Global Business Strategy

Multinational Corporations Venturing into Emerging Markets

Springer This book presents theories and case studies for corporations in developed nations, including Japan, for designing strategies to maximize opportunities and minimize threats in business expansion into developing nations. The case studies featured here focus on Asia, including China and India, and use examples of Japanese manufacturers. Five case studies are provided, including Hitachi Construction Machinery and Shiseido in China and Maruti Suzuki in India. These cases facilitate the reader's understanding of the business environments in emerging economies. This volume is especially recommended for business people responsible for international business development, particularly in China and India. In addition, the book serves as a useful resource for students in graduate-level courses in international management.

How to Write and Illustrate a Scientific Paper

Cambridge University Press This second edition of *How to Write and Illustrate a Scientific Paper* will help both first-time writers and more experienced authors, in all biological and medical disciplines, to present their results effectively. Whilst retaining the easy-to-read and well-structured approach of the previous edition, it has been broadened to include

comprehensive advice on writing compilation theses for doctoral degrees, and a detailed description of preparing case reports. Illustrations, particularly graphs, are discussed in detail, with poor examples redrawn for comparison. The reader is offered advice on how to present the paper, where and how to submit the manuscript, and finally, how to correct the proofs. Examples of both good and bad writing, selected from actual journal articles, illustrate the author's advice - which has been developed through his extensive teaching experience - in this accessible and informative guide.

Global Nomads

Techno and New Age as Transnational Countercultures in Ibiza and Goa

Routledge **Global Nomads** provides a unique introduction to the globalization of countercultures, a topic largely unknown in and outside academia. Anthony D'Andrea examines the social life of mobile expatriates who live within a global circuit of countercultural practice in paradoxical paradises. Based on nomadic fieldwork across Spain and India, the study analyzes how and why these post-metropolitan subjects reject the homeland in order to shape an alternative lifestyle. They become artists, therapists, exotic traders and bohemian workers seeking to integrate labor, mobility and spirituality within a cosmopolitan culture of expressive individualism. These countercultural formations, however, unfold under neo-liberal regimes that appropriate utopian spaces, practices and imaginaries as commodities for tourism, entertainment and media consumption. In order to understand the paradoxical globalization of countercultures, **Global Nomads** develops a dialogue between global and critical studies by introducing the concept of 'neo-nomadism' which seeks to overcome some of the shortcomings in studies of globalization. This book is an essential aide for undergraduate, postgraduate and research students of Sociology, Anthropology of Globalization, Cultural Studies and Tourism Studies.

Bootleg! The Rise And Fall Of The Secret Recording Industry

Omnibus Press An absorbing account of the record industry's worst nightmare. In the summer of 1969, *Great White Wonder*, a collection of unreleased Bob Dylan recordings appeared in Los Angeles. It was the first rock bootleg and it spawned an entire industry dedicated to making unofficial recordings available to true fans. **Bootleg!** tells the whole fascinating saga, from its underground infancy through the CD 'protection gap' era, when its legal status threatened the major labels' monopoly, to the explosion of trading via Napster and Gnutella on MP-3 files. Clinton Heylin provides a highly readable account of the busts, the defeats and victories in court; the personalities - many interviewed for the first time for this book. This classic history has now been updated and revised to include today's digital era and the emergence of a whole new bootleg culture.

Logical Reasoning

Bradley Dowden This book is designed to engage students' interest and promote their writing abilities while teaching them to think critically and creatively. Dowden takes an activist stance on critical thinking, asking students to create and revise arguments rather than simply recognizing and criticizing them. His book emphasizes inductive reasoning and the analysis of individual claims in the beginning, leaving deductive arguments for consideration later in the course.

Homer Economicus

The Simpsons and Economics

Stanford University Press In *Homer Economicus* a cast of lively contributors takes a field trip to Springfield, where the Simpsons reveal that economics is everywhere. By exploring the hometown of television's first family, this book provides readers with the economic tools and insights to guide them at work, at home, and at the ballot box. Since *The Simpsons* centers on the daily lives of the Simpson family and its colorful neighbors, three opening chapters focus on individual behavior and decision-making, introducing readers to the economic way of thinking about the world. Part II guides readers through six chapters on money, markets, and government. A third and final section discusses timely topics in applied microeconomics, including immigration, gambling, and health care as seen in *The Simpsons*. Reinforcing the nuts and bolts laid out in any principles text in an entertaining and culturally relevant way, this book is an excellent teaching resource that will also be at home on the bookshelf of an avid reader of pop economics.

