**Reading, Learning, Teaching Kurt Vonnegut [Peter Lang](#) Introduces the writing of contemporary American author, Kurt Vonnegut, and offers teachers ideas for bringing his works into the classroom as part of the reading and writing curriculum. Mothers and Masters in Contemporary Utopian and Dystopian Literature [Peter Lang](#) Because advances made by science and technology far outstripped improvements in human nature, utopian dreams of perfect societies in the twentieth century quickly metamorphosed into dystopian nightmares, which undermined individual identity and threatened the integrity of the family. Armed with technological and scientific tools, totalizing social systems found in literature abolish the distinction between public and private life and thus penetrate and corrupt the very core of all utopian blueprints and visions: the education of future generations. At the heart of the family, mothers as parents transmit their diverse cultural traditions while socializing their children and thus compete with ideologically driven systems that usurp their role as educators. Mothers and Masters in Contemporary Utopian and Dystopian Literature focuses, therefore, on the thematic importance of this and other maternal roles for generic metamorphosis: the shift to dystopia invariably is signaled by the inversion of traditional maternal roles. The longevity of the utopian-dystopian literary tradition and persistence of the maternal model of human relationships serve as points of reference in this post-modern age of relative cultural values. Meta-utopian exploration of this thematic tension between utopia and dystopia reminds us that «no place» may not be home, but we need to keep going there. Utopian and Dystopian Themes in Tolkien's Legendarium [Lexington Books](#) Utopia and Dystopia in Tolkien's Legendarium explores how Tolkien's works speak to many modern people's utopian desires despite the overwhelming**

dominance of dystopian literature in the twentieth and twenty-first centuries. It also examines how Tolkien's malevolent societies in his legendarium have the unique ability to capture the fears and doubts that many people sense about the trajectory of modern society. Tolkien's works do this by creating utopian and dystopian longing while also rejecting the stilted conventions of most literary utopias and dystopias. *Utopia and Dystopia in Tolkien's Legendarium* traces these utopian and dystopian motifs through a variety of Tolkien's works including *The Hobbit*, *The Lord of the Rings*, *The Silmarillion*, *Book of Lost Tales*, *Leaf by Niggle*, and some of his early poetry. The book analyzes Tolkien's ideal and evil societies from a variety of angles: political and literary theory, the sources of Tolkien's narratives, the influence of environmentalism and Catholic social doctrine, Tolkien's theories about and use of myth, and finally the relationship between Tolkien's politics and his theories of leadership. The book's epilogue looks at Tolkien's works compared to popular culture adaptations of his legendarium. **Building Vocabulary: Level 10 Kit** [Teacher Created Materials](#) **Building Vocabulary from Word Roots** provides a systematic approach to teaching vocabulary using Greek and Latin prefixes, bases, and suffixes. Over 90% of English words of two or more syllables are of Greek or Latin origin. Instead of learning words and definitions in isolation, students learn key roots and strategies for deciphering words and their meanings across all content areas. **Building Vocabulary from Word Roots: Level 10 kit** includes: **Teacher's Guide**; **Student Guided Practice Book** (Each kit includes a single copy; additional copies may be ordered in quantities of 10 or more); **Assessments** to support data-driven instruction; and **Digital resources** including modeled lessons, 50 bonus activities, and more. **The Palgrave Handbook of Utopian and Dystopian Literatures** [Springer Nature](#) **The Palgrave Handbook of Utopian and Dystopian Literatures** celebrates a literary genre already over 500 years old. Specially commissioned essays from established and emerging international scholars reflect the vibrancy of utopian vision, and its resiliency as idea, genre, and critical mode. Covering politics, environment, geography, body and mind, and social organization, the volume surveys current research and maps new areas of study. The chapters include investigations of anarchism, biopolitics, and postcolonialism and study film, art, and literature. Each essay considers central questions and key primary works, evaluates the most recent research, and outlines contemporary debates. **Literatures of Africa, Australia, China, Latin America, and the Middle East** are discussed in this global, cross-disciplinary, and comprehensive volume. **Teaching the Canon in 21st Century Classrooms Challenging Genres** [BRILL](#) **Teaching the Canon in 21st Century Classrooms** offers pedagogical applications and conceptualizations of canonical texts for 21st century students and classrooms through a variety of critical literacy perspectives. **Utopian and Dystopian Writing for Children and Young Adults** [Routledge](#) This volume examines a variety of utopian writing for children from the 18th century to

