of noted economists and policy analysts emphasizes the importance of universal health care—not just its value to individual and families, but also the overall economy. They examine in detail four policy alternatives for achieving universal health insurance coverage that would also improve efficiency in the health care industry. The contributors to this volume also evaluate proposals designed to make health care more affordable and effective. Among the possible strategies studied here are an expansion of preventive care, income-related cost sharing, and reform of Medicare's prescription drug benefit.*

CREATING THE NEW INTERNET SUPER HIGHWAY BOOK

TAKING THE WEB TO ANOTHER DIMENSION

Alastair R Agutter *Creating The New Internet Super Highway Book As a member of the public, business owner, developer, or programmer, you may well ask what the*

hell has Natural Branching and Quantum Mechanics got to do with the Web and a Virtual World. The reality is, even in a virtual world such elements are busy at work, so take a journey into the future, here and now! The Internet and World Wide Web was created and invented from a physical world of computing. Yet today using technology society operates in a Virtual World of Computer Science, and born from that has come the manifestation of a newly created Internet Super Highway and World Wide Web. This claim is not from a line, or script of a Sci-Fi Movie, but the arrival of a new era, one that exists right now, and is evolving by the day, and unbeknown to most, even to Folk in the world of Business and Development. The arrival of this new era of greater advancement is a quantum leap in computer science, and well beyond one dimensional thinking. In 2006, I wrote a paper on the World Wide web titled "The Chaos Theory of Packet Data" and now today there are over 94 million web sites and counting. It was only a matter of time by understanding the realms of Natural Law could be found even within a Virtual World Quantum Mechanics and Natural Branching busy at work reaching beyond convention for a faster method of packet data delivery by flat packing the World Wide Web by stealth. I have heard many say even in my life time, how amazing it would be, to be able to look into the future. Well this book takes you there, here and now regarding the World Wide Web and the Computer Sciences. So are you ready to look into the future now! Quotation: "Even a virtual world created by technology, continues to be re-shaped by the power of Natural Law in the form of Quantum Mechanics and Natural Branching." ~ Alastair R Agutter. This book covers my notes and work, when I had a eureka moment in early 2013, and realized it was possible to create a new 'Internet Super Highway' (virtual world wide web) and one that could be a free collaboration program with any number of entities. The creating of a new higher level of the World Wide Web is a major breakthrough, as demand becomes forever greater, surrounding more users and packet data. Every web site owner, developer, student and enthusiast can embrace and adopt this new virtual world of development, for a faster and more enjoyable connectivity experience. Creating a compression inflation environment for users and new customers by adopting and understanding how photon particles can be altered to different paths and journeys, even split and using far longer distances, but defining logic with faster delivery within the realms of fractal maths. From careful research, I was also able to establish the average bounce rate of a business web site was over 40% and over 94% of all web sites are not optimized for a virtual world, their users, or browser rendering engine technology software. So by flat packing things as folk would say, and by running optimization tools and tests, I found I could change the speed of any average web site, where it would perform at least 5 to 10 times faster by my newly discovered methods in such an environment, that I regard today in comparison to all other web sites being downloaded, as super fast speed by stealth!!!

IMPACT OF CHINA'S RISE ON THE MEKONG REGION

Springer This volume presents a contemporary analysis of the impact of China's rise on the Mekong Region at a critical point in Southeast Asian history. As the most populated country and the second largest economy in the world, China has become

an increasingly influential player in global and regional affairs in recent decades. Economic ties between China and her southern neighbors are particularly strong. Yet relations between China and the Mekong region are embedded in complex socio-cultural and political issues. China's accelerated growth, increasing economic footprint, rapid military modernization, and global search for energy, natural resources, and food security have created a wide range of new challenges for smaller countries in Southeast Asia. These new challenges both encourage and limit cooperation between China and the emerging ASEAN Economic Community (AEC). The authors pay close attention to these challenges with particular focus on the impact of Chinese investment, trade, foreign aid, and migration.

