### Stalin's Wars

### From World War to Cold War, 1939-1953

Yale University Press This breakthrough book provides a detailed reconstruction of Stalin's leadership from the outbreak of the Second World War in 1939 to his death in 1953. Making use of a wealth of new material from Russian archives, Geoffrey Roberts challenges a long list of standard perceptions of Stalin: his qualities as a leader; his relationships with his own generals and with other great world leaders; his foreign policy; and his role in instigating the Cold War. While frankly exploring the full extent of Stalin's brutalities and their impact on the Soviet people, Roberts also uncovers evidence leading to the stunning conclusion that Stalin was both the greatest military leader of the twentieth century and a remarkable politician who sought to avoid the Cold War and establish a long-term detente with the capitalist world. By means of an integrated military, political, and diplomatic narrative, the author draws a sustained and compelling personal portrait of the Soviet leader. The resulting picture is fascinating and contradictory, and it will inevitably change the way we understand Stalin and his place in history. Roberts depicts a despot who helped save the world for democracy, a personal charmer who disciplined mercilessly, a utopian ideologue who could be a practical realist, and a warlord who undertook the role of architect of post-war peace.

### The Best Laid Plans

### The Origins of American Multilateralism and the Dawn of the Cold War

Rowman & Littlefield Publishers The long-standing, but unresolved debate of the virtues and values of multilateralism vs. unilateralism in American foreign policy is critically important in today's complicated world. To understand the history of each approach is to understand their opportunities and challenges for the future. The Best Laid Plans answers two central questions. First, why did the United States embrace the principles and practices of liberal multilateralism during World War II? Second, why did it cling to this vision of world order despite the outbreak of the Cold War in the late 1940s, as the 'One World' that had been anticipated by U.S. postwar planners split into two rival global camps?

The book contends that neither the U.S. turn to liberal multilateralism nor the persistence of this orientation during the Cold War can be attributed solely or even primarily to the global power structure or crude considerations of material self interest. Rather, Stewart Patrick argues that a combination of enduring identity commitments and new ideas, based on the lessons of recent, cataclysmic events, shaped the policy preferences of American central decision-makers in the Roosevelt and Truman administrations. Although the book is steeped in history, its conclusions have tremendous relevance for the contemporary era, when the United States once again finds itself at the apex of world power, and debates are rife about the role of multilateral cooperation in the realization of U.S. foreign policy objectives.

Taylor & Francis This is the first study to present a comprehensive analysis of Greek foreign and internal policy during the Cold War, covering the key period from the country's accession to NATO in 1952 until the imposition of the colonels' dictatorship in 1967. Clearly divided into three parts: 1952-55, 1955-63 and 1963-67, this book deals with Greek foreign policy analysis; threat perception; the NATO connection (including Greek-US relations, the rise of anti-Americanism in 1955-58 and in 1964-67, the economic dimension of security and the issue of US military aid); Greek policy towards the Soviet bloc; and the regional dimension, mainly Greek policy towards Turkey and Yugoslavia, and (for the 1964-67 years) the Cyprus crisis which greatly complicated Greek security obligations. This book will be of great interest to students of Greek politics, Balkans history, the Cold War and strategic studies.

## The Dissent Papers

## The Voices of Diplomats in the Cold War and Beyond

Columbia University Press Beginning with the Cold War and concluding with the 2003 invasion of Iraq, Hannah Gurman explores the overlooked opposition of U.S. diplomats to American foreign policy in the latter half of the twentieth century. During America's reign as a dominant world power, U.S. presidents and senior foreign policy officials largely ignored or rejected their diplomats' reports, memos, and telegrams, especially when they challenged key policies relating to the Cold War, China, and the wars in Vietnam and Iraq. The Dissent Papers recovers these diplomats' invaluable perspective and their commitment to the transformative power of diplomatic writing. Gurman showcases the work of diplomats whose opposition enjoyed some success. George Kennan, John Stewart Service, John Paton Davies, George Ball, and John Brady Kiesling all caught the attention of sitting presidents and policymakers, achieving temporary triumphs yet ultimately failing to change the status quo. Gurman follows the circulation of documents within the State Department, the National Security Council, the C.I.A., and the military, and she details the rationale behind "The Dissent Channel," instituted by the State Department in the 1970s, to both encourage and contain dissent. Advancing an alternative narrative of modern U.S. history, she connects the erosion of the diplomatic establishment and the weakening of the diplomatic writing tradition to larger political and ideological trends while, at the same time,

foreshadowing the resurgent significance of diplomatic writing in the age of Wikileaks.

## Cold War

## Building for Nuclear Confrontation 1946-1989

Historic England Press In the early 1950s, the historian Professor William Hoskins, in his pioneering work *The making of the English landscape*, lamented what he saw as the devastation of the countryside by scientists, the military and politicians. He saw his world as dominated by "the obscene shape of the atom-bomber, laying a trail like a filthy slug upon Constable's and Gainsborough's sky. England of the Nissen hut, the "pre-fab", and the electric fence, of the high barbed wire around some unmentionable devilment". A generation later, this book reveals what lay behind the fence and how the sites are now, in dereliction, a new aspect of the complex landscape history of Britain.

## From War to Cold War, 1942-1948

## The Labour Party, Nationalism and Internationalism, 1939-1951

Psychology Press The Second World War was a watershed moment in foreign policy for the Labour Party in Britain. Before the war, British socialists had held that nationalism was becoming obsolete and that humanity was steadily evolving towards the ideal of a single world government. The collapse of the League of Nations destroyed this optimistic vision, compelling Labour to undertake a fundamental review of its entire approach to foreign affairs during a period of unprecedented global crisis. This book traces the controversy that ensued, as the British democratic left set about the task of defining the principles of a radically new international system for the postwar world. The schemes proposed by Labour policymakers during these years encompassed a wide variety of political institutions aiming at the restraint or supersession of the sovereign nation-state. What they shared in common, however, was a reconceptualization of British identity, in which the hyper-patriotism of the wartime period blended with the left's traditional internationalism. This new 'muscular' internationalism was to have a major impact upon the evolution of entities as diverse as the United Nations Organizations, the British Commonwealth and the accelerating campaign in favor of European unity after Labour assumed the reins of government in 1945. Breaking with the traditional accounts that place Cold War tensions at the centre of the Attlee government's activities in the immediate postwar years, R.M. Douglas's book provides an entirely new framework for reassessing British foreign policy and left-wing concepts of national identity during the most turbulent moment of Britain's modern history. This book will be essential reading for all students and researchers of British foreign policy, the Labour Party and international relations.