the present day, defining and exploring this new genre in the field of children's literature. The original essays discuss thematic conventions and present detailed case studies of individual works. All address the pedagogical implications of work that challenges children to grapple with questions of perfect or wildly imperfect social organizations and their own autonomy. The book includes interviews with creative writers and the first bibliography of utopian fiction for children. Contemporary Dystopian Fiction for Young Adults Brave New Teenagers [Routledge](#) Winner of the Children's Literature Association Edited Book Award From the jaded, wired teenagers of M.T. Anderson's Feed to the spirited young rebels of Suzanne Collins' The Hunger Games trilogy, the protagonists of Young Adult dystopias are introducing a new generation of readers to the pleasures and challenges of dystopian imaginings. As the dark universes of YA dystopias continue to flood the market, Contemporary Dystopian Fiction for Young Adults: Brave New Teenagers offers a critical evaluation of the literary and political potentials of this widespread publishing phenomenon. With its capacity to frighten and warn, dystopian writing powerfully engages with our pressing global concerns: liberty and self-determination, environmental destruction and looming catastrophe, questions of identity and justice, and the increasingly fragile boundaries between technology and the self. When directed at young readers, these dystopian warnings are distilled into exciting adventures with gripping plots and accessible messages that may have the potential to motivate a generation on the cusp of adulthood. This collection enacts a lively debate about the goals and efficacy of YA dystopias, with three major areas of contention: do these texts reinscribe an old didacticism or offer an exciting new frontier in children's literature? Do their political critiques represent conservative or radical ideologies? And finally, are these novels high-minded attempts to educate the young or simply bids to cash in on a formula for commercial success? This collection represents a prismatic and evolving understanding of the genre, illuminating its relevance to children's literature and our wider culture. A Modern Utopia [U of Nebraska Press](#) "Wells's uncanny ability to highlight the problems which are now most acute and supply tentative solutions that allow a maximum of individual freedom merits serious consideration. Recommended reading for students and teachers dealing with government, science, and the contemporary dilemma of a world facing war, famine, and racial unrest."--Choice A Modern Utopia is one of the first important blueprints for the modern welfare state and an early major statement of Wells's idea of the World State, an idea that is perhaps his greatest contribution to the intellectual history of this century. In this "quintessential utopia," as Lewis Mumford calls it, Wells "sums up and clarifies the utopias of the past, and brings them into contact with the world of the present." The Bison Books edition, with an introduction by Mark R. Hillegas, associate professor of English at Southern Illinois University, brings back into print a work that has stimulated three generations of thinkers. "This is not flight into fancy no voyage into

whimsy. It is a sober attempt to imagine what kind of society men would create if they really used their heads and worked at it. The result is one of the most plausible utopias ever written."--Chad Walsh, *From Utopia to Nightmare* "It is a beautiful Utopia beautifully seen and beautifully thought: and it has in it some of that flavor of airy unrestraint one finds in *News from Nowhere*."--Van Wyck Brooks, *The World of H.G. Wells Speculations of War Essays on Conflict in Science Fiction, Fantasy and Utopian Literature* [McFarland](#) Late 19th century science fiction stories and utopian treatises related to morals and attitudes often focused on economic, sociological and, at times Marxist ideas. More than a century later, science fiction commonly depicts the inherent dangers of capitalism and imperialism. Examining a variety of conflicts from the Civil War through the post-9/11 era, this collection of new essays explores philosophical introspection and futuristic forecasting in science fiction, fantasy, utopian literature and film, with a focus on the warlike nature of humanity. *Planet Utopia Utopia, Dystopia, and Globalisation* [Taylor & Francis](#) The key figure of the capitalist utopia is the individual who is ultimately free. The capitalist's ideal society is designed to protect this freedom. However, within *Planet Utopia: Utopia, Dystopia, Globalisation*, Featherstone argues that capitalist utopian vision, which is most clearly expressed in theories of global finance, is no longer sustainable today. This book concerns the status of utopian thinking in contemporary global society and the possibility of imagining alternative ways of living outside of capitalism. Using a range of sociological and philosophical theories to write the first intellectual history of the capitalist utopia in English, Featherstone provokes the reader into thinking about ways of moving beyond this model of organising social life through sociological modes of thought. Indeed, this enlightening volume seeks to show how utopian thinking about the way people should live has been progressively captured by capitalism with the result that it is difficult to imagine alternatives to capitalist society today. Presenting sociology and sociological thinking as a utopian alternative to the capitalist utopia, *Planet Utopia* will appeal to postgraduate and postdoctoral students interested in subjects including Sociology, Social Theory, Cultural Studies, Cultural Theory and Continental Philosophy. *Building Vocabulary: Student Guided Practice Book Level 10 4 Color Book* [Teacher Created Materials](#) *Building Vocabulary from Word Roots* helps students unlock the meaning of over 60% of the words they encounter in the classroom and beyond with a systematic approach to teaching vocabulary using Greek and Latin prefixes, bases, and suffixes. Students are introduced to one new root per lesson and this full-color Student Guided Practice Book is filled with daily activities to ensure that they learn the root and the many English words it generates. *The Palgrave Handbook of Reproductive Justice and Literature* [Springer Nature](#) This handbook offers a collection of scholarly essays that analyze questions of reproductive justice throughout its cultural representation in global literature and film. It offers analysis of specific texts carefully situated in their evolving

