Times of Polymers

Wiley-VCH Verlag GmbH The papers presented at the 2nd International Conference of "Times of Polymers - TOP", a biennial meeting of a number of scientists working within the area of timescales of polymers with respect to processing properties, structure and their mutual relationships.

Digital Innovations in Architectural Heritage Conservation: Emerging Research and Opportunities

Emerging Research and Opportunities

IGI Global The concept of conserving heritage for future generations is not a new idea. However, with recent digital advances, this task can be done much more efficiently and cultural properties can be better preserved for future populations. Digital Innovations in Architectural Heritage Conservation: Emerging Research and Opportunities highlights the most innovative trends in electronic preservation techniques. Featuring extensive coverage on relevant topics such as cultural complexities, participative heritage, architectural backgrounds, and virtual reconstruction, this is an ideal publication for all academicians, graduate students, engineers, and researchers interested in expanding their knowledge on current heritage conservation systems and practices.

An Introduction to Probability and Inductive Logic

Cambridge University Press An introductory 2001 textbook on probability and induction written by a foremost philosopher of science.

What Will We Play Today?

Brilliant Publications *What Will We Play Today?* contains 100 games based on drama, movement and music. It is sure to become a popular resource for anyone working with young children. It is said that a good game 'grows' with the children, and many of the games in this book are likely to be requested by children over and over again. The book contains games to encourage children's physical, creative and language development. The activities include listening games such as *Mi Gallinita*, hoop games, singing games and movement games such as *Jig Jog*. The games in the book are deliberately non-competitive and there is a strong emphasis on the process of playing rather than on winning. The games in this book offer a challenging and highly enjoyable way of providing guided play experiences for young children.

Sensors and Microsystems

Proceedings of the 17th National Conference, Brescia, Italy, 5-7 February 2013

Springer Science & Business Media This book contains a selection of papers presented at the 17th AISEM ("Associazione Italiana Sensori e Microsistemi") National Conference on Sensors and Microsystems, held in Brescia, 5-7 February, 2013. The conference highlighted state-of-the-art results from both theoretical and applied research in the field of sensors and related technologies. This book presents material in an interdisciplinary approach, covering many aspects of the disciplines related to sensors, including physics, chemistry, materials science, biology and applications.

Physiology of Behavior

Pearson College Division This revised edition incorporates the latest discoveries in the rapidly changing fields of neuroscience and physiological psychology and offers the most comprehensive and integrative coverage of research and theory in contemporary behavioural neuroscience.

Confronting the Challenges of Participatory Culture

Media Education for the 21st Century

MIT Press Many teens today who use the Internet are actively involved in participatory cultures—joining online communities (Facebook, message boards, game clans), producing creative work in new forms (digital sampling, modding, fan videomaking, fan fiction), working in teams to complete tasks and develop new knowledge (as in Wikipedia), and shaping the flow of media (as in blogging or podcasting). A growing body of scholarship suggests potential benefits of these activities, including opportunities for peer-to-peer learning, development of skills useful in the modern workplace, and a more empowered conception of citizenship. Some argue that young people pick up these key skills and competencies on their own by interacting with popular culture; but the problems of unequal access, lack of media transparency, and the breakdown of traditional forms of socialization and professional training suggest a role for policy and pedagogical intervention. This report aims to shift the conversation about the "digital divide" from questions about access to technology to questions about access to opportunities for involvement in participatory culture and how to provide all young people with the chance to develop the cultural competencies and social skills needed. Fostering these skills, the authors argue, requires a systemic approach to media education; schools, afterschool programs, and parents all have distinctive roles to play. The John D. and Catherine T. MacArthur Foundation Reports on Digital Media and Learning

The Hilbert Challenge

Oxford University Press on Demand Few problems in mathematics have had the status of those posed by David Hilbert in 1900. Mathematicians have made their reputations by solving some of them like Fermat's last theorem, but several remain unsolved including the Riemann Hypotheses, which has eluded all the great minds of this century. A hundred years later, this book takes a fresh look at the problems, the man who set them, and the reasons for their lasting impact on the mathematics of the twentieth century. In this fascinating book, the authors consider what makes this the pre-eminent collection of problems in mathematics, what they tell us about what drives mathematicians, and the nature of reputation, influence and power in the world of modern mathematics. It is written in a clear and entertaining style and will appeal to anyone with interest in mathematics or those mathematicians willing to try their hand at these problems.