Marketing Strategy Masterclass

The 100 Questions You Need to Answer to Create Your Own Winning Marketing Strategy : Including the New 'scorpio' Model of Market Strategy

Routledge The very best business isn't born out of hunches, macho tactical skirmishing or simply 'being busy', but is the product of careful calculation and understanding customers' needs, wants and aspirations. *Marketing Strategy Masterclass* is a 'how to' book of marketing strategy focused on doing what our customers want us to do, how they want it done. Included throughout are the wise words of a choice selection of history's masters, depicted on the book's front cover. Aimed at professional marketing managers, business development managers and students, this real and practical masterclass is an indispensable reference for use on its own or alongside *Marketing Strategy*, 3rd edition, also published by Butterworth-Heinemann. ABOUT THE AUTHOR Paul Fifield has been extensively involved in strategic marketing training and education since 1980. His professional assignments have ranged from marketing strategy development for some of the UK's largest companies through to projects in market segmentation and branding to top level in-company strategy development programmes and workshops. He has advised clients in a wide range of industries including aviation, banking, brewing, business services, computing and software, construction, economic development, housing, hotels and catering, insurance, publishing, retailing, household appliances, telecommunications, tourism and utilities. Paul is also Visiting Professor of Marketing at the University of Southampton and at the Collège des Ingénieurs in Paris. • Preparing for marketing strategy - what you need to know before you start • Developing the marketing strategy • Coordinating your strategic stance - creating the right strategic 'spine' (the basics) and then organising your strategic 'defence' and 'offence' to match • Implementing the strategy • The 100 questions you need to answer to develop and implement your marketing strategy • Templates that can be used to create real plans as you work through the SCORPIO strategy model approach • Frequently Asked Questions (FAQs) on each and every element of marketing strategy to stimulate and support the development of your own strategy

Female Masculinity

Duke University Press **Masculinity without men. In Female Masculinity** Judith Halberstam takes aim at the protected status of male masculinity and shows that female masculinity has offered a distinct alternative to it for well over two hundred years. Providing the first full-length study on this subject, Halberstam catalogs the diversity of gender expressions among masculine women from nineteenth-century pre-lesbian practices to contemporary drag king performances. Through detailed textual readings as well as empirical research, Halberstam uncovers a hidden history of female masculinities while arguing for a more nuanced understanding of gender categories that would incorporate rather than pathologize them. She rereads Anne Lister's diaries and Radclyffe Hall's *The Well of Loneliness* as foundational assertions of female masculine identity. She considers the enigma of the stone butch and the politics surrounding butch/femme roles within lesbian communities. She also explores issues of transsexuality among "transgender dykes"--lesbians who pass as men--and female-to-male transsexuals who may find the label of "lesbian" a temporary refuge. Halberstam also tackles such topics as women and boxing, butches in Hollywood and independent cinema, and the phenomenon of male impersonators. *Female Masculinity* signals a new understanding of masculine behaviors and identities, and a new direction in interdisciplinary queer scholarship. Illustrated with nearly forty photographs, including portraits, film stills, and drag king performance shots, this book provides an extensive record of the wide range of female masculinities. And as Halberstam clearly demonstrates, female masculinity is not some bad imitation of virility, but a lively and dramatic staging of hybrid and minority genders.

Vineland

Penguin "Later than usual one summer morning in 1984 . . ." On California's fog-hung North Coast, the enchanted redwood groves of Vineland County harbor a wild assortment of sixties survivors and refugees from the "Nixonian Reaction," still struggling with the consequences of their past lives. Aging hippie freak Zoyd Wheeler is revving up for his annual act of televised insanity when news reaches that his old nemesis, sinister federal agent Brock Vond, has come storming into Vineland at the head of a heavily armed Justice Department strike force. Zoyd instantly disappears underground, but not before dispatching his teenage daughter Prairie on a dark odyssey into her secret, unspeakable past. . . . Freely combining disparate elements from American popular culture—spy thrillers, ninja potboilers, TV soap operas, sci-fi fantasies—*Vineland* emerges as what Salman Rushdie has called in *The New York Times Book Review* "that rarest of birds: a major political novel about what America has been doing to itself, to its children, all these many years."

On Integrating Unmanned Aircraft Systems into the National Airspace System Issues, Challenges, Operational Restrictions, Certification, and Recommendations

Springer Science & Business Media This book presents, in a comprehensive way, current unmanned aviation regulation, airworthiness certification, special aircraft categories, pilot certification, federal aviation requirements, operation rules, airspace classes and regulation development models. It discusses unmanned aircraft systems levels of safety derived mathematically based on the corresponding levels for manned aviation. It provides an overview of the history and current status of UAS airworthiness and operational regulation worldwide. Existing regulations have been developed considering the need for a complete regulatory framework for UAS. It focuses on UAS safety assessment and functional requirements, achieved in terms of defining an "Equivalent Level of Safety", or ELOS, with that of manned aviation, specifying what the ELOS requirement entails for UAS regulations. To accomplish this, the safety performance of manned aviation is first evaluated, followed by a novel model to derive reliability requirements for achieving target levels of safety (TLS) for ground impact and mid-air collision accidents. It discusses elements of a viable roadmap leading to UAS integration in to the NAS. For this second edition of the book almost all chapters include major updates and corrections. There is also a new appendix chapter.