historical, economic, and cultural contexts. Reproductive justice is taken beyond the American setting in which the theory and movement began; chapters apply concepts to international realities and literatures from different countries and cultures by covering diverse genres of cultural production, including film, television, YouTube documentaries, drama, short story, novel, memoir, and self-help literature. Each chapter analyzes texts from within the framework of reproductive justice in an interdisciplinary way, including English, Japanese, Italian, Spanish, and German language, literature and culture, comparative literature, film, South Asian fiction, Canadian theatre, writing, gender studies, Deaf studies, disability studies, global health and medical humanities, and sociology. Academics, graduate students and advanced undergraduate students in Literature, Gender, Sexuality and Women's Studies, Cultural Studies, Motherhood Studies, Comparative Literature, History, Sociology, the Medical Humanities, Reproductive Justice, and Human Rights are the main audience of the volume. **Utopian Horizons Ideology, Politics, Literature** [Central European University Press](#) The 500th anniversary of Thomas More's *Utopia* has directed attention toward the importance of utopianism. This book investigates the possibilities of cooperation between the humanities and the social sciences in the analysis of 20th century and contemporary utopian phenomena. The papers deal with major problems of interpreting utopias, the relationship of utopia and ideology, and the highly problematic issue as to whether utopia necessarily leads to dystopia. Besides reflecting the interdisciplinary nature of contemporary utopian investigations, the eleven essays effectively represent the constructive attitudes of utopian thought, a feature that not only defines late 20th- and 21st-century utopianism, but is one of the primary reasons behind the rising importance of the topic. The volume's originality and value lies not only in the innovative theoretical approaches proposed, but also in the practical application of the concept of utopia to a variety of phenomena which have been neglected in the utopian studies paradigm, especially to the rarely discussed Central European texts and ideologies. **Dystopian Fiction East and West Universe of Terror and Trial** [McGill-Queen's Press - MQUP](#) **Gottlieb juxtaposes the Western dystopian genre with Eastern and Central European versions, introducing a selection of works from Russia, Poland, Hungary, and Czechoslovakia. She demonstrates that authors who write about and under totalitarian dictatorship find the worst of all possible worlds not in a hypothetical future but in the historical reality of the writer's present or recent past. Against such a background the writer assumes the role of witness, protesting against a nightmare world that is but should not be. She introduces the works of Victor Serge, Vassily Grossmam, Alexander Zinoviev, Tibor Dery, Arthur Koestler, Vaclav Havel, and Istvan Klima, as well as a host of others, all well-known in their own countries, presenting them within a framework established through an original and comprehensive exploration of the patterns underlying the more familiar Western works of dystopian fiction. Biopunk Dystopias**

**Genetic Engineering, Society, and Science Fiction** [Oxford University Press](#)  
**'Biopunk Dystopias'** contends that we find ourselves at a historical nexus, defined by the rise of biology as the driving force of scientific progress, a strongly grown mainstream attention given to genetic engineering in the wake of the Human Genome Project (1990-2003), the changing sociological view of a liquid modern society, and shifting discourses on the posthuman, including a critical posthumanism that decenters the privileged subject of humanism. The book argues that this historical nexus produces a specific cultural formation in the form of "biopunk", a subgenre evolved from the cyberpunk of the 1980s. Biopunk makes use of current posthumanist conceptions in order to criticize contemporary reality as already dystopian, warning that a future will only get worse, and that society needs to reverse its path, or else destroy all life on this planet.