Philology and Performing Arts

A Challenge

Presses universitaires de Louvain This volume invites to bridge the traditional gap between the author and the scribes, which means between the "original text" and the "copies" in order deal with more complex situations, in which the performer, the screenwriter, or the director...

Emerging Adulthood in a European Context

Psychology Press Emerging adulthood has been identified as an important developmental stage, characterised by identity exploration, instability and open possibilities, in which young people are no longer adolescents but have not yet attained full adult status. This ground-breaking edited collection is the first book to offer a comprehensive overview of emerging adulthood in a European context, which includes a comparison of findings in 9 different European countries and the USA.??? Each chapter, written by a leading European researcher, describes the socio-demographic characteristics of emerging adults, reviews the state of the field, synthesises new findings, and provides suggestions for how to move forward in research, interventions, and policy. The book examines how the traditional domain markers of adulthood, such as finishing education and caring for children, have changed. It also highlights how different factors such as gender, working status, living arrangements, romantic status and parental educational background affect the importance assigned to each set of adulthood criteria. The theory of emerging adulthood is further developed by considering how Arnett's emerging adulthood, Erikson's early adulthood, and Robinson's theory of early adult crisis fit together, and

data is provided to support the new framework given. The book will be of great interest to researchers interested in these developmental transitions, and to advanced students of Emerging Adulthood on developmental psychology and lifespan courses, and related disciplines.

Sensors and Microsystems

Proceedings of the 8th Italian Conference, Trento, Italy, 12-14 February, 2003

World Scientific This book constitutes a selection of papers presented at the 8th Italian Conference on Sensors and Microsystems. It contains contributions on sensors, microsystems, actuators and related interface electronics. Aspects of chemistry, biology and materials science are also covered. In addition, special sensor applications of industrial interest are presented and discussed. The proceedings have been selected for coverage in: . OCo Materials Science Citation Index-. OCo Index to Scientific & Technical Proceedings- (ISTP- / ISI Proceedings). OCo Index to Scientific & Technical Proceedings (ISTP CDRom version / ISI Proceedings). OCo CC Proceedings OCo Engineering & Physical Sciences."

Sensors and Microsystems

Haphazard Reality: Half a Century of Science

Plunkett Lake Press "An outstanding scientific autobiography... I remain impressed by its thoughtfulness and charm." — Steve K. Lamoreaux, American Journal of Physics "[A] rich autobiography and history-of-atomic-physics... One is impressed by Casimir's memory for detail and zeal to find corroboration for the stories he tells. And they are splendid tales: Gamow's playful pranks in Copenhagen: conversations with Lev Landau, ardent revolutionary but no Marxist; the tragedy of Ehrenfest, who killed himself after shooting his hopelessly retarded son... A charming, idiosyncratic, and meaningful account of events and personalities that changed physics." — Kirkus "I myself read [this book] with fascination, meeting old friends such as Gamow, Landau, Kramers, and learning much more about them... Also in the book are character sketches of those who made physics in the Netherlands such as Lorentz, Kamerlingh Onnes and Ehrenfest, the latter remembered with the greatest affection by the author." — Sir Nevill Mott, Contemporary Physics "The book... contains a valuable, entertaining and insightful collection of vignettes of many of the physicists

