THE COMPLETE PROPHECIES OF NOSTRADAMUS

Sterling Publishing Company, Inc. Provides the complete prophecies of Nostradamus, accompanied by new interpretaions of the seer's predictions with analysis that includes the dates on which the predictions would occur.

LIFESPAN NEUROREHABILITATION

A PATIENT-CENTERED APPROACH FROM EXAMINATION TO INTERVENTIONS AND OUTCOMES

The neuro rehab text that mirrors how you learn and how you practice! Take an evidence-based approach to the neurorehabilitation of adult and pediatric patients across the lifespan that reflects the APTA's patient management model and the WHO's International Classification of Function (ICF). You'll study examination and interventions from the body structure/function impairments and functional activity limitations commonly encountered in patients with neurologic disorders. Then, understanding the disablement process, you'll be able to organize the clinical data that leads to therapeutic interventions for specific underlying impairments and functional activity limitations that can then be applied as appropriate anytime they are detected, regardless of the medical diagnosis.

HANDBOOK OF AVIAN HYBRIDS OF THE WORLD

Oxford University Press With more than 5,000 works cited, Handbook of Avian Hybrids of the World is the greatest compendium of information ever published on hybridization in birds. Worldwide in scope, it provides information on all reported avian crosses, not only those occurring in captivity, but also in a natural setting (approximately 4,000 crosses are covered). This book is a basic reference, intended both for the serious birder and the professional biologist. McCarthy's work fills a need for reference material that takes into account the last half century of data. It will be of interest to workers in a wide variety of fields, ranging from animal behavior to genetics, ecology, zoology, and systematics. In fact, it will make fascinating reading for anyone interested in birds and the natural world.

LORENZO DE' MEDICI AND THE ART OF MAGNIFICENCE

JHU Press "Historian F.W. Kent offers a new look at Lorenzo's relationship to the arts, aesthetics, collecting, and building - especially in the context of his role as the political boss (maestro della bottega) of republican Florence and a leading player in Renaissance Italian diplomacy. Kent's approach reveals Lorenzo's activities as an art patron as far more extensive and creative than previously thought. Known as "the Magnificent," Lorenzo was broadly interested in the arts and supported efforts to beautify Florence and the many Medici lands and palaces. His expertise was well regarded by guildsmen and artists, who often turned to him for advice as well as for patronage.

PRACTICAL GUIDE TO THE EVALUATION OF CLINICAL COMPETENCE

Designed to help medical educators implement better assessment methods, tools, and models directly into training programs, Practical Guide to the Evaluation of Clinical Competence, 2nd Edition, by Drs. Eric S. Holmboe, Steven J. Durning, and Richard E. Hawkins, is a hands-on, authoritative guide to outcomes-based assessment in clinical education. National and international experts present an organized, multifaceted approach and a diverse combination of methods to help you perform effective assessments. This thoroughly revised edition is a valuable resource for developing, implementing, and sustaining effective systems for evaluating clinical competence in medical school, residency, and fellowship programs.

FULLY ALIVE

DISCOVERING WHAT MATTERS MOST

Sarah Crichton Books On a quest for what matters most, Timothy Shriver discovers a radically different, inspiring way of life. At a time when we are all more rudderless than ever, we look for the very best teachers and mentors to guide us. In *Fully Alive*, an unusual and gripping memoir, Timothy Shriver shows how his teachers have been the world's most forgotten minority: people with intellectual disabilities. In these pages we meet the individuals who helped him come of age and find a deeper and more meaningful way to see the world. Shriver's journey begins close to home, where the quiet legacy of his aunt Rosemary, a Kennedy whose intellectual disability kept her far from the limelight, inspired his family to devote their careers to helping the most vulnerable. He plays alongside the children of Camp Shriver, his mother's revolutionary project, which provided a space for children with intellectual disabilities to play, and years later he gains invaluable wisdom from the incredible athletes he befriends as chairman of the organization it inspired, Special Olympics. Through these experiences and encounters with scholars, spiritual masters, and political icons such as Nelson Mandela, Shriver learns how to find humility and speak openly of vulnerability and faith. *Fully Alive* is both a moving personal journey and a meditation on some of the greatest wisdom and the greatest contradictions of our society. Is disability to be feared or welcomed, pitied or purged? Shriver argues that we all have different abilities and challenges we should embrace. Here we see how those who appear powerless have turned this seeming shortcoming into a power of their own, and we learn that we are all totally vulnerable and valuable at the same time.

