Beyond the Cyborg

Adventures with Donna Haraway

Columbia University Press Feminist theorist and philosopher Donna Haraway has substantially impacted thought on science, cyberculture, the environment, animals, and social relations. This long-overdue volume explores her influence on feminist theory and philosophy, paying particular attention to her more recent work on companion species, rather than her "Manifesto for Cyborgs." Margret Grebowicz and Helen Merrick argue that the ongoing fascination with, and re-production of, the cyborg has overshadowed Haraway's extensive body of work in ways that run counter to her own transdisciplinary practices. Sparked by their own personal "adventures" with Haraway's work, the authors offer readings of her texts framed by a series of theoretical and political perspectives: feminist materialism, standpoint epistemology, radical democratic theory, queer theory, and even science fiction. They situate Haraway's critical storytelling and "risky reading" practices as forms of feminist methodology and recognize her passionate engagement with "naturecultures" as the theoretical core driving her work. Chapters situate Haraway as critic, theorist, biologist, feminist, historian, and humorist, exploring the full range of her identities and reflecting her commitment to embodying all of these modes simultaneously.

Perform, Repeat, Record

Live Art in History

Intellect Books Bringing together contributors from dance, theatre, visual studies and art history, *Perform, Repeat, Record* addresses the conundrum of how live art is positioned within history. Set apart from other art forms in that it may never be performed in precisely the same way twice, ephemeral artwork exists both at the time of its staging and long after in the memories of its spectators and their testimonies, as well as in material objects, visual media and text. These multiple occurrences and iterations offer new critical possibilities for thinking and writing the histories of performance. Among the artists, theorists and historians who contributed to this volume are Marina Abramovic, Guillermo Gómez-Peña, Rebecca Schneider, Boris Groys, Jane Blocker, Carolee Schneemann, Tehching Hsieh, Orlan, Tilda Swinton and Jean-Luc Nancy.

Artificial Intelligence and Machine Learning for COVID-19

Springer Nature This book is dedicated to addressing the major challenges in fighting COVID-19 using artificial intelligence (AI) and machine learning (ML) - from cost and complexity to availability and accuracy. The aim of this book is to focus on both the design and implementation of AI-based approaches in proposed COVID-19 solutions that are enabled and supported by sensor networks, cloud computing, and 5G and beyond. This book presents research that contributes to the application of ML techniques to the problem of computer communication-assisted diagnosis of COVID-19 and similar diseases. The authors present the latest theoretical developments, real-world applications, and future perspectives on this topic. This book brings together a broad multidisciplinary community, aiming to integrate ideas, theories, models, and techniques from across different disciplines on intelligent solutions/systems, and to inform how cognitive systems in Next Generation Networks (NGN) should be designed, developed, and evaluated while exchanging and processing critical health information. Targeted readers are from varying disciplines who are interested in implementing the smart planet/environments vision via wireless/wired enabling technologies.

Performing Remains

Art and War in Times of Theatrical Reenactment

Routledge 'At last, the past has arrived! *Performing Remains* is Rebecca Schneider's authoritative statement on a major topic of interest to the field of theatre and performance studies. It extends and consolidates her pioneering contributions to the field through its interdisciplinary method, vivid writing, and stimulating polemic. *Performing Remains* has been eagerly awaited, and will be appreciated now and in the future for its rigorous investigations into the aesthetic and political potential of reenactments.' - Tavia Nyong'o, Tisch School of the Arts, New York University 'I have often wondered where the big, important, paradigm-changing book about re-enactment is: Schneider's book seems to me to be that book. Her work is challenging, thoughtful and innovative and will set the agenda for study in a number of areas for the next decade.' - Jerome de Groot, University of Manchester *Performing Remains* is a dazzling new study exploring the role of the fake, the false and the faux in contemporary performance. Rebecca Schneider argues passionately that performance can be engaged as what remains, rather than what disappears. Across seven essays, Schneider presents a forensic and unique examination of both contemporary and historical performance, drawing on a variety of elucidating sources including the "America" plays of Linda Musmann and Suzan-Lori Parks, performances of Marina Abramovic' and Allison Smith, and the continued popular appeal of Civil War reenactments. *Performing Remains* questions the importance of representation throughout history and today, while boldly reassessing the ritual value of failure to recapture the past and recreate the "original."

Performativity in the Gallery

Staging Interactive Encounters

Peter Lang Pub Incorporated This book coincides with an increase in the programming of live art elements in many galleries and museums. Traditional art history has, however, been wary of live art's interdisciplinarity and its tendency to encourage increased formal and conceptual risk taking. Time-based performances have challenged the conventions of documentation and the viewer's access to the art experience. This book questions the canon of art history by exploring participation, liveness, interactivity, digital and process-based performative practices and performance for the camera, as presented in gallery spaces.
 The essays present both academic research as well as case studies of curatorial projects that have pushed the boundaries of the art historical practice. The authors come from a wide range of backgrounds, ranging from curators and art producers to academics and practising artists. They ask what it means to present, curate and create interdisciplinary performative work for gallery spaces and offer cutting-edge research that explores the intricate relationship between art history, live and performing arts, and museum and gallery space.

