This guide presents an easy-to-follow outline developing the technical requirements for security systems, establishing the procurement process for those systems, and managing the implementation of the acquired systems. All of the elements necessary to conduct a detailed survey of a facility and the methods used to document the findings of that survey are covered. Once the required systems are determined, the chapters following present how to assemble and evaluate bids for the acquisition of the required systems in a manner that will meet the most rigorous standards established for competitive bidding. The book also provides recommended approaches for system/user implementation, giving checklists and examples for developing management controls using the installed systems. This book was developed after a careful examination of the approved reference material available from the American Society for Industrial Security (ASIS International) for the certification of Physical Security Professionals (PSP). It is intended to fill voids left by the currently approved reference material to perform implementation of systems suggested in the existing reference texts. This book is an excellent How To for the aspiring security professional that wishes to take on the responsibilities of security system implementation, or the security manager who wants to do a professional job of system acquisition without hiring a professional consultant. UNIQUE FEATURE: Offers a step-by-step approach to identifying the application, acquiring the product and implementing the recommended system. Builds upon well-known, widely adopted concepts prevalent among security professionals. Offers seasoned advice on the competitive bidding process as well as on legal issues involved in the selection of applied products. BENEFIT TO THE READER: The author presents information previously available only from a costly Physical Security Consultant Dozens of sample forms, checklists, surveys, and tables make for quick reference PC Mag PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services.
