MAD POLITICS

Simon and Schuster If the definition of insanity is doing the same thing over and over and expecting a different result, America has

been insane for decades. We've elected establishment politicians on both sides of the aisle; we've hoped for change; and we've been disappointed. But with the election of Donald Trump, America tried something new. So we have to ask ourselves: what if Trump isn't the crazy man that the media pretends he is? What if he's actually the cure for a country who's been going mad for years? In *Mad Politics*, Fox News commentator, radio host, and psychological analyst Dr. Gina Loudon diagnoses the problem with America's status quo politics. Loudon has unique insight into both the Trump campaign and the larger political landscape as a member of the president's 2020 media advisory board, a former surrogate for his campaign, the wife of a former Senator from Missouri, the co-host of a national Television show, a seasoned psychological analyst on FOX News, CNN and others, and a twice pedigreed Master and Ph.D. With authority and wit, *Mad Politics* exposes cultural patterns that have led to today's political narcissism. She scans the psychological literature and illuminates a formula to answer the question: How can we restore a sound mind to the body politic? The answer, Loudon concludes, may be in joining Trump in a complete rejection of political correctness.

Alan Cooper is the founder of Cooper Interaction Design, a consulting firm that develops interactive product designs for hightech companies. Computer technology is embedded within almost every product that is manufactured. Yet all too often, these "newandimproved" products are hard to use because the engineers who are developing the interface between the user and the machine don't think like the average manonthestreet who knows.

SUMMARY: THE INMATES ARE RUNNING THE ASYLUM

REVIEW AND ANALYSIS OF COOPER'S BOOK

Primento The must-read summary of Alan Cooper's book: "The Inmates Are Running the Asylum: Why High-Tech Products Drive Us Crazy and How to Restore the Sanity". This complete summary of the ideas from Alan Cooper's book "The Inmates Are Running the Asylum" shows that computer technology is embedded within almost every product that is manufactured. Yet all too often, these "new-and-improved" products are hard to use because the engineers who are developing the interface between the user and the machine don't think like the average man-on-the-street who knows nothing about technology. Therefore, the situation effectively becomes the equivalent of letting the inmates run the asylum in which they are incarcerated. Better products need to be developed that work in the same way that average people think. Only then will new products deliver on their implied promise of enhancing the quality of life for their users. According to Alan Cooper, designers who are skilled in this specific field should be responsible for designing the interface between the user and the machine. This summary asserts that the goal of computer usage should be "not to make anyone feel stupid". Added-value of this summary: • Save time • Understand the key concepts • Increase your business knowledge To learn more, read "The Inmates Are Running the Asylum" and rethink entrenched priorities in software planning.

REFLECTIONS OF A MAD, MAD WORLD

(INCRIMINATING COMMENTARY ON THE INSANITY OF LIFE ON EARTH)

AuthorHouse TRILOGY BOOK FOUR includes three recent books from my twenty years of writing. Being a philosophical book-writer, dealing with world-view and value systems, I get to take time doing something that is considered the work of men of leisure. While it

may not be the toughest of jobs, I assure you that most days I am worn out from just thinking about it. And can I conclude anything yet? Sometimes I think I am going in reverse! Reflections of a Mad, Mad World is the title of the book, and it is the headline work followed by two more books, Remaking Michael and Forty Songs. All three were written with you (the reader and fellow life-mate) in mind. If you wonder about the madness and chaos that in the world today, and what you can do about it, maybe you will benefit from reading Reflections of a Mad, Mad World (Book One). This work addresses the nutty, whacky world in which we live, and suggests ways to cope. If you are trying to turn over a new leaf, and need some insight and direction, then Remaking Michael (Book Two) might be for you. In my personal travels through life, I have been remade over and over again its fun! There are always two sides to every coin. My book, Forty Songs, takes on 20 negative points of view, and counterbalances them with 20 more points that are positive. You be the judge as you weigh the evidence when the matter of Life itself is placed on trial. I am hopeful that this three-books-in-one volume will be rewarding and beneficial for you. On my web site, HowISeeTheWorld.com, questions and answers about Life that continue to crop up in the human mind are addressed. Come to the site and see what I am talking about!

THE MADHOUSE EFFECT

HOW CLIMATE CHANGE DENIAL IS THREATENING OUR PLANET, DESTROYING OUR POLITICS, AND DRIVING US CRAZY

Columbia University Press The award-winning climate scientist Michael E. Mann and the Pulitzer Prize-winning political cartoonist Tom Toles have been on the front lines of the fight against climate denialism for most of their careers. They have witnessed the manipulation of the media by business and political interests and the unconscionable play to partisanship on issues that affect the well-being of billions. The lessons they have learned have been invaluable, inspiring this brilliant, colorful escape hatch from the madhouse of the climate wars. The Madhouse Effect portrays the intellectual pretzels into which denialists must twist logic to explain away the clear evidence that human activity has changed Earth's climate. Toles's cartoons collapse counter-scientific strategies into their biased components, helping readers see how to best strike at these fallacies. Mann's expert skills at science communication aim to restore sanity to a debate that continues to rage against widely acknowledged scientific consensus. The synergy of these two climate science crusaders enlivens the gloom and doom of so many climate-themed books—and may even convert die-hard doubters to the side of sound science.