CANTI

Un bel mattino passeggiavo con mio padre, secondo il nostro costume; eravamo inseparabili; s'egli andava in un luogo senza di me, di lì a un poco mi vedevano spuntare; pareva che sapessi di doverlo perdere così presto. Ero in su que' bei diciott'anni, e su que' bei colli veronesi. La strada che talora serviva di letto al torrente, serpeggiava profonda, sassosa, sdrucchiola, tutta segnata sulla creta, dalle unghie fesse delle pecore, e dalle scarpe ferrate dei montanari. Due file di càrpi e di querce scapitozzate con macchie di rovi legate insieme da volubili madriselve sorgevano ombrose sull'alto delle due ripe, più a guisa di parete che di siepe, lasciando cadere dai cigli corrosi le pendole barbe delle radici nude.

AUSTRALIANS IN ITALY

CONTEMPORARY LIVES AND IMPRESSIONS

Monash Univ Pub "Long before the advent of modern tourism, Australians travelled to live in Italy, or undertook extensive visits there. Indeed they continue to do so in increasing numbers, as women and men find Italian partners; as business people with European interests settle there; as retirees in their thousands seek 'the good life' that Italy - in Ros Pesman's words, this 'culturally endowed place of rebirth' - seems to promise This collection seeks to map the past and present of the Australian love affair with Italy, and yields rich insights into its causes, motivations and transformations." -- About page.

I DREAMED OF AFRICA

Penguin UK 'Often, at the hour of day when the savannah grass is streaked with silver, and pale gold rims the silhouettes of the hills, I drive with my dogs up to the Mukutan, to watch the sun setting behind the lake, and the evening shadows settle over the valleys and plains of the Laikipia plateau.' Kuki Gallmann's haunting memoir of bringing up a family in Kenya in the 1970s first with her husband Paulo, and then alone, is part elegaic celebration, part tragedy, and part love letter to the magical spirit of Africa.

DIMENSIONAL PSYCHOPATHOLOGY

Springer This book presents an innovative approach to clinical assessment in psychiatry based on a number of psychopathological dimensions with a presumed underlying pathophysiology, that are related to fundamental phenomenological aspects and lie on a continuum from normality to pathology. It is described how the evaluation of these dimensions with a specific, validated rapid assessment instrument could easily integrate and enrich the classical diagnostic DSM-5 or ICD-10 assessment. The supplemental use of this dimensional approach can better capture the complexity underlying current categories of mental illness. The findings from a large patient sample suggest how this assessment could give a first glance at how variable and multifaceted the psychopathological components within a single diagnostic category can be, and thereby optimise diagnosis and treatment choices. Being short and easy to complete, this dimensional assessment can be done in a busy clinical setting, during an ordinary psychiatric visit, and in an acute clinical context, with limited effort by a minimally trained clinician. Therefore, it provides interesting and useful information without additional costs, and allows research work to be performed even in difficult settings.

DEVELOPMENTAL DIAGNOSIS - NORMAL AND ABNORMAL CHILD DEVELOPMENT - CLINICAL METHODS AND PEDIATRIC APPLICATIONS

READ BOOKS This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1917 edition. Excerpt: ... (6) Columns for Discount on Purchases and Discount on Notes on the same side of the Cash Book; (c) Columns for Discount on Sales and Cash Sales on the debit side of the Cash Book; (d) Departmental columns in the Sales Book and in the Purchase Book. Controlling Accounts.--The addition of special columns in books of original entry makes possible the keeping of Controlling Accounts. The most common examples of such accounts are Accounts Receivable account and Accounts Payable account. These summary accounts, respectively, displace individual customers' and creditors' accounts in the Ledger. The customers' accounts are then segregated in another book called the Sales Ledger or Customers' Ledger, while the creditors' accounts are kept in the Purchase or Creditors' Ledger. The original Ledger, now much reduced in size, is called the General Ledger. The Trial Balance now refers to the accounts in the General Ledger. It is evident that the task of taking a Trial Balance is greatly simplified because so many fewer accounts are involved. A Schedule of Accounts Receivable is then prepared, consisting of the balances found in the Sales Ledger, and its total must agree with the balance of the Accounts Receivable account shown in the Trial Balance. A similar Schedule of Accounts Payable, made up of all the balances in the Purchase Ledger, is prepared, and it must agree with the balance of the Accounts Payable account of the General Ledger." The Balance Sheet.--In the more elementary part of the text, the student learned how to prepare a Statement of Assets and Liabilities for the purpose of disclosing the net capital of an enterprise. In the present chapter he was shown how to prepare a similar statement, the Balance Sheet. For all practical...

