Candide

A&C Black *All the world's an Xbox and you're a player Candide is an optimist. A dreamer. He believes that everything is for the best in the best of all possible worlds. But that belief is about to be tested as Candide's comfortable life is overtaken by an endless barrage of misfortune. First published in 1759, the story traces the journey of a young man who leads a sheltered life, believing that mankind lives in the best of all possible worlds and that everything happens for the best. But Candide's happiness comes to a sharp end when he is unfairly evicted from his uncle's castle for kissing his cousin and true love, Lady Cunégonde. Cast out into the big wide world, Candide is forced to confront reality. As his world collapses around him, we are transported across the centuries to new locations and parallel universes. How will Candide's optimism fare when it collides with life in the twenty-first century?*

Candide

The best of all possible worlds

Nicolae Sfetcu *Translated and illustrated by Nicolae Sfetcu. A philosophical tale, a story of a journey that will transform the eponymous hero into a philosopher. An important debate on fatalism and the existence of Evil. For a long time Voltaire has been fiercely opposed to the ideas of the philosopher Leibniz concerning God, the "principle of sufficient reason," and his idea of "pre-established harmony." God is perfect, the world can not be, but God has created the best possible world. Evil exists punctually, but it is compensated elsewhere by an infinitely great good. Nothing happens without there being a necessary cause. An encouragement to fatalism. Voltaire opposes to this optimism that he considers smug, a lucid vision on the world and its imperfections, a confidence in the man who is able to improve his condition. In Candide, Voltaire openly attacks Leibnizian optimism and makes Pangloss a ridiculous defender of this philosophy. Criticism of optimism is the main theme of the tale: each of the adventures of the hero tends to prove that it is wrong to believe that our world is the best of all possible worlds.*

The Adventures of Roderick Random

Smollett's Collection

VM eBooks *APOLOGUE* A young painter, indulging a vein of pleasantry, sketched a kind of conversation piece, representing a bear, an owl, a monkey, and an ass; and to render it more striking, humorous, and moral, distinguished every figure by some emblem of human life. Bruin was exhibited in the garb and attitude of an old, toothless, drunken soldier; the owl perched upon the handle of a coffee-pot, with spectacle on nose, seemed to contemplate a newspaper; and the ass, ornamented with a huge tie-wig (which, however, could not conceal his long ears), sat for his picture to the monkey, who appeared with the implements of painting. This whimsical group afforded some mirth, and met with general approbation, until some mischievous wag hinted that the whole—was a lampoon upon the friends of the performer; an insinuation which was no sooner circulated than those very people who applauded it before began to be alarmed, and even to fancy themselves signified by the several figures of the piece. Among others, a worthy personage in years, who had served in the army with reputation, being incensed at the Supposed outrage, repaired to the lodging of the painter, and finding him at home, "Hark ye, Mr. Monkey," said he, "I have a good mind to convince you, that though the bear has lost his teeth, he retains his paws, and that he is not so drunk but he can perceive your impertinence." "Sblood! sir, that toothless jaw is a d—ned scandalous libel—but don't you imagine me so chopfallen as not to be able to chew the cud of resentment." Here he was interrupted by the arrival of a learned physician, who, advancing to the culprit with fury in his aspect, exclaimed, "Suppose the augmentation of the ass's ears should prove the diminution of the baboon's—nay, seek not to prevaricate, for, by the beard of Aesculapius! there is not one hair in this periwig that will not stand up in judgment to convict thee of personal abuse. Do but observe, captain, how this pitiful little fellow has copied the very curls—the colour, indeed, is different, but then the form and foretop are quite similar." While he thus remonstrated in a strain of vociferation, a venerable senator entered, and waddling up to the delinquent, "Jackanapes!" cried he, "I will now let thee see I can read something else than a newspaper, and that without the help of spectacles: here is your own note of hand, sirrah, for money, which if I had not advanced, you yourself would have resembled an owl, in not daring to show your face by day, you ungrateful slanderous knave!"

Reality Lost

Markets of Attention, Misinformation and Manipulation

Springer *This open access book looks at how a democracy can devolve into a post-factual state. The media is being flooded by populist narratives, fake news, conspiracy theories and make-believe. Misinformation is turning into a challenge for all of us, whether politicians, journalists, or citizens. In the age of information, attention is a prime asset and may be converted into money, power, and influence - sometimes at the cost of facts. The point is to obtain exposure on the air and in print media, and to generate traffic on social media platforms. With information in abundance and attention scarce, the competition is ever fiercer with truth all too often becoming the first victim. Reality Lost: Markets of Attention, Misinformation and Manipulation is an analysis by philosophers Vincent F. Hendricks and Mads Vestergaard of the nuts and bolts of the information market, the attention economy and media eco-system which may pave way to postfactual democracy. Here misleading narratives become the basis for political opinion formation, debate, and*

legislation. To curb this development and the threat it poses to democratic deliberation, political self-determination and freedom, it is necessary that we first grasp the mechanisms and structural conditions that cause it.

