ACCOUNTING FOR SOCIAL RISK FACTORS IN MEDICARE PAYMENT

National Academies Press Recent health care payment reforms aim to improve the alignment of Medicare payment strategies with goals to improve the quality of care provided, patient experiences with health care, and health outcomes, while also controlling costs. These efforts move Medicare away from the volume-based payment of traditional fee-for-service models and toward value-based purchasing, in which cost control is an explicit goal in addition to clinical and quality goals. Specific payment strategies include pay-for-performance and other quality incentive programs that tie financial rewards and sanctions to the quality and efficiency of care provided and accountable care organizations in which health care providers are held accountable for both the quality and cost of the care they deliver. Accounting For Social Risk Factors in Medicare Payment is the fifth and final report in a series of brief reports that aim to inform ASPE analyses that account for social risk factors in Medicare payment programs mandated through the IMPACT Act. This report aims to put the entire series in context and offers additional thoughts about how to best consider the various methods for accounting for social risk factors, as well as next steps.

SYSTEMS PRACTICES FOR THE CARE OF SOCIALLY AT-RISK POPULATIONS

National Academies Press The Centers for Medicare & Medicaid Services (CMS) have been moving from volume-based, fee-for-service payment to value-based payment (VBP), which aims to improve health care quality, health outcomes, and patient care experiences, while also controlling costs. Since the passage of the Patient Protection and Affordable Care Act of 2010, CMS has implemented a variety of VBP strategies, including incentive programs and risk-based alternative payment models. Early evidence from these programs raised concerns about potential unintended consequences for health equity. Specifically, emerging evidence suggests that providers disproportionately serving patients with social risk factors for poor health outcomes (e.g., individuals with low socioeconomic position, racial and ethnic minorities,

gender and sexual minorities, socially isolated persons, and individuals residing in disadvantaged neighborhoods) may be more likely to fare poorly on quality rankings and to receive financial penalties, and less likely to receive financial rewards. The drivers of these disparities are poorly understood, and differences in interpretation have led to divergent concerns about the potential effect of VBP on health equity. Some suggest that underlying differences in patient characteristics that are out of the control of providers lead to differences in health outcomes. At the same time, others are concerned that differences in outcomes between providers serving socially at-risk populations and providers serving the general population reflect disparities in the provision of health care. *Systems Practices for the Care of Socially At-Risk Populations* seeks to better distinguish the drivers of variations in performance among providers disproportionately serving socially at-risk populations and identifies methods to account for social risk factors in Medicare payment programs. This report identifies best practices of high-performing hospitals, health plans, and other providers that serve disproportionately higher shares of socioeconomically disadvantaged populations and compares those best practices of low-performing providers serving similar patient populations. It is the second in a series of five brief reports that aim to inform the Office of the Assistant Secretary of Planning and Evaluation (ASPE) analyses that account for social risk factors in Medicare payment programs mandated through the Improving Medicare Post-Acute Care Transformation (IMPACT) Act.

THE FAIRTAX SOLUTION

FINANCIAL JUSTICE FOR ALL AMERICANS

Penguin The definitive book on the Fairtax and its potential to save the U.S. economy In the century since it was created, the federal income tax system has grown into a monster that threatens the well-being of average citizens and business owners as well as the very foundations of our economy and our democracy. But there's a better alternative: the FairTax. Its supporters argue that the federal government should stop taxing what goes into the economy—earnings, savings, and investments—and start taxing what comes out: consumption. The result would be the same amount of revenue but more growth, much less political corruption, and a far healthier relationship between Americans and their government. Ken Hoagland of the FairTax Institute is an expert on this grassroots movement, and his book offers the clearest explanation of this revolutionary idea. He details the history of income tax collection in this country and current lobbying practices that have bloated the tax code to 67,500 pages of irrational regulations. Anyone who has ever shuddered as April 15 approaches or who simply cares about making the country better will be fascinated by Hoagland's research and conclusions.

THE STATE OF FOOD AND AGRICULTURE 2019

MOVING FORWARD ON FOOD LOSS AND WASTE REDUCTION

Food & Agriculture Org. The need to reduce food loss and waste is firmly embedded in the 2030 Agenda for Sustainable Development. Food loss and waste reduction is considered important for improving food security and nutrition, promoting environmental sustainability and lowering production costs. However, efforts to reduce food loss and waste will only be effective if informed by a solid understanding of the problem. This report provides new estimates of the percentage of the world's food lost from production up to the retail level. The report also finds a vast diversity in existing estimates of losses, even for the same commodities and for the same stages in the supply chain. Clearly identifying and understanding critical loss points in specific supply chains - where considerable potential exists for reducing food losses - is crucial to deciding on appropriate measures. The report provides some guiding principles for interventions based on the objectives being pursued through food loss and waste reductions, be they in improved economic efficiency, food security and nutrition, or environmental sustainability.

HANDBOOK OF RESEARCH ON ISLAMIC SOCIAL FINANCE AND ECONOMIC RECOVERY AFTER A GLOBAL HEALTH CRISIS

IGI Global Social financial reporting as an economic tool presents the firm as a socio-economic unit with empowered social capital to enable a sustainable economic solution, particularly in response to the COVID-19 pandemic. Islamic social finance (ISF) is a corporate social responsibility initiative in the form of humanitarian and socio-development programs by Islamic financial institutions and Shariah-compliant corporations. ISF is applied through various methods and tools that structure based on Islamic Sharia Law. For example, Islamic social finance tools would either be philanthropic, involving activities such as zakat (obligatory alms-giving), Sadaqah (voluntary alms-giving/charity), and waqf (endowment) or ta'awun (cooperation-based activities), which include Qardh al-hasan (benevolent loan) and kafala (guarantee). Thus, Islamic social finance instruments play a vital role in alleviating poverty and addressing socio-economic issues such as illiteracy, unemployment, malnutrition, and health issues. As such, integrated ISF reporting can empower sustainable economic development and lead to recovery. The Handbook of Research on Islamic Social Finance and Economic Recovery After a Global Health Crisis provides insights on the role of Islamic social finance in supporting and facilitating economic recovery in the post-COVID-19 era as well as reducing poverty and addressing the challenges of socio-economic problems such as education, unemployment, malnutrition, and health issues. This book is ideally intended for practitioners, stakeholders, researchers, academicians, and students who are interested in improving their understanding on the role of Islamic social finance theoretically and empirically in solving the issue of poverty and developing excellent funds management to achieve economic empowerment with better environmental sustainability.