CULTURAL IMPACT ON CONFLICT MANAGEMENT IN HIGHER EDUCATION

IAP *Cultural Impact on Conflict Management in Higher Education* shares information regarding conflict management and resolution in higher education from a global perspective. In this book, we introduced many conflict resolution methods from different regions in the world. You can borrow some successful strategies and examine the differences and similarities between contexts. The book shares a conflict resolution model which may direct the reader to start thinking about addressing and managing conflicts from different levels of organizations. This book is a collective work of authors coming from all over the world. We chose higher education as the context because it is a place where diverse thoughts, perspectives, and people come together. Because of the potential richness of diversity on a college campus, the opportunity for conflicts occurs. Managing conflict does not work when there is a "one-way only approach/model" for addressing conflict. Some conflict resolution encompasses multiple dimensions: (a) one's personal beliefs or beliefs about an issue; (b) an individual's personal history in terms of how the conflict was perceived as something to be discussed or not; (c) work culture of the conflict where if 'one has a conflict,' the person or unit is messing up or there is a problem person; (d) the unconscious strategies of 'face saving' (trying to maintain one's image) present; (e) social hierarchies or relationships; and (f) the diversity dimensions and issues that may be present.

SUPPORTING POST-COVID-19 ECONOMIC RECOVERY IN SOUTHEAST ASIA

Asian Development Bank *This report identifies well-established sectors needing transformation or improvement (tourism, agro-processing, and garments), along with evolving sectors with high potential for growth (electronics and digital trade) as Southeast Asian countries hammer out policies to boost post-COVID-19 recovery and*

secure a greener future. The first in a four-part series, the report looks at the pandemic's impact on these five sectors across Cambodia, Indonesia, Myanmar, the Philippines and Thailand. It identifies reforms and strategies to help core industries recover and grow over the medium term. This report underscores how deepening regional cooperation can help policy makers boost their countries' COVID-19 recovery and build more resilient economies and societies.

MOUNTAIN CHEF: HOW ONE MAN LOST HIS GROCERIES, CHANGED HIS PLANS, AND HELPED COOK UP THE NATIONAL PARK SERVICE

READ ALONG OR ENHANCED EBOOK

Triangle Interactive, Inc. Read Along or Enhanced eBook: The true story of a Chinese American mountain man who fed thirty people for ten days in the wilderness--and helped inspire the creation of the National Park Service. Tie Sing was born in the mountains. The mountains were in his blood. But because he was of Chinese descent at a time in America when to be Chinese meant working in restaurants or laundries, Tie Sing's prospects were limited. But he had bigger plans. He began cooking for mapmakers and soon built a reputation as the best trail cook in California. When millionaire Stephen Mather began his quest to create a national park service in 1915, he invited a group of influential men--writers, tycoons, members of Congress, and even a movie star--to go camping in the Sierras. Tie Sing was hired to cook. Tie Sing planned diligently. He understood the importance of this trip. But when disaster struck--twice!--and Tie Sing's supplies were lost, it was his creative spirit and quick mind that saved the day. His sumptuous menus had to be struck and Tie Sing had to start over in order to feed the thirty people in the group for ten whole days. His skills were tested and Tie Sing rose to the challenge. On the last night, he fed not just the campers' bodies, but also their minds, reminding them to remember and protect the mountains. 2016 marks the 100th anniversary of the National Park Service, created by Congress on August 25, 1916. Today, you can hike to Sing Peak, named for Tie Sing, in Yosemite National Park.

SOCIAL PROTECTION, PASTORALISM AND RESILIENCE IN ETHIOPIA

LESSONS FOR SUB-SAHARAN AFRICA

Taylor & Francis *This book investigates the role of social protection amongst African pastoral and agro-pastoral communities, with a particular focus on Ethiopia. Based on rigorous empirical research, this book assesses the successes, failures, prospects and lessons learned from Africa's largest social security intervention: Ethiopia's Productive Safety Net Programme. It goes beyond an analysis of immediate impacts, exploring factors such as highland-lowland interactions, rural-urban linkages, economic diversification, the role of youth, indigenous safety nets and social capital. Special attention is given to gender-responsive social protection measures and to the circumstances brought about by the COVID-19 pandemic. Overall, the book demonstrates the value of indigenous knowledge systems and local institutions in contributing to the design of more effective safety net programmes and disaster responses and in helping people to build resilience and cope with shocks. At a time when social protection is gaining prominence in contemporary development discourse, this book will be of interest to development practitioners.*