TALKING TO 'CRAZY'

HOW TO DEAL WITH THE IRRATIONAL AND IMPOSSIBLE PEOPLE IN YOUR LIFE

AMACOM “[Goulston’s]ideas are a bit counter-intuitive but they really do shift the dynamic and help people diffuse and disarm the irrational person leading to more positive outcomes.” -- Online MBA Because some people are beyond difficult... Let’s face it, we all know people who are irrational. No matter how hard you try to reason with them, it never works. So what’s the solution? How do you talk to someone who’s out of control? What can you do with a boss who bullies, a spouse who yells, or a friend who frequently bursts into tears? In his book, Just Listen, Mark Goulston shared his bestselling formula for getting through to the resistant people in your life. Now, in his breakthrough new book Talking to Crazy, he brings his communication magic to the most difficult group of all—the downright irrational. As a psychiatrist, Goulston has seen his share of crazy and he knows from experience that you can’t simply argue it away. The key to handling irrational people is to learn to lean into the crazy—to empathize with it. That radically changes the dynamic and transforms you from a threat into an ally. Talking to Crazy explains this counterintuitive Sanity Cycle and reveals: Why people act the way they do • How instinctive responses can exacerbate the situation—and what to do instead • When to confront a

problem and when to walk away • How to use a range of proven techniques including Time Travel, the Fish-bowl, and the Belly Roll • And much more You can't reason with unreasonable people—but you can reach them. This powerful and practical book shows you how.

ENLIGHTENMENT 2.0

Harper Collins The co-author of the internationally bestselling *The Rebel Sell* brings us "slow politics": promoting slow thought, slow deliberation and slow debate. Over the last twenty years, the political systems of the western world have become increasingly divided--not between right and left but between crazy and non-crazy. What's more, the crazies seem to be gaining the upper hand. Rational thought cannot prevail in the current social and media environment, where elections are won by appealing to voters' hearts rather than their minds. The rapid-fire pace of modern politics, the hypnotic repetition of daily news items and even the multitude of visual sources of information all make it difficult for the voice of reason to be heard. In *Enlightenment 2.0*, bestselling author Joseph Heath outlines a program for a second Enlightenment. The answer, he argues, lies in a new "slow politics." It takes as its point of departure recent psychological and philosophical research that identifies quite clearly the social and environmental preconditions for the exercise of rational thought. It is impossible to restore sanity merely by being sane and trying to speak in a reasonable tone of voice. The only way to restore sanity is by engaging in collective action against the social conditions that have crowded it out.

OUT OF THE MADHOUSE

FROM ASYLUMS TO CARING COMMUNITY?

Australian Scholarly Publishing 2020 Victorian Community History Award Winner Larundel Psychiatric Hospital was ‘the madhouse on the edge of town’ - until the 1990s, a Melbourne cultural icon shrouded in mystery in the outer suburb of Bundoora. What was it really like inside this madhouse? This story takes us into the heart of Larundel through the voices of former inmates and staff, exposing the best and worst aspects of the mental institutions of the times. It shows the shifts in psychiatric treatments, the social forces at play, and changes driving mental health policy. It explores what de-institutionalisation and ‘care in the community’ actually meant for those suffering mental illness, as well as for those treating, and caring for them. What did we lose with Larundel’s closure in 1999 and the move to acute psychiatric wards in general hospitals? The notion of asylum? Is the more recent notion of ‘recovery’ a hopeful signpost towards a brave new world for mental health? The authors are Sandy Jeffs, a former inmate of Larundel, who became an advocate for her ‘mad’ comrades and is now a poet of distinction; and Margaret Leggatt, sociologist, occupational therapist and activist for the friends and families of mentally ill people. ‘A significant and lively contribution to the history of mental health services in Australia, offering vital insights for the progress we must work for.’ – Jack Heath, CEO, SANE Australia

DATA-DRIVEN PERSONAS

Springer Nature Data-driven personas are a significant advancement in the fields of human-centered informatics and human-computer interaction. Data-driven personas enhance user understanding by combining the empathy inherent with personas with the rationality inherent in analytics using computational methods. Via the employment of these computational methods, the data-driven persona method permits the use of large-scale user data, which is a novel advancement in persona creation. A common approach for increasing stakeholder engagement about audiences, customers, or users, persona creation remained relatively unchanged for several decades. However, the availability of digital user data, data science algorithms, and easy access to analytics platforms provide avenues and opportunities to enhance personas from often sketchy representations of user segments to precise, actionable, interactive decision-making tools—data-driven personas! Using the data-driven approach, the persona profile can serve as an interface to a fully functional analytics system that can present user representation at various levels of information granularity for more task-aligned user insights. We trace the techniques that have enabled the development of data-driven personas and then conceptually frame how one can leverage data-driven personas as tools for both empathizing with and understanding of users. Presenting a conceptual framework consisting of (a) persona benefits, (b) analytics benefits, and (c) decision-making outcomes, we illustrate applying this framework via practical use cases in areas of system design, digital marketing, and content creation to demonstrate the application of data-driven personas in practical applied situations. We then present an overview of a fully functional data-driven persona system as an example of multi-level information aggregation needed for decision making about users. We demonstrate that data-driven personas systems can provide critical, empathetic, and user understanding functionalities for anyone needing such insights.

A COMPANION TO PLAUTUS

John Wiley & Sons An important addition to contemporary scholarship on Plautus and Plautine comedy, provides new essays and fresh insights from leading scholars A Companion to Plautus is a collection of original essays on the celebrated Old Latin period playwright. A brilliant comic poet, Plautus moved beyond writing Latin versions of Greek plays to create a uniquely Roman cultural experience worthy of contemporary scholarship. Contributions by a team of international scholars explore the theatrical background of Roman comedy, the theory and practice of Plautus' dramatic composition, the relation of Plautus' works to Roman social history, and

his influence on later dramatists through the centuries. Responding to renewed modern interest in Plautine studies, the Companion reassesses Plautus' works—plays that are meant to be viewed and experienced—to reveal new meaning and contemporary relevance.