The Politics of Total Liberation

Revolution for the 21st Century

Palgrave Macmillan This book argues that there is an ongoing planetary crisis, in both the social and natural worlds, that is of urgent importance. This demands a new politics, a politics of total liberation, one that grasps the need to unite the disparate movements for human, animal, and earth liberation. In the book, Best outlines a way forward despite challenges.

Spanish Republic and the Civil War, 1931-1939

Princeton University Press At the time of its occurrence, the Spanish Civil War epitomized for the Western world the confrontation of democracy, fascism, and communism. An entire generation of Englishmen and Americans felt a deeper emotional involvement in that war than in any other world event of their lifetimes, including the Second World War. On the Continent, its "lessons," as interpreted by participants of many nationalities, have played an important role in the politics of both Western Europe and the People's Democracies. Everywhere in the Western world, readers of history have noted parallels between the Spanish Republic of 1931 and the revolutionary governments which existed in France and Central Europe during the year 1848. The Austrian revolt of October 1934, reminded participants and observers alike of the Paris Commune of 1871, and even the most politically unsophisticated observers could see in the Spain of 1936 all the ideological and class conflicts which had characterized revolutionary France of 1789 and revolutionary Russia of 1917. It is not surprising, therefore, that the worthwhile books on the Spanish Civil War have almost all emphasized its international ramifications and have discussed its political crises entirely in the vocabulary of the French and Russian revolutions. Relatively few of the foreign participants realized that the Civil War had arisen out of specifically Spanish circumstances. Few of them knew the history of the Second Spanish Republic, which for five years prior to the war had been grappling with the problems of what we now call an "underdeveloped nation." In *Spanish Republic and the Civil War*, Gabriel Jackson expounds the history of the Second Republic and the Civil War primarily as seen from within Spain.

The 33

Clipper Audio The miraculous survival and dramatic rescue of the Chilean miners On 12 October 2010 the world's attention was fixed on a remote Chilean mine. Final preparations were underway for a daring rescue to end the longest underground entrapment in human history. Learn how 33 trapped men and the rescuers dedicated to saving them created a miracle in the desert. What those men experienced in the claustrophobic dark of the mine, and how their families kept faith, make this an unforgettable story. As the only print journalist with full access to the rescue efforts, Jonathan Franklin takes us deep into the collapsed mine, and behind the scenes of the rescue effort.

The World According To Pimm: A Scientist Audits the Earth

McGraw Hill Professional Take a globe-circling tour of our endangered planet with conservation biologist Stuart Pimm who is taking stock and keeping score. We use 50 percent of the world's freshwater supply. We consume 42 percent of the world's plant growth. We are liquidating animals and plants 100 times faster than the natural rate of extinction. Such numbers should make it clear that the human impact on our planet has been, and continues to be, extreme and detrimental. Yet even after decades of awareness of our environmental peril, there remains passionate disagreement over what the problems are and how they should be remedied. Much of the impasse stems from the fact that the problems are difficult to quantify. How do we assess the impact of habitat loss on various species, when we haven't even counted them all? And just what factors go into that 42 percent of biomass we are hungrily consuming? It is only through an understanding of the numbers that we will be able to break that impasse and come to agreement. Working on the front lines of conservation biology, Stuart Pimm is one of the pioneers whose work has put the "science" in environmental science. In this book, he appoints himself "investment banker of the global, biological accounts," checking the numbers gathered by tireless scientists in work that is always painstaking and often heartbreaking. Pimm explains the numerical results in lucid prose. With wit, passion, and candor, he reveals the importance of understanding where those numbers come from and what they mean. To do so, he takes the reader on a globe-circling tour of our beautiful, but weary, planet. With Pimm as our indomitable guide, we travel from the volcanic mountains and rainforests of Hawaii to the boreal forests of Siberia. We see a blue whale off the Pacific coast of Mexico, where the blue oceans are slowly turning to barren deserts. We go birdwatching high up in the leafy canopy of the Amazon, from which we can see the hundreds of smoke plumes busily working at deforestation. At times, the view looks rather grim. But Pimm is no Cassandra; he never preaches or scolds. Ever optimistic, this book presents a world filled with mysterious beauty, the infinite variety of nature, and an urgent hope that through an understanding of our planet's environmental past and present, we will be inspired to save it from future extinction. "[T]his book is unashamedly optimistic. It is a celebration of our spectacular and fascinating world. I have made no attempt to restrain my joy as I encounter its natural history and its peoples. By the time you read the Epilogue you will know that our world is not doomed, it is not fatally wounded, but neither is it healthy. It needs attention. . . ." Stuart Pimm, from the Prologue