**The Routledge Handbook of Star Trek** [Taylor & Francis](#) **The Routledge Handbook of Star Trek** offers a synoptic overview of Star Trek, its history, its influence, and the scholarly response to the franchise, as well as possibilities for further study. This volume aims to bridge the fields of science fiction and (trans)media studies, bringing together the many ways in which Star Trek franchising, fandom, storytelling, politics, history, and society have been represented. Seeking to propel further scholarly engagement, this Handbook offers new critical insights into the vast range of Star Trek texts, narrative strategies, audience responses, and theoretical themes and issues. This compilation includes both established and emerging scholars to foster a spirit of communal, trans-generational growth in the field and to present diversity to a traditional realm of science fiction studies.

**Human Nature and Politics in Utopian and Anti-Utopian Fiction** [Rowman & Littlefield](#) This book examines conceptions of human nature and how such ideas impact the political arrangements in the works of Thomas More, Edward Bellamy, Aldous Huxley, and George Orwell. By teasing out the underlying conceptions of human nature in these novels, this book links the ontology of their works directly to their political prescriptions.

**Historical Dictionary of Utopianism** [Rowman & Littlefield](#) This second edition of **Historical Dictionary of Utopianism** contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 1000 cross-referenced entries on broad conceptual entries; narrower entries about specific works; and narrower entries about specific intentional communities or movements.

**Feminism, Utopia, and Narrative** [Univ. of Tennessee Press](#) Essays from the intersection of feminist theory, literary criticism, and political philosophy trace the feminist utopian impulse in contexts as different as a medieval convent and contemporary science fiction, raising questions about the relationships between narrative and social change, utopianism and totalitarianism, and fantasy and hope.

**Annotation** copyrighted by Book News, Inc., Portland, OR **Heterotopia and Heritage Preservation** **The Heterotopic Tool as a Means of Heritage Assessment** [Springer](#) This book approaches the field of built heritage and its practices by employing the concept of heterotopia, established by the French

philosopher Michel Foucault. The fundamental understandings of heritage, its evolution and practices all reveal intrinsic heterotopic features (the mirror function, its utopic drive, and its enclave-like nature). The book draws on previous interpretations of heterotopia and argues for a reading of heritage as heterotopia, considering various heritage mechanisms - heritage selection, conservation and protection practices, and heritage as mnemonic device - in this regard. Reworking the six heterotopic principles, an analysis grid is designed and applied to various built heritage spaces (vernacular, religious architecture, urban 19th century ensembles). Guided through this theoretical itinerary, the reader will rediscover the heterotopic lens as a minor, yet promising, Foucauldian device that allows for a better understanding of heritage and its everyday practices. **Possible Worlds Theory and Contemporary Narratology** [U of Nebraska Press](#) The notion of possible worlds has played a decisive role in postclassical narratology by awakening interest in the nature of fictionality and in emphasizing the notion of world as a source of aesthetic experience in narrative texts. As a theory concerned with the opposition between the actual world that we belong to and possible worlds created by the imagination, possible worlds theory has made significant contributions to narratology. **Possible Worlds Theory and Contemporary Narratology** updates the field of possible worlds theory and postclassical narratology by developing this theoretical framework further and applying it to a range of contemporary literary narratives. This volume systematically outlines the theoretical underpinnings of the possible worlds approach, provides updated methods for analyzing fictional narrative, and profiles those methods via the analysis of a range of different texts, including contemporary fiction, digital fiction, video games, graphic novels, historical narratives, and dramatic texts. Through the variety of its contributions, including those by three originators of the subject area--Lubomír Doležal, Thomas Pavel, and Marie-Laure Ryan--**Possible Worlds Theory and Contemporary Narratology** demonstrates the vitality and versatility of one of the most vibrant strands of contemporary narrative theory. **Utopia and Utopianism in the Contemporary Chinese Context** [Texts, Ideas, Spaces Hong Kong University Press](#) **Utopia and Utopianism in the Contemporary Chinese Context: Texts, Ideas, Spaces** decisively demonstrates the extent to which utopianism has shaped political thought, cultural imaginaries, and social engagement after it was introduced into the Chinese context in the nineteenth century. In fact, pursuit of utopia has often led to action—such as the Chinese Revolution and the Umbrella Movement—and contested consequences. Covering a time span that goes from the late Qing to our days, the authors show that few ideas have been as influencing as utopia, which has compellingly shaped the imaginaries that underpin China's historical change. Utopianism contributed to the formation of the Chinese state itself—shaping the thought of key figures of the late Qing and early Republican eras such as Kang Youwei and Sun Yat-sen—and outlived the labyrinthine debates of the second half of the twentieth century, both

