---

Abrams **In this read-along picture book, a classroom full of young dinosaurs plays with toys, does art projects, and reads books. But each activity is another opportunity for the over-enthusiastic Tyrannosaurus Rex to wreak havoc. Parents and young children will love the call-and-response nature of the book, and young dinosaur fans will appreciate the listing (and pronunciation guide) for a dozen different dino species. The format is extra vertical in order to accommodate T. Rex's biggest messes. Praise for Tyrannosaurus Wrecks "Punchy writing, an equally in-your-face palette, and OHora's characteristically brash painting style make this as much a stompalong as a readaloud." --Publishers Weekly "Along with the pleasure of pronouncing those multisyllabic dino names, young audiences may find food for thought in the behavioral dynamics on display." --Kirkus Reviews "Warmly colored with childlike bodies and emotive faces, Ohora's dinosaurs are among the cutest you will come across in children's books." --Booklist "The brief rhyming text, which scans well, tells a story with child appeal. There is a good balance of two-to-three word sentences with large, uncluttered illustrations, making the book a good choice for reading aloud. In their simplicity, the brightly colored pictures have the look of children's art, but they enhance the classroom setting appropriately with interesting details." --School Library Journal "The shapely dinos, whose rough charcoal-style outlines and strong colors vividly contrast with the white or sometimes black backgrounds, are chunky and friendly in an eight-crayon-box color scheme and snazzy Peanuts-reminiscent outfits." --Bulletin of the Center for Children's Books "Together the chanting rhythm, ragged lines, and setting of an un-chaperoned dinosaur class create a satisfyingly high-energy, primal read-aloud strongly reminiscent of Bob Shea's 'Dinosaur vs.' series." --The Horn Book Magazine**

**BELLY UP; POACHED; BIG GAME**

---

[Simon & Schuster Books for Young Readers](#) Join FunJungle's resident zoo sleuth, Teddy Fitzroy, as he solves mysteries and strives to protect the animals at the zoo with the first three funny and suspenseful novels of the bestselling FunJungle series from New York Times bestselling author Stuart Gibbs, now available together in one collectible boxed set! It all starts when the hippo goes belly up—and it's a wild ride from there. When Teddy Fitzroy moved into FunJungle, the nation's largest zoo, with his scientist parents, he expected things to be kind of quiet. There'd be the occasional elephant stampede and water balloon fight with the chimpanzees, of course, but when Henry the Hippo dies from not-so-natural causes, Teddy suspects foul play. And that was just the beginning. He begins to realize that the zoo is far more exciting than he thought it was, and soon the mysteries at FunJungle are piling up... This collectible boxed set includes hardcover editions of Belly Up, Poached, and Big Game.

## **PARASITE REX**

---

---

### **INSIDE THE BIZARRE WORLD OF NATURE'S MOST DANGEROUS CREATURES**

---

Random House **Almost every animal will at some time or another become the home of a parasite. Not only are parasites the most successful life-forms on Earth, they triggered the development of sex, shape ecosystems, and have driven the engine of evolution. Zimmer describes the frightening and amazing ingenuity these commando invaders use to devour their hosts from the inside and control their behaviour. Sacculina carcini makes its home in an unlucky crab and proceeds to eat everything but what the crab needs to put food in its mouth, which Sacculina then consumes. Single-celled Toxoplasma gondi has an even more insidious role, for it can invade the human brain and cause personality changes, making its host less afraid and more prone to danger and a violent end - so that, in the carnage, it will be able to move on to another host. Finally, Zimmer concludes that humankind itself is a new kind of parasite, one that preys on the entire earth. If we are to achieve the sophistication of the parasites on display here in vivid detail, if we are to promote the flourishing of life in all its diversity as they do, we must learn the ways nature lives with itself, the laws of Parasite Rex.**

## BEAR BOTTOM

---

[Simon & Schuster Books for Young Readers](#) In the seventh novel in New York Times bestselling Stuart Gibbs's FunJungle series, Teddy Fitzroy returns as FunJungle's resident sleuth to solve the disappearances of endangered bison and an irreplaceable necklace. Teddy Fitzroy, his family, and some other FunJungle employees have been invited to visit a bison ranch just outside Yellowstone National Park that FunJungle's owner, J.J. McCracken, is considering purchasing. But as usual, trouble isn't far behind. The ranch's endangered bison have been mysteriously disappearing. Then a massive local grizzly bear named Sasquatch breaks into the house, causing chaos. In the aftermath, Kandace McCracken discovers that her exceptionally expensive sapphire necklace has vanished. Was it stolen? Or did Sasquatch eat it? (And if so, can it be recovered?) And what's been happening to the bison? With over

a dozen suspects, it's up to Teddy to detangle this hairy situation, before his family or friends—or any more expensive objects—become dinner.

### **TESTOSTERONE REX: MYTHS OF SEX, SCIENCE, AND SOCIETY**

---

*W. W. Norton & Company* “Beliefs about men and women are as old as humanity itself, but Fine’s funny, spiky book gives reason to hope that we’ve heard Testosterone rex’s last roar.” —Annie Murphy Paul, *New York Times Book Review* Many people believe that, at its core, biological sex is a fundamental force in human development. According to this false-yet-familiar story, the divisions between men and women are in nature alone and not part of culture. Drawing on evolutionary science, psychology, neuroscience, endocrinology, and philosophy, Testosterone Rex disproves this ingrained myth and calls for a more equal society based on both sexes’ full human potential.

### **QUACKENSTEIN HATCHES A FAMILY**

---

*Abrams* A spooky and kooky tale about a lonely duck and his unexpected new friend—now in an 8 x 8 trim size and paperback Told in rollicking rhyme, this picture book introduces Quackenstein, a lonely duck in his “lair” at the zoo. One day, Quack is inspired to adopt an egg from the nursery and—much like his inspiration, Dr. Frankenstein—he’s shocked by what emerges from the egg. The “monster” chases him throughout the zoo in a fast-paced and funny parody of monster movies. In the twist ending, the monster (actually an adorable platypus) and Quack resolve their differences and settle down as a not-so-spooky family.

#### **A LITTLE BIT OF DINOSAUR**

---

#### **READ ALONG OR ENHANCED EBOOK**

*Triangle Interactive, Inc.* Did you know that you have a little bit of dinosaur in you? And it's your mother's fault. She fed you that cheese sandwich, which had a calcium atom that used to be in the bones of a T-rex. This humorous story follows a calcium atom as it journeys from dry bones to your jawbone! Inspired by U.S. environmentalist Aldo Leopoldo, this story follows a little bit of dinosaur, a calcium atom, as it travels over time from a dinosaur to a child. In his 1949 classic, *A Sand County Almanac*, Leopoldo beautifully discussed how man and nature are interconnected. This amazing circle of life is illustrated with humour and a touch of empathy. Sisters Elleen Hutcheson and Darcy Pattison team up to bring Leopoldo's circle of life to kids. Hutcheson is a high school biology teacher; five of Pattison's picture books have been named NSTA Outstanding Science Trade Books. Each is shaking her finger at their mother wondering why she fed them that cheese sandwich.
