Parentology

Everything You Wanted to Know about the Science of

Raising Children but Were Too Exhausted to Ask

<u>Simon and Schuster</u> **An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom…bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.**

The Global Smartphone

Beyond a youth technology

UCL Press **The smartphone is often literally right in front of our nose, so you would think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by older people. Their research reveals that smartphones are technology for everyone, not just for the young. The Global Smartphone presents a series of original perspectives deriving from this global and comparative research project. Smartphones have become as much a place within which we live as a device we use to provide 'perpetual opportunism', as they are always with us. The authors show how the smartphone is more than an 'app device' and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result, it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland – all alongside diverse trajectories of ageing in Al Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people's lives around the world.**

Free Culture

Lulu Press, Inc **Lawrence Lessig, "the most important thinker on intellectual property in the Internet era", masterfully argues that never before in human history has the power to control creative progress been so concentrated in the hands of the powerful few, the so-called Big Media. Never before have the cultural powers- that-be been able to exert such control over what we can and can't do with the culture around us. Our society defends free markets and free speech; why then does it permit such top-down control? To lose our long tradition of free culture, Lawrence Lessig shows us, is to lose our freedom to create, our freedom to build, and, ultimately, our freedom to imagine.**

The Dictator's Handbook

Why Bad Behavior is Almost Always Good Politics

Hachette UK **A groundbreaking new theory of the real rules of politics: leaders do whatever keeps them in power, regardless of the national interest. As featured on the viral video Rules for Rulers, which has been viewed over 3 million times. Bruce Bueno de Mesquita and Alastair Smith's canonical book on political science turned conventional wisdom on its head. They started from a single assertion: Leaders do whatever keeps them in power. They don't care about the "national interest"-or even their subjects-unless they have to. This clever and accessible book shows that democracy is essentially just a convenient fiction. Governments do not differ in kind but only in the number of essential supporters, or backs that need scratching. The size of this group determines almost everything about politics: what leaders can get away with, and the quality of life or misery under them. The picture the authors paint is not pretty. But it just may be the truth, which is a good starting point for anyone seeking to improve human governance.**

Making Open Development Inclusive

Lessons from IDRC Research

<u>MIT Press</u> **Drawing on ten years of empirical work and research, analyses of how open development has played out in practice. A decade ago, a significant trend toward openness emerged in international development. "Open development" can describe initiatives as disparate as open government, open health data, open science, open education, and open innovation. The theory was that open systems related to data, science, and innovation would enable more inclusive processes of human development. This volume, drawing on ten years of empirical work and research, analyzes how open development has played out in practice Focusing on development practices in the Global South, the contributors explore the crucial questions of who is allowed to participate when an initiative is "open" and who benefits—or not—from them, finding that processes characterized as open can sometimes be exclusionary in their implementation. Examining a wide range of cases, they consider the governance of open development ecosystems and the implementation of a variety of applications, including open educational resources, collaborative science, and the uses of crowdsourcing. Contributors Denisse Albornoz, Chris Armstrong, Savita Bailur, Roxana Barrantes, Carla Bonina, Michael Cañares, Leslie Chan, Laura Czerniewicz, Jeremy de Beer, Stefano De Sabbata, Shirin Elahi, Alison Gillwald, Mark Graham, Rebecca Hillyer, Cheryl Hodgkinson-Williams, Dick Kawooya, Erika Kramer-Mbula, Paulo Matos, Caroline Ncube, Chidi Oguamanam, Angela Okune, Alejandro Posada, Nagla Rizk, Isaac Rutenberg, Tobias Schonwetter, Fabrizio Scrollini, Ruhiya Kristine Seward, Raed Sharif, Matthew Smith, William Randall Spence, Henry Trotter, François van Schalkwyk, Sonal Zavaeri**

Born A Crime

Stories from a South African Childhood

Hachette UK **WINNER OF THE THURBER PRIZE The compelling, inspiring, (often comic) coming-of-age story of Trevor Noah, set during the twilight of apartheid and the tumultuous days of freedom that followed. One of the comedy world's brightest new voices, Trevor Noah is a light-footed but sharp-minded observer of the absurdities of politics,**

race and identity, sharing jokes and insights drawn from the wealth of experience acquired in his relatively young life. As host of the US hit show The Daily Show with Trevor Noah, he provides viewers around the globe with their nightly dose of biting satire, but here Noah turns his focus inward, giving readers a deeply personal, heartfelt and humorous look at the world that shaped him. Noah was born a crime, son of a white Swiss father and a black Xhosa mother, at a time when such a union was punishable by five years in prison. Living proof of his parents' indiscretion, Trevor was kept mostly indoors for the first years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, take him away. A collection of eighteen personal stories, Born a Crime tells the story of a mischievous young boy growing into a restless young man as he struggles to find his place in a world where he was never supposed to exist. Born a Crime is equally the story of that young man's fearless, rebellious and fervently religious mother - a woman determined to save her son from the cycle of poverty, violence and abuse that ultimately threatens her own life. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Noah illuminates his curious world with an incisive wit and an unflinching honesty. His stories weave together to form a personal portrait of an unlikely childhood in a dangerous time, as moving and unforgettable as the very best memoirs and as funny as Noah's own hilarious stand-up. Born a Crime is a must read.