under Mao's rule and during the post-socialist era. Even in the current times of dystopian narratives, a period in which utopia seems to be less influential than in the past, its manifestations persistently provide lifelines against fatalism or cynicism. This collection shows how profoundly utopian ideas have nurtured both the thought of crucial figures during these historical times, the new generation of mainland Chinese and Sinophone intellectuals, and the hopes of twenty-first-century Hong Kong activists. "Wang, Leung, and Zhang's collection is a timely contribution to utopian studies built on consistent, coherent, boundary-crossing approaches. Interdisciplinary in its very sense, the essays bring intellectual history, literary studies, philosophy, and political theories together in dialogue. Of particular note are the essays that situate Hong Kong in a literary tradition that connects China, Hong Kong, and the beyond." —Mingwei Song, Wellesley College

**Utopia and Utopianism in the Contemporary Chinese Context** is an impressive intellectual undertaking. The essays are highly engaging and offer powerful, multi-faceted approaches to utopianism in contemporary Chinese thought and practice. Stimulating and informative, the book as a whole addresses the dynamic interplay between the utopian and dystopian, thereby inspiring clarity in political thought and action in the present moment." —Robin Visser, University of North Carolina at Chapel Hill

**The Cambridge Companion to Utopian Literature** [Cambridge University Press](#) Since the publication of Thomas More's genre-defining work **Utopia in 1516**, the field of utopian literature has evolved into an ever-expanding domain. This Companion presents an extensive historical survey of the development of utopianism, from the publication of *Utopia* to today's dark and despairing tendency towards dystopian pessimism, epitomised by works such as George Orwell's *Nineteen Eighty-Four* and Margaret Atwood's *The Handmaid's Tale*. Chapters address the difficult definition of the concept of utopia, and consider its relation to science fiction and other literary genres. The volume takes an innovative approach to the major themes predominating within the utopian and dystopian literary tradition, including feminism, romance and ecology, and explores in detail the vexed question of the purportedly 'western' nature of the concept of utopia. The reader is provided with a balanced overview of the evolution and current state of a long-standing, rich tradition of historical, political and literary scholarship.

**Assessment is Essential** [McGraw-Hill Humanities Social Assessment is Essential](#) offers a novel approach for educational assessment courses. Stressing a practical approach that encourages students to think critically about designing the appropriate assessment for a wide range of situations, Green provides students with tools they can use in their future classrooms.

**Dystopia A Natural History** [Oxford University Press](#) **Dystopia: A Natural History** is the first monograph devoted to the concept of dystopia. Taking the term to encompass both a literary tradition of satirical works, mostly on totalitarianism, as well as real despotisms and societies in a state of

disastrous collapse, this volume redefines the central concepts and the chronology of the genre and offers a paradigm-shifting understanding of the subject. Part One assesses the theory and prehistory of 'dystopia'. By contrast to utopia, conceived as promoting an ideal of friendship defined as 'enhanced sociability', dystopia is defined by estrangement, fear, and the proliferation of 'enemy' categories. A 'natural history' of dystopia thus concentrates upon the centrality of the passion or emotion of fear and hatred in modern despotisms. The work of Le Bon, Freud, and others is used to show how dystopian groups use such emotions. Utopia and dystopia are portrayed not as opposites, but as extremes on a spectrum of sociability, defined by a heightened form of group identity. The prehistory of the process whereby 'enemies' are demonised is explored from early conceptions of monstrosity through Christian conceptions of the devil and witchcraft, and the persecution of heresy. Part Two surveys the major dystopian moments in twentieth century despotisms, focussing in particular upon Nazi Germany, Stalinism, the Chinese Cultural Revolution, and Cambodia under Pol Pot. The concentration here is upon the political religion hypothesis as a key explanation for the chief excesses of communism in particular. Part Three examines literary dystopias. It commences well before the usual starting-point in the secondary literature, in anti-Jacobin writings of the 1790s. Two chapters address the main twentieth-century texts usually studied as representative of the genre, Aldous Huxley's *Brave New World* and George Orwell's *Nineteen Eighty-Four*. The remainder of the section examines the evolution of the genre in the second half of the twentieth century down to the present. Alternative Communities in Hispanic Literature and Culture [Cambridge Scholars Publishing](#) What are Hispanic alternative communities and how are they represented in literature, film, and popular music? This book studies the fictional representation of circles of artists and intellectuals, youth gangs, musical bands, packs of marginal urban dwellers, groups of immigrants, and other diverse associations that share the common trait of being small and subversive collectives, perhaps akin to secret societies plotting to take control of society. These groups usually exist within a larger and established community - typically, the nation-state - though maintaining with it complicated relations of rivalry, criticism, outright violence, and other forms of antagonism. Thus "alternative communities" represent the "other side" of official institutions, by constituting dystopias that condemn the status quo, or by building utopias that point to new social arrangements. In the Hispanic world - a broad, transatlantic space that includes Spain and Spanish America - alternative communities have existed since the 19th century, a time of nation-building for Spanish American countries, all the way to the 21st century, when hybrid, postnational, and cosmopolitan communities begin to appear. The seventeen chapters brought together in this volume, which constitutes the first systematic approach to Hispanic alternative communities, tackle this complex cultural phenomenon from diverse critical perspectives. Integrative and Interdisciplinary Curriculum in the Middle School Integrated Approaches in Teacher Preparation and Practice [Routledge](#) Originally published as a special issue of the Middle School Journal, this book**

