MASS PRODUCTION, THE STOCK MARKET CRASH, AND THE GREAT DEPRESSION

THE MACROECONOMICS OF ELECTRIFICATION

iUniverse Economists and historians view the events of the 1920s, the stock market boom and crash, the Great Depression and the New Deal, as being largely independent. This work presents an integrated, empirically-consistent view of this important period arguing that all of these events can be traced back to a paradigm technology shock, namely the electrification of U.S. industry from 1910 to 1926. The author goes from electrification through the stock market boom to the tariffs of the late 20s to the stock market crash and depression followed by the National Industrial Recovery Act in 1933.

PURSUING HAPPINESS

AMERICAN CONSUMERS IN THE TWENTIETH CENTURY

Princeton University Press Whether watching baseball or undergoing heart surgery, Americans have bought a variety of goods and services to achieve happiness. Here is a provocative look at what they have chosen to purchase. Stanley Lebergott maintains that the average consumer has behaved more reasonably than many distinguished critics of "materialism" have suggested. He sees consumers seeking to make an uncertain and often cruel world into a pleasanter and more convenient place--and, for the most part, succeeding. With refreshing common sense, he reminds us of what many "luxuries" have meant, especially for women: increased income since 1900 has been used largely to lighten the backbreaking labor once required by household chores. Originally published in 1993. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

MARX AND KEYNES

THE LIMITS OF THE MIXED ECONOMY

Radical Reprints Marx and Keynes: The Limits of the Mixed Economy is a 1969 book by Paul Mattick which presents a Marxist critique of the Keynesian approach to economic problems. During a time in which the economic orthodoxy was to say that the contradictions of the capitalist system had been overcome, Marx and Keynes goes against the orthodoxy to examine how the solutions which are presented for the market in Keynesianism are only limited and present the same contradictions. Written before the complete turn to Neoliberalism, Mattick not only critiques Keynes' policies, but also points out the same contradictions of the system exist within the

state capitalism of the USSR, proclaiming himself an "Anti-Bolshevik Communist." Past being a critique of Keynesianism, Marx and Keynes is also a guide to understanding Marx's economics, from the theory of value to the falling rate of profit, Mattick applies Marx to the current state of economics in the '60s. Paul Mattick, Sr. (March 13, 1904 - February 7, 1981) was a Marxist political writer and social revolutionary, whose thought can be placed within the council communist and left communist traditions.