Casimir has associated with[,]... Lorentz, Ehrenfest, Bohr, Pauli, with whom he studied; Goudsmit, Uhlenbeck, Landau, Gamov, members of his own generation; Kramers, Gorter, de Haas, colleagues in Dutch academic circles; Holst and Loupart, colleagues at the Philips Laboratories. Haphazard Reality also offers valuable insights into Dutch middle class culture and a rewarding overview of Dutch educational and scientific establishments... Casimir is a master at deftly and sensitively conveying the psychological ambiance of his surroundings. His description of the brilliant young theoretical physicists around Bohr in the early thirties conveys not only the style of doing physics but also delineates the issues addressed by outlining the content of their researches.” — S. S. Schweber, 4S Review “Engaging reminiscences by an important Dutch physicist of conversations with the major contributors to 20th-century physics. An overly modest, but otherwise balanced account of his own experiences and contributions from his early years at Leiden to his directorship of the Philips Laboratory.” — The Antioch Review “Haphazard Reality paints a vivid and insightful picture of the development of modern physics.” — Steve K. Lamoreaux, Proceedings of the American Philosophical Society

A World of Nations

The International Order Since 1945

Oxford University Press, USA A World of Nations provides an analytical narrative of the origins, evolution, and end of the Cold War through a genuinely international history of this turbulent period. This new edition includes new topics such as human rights, environmental issues and international terrorism.

Proceedings of GE 2013. 45th Conference (Udine, 17-21 June 2013)

Sensors and Microsystems

Proceedings of the 13th Italian Conference : Roma, Italy, 19-21 February 2008

World Scientific This book collects a number of papers presented at the 13th Italian Conference on Sensors and Microsystems. It provides a unique perspective on the

research and development of sensors, microsystems and related technologies in Italy. Besides the scientific value of the papers, this book offers a unique source of data to analysts that intend to survey the Italian situation on sensors and microsystems.

Olfaction and Electronic Nose

Proceedings of the 13th International Symposium on Olfaction and Electronic Nose

American Inst. of Physics ISOEN addresses research in the fields of gas sensors and artificial olfactory systems. In this edition we broadened the participation spectrum to all kinds of analytical instrumentation for odor measurement and to biological olfaction. We also had a strong involvement in industry. The audience comprises materials scientists, chemists, physicists, engineers, biologists, computer scientists, and application specialists (e.g. food, medical, environmental, security).

Origini Del Teatro Italiano: Con Due Appendici Sulla Rappresentazione Drammatica Del Contado Toscano E Sul Teatro Mantovano Nel;

Sagwan Press This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Montaigne & Melancholy

The Wisdom of the Essays

Rowman & Littlefield Montaigne (1533-1592), the personification of philosophical calm, had to struggle to become the wise Renaissance humanist we know. His balanced temperament, sanguine and melancholic, promised genius but threatened madness. When he started his Essays, Montaigne was upset by an attack of melancholy humor: He became temperamental and unbalanced. Writing about himself restored the balance but broke an age-old taboo—happily so, for he discovered profound truths about himself and about our human condition. His charm and humor have made his writings widely enjoyed and admired.

Flood Hydrology

Proceeding of the International Symposium on Flood Frequency and Risk Analyses, 14–17 May 1986, Louisiana State University, Baton Rouge, USA

Springer Science & Business Media Floods constitute a persistent and serious problem throughout the United States and many other parts of the world. They are responsible for losses amounting to billions of dollars and scores of deaths annually.

Virtually all parts of the nation--coastal, mountainous and rural--are affected by them. Two aspects of the problem of flooding that have long been topics of scientific inquiry are flood frequency and risk analyses. Many new, even improved, techniques have recently been developed for performing these analyses. Nevertheless, actual experience points out that the frequency of say a 100-year flood, in lieu of being encountered on the average once in one hundred years, may be as little as once in 25 years. It is therefore appropriate to pause and ask where we are, where we are going and where we ought to be going with regard to the technology of flood frequency and risk analyses. One way to address these questions is to provide a forum where people from all quarters of the world can assemble, discuss and share their experience and expertise pertaining to flood frequency and risk analyses. This is what constituted the motivation for organizing the International Symposium on Flood Frequency and Risk Analyses held May 14-17, 1986, at Louisiana State University, Baton Rouge, Louisiana.