presents integrative curriculum as a foundational element of the middle school. By addressing the current gap in literature on curriculum integration in the middle grades, this text explores how learning can be organized around authentic concepts or questions which cut across disciplines and speak to young adolescents. Providing a current, nuanced, and comprehensive review of what it means to embrace and implement an interdisciplinary and integrative curriculum, the volume considers how educators can create and deliver a high-quality integrative curriculum which is enjoyable, challenging, and inclusive. Examples of implementation in teacher preparation programs and middle grade classrooms showcase integrative approaches and illustrate how curricula have been key in tackling social inequities, increasing engagement with STEM, and supporting collaboration. This text will be of great interest to graduate and postgraduate students, researchers, academics and libraries in the field of Middle School Education, Curriculum Studies, Teacher Education, Theories of Learning, and STEM Education. He's lived his entire life in hiding, and now, with a new housing development replacing the woods next to his family's farm, he is no longer even allowed to go outside. Then, one day Luke sees a girl's face in the window of a house where he knows two other children already live. Finally, he's met a shadow child like himself. Fahrenheit 451 A fireman in charge of burning books meets a revolutionary school teacher who dares to read. Depicts a future world in which all printed reading material is burned. Chinese and Western Literary Influence in Liu Cixin's Three Body Trilogy [Springer Nature](#) Chinese and Western Literary Influence in Liu Cixin's Three Body Trilogy examines Liu Cixin's acclaimed trilogy, a Chinese science fiction epic whose translation is exceedingly popular in the Western world. Will Peyton argues that the ingenuity of Liu's writing is

found in its conscious engagement with translated Western fiction rather than, as one might expect, in Chinese language science fiction of the past. The book illustrates how contemporary Chinese fiction, since the economic opening of China in the late 1980s, is deeply and complexly influenced by various strains in Western literary and intellectual thought, an area that scholars of Chinese literature have tended to neglect. Providing a lucid and succinct close-reading and textual analysis of Three Body trilogy, the book also makes reference to broader ideas and themes in modern Chinese and Western intellectual history. Wandering into Brave New World [Rodopi](#) Wandering into Brave New World explores the historical contexts and contemporary sources of Aldous Huxley's 1932 novel which, seventy years after its initial publication remains the best known and most discussed dystopian work of the twentieth century. This new study addresses a number of questions which still remain open. Did his round-the-world trip in 1925-1926 provide material for the novel? Did India's caste system contribute to the novel's human levels? Is there an overarching pattern to the names of the novel/s characters? Has the role of Hollywood in the novel been underestimated? Is Lenina Crown a representative 1920s "flapper"? Did Huxley have knowledge of and sources for his Indian reservation characters and scenes quite independent of and more accurate than those of D. H. Lawrence's writings? Did Huxley's visit to Borneo contribute anything to the novel? New research allows substantive answers and even explains why Huxley linked such figures as Henry Ford and Sigmund Freud. It also shows how the novel overcomes its intense grounding in 1920s political turmoil to escape into the timelessness of dystopian fiction.