The Prince

Large Print

"The Prince" is a political treatise by Machiavelli that is not considered to be representative of the work published during his lifetime, but is the most remembered. The theories in this book describe methods that an aspiring prince can use to acquire the throne, or an existing prince can use to maintain his reign. These theories include defense and military, perceived reputation, generosity, cruelty

versus mercy, gaining honors, fortune and a number of other discourses. It is customary for such as seek a Prince's favour, to present themselves before him with those things of theirs which they themselves most value, or in which they perceive him chiefly to delight. Accordingly, we often see horses, armour, cloth of gold, precious stones, and the like costly gifts, offered to Princes as worthy of their greatness.

Liquid Life: On Non-Linear Materiality

If we lived in a liquid world, the concept of a "machine" would make no sense. Liquid life is metaphor and apparatus that discusses the consequences of thinking, working, and living through liquids. It is an irreducible, paradoxical, parallel, planetary-scale material condition, unevenly distributed spatially, but temporally continuous. It is what remains when logical explanations can no longer account for the experiences that we recognize as part of "being alive." Liquid life references a third-millennial understanding of matter that seeks to restore the agency of the liquid soul for an ecological era, which has been banished by reductionist, "brute" materialist discourses and mechanical models of life. Offering an alternative worldview of the living realm through a "new materialist" and "liquid" study of matter, it conjures forth examples of creatures that do not obey mechanistic concepts like predictability, efficiency, and rationality. With the advent of molecular science, an increasingly persuasive ontology of liquid technologies can be identified. Through the lens of lifelike dynamic droplets, the agency for these systems exists at the interfaces between different fields of matter/energy that respond to highly local effects, with no need for a central organizing system. Liquid Life seeks an alternative partnership between humanity and the natural world. It provokes a re-invention of the languages of the living realm to open up alternative spaces for

exploration: Rolf Hughes' "angelology" of language explores the transformative invocations of prose poetry, and Simone Ferracina's graphical notations help shape our concepts of metabolism, upcycling, and designing with fluids. A conceptual and practical toolset for thinking and designing, Liquid Life reunites us with the irreducible "soul substance" of living things, which will neither be simply "solved," nor go away. Rachel Armstrong is Professor of Experimental Architecture at Newcastle University (UK), and has also been a Rising Waters II Fellow for the Robert Rauschenberg Foundation (April-May 2016), TWOTY futurist in 2015, Fellow of the British Interplanetary Society, and a Senior TED Fellow in 2010. She is also the coordinator of the Living Architecture project, an EU-funded project that establishes the principles for our buildings to share some of the properties of living things, e.g. metabolism, operating at the intersection of architecture, building construction, bio-energy and synthetic biology. Philosophy of Globalization

Walter de Gruyter GmbH & Co KG *Not so long ago, it seemed the intellectual positions on globalization were clear, with advocates and opponents making their respective cases in decidedly contrasting terms. Recently, however, the fronts have shifted dramatically. The aim of this publication is to contribute philosophical depth to the debates on globalization conducted within various academic fields – principally by working out its normative dimensions. The interdisciplinary nature of this book's contributors also serves to scientifically ground the ethical-philosophical discourse on global responsibility. Though by no means exhaustive, the expansive scope of the works herein encompasses such other topics as the altering consciousness of space and time, and the phenomenon of globalization as a discourse, as an ideology and as a symbolic form.*

The Digital Dialectic

Unlike purely academic texts on new media, the book includes contributions by scholars, artists, and entrepreneurs, who combine theoretical investigations with hands-on analysis of the possibilities (and limitations) of new technology. The key concept is the digital dialectic: a method to ground the insights of theory in the constraints of practice. The essays*

move beyond journalistic reportage and hype into serious but accessible discussion of new technologies, new media, and new cultural forms.

As it became clear that Calas had been persecuted by 'an irrational mob' for being a Protestant, the Enlightenment philosopher Voltaire began a campaign to vindicate him and his family. God, Freud and Religion

The origins of faith, fear and fundamentalism

Routledge Choice Essential Read *Did God create man or did man create God? In this book, Dianna Kenny examines religious belief through a variety of perspectives – psychoanalytic, cognitive, neuropsychological, sociological, historical and psychiatric – to provide a coherent account of why people might believe in God. She argues that psychoanalytic theory provides a fertile and creative approach to the study of religion that attempts to integrate religious belief with our innate human nature and developmental histories that have unfolded in the context of our socialization and cultural experiences. Freud argued that religion is so compelling because it solves the problems of our existence. It explains the origin of the universe, offers solace and protection from evil, and provides a blueprint about how we should live our lives, with just rewards for the righteous and due punishments for sinners and transgressors. Science, on the other hand, offers no such explanations about the universe or the meaning of our lives and no comfort for the unanswered longings of the human race. Is religion a form of wish-fulfilment, a collective delusion to which we cling as we try to fathom our place and purpose in the drama of cosmology? Can there be morality without faith? Are science and religion radically incompatible? What are the roots of fundamentalism and terror theology? These are some of the questions addressed in *God, Freud and Religion*, a book that will be of interest to psychoanalysts, psychologists and psychotherapists, students of psychology, psychoanalysis, philosophy and theology and all those with an interest in religion and human behaviour. Dianna Kenny is Professor of Psychology at the University of Sydney, Australia. She is the author of over 200 publications, including six books.*
