A Short Course in Intermediate Microeconomics with Calculus [Cambridge University Press](#) This second edition continues to present all the standard topics in microeconomics, with calculus, concisely, clearly and with a sense of humor.

The Economic Organization of the Household [Cambridge University Press](#) Surveying the field of the economics of the household, the second edition of this text reviews the theory of the consumer at the intermediate undergraduate level. It then applies and extends it to consumer demand and expenditures, consumption and saving, time allocation among market work, home work, and leisure, human capital emphasizing investment in education, children and health, fertility, marriage, and divorce. Influenced by Gary Becker and his associates, the models developed are used to help explain modern U.S. trends in family behavior. Topics are

discussed with the aid of geometry and a little algebra. For those with calculus, mathematical endnotes provide the models on which the text discussions are based and interesting applications beyond the scope of the text.

Environmental Economics Theory and Policy [Cambridge University Press](#) How can we design environmental policy that achieves ambitious ecological goals without burdening society with excessive costs? How can effective international agreements, for example, on global warming, be designed? This textbook discusses issues such as these in an intelligible manner for students. The book uses little mathematical analysis, relying on verbal and graphical analysis.

Global Competitive Strategy [Cambridge University Press](#) Globalization has fundamentally changed the game of business. Strategic frameworks developed for the analysis of purely domestic business necessarily fall short in the international business context. Managers and business students require alternative approaches to understand and cope with these far-reaching changes. We must learn to think globally in order to succeed. Global Competitive Strategy shows how we can do this by providing a unique set of strategic tools for international business. Such tools include the 'star analysis' that allows strategy makers to integrate geographic information with market information about the global business environment. Also introduced is the 'global value connection' that shows managers how to account for the gains from trade and the costs of trade. Aimed at MBA students taking courses in international strategy, consultants and practising managers with responsibility for strategic development, this 2007 book offers a comprehensive strategic framework for gaining competitive advantage in the global marketplace.

Behavioral Rationality and Heterogeneous Expectations in Complex Economic Systems [Cambridge University Press](#) Recognising that the economy is a complex system with boundedly rational interacting agents, applies complexity modelling to economics and finance.

Getting Started in Track and Field Athletics Advice & Ideas for Children, Parents, and Teachers [Trafford Publishing](#) Getting Started in Track and Field Athletics-advice, ideas and great stories for parents, coaches, teachers, and young athletes.

Economics The guide to the economics programme that began in September 1996 for first examinations in May 1999. Includes aims, objectives, syllabus and assessment details.