LIBERTÀ E LAVORO

CRONACA DEL PRESENTE

LUFTWAFFE FIGHTER ACES

Frontline Books In this exciting book Mike Spick shows how the Luftwaffe's leading fighter pilots were able to outscore their allied

counterparts so effectively and completely during the Second World War. When the records of the Jagdflieger pilots became available after the war, they were initially greeted with incredulity – the highest claim was for 352 kills, and more than 100 pilots had recorded more than 100 victories. However postwar research proved that these claims had in fact been made in good faith and confirmation had only been given after rigorous checking. To discover the secret of this success, aviation history expert Mike Spick examines the exploits of these aces and sets out the context in which it took place. Every major theater is covered in detail including the conditions peculiar to each: climate, relative numerical and qualitative strengths, the presence or absence of radar and other measures, and the relative merits of the planes being flown. He focuses on the methods and tactics used by individual aces and uses firsthand sources wherever possible to put the reader right alongside the pilot in the cockpit.

LITERATURE AND GEOGRAPHY

THE WRITING OF SPACE THROUGHOUT HISTORY

Cambridge Scholars Publishing In a period marked by the Spatial Turn, time is not the main category of analysis any longer. Space is. It is now considered as a central metaphor and topos in literature, and literary criticism has seized space as a new tool. Similarly, literature turns out to be an ideal field for geography. This book examines the cross-fertilization of geography and literature as disciplines, languages and methodologies. In the past two decades, several methods of analysis focusing on the relationship and interconnectedness between literature and geography have flourished. Literary cartography, literary geography and geocriticism (Westphal, 2007, and Tally, 2011) have their specificities, but they all agree upon the omnipresence of space, place and mapping at the core of analysis. Other approaches like ecocriticism (Buell, 2001, and Garrard, 2004), geopoetics (White, 1994), geography of literature (Moretti, 2000), studies of the inserted map (Ljunberg, 2012, and Pristnall and Cooper, 2011) and narrative cartography have likewise drawn attention to space. Literature and Geography: The Writing of Space Throughout History, following an international conference in Lyon bringing together literary academics, geographers, cartographers and architects in order to discuss literature and geography as two practices of space, shows that literature, along with geography, is perfectly valid to account for space. Suggestions are offered here from all disciplines on how to take into account representations and discourses since texts, including literary ones, have become increasingly present in the analysis of geographers.

EPICS OF SUMERIAN KINGS

THE MATTER OF ARATTA

BRILL This volume presents for the first time both the authoritative Sumerian text and an elegant English translation of four Sumerian

epics, the earliest known in any language. The introduction discusses the intellectual and cultural context as well as the poetics and meaning of this epic cycle.

FRANK FILMS

THE FILM AND VIDEO WORK OF ROBERT FRANK

Steidl / Edition7L Robert Frank turned to filmmaking at the end of the 1950s. Although he has made 27 films, the work is largely a wellkept secret. Frank approaches each film project as a new experience, challenging the medium and its possibilities at every turn. He has amalgamated documentary, fiction, and autobiography, cutting across genres. This book offers a visually unique approach to Frank's films: only new stills taken from videotapes have been used and they add up to a visual essay on Frank's cinema that establishes an engaging dialogue with his photographic work. Each film is introduced with detailed analysis, discussing the history and the aesthetics of Frank's film work. An interview with Allen Ginsberg provides an insider view. Together the texts and images offer an innovative and in-depth approach to the oeuvre of one of the greatest and most restless artists of the 20th century. Robert Frank was born in Zurich, Switzerland in 1924 and went to the United States in 1947. He is best known for his seminal book *The Americans* (1958), which gave rise to a distinct new art form in the photo-book, and his experimental film *Pull My Daisy* (1959) both reproduced by Steidl within The Robert Frank Project.

JUNIOR ENCYCLOPEDIA

This comprehensive book covers a wide range of key topics, from space and science to history and the natural world. Crammed with amazing facts and fantastic photographs, this Junior Encyclopedia provides children with a wealth of knowledge in an accessible format, while captions, annotation and special panels supply extra information.

MOLECULAR GENETIC APPROACHES IN CONSERVATION

Oxford University Press on Demand Molecular techniques are proving invaluable in determining the phylogenetic status of potentially endangered species, for investigating mechanisms of speciation, and for measuring the genetic structure of populations. It is increasingly important for ecologists and evolutionary and conservation biologists to understand and use such molecular techniques, but most workers in these areas have not been trained in molecular biology. This book lays out the principles and basic techniques for the molecular tools appropriate for addressing issues in conservation, and it presents case studies showing how these tools have been used successfully in conservation biology. Examples include the genetic analysis of population structure, various uses of DNA in conservation genetics, and estimation of migration parameters from genetic data. Wildlife managers, as well as researchers in these areas, will find this a valuable book.