The Automotive Chassis

Volume 2: System Design

Springer Science & Business Media This work serves as a reference concerning the automotive chassis, i.e. everything that is inside a vehicle except the engine and the body. It is the result of a decade of work mostly done by the FIAT group, who supplied material, together with other automotive companies, and sponsored the work. The first volume deals with the design of automotive components and the second volume treats the various aspects of the design of a vehicle as a system.

The Heinemann English Wordbuilder

City of Quartz

Excavating the Future in Los Angeles

Verso Books This new edition of the visionary social history of Los Angeles is “as central to the L.A. canon as anything that . . . Joan Didion wrote in the seventies” (New Yorker) No metropolis has been more loved or more hated. To its official boosters, “Los Angeles brings it all together.” To detractors, L.A. is a sunlit mortuary where “you can rot without feeling it.” To Mike Davis, the author of this fiercely elegant and wide-ranging work of social history, Los Angeles is both utopia and dystopia, a place where the last Joshua trees are being plowed under to make room for model communities in the desert, where the rich have hired their own police to fend off street gangs, as well as armed Beirut militias. In *City of Quartz*, Davis reconstructs L.A.’s shadow history and dissects its ethereal economy. He tells us who has the power and how they hold on to it. He gives us a city of Dickensian extremes, Pynchonesque conspiracies, and a desperation straight out of Nathaniel West—a city in which we may glimpse our own future mirrored with terrifying clarity. In this new edition, Davis provides a dazzling update on the city’s current status.

The Fast

Nonfiction. This is the first of four early journals, written in 1970 (*THE FAST*); in 1971, (*COUNTRY GIRL*); in 1972, (*PICTURES AND EARLY WORDS*); in 1973, (*BIG WORDS*). These journals depict the development of the clairvoyance from feeling and seeing auras, to seeing pictures, and finally the slow development of seeing words which first appeared singly, then later in short phrases. The culmination of this seeing of words resulted in the *CLAIRVOYANT JOURNAL*, written in 1974, and published by Angel Hair Books, now known as United Artists Books, in 1978, and in many books that followed.

Book of Shadows

The Gardnerian Book of Shadows

CreateSpace A *Book of Shadows* is a book containing religious texts and instructions for magical rituals found within the Neo-pagan religion of Wicca. The first *Book of Shadows* was created by Gerald B. Gardner, (an author as well as an amateur archaeologist and anthropologist), in the late 1940's or early 1950's, which he used in his Bricket Wood coven and then in later covens which he founded. The concept was adopted by other traditions. The current *Book of Shadows* is a compilation of manuscripts found in his museum after his death.

Revelations Tarot

The Ultimate Solution to Tarot Reversals Whether you're new to divination or an experienced professional, working with reversed Tarot cards is always a challenge. After all, the image is upside-down and everything appears, well, reversed. How can you possibly work with such inverted symbols? Zach Wong has come up with the ultimate solution. He presents different symbolism on the bottom part of the card, so it appears upright when the card is inverted. This is like having a 156-card deck while only using 78 cards. There is much more to this deck than just ease with reading reversals. All of the characters wear masks. This shows them to be similar to mythical deities who assume human form and stand among us to make their spiritual messages easier for us to understand. Similarly, they make the message of the cards easier to comprehend. These cards, with their stained glass imagery, match the traditional RWS interpretations. Wong, however, has added his own twists that energize and add additional meaning to the RWS concepts. You can bring these additional insights into your divinations with any Tarot. This is a beautiful, unique, and powerful deck that matches and expands upon traditional Tarot ideas. The new realizations and revelations you'll get when you use this deck for divination or meditation validate the name and give another reason for you to use this deck regularly. Ideal for meditation, study, and divination, treat this deck as something special...because it is!

Unmanned Aircraft Systems

UAVS Design, Development and Deployment

Wiley Unmanned Aircraft Systems delivers a much needed introduction to UAV System technology, taking an integrated approach that avoids compartmentalising the subject. Arranged in four sections, parts 1-3 examine the way in which various engineering disciplines affect the design, development and deployment of UAS. The fourth section assesses the future challenges and opportunities of UAS. Technological innovation and increasingly diverse applications are two key drivers of the rapid expansion of UAS technology. The global defence budget for UAS procurement is expanding, and in the future the market for civilian UAVs is expected to outmatch that of the military. Agriculture, meteorology, conservation and border control are just a few of the diverse areas in which UAVs are making a significant impact; the author addresses all of these applications, looking at the roles and technology behind both fixed wing and rotorcraft UAVs. Leading aeronautical consultant Reg Austin co-founded the Bristol International Remotely Piloted Vehicle (RPV) conferences in 1979, which are now the longest-established UAS conferences worldwide. In addition, Austin has over 40 years' experience in the design and development of UAS. One of Austin's programmes, the "Sprite UAV System" has been deployed around the world and operated by day and night, in all weathers.