Circadian Lighting Design in the LED Era

Springer This book explores how lighting systems based on LED sources have the ability to positively influence the human circadian system, with benefits for health and well-being. The opening chapters examine the functioning of the human circadian system, its response to artificial lighting, potential health impacts of different types of light exposure, and current researches in circadian photometry. A first case study analyzes the natural lighting available in an urban interior, concluding that it is unable to activate the human circadian system over the entire year. Important original research is then described in which systems suitable for artificial circadian lighting in residential interiors and offices were developed after testing of new design paradigms based on LED sources. Readers will also find a detailed analysis of the LED products available or under development globally that may contribute to optimal artificial circadian lighting, as well as the environmental sensors, control interfaces, and monitoring systems suitable for integration with new LED lighting systems. Finally, guidelines for circadian lighting design are proposed, with identification of key requirements.

Incunabula

Studies in Fifteenth-century Printed

Books Presented to Lotte Hellinga

British Library Board This stimulating collection of essays (all hitherto unpublished) is designed to honour the work of Lotte Hellinga on her retirement from the British Library, where she was for many years Head of the Incunabula Section. Scholars from eight countries range widely over the field of fiteenth-century printed books, writing on such topics as the shape of early type, authorship, ownership, and the building up of collections of incunabula, the binding and decoration of books from the presses of England, the Low Countries, and Italy, the earliest trade in printed books and the vicissitudes of the Gutenberg Bible in the sales rooms. The book is extensively illustrated and contains an appreciation of Dr. Hellinga's career and a list of her publications.

Sensors and Microsystems

AISEM 2009 Proceedings

Springer Sensors and Microsystems contains a selection of papers presented at the 14th Italian conference on sensors and microsystems. It provides a unique perspective on the research and development of sensors, microsystems and related technologies in Italy. The scientific values of the papers also offers an invaluable source to analysts intending to survey the Italian situation about sensors and microsystems. In an interdisciplinary approachm many aspects of the disciplines are covered, ranging from materials science, chemistry, applied physics, electronic engineering and biotechnologies. Further details of the conference and its full program at the website <http://www.microelectronicsevents.com/AISEM>

Parisiana Poetria

John of Garland's Parisiana poetria, first published about 1220, expounds medieval poetic theory and summarizes contemporary thought about writing. The long account of rhymed poetry included here is the most complete that has survived. This volume presents the most authoritative edition of the Latin text alongside a fresh English translation.

Set the Stars Alight

Hachette UK A thrilling novel of espionage and romance set against the sultry, exotic Gold Coast of Africa. When the motion picture that blonde Gay Burnett was making went bankrupt, the beautiful English actress was stranded -and easy prey for the advances of the sinister director, Kurt Mulheim. Then she encountered a dissolute and reluctant saviour, Rick Morell. Rick, the ivory trader who vowed to distrust all women. But Mulheim had her kidnapped and sold as a white slave in darkest Ligati. Alone and terrified, Gay refused to give up hope that one day she would see Rick again-and tell him she loved him. A captivating love story from the 100-million-copy bestselling Queen of Romance, first published in 1941, and available now for the first time in eBook.

A First Course in Mathematical Analysis

Intends to serve as a textbook in Real Analysis at the Advanced Calculus level. This book includes topics like Field of real numbers, Foundation of calculus, Compactness, Connectedness, Riemann integration, Fourier series, Calculus of several variables and Multiple integrals are presented systematically with diagrams and illustrations.

Concrete Math Companion

Saracen Tales

Bordighera Incorporated Fiction. Short Stories. Translated from the Italian by Barbara De Marco. In SARACEN TALES, Italian-born Giuseppe Bonaviri brings a wild newness to the tale of the life of Jesus. In this succession of stories, Bonaviri explores all manners of the known and unknown, the archetypal, the mythological, the symbolic--the life of Jesus is both his material and his point of departure. Part surrealism, part folklore, readers will be amazed at the originality and creativity with which a long-familiar tale is presented. "Bonaviri is a myth-maker, looking simultaneously to the historical past and to the future, to arrive at the a-historical, at cosmic universality"--Franco Zangrilli. Giuseppe Bonaviri was born in 1924 in Sicily. He began writing when he was ten and continued through high school, college, and in his professional life as a doctor, health official, and cardiologist. His work has been widely translated.
