MASTERING SYSTEM IDENTIFICATION IN 100 EXERCISES

John Wiley & Sons This book enables readers to understand system identification and linear system modeling through 100 practical exercises without requiring complex theoretical knowledge. The contents encompass state-of-the-art system identification methods, with both time and frequency domain system identification methods covered, including the pros and cons of each. Each chapter features MATLAB exercises, discussions of the exercises, accompanying MATLAB downloads, and larger projects that serve as potential assignments in this learn-by-doing resource.

MASTERING NEGOTIABLE INSTRUMENTS (UCC ARTICLES 3 AND 4) AND OTHER PAYMENT SYSTEMS

Mastering Negotiable Instruments (UCC Articles 3 and 4) and Other Payment Systems explains the essential concepts in the law governing payment systems. The book focuses primarily on the prototypical payment systems that for centuries have used negotiable instruments: notes, checks, and other types of drafts. It explores the rules and mechanisms that regulate transactions in negotiable instruments from issue to collection. Study of the rules starts with UCC Article 3 (governing negotiable instruments generally) and Article 4 (governing check collection), but also requires consideration of federal statutes such as the Expedited Funds Availability Act, the new Check Clearing for the 21st Century Act, and related federal regulations. The book also explores the largely federal law governing newer payment systems that have evolved from negotiable instruments, such as credit cards and debit cards. This book is part of the Carolina Academic Press Mastering Series edited by Russell L. Weaver, University of Louisville School of Law.

MASTERING KDE

A BEGINNER'S GUIDE

CRC Press Mastering KDE helps the reader master the KDE desktop environment for a faster and more robust computing experience. The best thing about Linux is the plethora of choices that users tend to have. Whether it pertains to the kernel modules, or to the desktop environments, there is no shortage of options. Speaking of desktop environments, KDE stands tall as one of the leading options. KDE stands for K Desktop Environment, an open source desktop working platform featuring a graphical user interface (GUI). When KDE was first introduced, it was known as the Kool desktop environment, later renamed KDE. The KDE GUI includes everything a typical user would require, such as a file manager, window manager, help tool, and system settings. KDE is the default desktop environment for various Linux distros, and also has its own flagship distro, KDE Neon, that is covered at length in Mastering KDE. KDE comes with features that give users remote access to other devices, such as computers running Windows, Linux, macOS, or Android smartphones. KDE Connect, a Linux-based application, is one such solution that allows users to transfer data between multiple devices and operate them remotely. This book talks about everyday usage of KDE, including remote access and KDE development. With Mastering KDE, using KDE for day-to-day computing becomes simple and straightforward, which will undoubtedly help readers boost their productivity. The Mastering Computer Science series is edited by Sufyan bin Uzayr, a writer and educator with over a decade of experience in the computing field.

STRATEGY

NAVIGATING THE COMPLEXITY OF THE NEW WORLD

[Campus Verlag](#) This book describes Malik's strategic solutions for the Revolutions of the New World, which are already underway. They are part of the Great Transformation 21 which the author will address in the book. In the six parts of this book, he will first look at the dynamics of the Great Transformation 21, its inherent risks of crisis and its opportunities, as well as the labor pains that the New World is suffering. After that, he will deal with the amazingly effective cybernetic systems for strategic navigation and the strategy maps required for that, as well as the empirical quantification of businesses, both existing and yet unknown, which will help break the new territory of innovation. Finally, Malik will reveal the patterns that the tidal currents of great transformations invariably follow, as well as the economic dynamics resulting from them and the strategies required to deal with them. In the last part of the book he will describe the revolutionary new methods that enable us to master groundbreaking strategic change with great precision and unprecedented time compression - at the "speed of light", so to speak. This way, even enormous corporate growth and size can be managed and turned into true strengths, with perfect ease and using innovative approaches where conventional approaches have proven useless.
