Bodies Across Borders

The Global Circulation of Body Parts, Medical Tourists and Professionals

Routledge Historically organised at a local or national scale, the fields of medicine and healthcare are being radically transformed by new communication, transport and biotechnologies creating, in the process, a genuinely globalised sphere of biomedical production and consumption. This emerging market is characterised by the circulation of bodily materials (tissues, organs and bio-information), patients and expertise across what traditionally have been relatively secure ontological and geographical borders. Crossing both disciplinary and geographical boundaries, this volume draws together a number of important contributions from acknowledged leaders in three respective fields: the trade in bodily commodities, biomedical tourism and migration of health care professionals. It explores and maps out the key characteristics of this emerging, although as yet poorly researched global trade, questioning how, where and why bodies cross borders, whether this exacerbates existing health inequalities and how these circulations impact on healthcare services. Considered together, the chapters in this volume invite comparisons of the ways in which body parts, patients and medical professionals cross national borders, elucidating common themes, concerns and issues. Contributors also pose important questions about the ethical and legal implications of the circulation of bodies across borders and evaluate current and future strategies for regulation.

Global Migration, Gender, and Health Professional Credentials

Transnational Value Transfers and Losses

University of Toronto Press Bringing together diverse approaches and case studies of international health worker migration, *Global Migration, Gender, and Health Professional Credentials* critically reimagines how we conceptualize the transfer of value embodied in internationally educated health professionals (IEHPs). This volume provides key insights into the economic and feminist concepts of global value transmission, the complexity of health worker migration, and the gendered and intersectional intricacies involved in the workplace integration of immigrant health care workers. The contributions to this edited collection uncover the multitude of actors who play a role in creating, transmitting, transforming, and utilizing the value embedded in international health migrants.

Medical Dictionary for Travellers

CreateSpace This English-Croatian dictionary is created to serve to frequent travellers and tourists disposed to any kind of danger or health risk, and therefore in the need of medical assistance, while in some foreign speaking country. The audience for this dictionary also includes medical professionals working in multilingual environments, global health professionals in tourist areas, professionals in public health, humanitarian medicine, emergency disaster management and rescue teams. In emergency situations even small misunderstandings can lead to the loss of valuable time and consequently lives, therefore this dictionary is created in very practical time-saving and easy-to-understand way for both medical professionals and their patients. Instead of one classical A to Z alphabetical order, it consists of several topics where terms regarding each topic are organized alphabetically. The topics start from very basic subjects of numbers and orientation and proceed with terminology concerning accidents and disasters, parts of the human body, injuries, symptoms and diseases, pharmacy, medical facilities, medical procedures, diagnostics, pregnancy and obstetrics. Consisting of over 3000 medical terms, this dictionary is a valuable tool for medical students on exchange programs and can serve as a basic medical dictionary for translators.

Philosophical Foundations of Medical Law

Oxford University Press, USA With advances in personalised medicine, the field of medical law is being challenged and transformed. The nature of the doctor-patient relationship is shifting as patients simultaneously become consumers. The regulation of emerging technologies is being thrown into question, and we face new challenges in the context of global pandemics. This volume identifies significant questions and issues underlying the philosophy of medical law. It brings together leading philosophers, legal theorists, and medical specialists to discuss these questions in two parts. The first part deals with key foundational theories, and the second addresses a variety of topical issues, including euthanasia, abortion, and medical privacy. The wide range of perspectives and topics on offer provide a vital introduction to the philosophical underpinnings of medical law.

Medical Tourism

The Ethics, Regulation, and Marketing of Health Mobility

Routledge Although spas and improved well-being have long been part of the tourist experience, health tourism now includes travel for medical purposes ranging from cosmetic and dental surgery through to transplants and infertility treatment. Drawing on a range of theoretical and methodological perspectives, this book is one of the first to critically address the substantial political, philosophical and ethical issues that arise out of the transnational practices of medical tourism. Through a series of chapters the book engages with key issues such as the role of regulatory and policy structures in influencing medical and health tourism related mobilities. Through a series of chapters the book engages with key issues such as the role of regulatory and policy structures in influencing medical and health tourism related mobilities. These issues are investigated by considering range of developing and developed countries, medical systems and health economic perspectives. The book adopts a multi-layered perspective to not only investigate the business and marketing practices of medical and health tourism but places these within a broader framework of contemporary globalisation, policy and practice.

Interpreting Professional Self-regulation

A History of the United Kingdom Central Council for Nursing, Midwifery and Health Visiting

Psychology Press Interpreting Professional Self-Regulation analyses the contribution made by the UKCC to the development of the nursing profession in this country over the last 30 years. It details the key issues the council grappled with during this time and provides in-depth analyses of the complexity of these issues. There is a general consensus that the current view of nursing's regulatory body will culminate in a major shake up of the way the nursing profession is governed and in which the UKCC will be radically transformed. This publication of the history of the UKCC will mark the close of a very significant period in nursing's history and the opening of wider debates about ensuring the safety of the public through regulation of health professionals. This is an important text for all those who teach on professional and policy issues in nursing, giving them a factual background that has never been brought together before, enabling them to bring discussion of post-registration education, discipline and other professional matters more firmly into the curriculum.

Medical Tourism

CABI Medical Tourism John Connell Although it may seem a recent phenomenon, tourism has long been associated with improved health, resulting in a boom of spas, yoga and rejuvenation treatments. Medical tourism is a more recent example of niche tourism, with increasing numbers of people travelling abroad in search of cosmetic enhancement and solutions to various serious medical conditions, often through surgery. This book looks at the background and rise of both health and medical tourism, alongside its global expansion and growing complexity, and examines how medical tourism benefits but also challenges local healthcare providers, and contributes to regional economies and the tourism industry. It offers a unique overview of an emerging component of the tourist industry that is a distinct and controversial element of health provision. The book also provides insights into current topics such as global health and ethics, making this an essential resource for researchers and students of medical tourism and healthcare.

Transplant Tourism

An International and National Law Model to Prohibit Travelling Abroad for Illegal Organ Transplants

BRILL This book explores the role that international and national laws must play in the prohibition and eradication of transplant tourism and proposes a three-stage legal model for the prohibition of the practices. Through the examination of international law norms, principles and instruments; laws and policies from several legal systems; and legal frameworks and models which currently prohibit a number of national, transnational and international offences, this publication focuses on the creation of a comprehensive soft law instrument on transplant tourism, a treaty on transplant tourism and unified national transplant tourism laws with extraterritorial application in accordance with the principles and spirit of the international law instruments.

Dictionary of Medical Emergencies / Dictionnaire Des Urgences Medicales

English - French Anglais - Francais

Createspace Independent Publishing Platform The audience for this dictionary includes medical professionals working in multilingual environments; global health professionals in tourist areas; professionals in public health, humanitarian medicine, emergency disaster management, rescue teams and above all, frequent travellers disposed to any kind of danger or health risk and therefore in the need of medical assistance while in some foreign speaking country. In emergency situations even small misunderstandings can lead to the loss of valuable time and consequently lives, therefore this English-French dictionary is created in very practical time-saving and easy-to-understand way for both medical professionals and their patients. Instead of one classical A to Z alphabetical order, it consists of over 3000 medical terms divided to several topics where terms regarding each topic are organized alphabetically. The topics start from very basic subjects of numbers and orientation and proceed with terminology concerning accidents and disasters, parts of the human body, injuries, symptoms and diseases, pharmacy, medical facilities, medical procedures, diagnostics, pregnancy and obstetrics.
